UNIVERSITY OF VICTORIA
Supplement
To the 2011-2012 Undergraduate Calendar

This Supplement contains corrections to the 2011-2012 Undergraduate Course Calendar (obvious typographical errors excluded), as well as amendments approved by the Senate and the Board of Governors since publishing. Specific revisions are either underlined (new) or crossed-out (deleted).

Page 5 – How Much Will It Cost?

Page 14 – Counselling Services
3rd column – delete the following two sections:
International Student Counselling &

Adaned Educational Testing/Computer-Based Testing Centre

Replace with the following two new sections:
**Counselling for Indigenous Students**
Individual, couples and group counselling is available for Indigenous students through a collaboration with UVic’s Office of Indigenous Affairs. Support can address a wide variety of issues such as: strengthening of identity, processing of colonial trauma, navigating the university environment as an Indigenous learner, and regaining balance and harmony in all aspect of life.

**Counselling for International Students**
Individual, couples and group counselling is available for currently registered UVic international students on a wide variety of issues such as culture shock, communication, navigating the academic system, and returning home.

Page 29 – Adding and Dropping Courses
Add the following new paragraph following the first paragraph:
You may add “standard” courses by using online registration until the last day to add courses for each term. After the last day to add courses a request to add a course must be submitted on an Undergraduate Course Change Form to Undergraduate Records; *approval is not automatic*. An Undergraduate Course Change Form must be accompanied by a written explanation of the circumstances that prevented registration prior to the last day for adding courses and a memo from the course instructor stating that you have attended classes. Approval is determined by the dean or designee of the faculty of the program in which you are registered.

Page 29 - Letters of Permission for UVic Students to Undertake Studies Elsewhere
A student who wishes to take courses at other approved post-secondary institutions for credit towards the student’s UVic degree...
must receive prior approval in the form of a Letter of Permission from the appropriate faculty advising service. For information about other specific requirements, contact the faculty advising service.

Page 30 - Deadline for Completing the English Requirement
2nd column - removal of reference to ENGR 111 as the course is no longer offered:
Students who are NOT exempt from the English requirement must register in 1.5 units of English or ENGR 110 or 111 before completing 30 units of credit. Students who fail to complete the requirement before completing 30 units of credit must meet the requirement in the next session they attend. Students who were initially placed in LING 099 or ENGL 099 must complete the required remedial course within four terms (normally two Winter Sessions) and then must also complete the required 1.5 units of English or ENGR 110 or 111 no later than the next session after completing 30 units of credit (achieved 3rd year standing).

Page 31 – Minimum Course Load
3rd column - last sentence, change in units.
Most undergraduate scholarships, bursaries and prizes administered by the University are restricted to students enrolled in a minimum of 15 academic units in each Winter Session.

Page 32 - Accumulation of Credit
All course credits earned are recorded on the student’s academic record. Whether credit for a course applies toward a degree or diploma is determined by the regulations governing the program. In the case of a course taken more than once, the unit value will be shown on the student’s record in each instance, but units are awarded only once toward the student’s degree or diploma unless the course is designated as one that may be repeated for additional credit.

Page 34 – Assessment Techniques
3rd column – revised regulation
Assessment techniques include: assignments; essays; oral or written tests, including midterms; participation in class discussions; seminar presentations; artistic performances; professional practica; laboratory examinations; “open book” or “take home” examinations; and examinations administered by the instructor or Undergraduate Records during formal examination periods. Students may be asked to reflect critically on their own work or the work of other students; however, in all courses, instructors are responsible for the determination of grades. Instructors may not assign this responsibility, in whole or in part, to students, other than students appointed as teaching assistants or laboratory assistants under the terms of their appointments. Self-evaluation may not be used to determine a student’s grade, in whole or in part, in any course.

Page 38 – Undergraduate Grading
Revised INP grading description:
In Progress, Used only for courses designated by Senate, to be replaced with a final grade by the end of the next Winter Session except for TIED courses (identified in the Calendar). In TIED courses the INP must be replaced with a final grade by the end of the subsequent term (including Summer Session) or, where a COOP Work Term intervenes, within eight months. If a student fails to complete the second course of a TIED course sequence, then the final grade will be N.

ASPIRe has a strong focus on facilitating and being a catalyst for research collaborations within the university in these areas and with external industry, government, and academic partners regionally, nationally, and internationally. ASPIRe also serves as a focal point for the research already underway at the university in these areas. ASPIRe members are involved in numerous industry, government, and academic research projects including in: network engineering, cryptography and cryptanalysis, distributed/cloud systems, health information systems, wireless networks, the semantic web, malware analysis and classification, social networking, mobile devices and applications, etc. ASPIRe is associated with NSERC's national cyber-security focused strategic network - the Interconnected Systems Security Network (ISSNet) and UVic's recently established Entrepreneurial Engineering Masters Projects (EEMP) conducted in partnership with the Alacrity Foundation.

ASPIRe is open to and welcoming of extending its collaborations across the wider university community as the ASPIRe membership fully realize that developing solutions in these pressing domains will require active collaborative efforts between technically and non-technically focused researchers, i.e., across engineering and science, business, law, psychology, political science, economics, etc., as well as active collaborations with its industry and government partners. ASPIRe members have research project support through NSERC, CFI, BC KDF, MITACS, etc.

The ASPIRe Centre was formally established in 2011 within the Faculty of Engineering with support from the Government of the Province of British Columbia. ASPIRe focuses on advancing research and understanding with the three core inter-related domains of cyber-security, information privacy, and the underlying information systems that have become intrinsic to modern societies.

**NEW** Victoria Subatomic Physics and Accelerator Research Centre (VISPA)
Dean Karlen, BSc (U Alberta), PhD (Stanford), Director

3 The Victoria Subatomic Physics and Accelerator Research Centre (VISPA) brings together an internationally recognized group of particle and accelerator physicists who
work to understand the fundamental nature of our Universe. Group members develop new theoretical approaches, participate in leading particle physics experiments around the world, and advance the technology required to pursue this science. The group shares computing and laboratory resources, supports and manages technical staff, and ensures a high-quality graduate and post-doctoral training environment. The theoretical group has gained an excellent reputation across Canada and has close ties with the Perimeter Institute, a world leading institute in theoretical physics in Waterloo, Ontario. The experimental projects include ATLAS at CERN, at the energy frontier. T2K in Japan, a world leading neutrino experiment, and BABAR at SLAC, at the precision frontier. The University of Victoria is the lead institution on the new electron linear accelerator being built at TRIUMF, thanks to substantial funding from the Canadian Foundation for Innovation and the Province of British Columbia.
