Faculty Members and Areas of Research

Alexandrine Boudreault-Fournier, PhD (Manchester)
  Sociocultural anthropology; visual anthropology; sound; creative practices; digital media; cultural policy, Cuba, Canada

Leslie Butt, PhD (McGill)
  Sociocultural anthropology; family and migration, medical anthropology, gender and reproduction, HIV/AIDS, Indonesia; the Pacific and Southeast Asia

Melissa Gauthier, PhD (Concordia)
  Sociocultural anthropology; economic anthropology; border studies; informal and illicit economies; cross-border trade, Mexico-U.S. borderlands; Mexico, Yucatán

Lisa Gould, PhD (Washington U St Louis)
  Primate ecology, lemurs, conservation, Madagascar

Helen Kurki, PhD (Toronto)
  Biological anthropology, skeletal biology, hominin functional anatomy

Yin Lam, PhD (Stony Brook)
  Archaeology, zooarchaeology, palaeoanthropology

Quentin Mackie, PhD (Southampton)
  Archaeology, Haida Gwaii, Salish Sea, stone tools, Northwest Coast

Margo L. Matwychuk, PhD (CUNY)
  Sociocultural anthropology, political economy, feminism, Latin America (Brazil), poverty, housing and homelessness, politics of food and hunger

Erin Halstad McGuire, PhD (Glasgow)
  Archaeology, material culture, funerary rituals, gender identities, medieval North Atlantic, historical archaeology, experimental archaeology, teaching and learning in undergraduate education

Iain McKechnie, PhD (UBC)
  Coastal archaeology, historical ecology, Northwest Coast, zooarchaeology

Lisa M. Mitchell, PhD (Case Western Reserve U)
  Cultural anthropology, bodies and embodiment, reproduction, ultrasound imaging, children and youth, visual culture, Philippines, Canada

April Nowell, PhD (U Penn)
  Neanderthal, Paleolithic art and archaeology, hominin life histories

Eric A. Roth, PhD (Toronto)
  HIV/AIDS; substance use; Canada

Daromir Rudnyckyj, PhD (UC Berkeley)
  Globalization; development; religion; science and technology studies; social studies of finance; Southeast Asia

Ann B. Stahl, PhD (UC Berkeley)
  Archaeology, comparative colonialism, material cultural studies, Africa; Ghana

Brian Thom, PhD (McGill)
  Sociocultural anthropology; indigenous peoples; ethnographic mapping; place; aboriginal rights, title and governance; Coast Salish
Andrea N. Walsh, PhD (York)
Visual anthropology, visual culture & theory, contemporary
First Nations visual culture

Margot E. Wilson, PhD (Southern Methodist U)
Sociocultural anthropology; culture change, international
development, Bangladesh, women’s narratives

Degrees and Specializations Offered
The Department offers programs of study leading to a Master of
Arts (MA) and to a Doctor of Philosophy (PhD).

Facilities
The Department has large research labs devoted to archaeology,
biological anthropology, and visual anthropology. It houses an
extensive comparative faunal reference collection. Two recently
opened labs are devoted to ethnographic mapping and to the
study of sound. University resources of particular benefit to
anthropology students include: the McPherson Library, which is
the second largest research library in B.C. and the largest on
Vancouver Island; the University Computing Centre; research
centers in Addictions Research, Aging, Asia Pacific Initiatives, Bio-
Medical Research, Global Studies, Religion and Society, Youth and
Society, among others. Students interested in Northwest North
America will find relevant resources among the important
collections and holdings of the Royal British Columbia Museum
and Provincial Archives of British Columbia.

Financial Support
Well-qualified applicants are eligible for graduate awards and
fellowships. The maximum value of such awards in 2015 was
$18,000, with most ranging between $3,000 and $7,000. Students
who are eligible are expected to apply for graduate fellowships
offered by federal funding agencies (e.g., NSERC, CIHR, SSHRC). A
number of teaching assistantships are available, usually at a value
of $6,000 for eight months’ work during the fall and winter terms.
Additional teaching assistantships may be available for the
summer term.

Admission Requirements

General
The graduate program in Anthropology has been designed to
transcend traditional sub-disciplinary boundaries by focusing on
four integrative themes:
1. Inequality, Culture, Health
2. Evolution and Ecology
3. Indigenous Peoples
4. Visual Anthropology and Materiality

All applications are reviewed by the Departmental Graduate
Committee, and students are accepted into the graduate
program only if they meet admissions requirements and if there is
at least one faculty member able, interested, and available to
supervise the proposed topic of research. Prospective applicants
are encouraged to contact the faculty member(s) with whom
they wish to work.

Deadlines
January 15

Admission To MA Program
The Master of Arts degree in Anthropology is a general degree
requiring a candidate to have a broad knowledge of the subfields
of the discipline. The program introduces students to our
department’s unique thematic foci and requires them to conduct
a major, independent research project leading to a thesis.

Students are required to have passed undergraduate courses
equivalent to those comprising the Anthropology Major Program
(see University of Victoria Undergraduate Calendar). Applicants
without this equivalent may be asked to take the appropriate
courses to satisfy the Major requirements before admission into
the MA program.

In addition to the materials required by the Faculty of Graduate
Studies, applicants must submit a brief statement outlining the
intended program and field of study and a recent sample of their
scholarly work. Normally a B+ average (6.0 GPA) for the last two
years of university work is a minimum requirement for admission
to the MA program.

Admission to PhD program
The PhD program in Anthropology enables students to specialize
in one of our department’s unique thematic foci and requires
them to initiate and conduct a major, independent research
project leading to a dissertation. Applicants will normally be
required to have completed a baccalaureate and master’s (thesis
or project-based) degree in Anthropology at recognized
academic institutions. They are expected to have achieved a
minimum A- average (7.0 GPA) in their master’s program, have
strong letters of reference, present a clear statement of research
interests, and submit an example of scholarly work.

Program Requirements

Master of Arts program
MA students are required to complete a minimum of 7.5 units of
course work and a 7.5-unit thesis.

Course Requirements
The MA program requires students to take the two core courses
(1.5 units each):
ANTH 500 Seminar in Anthropological Theory
ANTH 516 Seminar in Anthropological Research Methods

and two of the following seminars (1.5 units each):
ANTH 511 Advanced Research Seminar in Inequality,
Culture, and Health.
Course Requirements

ANTH 541  Advanced Research Seminar in Indigenous Peoples in Prehistoric, Historic, and Contemporary Contexts
ANTH 551  Advanced Research Seminar in Ecology and Evolution
ANTH 571  Advanced Research Seminar in Visual Anthropology and Materiality

and 1.5 units of elective from within or outside the department with the permission of the student's supervisor. Possible electives offered by the department include, but are not limited to, other advanced research seminars, upper-level undergraduate courses, and graduate courses offered under Selected Topics, Specialized Themes, and Directed Studies.

Thesis Proposal

Students will register in ANTH 597 (Thesis Proposal Development) while preparing the thesis proposal, typically in the summer term at the end of the first year in the program. The thesis proposal and thesis are prepared under the direction of the supervisory committee. The thesis proposal must be approved by the committee before September 15th of the second year of the MA program. Once the thesis proposal has been approved, the student registers in ANTH 599 (Thesis).

Thesis

The thesis, carrying 7.5 units of credit, will entail specialized research on a topical area chosen in consultation with the student's supervisory committee. Once the thesis is judged ready to be defended by the committee, an application is made for an oral defense, in accordance with the process set by the Faculty of Graduate Studies. The supervisor will recommend an appropriate oral examiner. This member of the examining committee comes from another department or institution, normally has no input in the creation of the thesis, and, as an arms-length knowledgeable member, is given the leading role in examining the candidate. The oral examination is chaired by a faculty member from a separate department, appointed by the Dean of Graduate Studies.

Program Length

Full-time students are expected to complete the MA program in two years.

PhD Program

PhD students must complete 30 units of graduate credit, including a 20-unit dissertation. Students are required to complete four 1.5 unit graduate courses during their first two years in the program, the period of residency. The courses will include ANTH 600 (Professional Development in Anthropology), one specialized directed study (ANTH 690A, 690B, 690C, 690D, 690E or 690F), one advanced research seminar (ANTH 611, 641, 651 or 671), and one course that satisfies the Breadth of Knowledge requirement (a course in a theme other than the one in which they have chosen to specialize, or in another academic discipline). In addition, students are required to register and participate in the Graduate Colloquium in both the fall and spring semesters of their two years of residency. Depending on the coursework completed during his/her MA program, a student may be required to complete ANTH 500, the department’s MA-level method and theory course.

Students must achieve at least a B+ (6.0) in required courses and maintain a cumulative GPA of at least A- (7.0).

Summary of PhD Requirements

ANTH 600 .......................................................................................................................... 1.5
ANTH 690A, 690B, 690C, 690D, 690E or 690F ................................................................. 1.5
ANTH 611, 641, 651 or 671 ......................................................................................... 1.5
ANTH 612 (Colloquium) ............................................................................................... 1.0
Breadth of Knowledge requirement ............................................................................. 1.5
ANTH 693 Candidacy Examinations ............................................................................ 3.0
ANTH 699 Dissertation ................................................................................................ 20.0

Advancement to Candidacy

Students enroll in ANTH693 (PhD Candidacy Examinations) in preparation for candidacy. To advance to candidacy, students must successfully complete all coursework, the language requirement, the comprehensive examinations, and the dissertation proposal defense.

The PhD language requirement of proficiency in a language other than English may be met through the completion of relevant courses in the target language or through the demonstration, on the basis of a written translation exam, of competence in communication in that language.

For the comprehensive examinations, students, in consultation with their supervisory committee, will craft three important, original questions related to their research area and answer those questions in written format, drawing upon literature covered in doctoral coursework and readings.

Students must also prepare and defend a dissertation research proposal. They will give a presentation on their proposal topic and answer questions posed by the supervisory committee on the theoretical foundation, methodology, and significance of the proposed research.

Once these requirements have been fulfilled (normally by the end of the second year of full-time study), the student will have completed ANTH693 and will enroll in ANTH699 Dissertation.

Dissertation

PhD students are required to prepare, submit and defend a dissertation, which carries 20 units of credit. The dissertation is the culmination of intensive, independent and original research. Once the dissertation is judged ready to defend by the supervisory committee, an application is made for an oral defense, in accordance with the process set by the Faculty of Graduate Studies. The supervisor will recommend an appropriate external examiner. This member of the examining committee comes from another institution, normally has no input in the
creation of the dissertation, and, as an arms-length knowledgeable member, is given the leading role in examining the candidate. The oral examination is chaired by a faculty member from a separate department, appointed by the Dean of Graduate Studies.

Program Length
Full-time students are expected to complete the PhD program in 4 to 5 years.

CO-OPERATIVE EDUCATION
Participation in the Co-operative Education program – which enables students to acquire knowledge, practical skills for employment, and workplace experience – is optional for full-time graduate students. To receive the Co-op designation on their transcripts, Master’s students complete two work terms and PhD students complete three (a work term consists of four months of full-time, paid employment). Students require permission from their academic adviser and graduate adviser, as well as the Co-op coordinator, to participate in the Co-op program. Interested students should contact the Anthropology Co-op office early in their first term. Students are also referred to “General Regulations: Graduate Co-op” (page 56).

Faculty Members and Areas of Research
Allan Antliff, PhD (Delaware)
   Modern American and European art, Contemporary art, Anarchist studies
Evanthia Baboula, DPhil, (Oxford)
   Material & Visual Culture, Northeast Mediterranean
Carolyn Butler-Palmer, PhD (Pittsburgh)
   Modern & Contemporary Art of the Pacific Northwest
Erin Campbell, PhD (Toronto)
   Early Modern European Art
Catherine Harding, PhD (London)
   Late Medieval/Early Italian Renaissance art
Lianne M. McLarty, PhD (Simon Fraser)
   Feminist film theory, critical theory, popular culture
Marcus Milwright, DPhil (Oxford)
   Medieval Islamic art and archeology
Astri Wright, PhD (Cornell)
   Southeast Asian art (including textiles, ephemeral arts), modern and contemporary arts
Victoria Wyatt, PhD (Yale)
   North American Native arts and ethnohistorical photographs

Emeritus
Kathlyn Liscomb, PhD (Chicago)
   Chinese art, art theory, and art historiography
S. Anthony Welch, PhD (Harvard)
   Islamic art and architecture; Iranian painting; architecture of Muslim India
Christopher A. Thomas, PhD (Yale)
   Canadian art and architecture, modern architecture

Degrees and Specializations Offered
The Department of Art History and Visual Studies offers programs of graduate study leading to the degrees of Master of Arts and Doctor of Philosophy. The program for each student is determined by the Graduate Adviser and the appropriate
supervisor in consultation with the student, and is intended to meet the student’s specific academic needs while at the same time maintaining some breadth of exposure to a wide range of topics and methodologies.

The department also participates in the Co-operative Education Program; students who are interested in the possibility of gaining discipline-related work experience while they pursue their degree are invited to contact the department’s Graduate Adviser.

Financial Support

Financial assistance: well-qualified applicants are eligible for a University Fellowship. Several teaching or research assistantships may also be available, usually ranging from $2,700 to $7,000 for eight months’ work. There are also several awards that provide small numbers of exceptional or financially needy students with additional funds. Please contact the Graduate Adviser of the department for additional details.

ADMISSION REQUIREMENTS

General

As part of the requirements of the MA and PhD programs of the Department of Art History and Visual Studies, all applicants must submit a brief statement of the reasons for their interest in a career in art history, a CV, transcripts, two reference letters and a sample of their written art-historical research. This may be a paper, publication or, where relevant, an MA thesis.

Admission to the Master’s Program

Applicants for the MA program should have a significant academic background in the history of art, either through a Major or Honours degree in the history of art or a closely related field, or, if their degree is in some other discipline, through substantial course work in the history of art. A student who does not have sufficient course work in the history of art may be asked to complete a full year of additional course work at the senior undergraduate level before their application to the graduate program will be considered.

Admission to the PhD Program

Applicants for the PhD program should have a master’s degree in the history of art or a closely related field from a recognized university, and demonstrate that they are capable of undertaking advanced research. (This capability will be judged on the basis of a master’s thesis or other scholarly work, including publications, as well as from letters of reference from qualified referees.)

Deadlines

Complete applications must be received by the Graduate Admissions and Records Office by December 15 in order to be processed in time for the department to make its decisions in spring regarding admissions and nominations for fellowships for the next academic year. Applicants should send a transcript of their fall courses directly to the department as soon as their grades are available for those courses completed in the fall.

PROGRAM REQUIREMENTS

Except for AHVS 501/601 and AHVS 509/609, only a selection of seminars (AHVS 502-580) will be offered in any particular year. Except for AHVS 501/601 and AHVS 509/609, all seminar courses and directed studies may be taken more than once, in different topics.

Master of Arts

The MA in Art History and Visual Studies normally consists of 15 units, including a Research Paper (AHVS 598). In the first eight months (September-April), all students will complete AHVS 501: Colloquium in Theories and Practices; AHVS 509: Workshop in Art Historical Writing, both compulsory for all students, and normally four additional courses. An additional, fifth course will normally be taken in the second year (September-April).

Course Requirements

AHVS 501 (Colloquium in Theories and Practices) .............. 1.5
AHVS 509 (Workshop in Art Historical Writing) ............... 1.5
5 additional courses (1.5 units each) ......................... 7.5
AHVS 598 (Research Paper) ........................................ 4.5

Students may take up to 3 units in another department. These courses must be related to the student’s art-historical interests. All courses must be at the graduate level.

Other Requirements

Before graduation, each student will be required to demonstrate a reading knowledge of a language other than English, appropriate to the area of special interest. This requirement will normally be satisfied by completion of 3 units of 200-level language or literature courses (excluding those taught in English using translations). Also acceptable are PAAS 111, 131, GMST 405, 3 units of FRAN 160 and above or ITAL 300. For First Nations’ languages, a minimum of 4.5 units within a single language is acceptable. A grade point average of at least 4.0 (B-) is necessary. In special circumstances, students may request permission to take a translation examination administered by the department.

Program Length

Master’s degrees are normally completed in two years, doctoral degrees within 4-5 years.

PhD Program

The PhD normally consists of a minimum of 39 units, with a course work component of 6.0 units (4 courses). Those who enter the AHVS department as PhD students coming from other universities must take AHVS 601 and AHVS 609, and 2 additional courses (3.0 units) as part of their required course work. Students holding a Master’s from our department and entering the doctoral program with AHVS 501 and AHVS 509 as credits, will take AHVS 609 and 3 additional courses (4.5 units). The courses should be directly related to the student’s particular areas of art historical interest; in some cases, courses may be taken outside of the department with permission from the supervisor and
Graduate Adviser. Students must pass their courses with at least a B+ average.

There is a required 3-unit Candidacy Exam (AHVS 693), which must be passed within 3 years of registration in the program. Registration in AHVS 699, the 30.0 unit Dissertation, is only permitted upon completion of AHVS 693.

**Course Requirements**

Students accepted into the doctoral program from outside universities will take:

- AHVS 601 ................................................................. 1.5
- AHVS 609 ................................................................. 1.5
- 2 additional courses .................................................. 3.0

Students accepted into the doctoral program from within UVic, with credit for AHVS 501 and AHVS 509, will take:

- AHVS 609 ................................................................. 1.5
- 3 additional courses .................................................. 4.5

All students will take:

- AHVS 693 (Candidacy Exam) ............................... 3.0
- AHVS699 Dissertation ........................................... 30.0

AHVS 693 must be passed within 3 years of registration in the program. Once students complete their slate of courses, they are required to register in AHVS 693. Readings for the comprehensive examinations will be broader than the course work and will be determined by the student and his/her advisers. A student may repeat comprehensive examinations only once.

The Candidacy Examination in Art History and Visual Studies consists of three parts:

- The Major Field Examination (referred to as “Comprehensive Exam or Exams”), with two sub-topics being prepared (written)
- The Secondary Field Examination (referred to as “Comprehensive Exam or Exams”), with two sub-topics being prepared (written)
- The Special Topics (dissertation proposal) Examination, in which the student presents the most recent version of their proposed dissertation topic in written form (details below), plus a detailed timeline on how the research will progress, with information on potential research trips, plans to acquire additional training, conference presentations/plans for research dissemination, and stages of writing, in advance of an oral examination with the dissertation committee (written + oral).

Registration in AHVS699 is only permitted upon completion of AHVS 693.

**Other Requirements**

PhD candidates will be required to demonstrate a good reading knowledge of at least two languages other than English which are appropriate to their area of study. In addition, they will be required to demonstrate a working knowledge of any additional languages which may be deemed by their supervisory committee to be essential for the successful completion of the dissertation. Substantial fieldwork is expected of all PhD candidates.

**Oral Examination**

The oral examination for the dissertation may not take place until all language requirements have been satisfied.

**Program Length**

A student normally should expect to spend at least two years of academic work to obtain a master’s degree and at least 3 years to obtain a PhD. A minimum of 5 full fee installments is required for a Master’s degree and 7 full fee installments are required for a PhD. All requirements for a master’s degree must be completed within five years (60 months) of the date of first registration. All requirements for a PhD degree must be completed within seven years (84 months) of the date of first registration.

**CO-OPERATIVE EDUCATION**

Participation in the Co-operative Education program - which enables students to acquire knowledge, practical skills for employment, and workplace experience - is optional for Master’s and PhD students. Master’s students complete two work terms, and PhD students complete three (a work term consists of four months of full-time, paid employment), and students undertake study and work terms in alternating sessions. Interested students should contact the Humanities, Fine Arts, and Professional Writing Co-op office early in the term in which they are applying. Students are also referred to “General Regulations: Graduate Co-op” (page 56).

**Biochemistry and Microbiology**

**GENERAL INFORMATION**

The Department of Biochemistry and Microbiology offers students the opportunity to receive research training in a broad range of life science disciplines at the cellular, sub-cellular and molecular levels. Students have access to the facilities and faculty expertise necessary to allow them to use modern techniques such as genomics, proteomics, bioinformatics, X-ray crystallography, cell culture and microscopy in their research. Teaching assistantships in the undergraduate laboratory program give graduate students experience in teaching and mentoring. Student seminar programs at the MSc and PhD levels, the grant-style research proposal required for the PhD program and an annual research day give our graduate students the opportunity to acquire and polish their scientific presentation skills.

Further information on our graduate program is available on the departmental website.

**Contact Information**

Department of Biochemistry and Microbiology
Faculty Members and Areas of Research

Leigh Anderson, PhD (Cambridge)
Human plasma proteomics; protein biomarkers of disease and development of clinical diagnostics; quantitative mass spectrometry methods applicable to peptides; theory of biomarkers.

Juan Ausiò, PhD (Barcelona)
Biophysical and biochemical studies of DNA-protein interactions involved in chromatin assembly and transcription; chromatin remodeling during spermatogenesis and chromatin determinants of Rett syndrome and prostate cancer.

Alisdair Boraston, PhD (British Columbia)
Fundamental aspects of protein-carbohydrate recognition; structures and functions of carbohydrate-binding molecules; roles of carbohydrate-binding proteins in microbial pathogenesis.

Christoph Borchers, PhD (Konstanz)
The application of mass spectrometry, proteomics, photoaffinity labelling and molecular modelling to determine structure-function relationships in proteins.

Martin Boulanger, PhD (British Columbia)
Structural basis of host-pathogen and vector-pathogen interactions; structure-guided design of small molecule therapeutics and vaccines.

John E. Burke, PhD (California, San Diego)
Structural and dynamic studies investigating the regulation of lipid signalling enzymes and their role in human disease.

Robert D. Burke, PhD (Alberta)
Cellular and developmental biology, cell signalling in early development, neural development, integrin signalling.

Caroline Cameron, PhD (Victoria)
Bioinformatic, genomic and proteomic approaches to studying the pathogenic mechanisms of spirochetes.

Stephen Evans, PhD (British Columbia)
Antibody recognition of carbohydrate antigens; structural basis for protein-carbohydrate mimicry; glycosyltransferases; protein crystallography; scientific visualizations of macromolecules.

Caren C. Helbing, PhD (Western Ontario)
Molecular mechanisms of hormone signalling in vertebrates; amphibian metamorphosis; molecular biomarkers of environmental contaminants in wildlife.

Perry L. Howard, PhD (Toronto)
RNA processing in stem cells, Regulation of Pax6 by miRNA, and rewiring of tyrosine pathway in cancer.

Julian J. Lum, PhD (Ottawa)
Immunometabolism; understand the metabolic roles of autophagy in cancer and T cell survival, development of immune-based treatment combinations with radiation (ovary, breast, prostate, rectal).

Francis E. Nano, PhD (Illinois)
The goal of our research is to develop genome engineering tools for generating temperature-sensitive (TS) microbial strains. One application is developing attenuated pathogens that can be used as live vaccine strains. We use directed evolution of native essential genes of mesophiles to change them to produce a TS product with a defined and non-reverting property. We also engineer genetic circuits that use a TS repressor protein to control a lethal gene in a mesophile.

Christopher Nelson, PhD (British Columbia)
Brad Nelson, PhD (California, Berkeley)
Cancer immunology; the development of immune-based diagnostics and therapeutics for cancer (breast, ovary, prostate and lymphoma); molecular pathology of cancer; signal transduction and cell cycle control by cytokine receptors in lymphocytes.

Monica Palcic, PhD (Alberta)
Structure, function and mechanisms of enzymes in glycome assembly and degradation, glycosyltransferases, glycosidases.

Michael Przybylski, PhD (Mainz)
Application of mass spectrometry and peptide biochemistry to structure and mechanisms of neurodegenerative proteins; pathophysiological protein modification; vaccine chemistry; structure and epitope analysis of therapeutic antibodies; affinity-mass spectrometry of biopolymer interaction epitopes; mass spectrometric elucidation of oligomerisation/truncation pathways and structures of “misfolding”/aggregating proteins in neurodegenerative diseases.

Paul J. Romaniuk, PhD (McMaster)
Enzymology of novel DNA and RNA polymerases; mechanisms and applications of isothermal amplification; development of point of care diagnostic tests for low resource settings.

Andrew Ross, PhD (British Columbia)
Application of mass spectrometry and associated techniques to marine biogeochemistry and proteomics, including the identification of metal-binding compounds and modified proteins involved in stress, disease, and the biological uptake of essential trace elements.

Christopher Upton, PhD (London)

Peter Watson, MB BChir (Cambridge)
Identification of the molecular genetic alterations underlying the development and progression of breast cancer.

John Webb, PhD (British Columbia)
Various aspects of cellular immunity, particularly (CD4 and CD8) immune responses against peptide epitopes containing the post-translational modification 3-nitrotyrosine and the role these responses play in infection, autoimmunity and cancer. Therapeutic vaccine development for cervical dysplasia and cervical cancer.

Degrees and Specializations Offered
The Department of Biochemistry and Microbiology offers courses leading to the degrees of Master of Science and Doctor of Philosophy in Biochemistry or Microbiology.

Facilities
- $13 million in research instrumentation
- In-house Technical Support Services
- Aquatics Facility (fresh and salt)
- University of Victoria/Genome B.C. Proteomics Facility <www.proteincentre.com>
- Imaging Facility (confocal, EM)
- Flow Cytometry
- Monoclonal Antibody Facility
- X-ray crystallography
- Bioinformatics
- DNA sequencing

Financial Support
$18,000 per annum minimum from a combination of TA-ships, internal and external scholarships and supervisor’s research grants.

Admission Requirements

General
Applicants whose native language is not English should submit results of the TOEFL (Test of English as a Foreign Language) or alternative proof of English competency (See “English Language Proficiency”, page 30) with their application. The departmental minimum score requirement for TOEFL is 100 for internet based. The Department’s Graduate Committee will screen applications that meet the requirements of the Faculty of Graduate Studies. Applicants without sufficient background in biochemistry and/or microbiology may be refused admission, or may be required to take additional undergraduate courses in these disciplines as part of their graduate degree program. Final entry into the program requires a financial and supervisory commitment from an individual faculty member.

Admission to the Master’s Program
Entrance into an MSc program requires, at a minimum, completion of an undergraduate degree with sufficient background for graduate studies in Biochemistry and Microbiology.

Admission to the PhD Program
Entry into the PhD program requires either an MSc in a cognate discipline from a recognized university, or formal transfer from the department’s MSc program. Transfer requires successful completion of all graduate courses and of the candidacy exam (see below).

Deadlines
Though there is no deadline for admission, applications must be complete (receipt of transcripts, letters of reference and TOEFL
scores if required) at least a month in advance of the start date (terms start the beginning of September for Fall term, January for Spring, or under special circumstances, May for Summer) in order for the admission decision to be made. Only applications received by February 15 are guaranteed to be considered for University of Victoria Fellowships.

**PROGRAM REQUIREMENTS**

**Thesis-based Master’s**

Note: The department does not offer a Project-based Master’s degree.

**Course Requirements**

In addition to the following requirements, the general regulations governing the granting of advanced degrees, as stated in this calendar, are applicable.

Candidates for the MSc degree are required to successfully complete a minimum of 3 units of graduate level courses, approved by the student’s supervisory committee. Normally students are required to take BCMB 500 as part of this 3 unit requirement. Students may be required to take additional graduate level courses at the discretion of the supervisory committee.

Students must complete BCMB 580. Successful completion of the course requires that students present their own 580 seminar and receive a favourable assessment, and that they attend and participate in seminars given by other graduate students and senior scientists. Further information on the assessment of student performance for the BCMB 580 seminar can be found within the graduate handbook located at <www.uvic.ca/science/biochem/graduate>.

Students must register for BIOC 599 or MICR 599 (thesis).

**Other Requirements**

Students must be continuously registered full-time in three terms per year in the graduate program. No part-time graduate programs are offered.

Attendance at departmental research seminars, given by scientists inside and outside the University, is mandatory.

Students are normally required to undertake a teaching assistantship, or equivalent duties, within the department for at least three terms over a two-year period.

**Thesis**

All students must have a supervisory committee consisting of the supervisor and a minimum of two other faculty members, one from the department and one from a related academic discipline.

Students are normally expected to publish the results of their research in refereed scientific journals and/or present them at conferences.

**Oral Examination**

The final, written thesis will be evaluated by an examining committee including an examiner, external to the department, chosen by the Graduate Committee in consultation with the student’s supervisor. The thesis must be publicly presented and defended in an oral exam.

**Program Length**

Normally two to three years.

**PhD Program**

**Course Requirements**

Candidates for the PhD degree are required to complete successfully a minimum of 3 units of graduate level courses approved by the student’s supervisory committee. Students are normally required to take BCMB 500 as part of this 3 unit requirement. Students who enter with a Master’s degree may be given credit for up to 3 units of previous graduate level work. Additional graduate level courses may be required at the discretion of the supervisory committee.

Students must complete BCMB 580 and BCMB 680, which require that students present their own 580 and 680 seminars and receive favourable assessments, and that they attend and participate in seminars given by other graduate students and senior scientists. Further information on the assessment of student performance for the BCMB 580/680 seminars can be found within the graduate handbook located at <www.uvic.ca/science/biochem/graduate>. The BCMB 580 and BCMB 680 seminars must be on the student’s own research. Students must register for BIOC 699 or MICR 699 (thesis).

**Candidacy**

Students entering the PhD program with a Master’s degree must complete the candidacy exam within 18 months, while students transferring from the MSc to the PhD program must complete the exam within 24 months. Students must register in BCMB 693 upon provisional transfer to the PhD program and must remain registered until the candidacy requirements are complete.

The candidacy examination is an oral defense of a grant-style proposal written on the student’s research project. Students must pass both the oral and written components.

**Other Requirements**

Students must be continuously registered full-time in three terms per year in the graduate program. No part-time graduate programs are offered.

Attendance at departmental research seminars, given by scientists inside and outside the University, is mandatory.

Students normally undertake a teaching assistantship within the department.
**Dissertation**

Students must have a supervisory committee consisting of their supervisor, a minimum of two other faculty members and an external faculty member from a related academic discipline. Students are expected to publish the results of their research in refereed scientific journals and present them at conferences.

**Oral Examination**

The final, written thesis will be evaluated by the supervisory committee and an external examiner (from outside the University) chosen by the Graduate Committee in consultation with the supervisor and approved by the Faculty of Graduate Studies. The thesis must be publicly presented and defended in an oral exam.

**Program Length**

Normally three to five years.

---

**Biology**

**GENERAL INFORMATION**

The Department of Biology has three core research areas in Molecular Biology, Organismal Biology, and Ecology and Evolution. Cross-disciplinary research among these areas occur in five main research themes: Marine Science, Neurobiology, Biomedical Research and Genomics, Forest Biology, and Environmental Biology.

Additional information can be found on the web at <www.uvic.ca/science/biology/>.

**Contact Information**

Department of Biology

Location: Cunningham Building, Room 202

Mailing Address:

University of Victoria

PO Box 1700, STN CSC

Victoria, BC V8W 2Y2

Canada

**Faculty Members and Areas of Research**

Geraldine A. Allen, PhD (Oregon State)

- Plant evolution; flowering plant diversity, phylogeny and phylogeography; conservation biology

Bradley R. Anholt, PhD (Brit Col)

- Population and community ecology; evolutionary ecology of antipredator defenses; evolution of sex ratio variation

Gautam B. Awatramani, PhD (SUNY Buffalo)

- Synaptic physiology, Two-photon imaging, retinal circuitry

Julia K. Baum, PhD (Dalhousie)

- Population and community ecology; role of predators, trophic control in the ocean; marine conservation

Craig E. Brown, PhD (Calgary)

- Neuroscience, stroke, diabetes, synaptic plasticity, somatosensory cortex, functional brain imaging

Brian R. Christie, PhD (Otago, New Zealand)

- Neuroscience; learning and memory processes; neuroanatomy; neurophysiology; synaptic plasticity; animal behaviour; electrophysiology; neurogenesis; developmental disorders (i.e. Fetal Alcohol Syndrome, Fragile X Syndrome); Age related disorders (i.e. Alzheimer’s Disease, Huntington’s Disease)

Robert L. Chow, PhD (New York)

- Molecular and developmental genetics of the eye, gene-targeting and transgenic models of ocular disease, retinal circuitry, microRNA regulation

Francis Y.M. Choy, PhD (North Dakota)

- Molecular biology, human molecular and biochemical genetics, molecular evolution of the glucocerebrosidase gene among human and non-human primates, and implications in Gaucher disease

C. Peter Constabel, PhD (Montreal)

- Plant molecular biology, secondary plant metabolism, plant-insect interactions, chemical ecology

Kerry R. Delaney, PhD (Princeton)

- Neurophysiology, synaptic physiology, calcium imaging and dendritic processing; Rett Syndrome

John F. Dower, PhD (Victoria)

- Biological oceanography and marine biology, zooplankton and larval fish ecology
Juergen Ehlting, PhD (Max Planck Cologne)
Functional genomics, molecular evolution, and biochemistry of plant natural products

Rana El-Sabaawi, PhD (Victoria)
Food web ecology, physiological ecology, streams and river ecology, estuarine and coastal systems, eco-evolutionary dynamics, ecosystem processes

Patrick T. Gregory, PhD (Manitoba)
Population ecology, herpetology

Barbara J. Hawkins, PhD (Canterbury)
Conifer seedling physiology; mineral nutrition, cold tolerance

William E. Hintz, PhD (Toronto)
Molecular genetics and characterization of pathogenicity determinants of phytopathogenic fungi

Francis Juanes, PhD (Stony Brook)
Fisheries ecology, conservation genetics, underwater soundscapes and sound production in fishes, salmon life history and recruitment

S. Kim Juniper, PhD (Canterbury)
Ecology of marine microorganisms; marine benthic ecology; biogeochemistry, ecology of deep-sea hydrothermal vents

Ben F. Koop, PhD (Wayne State)
Molecular biology; evolution, fish genomics, immunology

Terri Lacourse, PhD (Simon Fraser)
Paleoecology; palynology; Earth systems ecology

Asit Mazumder, PhD (Waterloo)
Water and watershed ecology; environmental management of drinking water, nutrient-foodweb ecology of Atlantic and Pacific salmon, fate and transfer of chemicals in aquatic foodwebs

Patrick C. Nahirney, PhD (Brit Col)
Developmental muscle biology, synaptic plasticity in the brain, live cell imaging, electron microscopy

Raad Nashmi, PhD (Toronto)
Neurobiology, synaptic transmission, nicotinic receptors, nicotine addiction

Louise R. Page, PhD (Victoria)
Development, evolution, and neurobiology of marine invertebrates

Steve J. Perlman, PhD (Arizona)
Evolutionary ecology; Host-parasite evolution and ecology; Symbiosis; Entomology

Thomas E. Reimchen, DPhil (Liverpool)
Evolutionary and ecological factors responsible for intraspecific variability of genetic and phenotypic traits in animal populations; nutrient cycling between marine habitats and coastal forests

Réal Roy, PhD (McGill)
Microbial ecology, bacterial nitrogen and carbon cycling in soil/sediment, atmospheric trace gases metabolism

Leigh Anne Swayne, PhD (Calgary)
Neuroscience, Cellular and Molecular Neurobiology, Bioelectric control of neurogenesis, Electrophysiology, Neural protein biochemistry and protein-protein interactions

John S. Taylor, PhD (Simon Fraser)
Molecular evolution focusing on the consequences of gene and genome duplication in vertebrate and invertebrate model organisms

Verena J. Tunnicliffe, PhD (Yale)
Marine benthic ecology and community structure

Diana E. Varela, PhD (Brit Col)
Marine phytoplankton ecology and physiology; nutrient cycling

Patrick von Aderkas, PhD (Manchester)
Conifer reproduction

**Degrees and Specializations Offered**

MSc and PhD in Biology in the areas of ecology and evolutionary biology, physiology, and cell and molecular biology. Specializations include: Biomedical Research and Comparative Genomics, Environmental Biology, Forest Biology, Marine Sciences, Neurobiology.

**Facilities**

Facilities include a herbarium, greenhouses, an aquatic facility with both fresh and seawater systems, animal care facilities, and an electronic microscope with both scanning and transmission electron microscopes and a confocal microscope. The marine service vessel JOHN STRICKLAND is available for oceanographic work. In addition, individual labs are fully equipped for a variety of molecular, physiological, and environmental research.

**Financial Support**

All students accepted into the program are guaranteed a minimum stipend made up of a combination of scholarship, fellowship, Teaching Assistantship, and support payments from individual research grants. For this reason, students are accepted into individual laboratories as well as by the department.

All graduate students are financially supported to undertake full-time graduate studies in the Department of Biology. MSc students are guaranteed a minimum of $18,000 p.a. for two years and PhD
students $18,000 p.a. for three years. This funding is made up of a variety of sources. (1) National or Provincial awards are available to those with a first-class grade point average (minimum 7.0 but in practice much higher) in the last two years of undergraduate studies. Eligibility criteria vary with agency. Currently national fellowship holders receive an additional award from the university. (2) A limited number of University of Victoria Graduate Fellowships are available to applicants with a GPA over 7.5 (A). (3) There are a limited number of awards specifically for Biology graduate students outlined in the awards section of the Calendar. Application and/or nomination for the University of Victoria awards and fellowships may only be done once the student has been admitted to the department. (4) Students can also obtain some financial support for their studies as a Graduate Teaching Assistant. These appointments are made by the Department of Biology for qualified students to work up to 2/5 time as a laboratory instructor. Normally students are also appointed as a research assistant by their faculty supervisor to meet the minimum level of support guaranteed by the department. Funding is still available in additional years of the program but the minimum is no longer enforced.

**ADMISSION REQUIREMENTS**

**General**

Initial inquiries should be made to individual faculty or the Graduate Adviser, Department of Biology. Links to the application forms can be found on the departmental website.

Applicants whose native language is not English must write the TOEFL (Test of English as a Foreign Language) and submit the scores to the Graduate Admissions and Records Office together with their application forms (“English Language Proficiency”, page 30). Even with passing TOEFL scores, students may be required to take English language courses as well as their other course work.

All MSc and PhD candidates admitted to the Department of Biology are expected to have or to make up a background knowledge of basic biology of at least equivalent to that of a BSc student graduating from this department.

Applications from students with a first class academic record will be considered for recommendation at any time. Applicants with a GPA of less than 6.5 (B+/A-) or its equivalent in their last two years of work will not normally be recommended for admission by the Department of Biology.

In addition to the documentation required by the Faculty of Graduate Studies (See "Faculty Admissions", page 29), the Department of Biology also requires a Letter of Intent outlining the applicant’s research interest and relevant experience.

**Admission to the MSc Program**

Admission requires a bachelor’s degree, preferably in Biology or Biochemistry, with a minimum overall average of 6.5 on the University of Victoria 9-point scale.

**Admission to the PhD Program**

Admission to the PhD program will normally require an MSc in Biology or Biochemistry, with a GPA of A- or 7.0 on the University of Victoria 9-point scale.

**Deadlines**

Students wishing to be considered for a University of Victoria Fellowship must submit their complete application by February 15 for admission in September of the same calendar year. Admission is possible for May 1, September 1, or January 1, but complete applications must arrive three months before the expected entry date into the program for Canadian applications. Because of visa requirements international students should complete the application process at least six months in advance.

**PROGRAM REQUIREMENTS**

Students entering with a BSc and intending to take a PhD program will initially be registered in a MSc program. They may be transferred to a PhD program at the end of their first year, on the recommendation of their supervisory committee and the Department of Biology and approval by the Dean of Graduate Studies.

**MSc - Thesis Option**

The MSc is a full-time research degree with thesis and with some additional required course work.

**Course Requirements**

<table>

<tr>
<td>Thesis (BIOL 599)</td>
<td>12.0</td>
<td></td>
</tr>
</tbody>
</table>

All students are to register in BIOL 560. Students should consult the department concerning which courses will be offered in any given year. Admission to any graduate courses requires permission of the instructor.

Students must consult with their supervisor and supervisory committee on the required course work. Graduate students may be asked to complete senior undergraduate courses with additional advanced assignments for part of the course requirements.

**Forest Biology Courses**

Graduate students in Forest Biology must register in FORB 560 (1.5 units) in addition to BIOL 560.

**Thesis**

The topic and scope of the thesis research is agreed by the supervisory committee. The written thesis must meet the formatting standards of the university and the research standards of the wider scientific community.

**Oral Examination**

The thesis must be defended in an oral examination in front of the supervisory committee and an external examiner from outside
the candidate’s home department to ensure that the research and the thesis meet the required standard.

**Program Length**

The MSc is primarily a program of full-time independent research. Students can expect to take a minimum of two years to complete the program.

**PhD Program**

The PhD program is a full-time program of independent and original research culminating in a dissertation which is defended in an oral examination. Students must complete a candidacy examination in their general research area within 2 years of entering the program, and some additional required coursework.

**Course Requirements**

All PhD students must register in BIOL 560 and BIOL 693. Students should consult the department for other courses that will be offered in any given year. Admission to any graduate course requires permission of the instructor.

Students must consult with their supervisor and supervisory committee on the required course work. Graduate students may be asked to complete senior undergraduate courses with additional advanced assignments for part of the course requirements.

PhD students must complete 4.5 units (three one-term courses) plus BIOL 560 and BIOL 693 during the course of their PhD.

**Comprehensive Exams**

The comprehensive requirement must be satisfied within two years of registration in the doctoral program (see "Program Requirements - Doctoral Degrees", page 36).

**Candidacy**

The candidacy examination requires a candidacy paper on a topic agreed with the supervisory committee. If the paper is acceptable to the committee, the oral examination can proceed. Topics for the oral examination are based in part on the paper and other areas agreed by the committee at the time of setting the topic of the candidacy paper.

The candidacy examination must be held within 21 months of a student entering the PhD program. Students transferring from the MSc to the PhD program must complete the exam within 18 months from their entry into the PhD.

Students enroll in BIOL 693 (PhD Candidacy Examination) upon registering in the PhD program (or upon switching to the PhD program from the MSc program) and remain enrolled until all candidacy requirements are complete.

**Other Requirements**

All PhD students must give a departmental seminar on their research prior to completing the program.

**Dissertation**

The topic and scope of the dissertation research is agreed by the supervisory committee. The written dissertation must conform to the standards of the university and the research standards of the wider scientific community.

**Oral Examination**

The dissertation must be defended in an oral examination in front of the supervisory committee and an external examiner from outside of the university to ensure that the research and the dissertation meets the required standards.

**Program Length**

The PhD is a full-time research degree that normally takes four years to complete.

**Specialization in Forest Biology**

Graduate courses in Forest Biology (FORB) are offered. Graduate students in Forest Biology must register in FORB 560 in addition to BIOL 560.

**Co-operative Education**

Participation in the Co-operative Education program – which enables students to acquire knowledge, practical skills for employment, and workplace experience – is optional for Master’s and PhD students. Master’s students complete two work terms and PhD students complete three (a work term consists of four months of full-time, paid employment). Students require permission from their academic adviser and graduate adviser, as well as the Co-op coordinator, to participate in the Co-op program. Interested students should contact the Biology Co-op office early in their first term. Students are also referred to "General Regulations: Graduate Co-op", page 56.

**Business**

**General Information**

The Sardul S. Gill Graduate School, part of the Peter B. Gustavson School of Business, provides a dynamic and unique learning environment that develops principled managers and leaders who can drive innovation and social change. The faculty delivers innovative graduate programs that are designed to cross functional areas and provide an international perspective. The Gill Graduate School of Business specializes in Entrepreneurship, Service Management, and International Business and offers a variety of programs at the graduate certificate, graduate diploma, master, and PhD levels.

The MBA Program is designed to prepare students for business success in the global business environment. Students learn to think critically, use leading edge business knowledge and build a professional business network. Our commitment to sustainability and international business underpins our program.

The Master of Global Business (MGB) is a sixteen-month graduate degree that can be completed within twelve months, designed
specifically for the student who holds an undergraduate degree in Business Administration or Commerce and wishes to specialize in International Business.

The MGB program is primarily located at the University of Victoria campus in Victoria, BC. Program components are also delivered by Gill Graduate School of Business faculty at partner institutions in Asia, Europe, South America and the Middle East and North Africa (MENA) region. Students are normally expected to complete the program within one year (September to August, or January to December). The program aims to provide the opportunity for British Columbian and other BCom graduates to specialize in international business at a graduate level, to offer a rigorous learning experience combined with cultural experience and training that is richer than any other offered in Canada, and to build on and use the considerable international expertise and contacts within the school.

The Graduate Certificate in Entrepreneurship (GCE) and Graduate Diploma in Entrepreneurship (GDE) programs are designed to help learners develop an entrepreneurial mindset and master the concepts involved in identifying and realizing opportunities to create new value, either through new venture creation or new product development.

The GCE and GDE programs will appeal to: 1) recent graduates who have an innovative new product concept or would like to work on one; 2) working professionals who are seeking to start a new venture or create new value within an existing organization; or 3) professionals who support and provide services to entrepreneurs and seek to better understand the process of entrepreneurship and the needs of entrepreneurs.

The PhD in International Management & Organization is a challenging and stimulating program designed to develop an individual’s competence in research as well as in teaching to prepare candidates for a productive academic career. The program places an emphasis on international business; it offers opportunities for international fellowships and pragmatic internships to apply and observe concepts of study. Candidates are trained in management theory and methodology to create insights that are publishable in the world’s top academic management journals.

Gill Graduate School faculty are recognized worldwide for their research and teaching excellence.

Practical knowledge to distinguish themselves in the business sector. Students will gain a comprehensive understanding of the functional business disciplines underpinned by an in-depth understanding of international business and sustainability.

**MGB Degree**

The Master of Global Business Program has been designed as a rigorous program combining the fundamentals of International business and the experience of learning, living and working in the global environment. Learning outcomes have been carefully determined and by program finish, students are expected to possess: a “global mindset” that facilitates decision making and increases effectiveness in leading change in international contexts; an ability to deal with the challenges of international business; an understanding of the comparative socio-economic environments of North America, Asia, South America, Europe, and the Middle East and North Africa (MENA) region; a high level of cultural awareness and empathy; and foreign language proficiency.

**Graduate Certificate and Diploma**

The Graduate Certificate in Entrepreneurship (GCE) program focuses on the key theories, concepts, thinking and behaviours needed to be a successful entrepreneur. Delivered at the University of Victoria, the 6.0 credit certificate will help students work through the entrepreneurial process from idea generation to start-up planning. On completion of the certificate, learners will have written a viable business plan, will possess a better understanding of their own willingness to venture and will master key skills needed to be successful in their venture.

The Graduate Diploma in Entrepreneurship (GDE) builds on this classroom learning by providing an additional 3.0 unit directed entrepreneurial practicum and expertise development seminar, where learners implement their business concept (or help grow an existing organization) and develop venture specific expertise via directed study. On completion of the diploma, learners will have gained experience, additional skills and knowledge needed to be successful in their venture.

**PhD Degree**

The Doctor of Philosophy (PhD) Program in International Management & Organization emphasizes International Business, but allows room for significant content specific course work to enable students to attain a minor in the traditional business domains (i.e. Strategy or Organizational Theory, etc.) of particular interest to students and supervisors.

**Facilities**

The Sardul S. Gill Graduate School is located in the Business and Economics (BEC) Building which is the hub of the Gustavson School of Business’ activity. Its main and lower floors house the student services offices, faculty offices and the Business Co-op and Career center. For MBA students, BEC houses exclusive facilities, such as a bistro-style lounge, wireless computer lab and business boardrooms. The MBA classroom features state-of-the-art technology complete with wireless access. MGB students will
have dedicated study space available to them during their time on campus at UVic. PhD students have prime office space within BEC to conduct their studies.

Other resources housed in BEC include a full-service computer lab. All students have access to a large number of major business and economics online journals available through the UVic MacPherson library and the interlibrary loans service.

Financial Support

Entrance Scholarships

All accepted students are automatically considered for any scholarships awarded through the Gill Graduate School of Business.

MBA Scholarships are awarded to selected incoming students based on work experience and prior academic performance. The awards range from C$1,000 to C$9,000.

MGB Scholarships will be made available to incoming students also based on their prior academic performance. The awards range from C$5,000 to C$10,000.

For PhD students, entrance scholarships are available from the Gill Graduate School and the Faculty of Graduate Studies. Amounts vary. The Faculty of Graduate Studies provides a list of available awards and necessary applications online at <web.uvic.ca/gradstudies/fund> and through their office in the University Centre.

Research and Teaching Assistants

Some professors hire graduate students as research, teaching and marking assistants. Students can apply for these positions once they are admitted to their program. PhD students should coordinate with the PhD Program Office.

Scholarships

All students are eligible to apply for UVic Graduate Studies fellowships and scholarships. Eligible PhD students are also strongly encouraged to apply for grants through national granting agencies such as Canada’s Social Sciences and Humanities Research Council at <www.sshrc.ca>.

Student Loans

Other financial assistance is available in the form of national and provincial student loans, for those who qualify. For more information, please phone the UVic Student Financial Aid Office: 250-721-8423; fax: 250-721-8757.

Bursaries

Bursaries are non-repayable monetary awards based on financial need and reasonable academic standing. Students can apply for these through the Student Awards and Financial Aid Office at <www.uvic.ca/registrar/safa>.

Awards

MBA students are eligible for awards that range in value from $500 to $1500. The awards include: International Integrated Management Exercise Travel Award, Leadership/Citizenship Awards, Best Consulting Paper, Specialization awards and Highest Foundation GPA Award.

Dean’s Honour Roll Criteria

MBA and MGB students must have a graduating GPA in the top 10% of their class to be considered for the Dean’s Honour Roll.

ADMISSION REQUIREMENTS

Daytime and Weekend MBA Programs

Applications are welcome from any person who has received a baccalaureate degree from a recognized Canadian university, or foreign equivalent, with an academic standing acceptable to the Gill Graduate School of Business and the Faculty of Graduate Studies (See "Admission to Regular Master’s Degree Programs", page 31). The program does not require any academic background in business or economics. Work experience in any professional or managerial capacity is considered a major asset. Normally, successful applicants to the Daytime MBA program will have three or more years’ full-time professional work experience following their undergraduate degree and those to the Weekend MBA program will have six or more years’ full-time professional work experience following their undergraduate degree, with two or more years in a managerial role. Applicants must also submit a valid Graduate Management Admission Test (GMAT) score, two letters of reference, a current résumé and additional documentation outlined on the admissions website. In situations where an applicant is unable to provide a GMAT score, a valid Graduate Record Examinations (GRE) score will be accepted in its place. Under exceptional circumstances, requests for GMAT/GRE waivers for admission to the Weekend MBA program may be considered at the discretion of the MBA Program and only if the applicant can provide sufficient other evidence of academic ability. Applicants are advised that enrolment in this program is limited and admission is competitive.

Modular MBA Option

The program may be offered in a modular format for delivery to cohorts by special arrangement through an educational services contract. The program may be composed of different courses to provide the appropriate content emphasis. For applicants under such a modular option only, the same admission requirements as the Daytime and Evening programs apply but the GMAT score requirement may be waived.

International Executive MBA Program

This program is currently under review. At time of going to press, no date had been set for the next admission to this program.

MBA and MGB Application Deadlines

The deadline for submitting an application is May 31 for both Daytime and Weekend MBA and May 31 for the MGB September entry point, and September 30 for the MGB January entry point. Applications after that date will be considered subject to program space. International applicants are encouraged to have their...
application completed at least one month earlier than the above
dates in order to obtain the necessary visas.

**GCE and GDE Programs**

Applicants for the Graduate Certificate and Diploma in
Entrepreneurship must satisfy all regular admission requirements
of the Faculty of Graduate Studies. Students must have an
undergraduate degree or equivalent. Applications will be
adjudicated by the Gill Graduate School Entrepreneurship
Certificate/Diploma Admission Team and entry will be based on:

- Undergraduate degree or graduate degree transcripts,
- A résumé, and
- A letter of application describing how the student expects to
  benefit from and contribute to this specialized
  entrepreneurship training.

As an option, a student who completes the Certificate or Diploma
could apply the courses toward completing the Gill Graduate
School MBA program (the student will need to meet the MBA
admission requirements). In this laddering option, a student
would complete the core MBA courses and other required
elements of the MBA program. Six units of certificate courses and
nine units of diploma courses would then be applied as electives
towards the completion of the MBA program (maximum of 6
units). This arrangement will be decided by the MBA program on
a case-by-case basis.

**Deadlines**

Applications are accepted on a continual basis, but must be
submitted two months prior to program start (Feb 28th for May-
July programs).

**PhD Program**

PhD students are admitted every other year in September by the
PhD Program Committee. Admission normally requires
completion of a master’s degree (or equivalent) from an
accredited and recognized institution. In general, applicants to
the program will be expected to have a Master’s of Business
Administration or another master’s-level degree (e.g., in
Economics or Sociology) and as well as some experience working
within an organization.

As per Graduate Studies regulations, successful applicants who
enter the program without a Master’s-level program completed
will be required to complete 45 units beyond the Bachelor’s level
to satisfy completion of a PhD Program.

Assessment of candidates is based on their education, work and
life experiences, personal statement, references, and GMAT or GRE
scores.

**PhD Application Process**

In addition to the documentation and fees required by the Faculty
of Graduate Studies, applicants need to submit additional
information to apply to the PhD program at the Gill Graduate
School. Please visit the website at <www.uvic.ca/gustavson/gill/
phd> for more details. Admission questions and inquiries can be
directed to the PhD Program Office at busiphd@uvic.ca.

**PhD Application Deadlines**

Please apply to the PhD program and submit all documents by
January 30 to be considered for University of Victoria Graduate
Fellowships.

**Program Requirements**

**Daytime MBA Program**

The Daytime MBA Program consists of 30 units and may include
one or two Coop work terms. Students entering the program with
less than three years of full-time, professional work experience are
required to complete one four-month Co-op work term.

The Daytime program is generally completed in 17 to 21 months.
Students, with the exception of those in double degree streams
or on international academic exchange, participate in an
international project. The project takes place in another country
or countries over a two-week period. There are additional fees
associated with the project and with other travel required as part
of the program. Please see <www.uvic.ca/gustavson/gill/mba/
tuition> for additional information.

The regular degree program consists of 30 units. Individual
programs of study may differ, but in no case will the MBA degree
be awarded on the basis of fewer than 21 units.

MBA 586 (0.5) Consulting Methods II
MBA 596 or 598 (3.0) Integrative Project or Research Project (See additional information below)

Specializations and Electives

Students choose one of two specializations, either Service Management or Entrepreneurship. Each specialization consists of three co-requisite courses taken during the same academic term. In exceptional cases, or for students participating in an international academic exchange, 4.5 units of graduate level electives may be selected, or a combination of 300- or 400-level undergraduate electives (to a maximum of 3.0 units of 300- or 400-level electives) with permission from the MBA Program Director prior to enrolling in these courses.

Specialization courses and electives are offered subject to enrolment and the availability of faculty.

Service Management
MBA 511 (1.5) Customer Experience Management
MBA 512 (1.5) Quality Management and Service Operations
MBA 513 (1.5) Issues in Service Technology and HR Management

Entrepreneurship
MBA 561 (1.5) Entrepreneurial Planning and Finance
MBA 562 (1.5) New Venture Marketing
MBA 563 (1.5) Entrepreneurial Strategy

Electives
MBA 588 (1.0-7.5) Study Abroad
MBA 590 (1.0-3.0) Directed Study
MBA 595 (0.5-5.0) Special Topics in Business Administration

Major Project Requirement

Students choose one of two project options: Integrative Project or Research Project. Students choosing to do the Research Project will be required to take an appropriate Research Methods course of 1.5 units. Students should consult with their academic supervisor to identify a suitable course.

MBA 596 (3.0) Integrative Project
MBA 598 (3.0) Research Project

Weekend MBA Program

The Weekend MBA Program consists of 22 units.

The Weekend program is generally completed in 24 months. All students participate in an international project. The project takes place in another country or countries over a one-week period. There are additional fees associated with the project and with other travel required as part of the program. Please see <www.uvic.ca/gustavson/gill/mba/tuition> for additional information.

The regular degree program consists of 22 units. Individual programs of study may differ, but in no case will the MBA degree be awarded on the basis of fewer than 21.0 units.

Foundation Courses
MBA 510 (1.0) Marketing Management

Electives

Students have an elective requirement of 2 units of coursework. Students can choose to do the two courses offered as an elective bundle within the program: Managing in the Service Economy and Entrepreneurship. Alternately, students may elect to take 2 units of graduate level electives offered through other departments or a combination of 300- or 400-level undergraduate electives (to a maximum of 1.5 units of 300- or 400-level electives) with permission from the MBA Program Director prior to enrolling in these courses.

Electives are offered subject to enrolment and the availability of faculty.

Electives

Students have an elective requirement of 2 units of coursework. Students can choose to do the two courses offered as an elective bundle within the program: Managing in the Service Economy and Entrepreneurship. Alternately, students may elect to take 2 units of graduate level electives offered through other departments or a combination of 300- or 400-level undergraduate electives (to a maximum of 1.5 units of 300- or 400-level electives) with permission from the MBA Program Director prior to enrolling in these courses.

Electives are offered subject to enrolment and the availability of faculty.
Students choose one of two project options: Integrative Project or Research Project. Students choosing to do the Research Project will be required to take an appropriate Research Methods course of 1.5 units. Students should consult with their academic supervisor to identify a suitable course.

**Performance Requirement**

All MBA students are subject to the performance standards set by the Faculty of Graduate Studies. (See "Academic Performance", page 50.)

**MBA+JD Double Degree Program Requirements**

A limited number of students (up to a maximum of five) who are accepted in both the Daytime MBA program and the Faculty of Law JD program may take both degrees concurrently with modified requirements for each. The double degree may be completed within 25 months. The MBA program for double degree students consists of 24.5 units. Individual programs of study may differ, but in no case will the MBA degree be awarded on the basis of fewer than 21 units.

Double-degree students complete all MBA course work excluding the Specialization in the first three terms of their program. Students will also normally be waived from MBA 576 and the international project component of MBA 501. Normally, students will then transfer to the Faculty of Engineering to complete MEng course work and Graduate Seminar requirements. The major project requirement for both programs will be satisfied with the successful completion of a single project, MBME 598, jointly supervised by the Faculty of Business and either the Department of Mechanical or Electrical and Computer Engineering. Completion of all required Engineering course work will also be credited as fulfillment of the MBA specialization module requirements.

Students entering with less than three years of full-time work experience will complete a Co-op work term as a requirement of the MBA program.

**MBA+MEng Double-Degree Program**

A limited number of students (up to a maximum of five) who are accepted in both the Daytime MBA program and the Masters of Engineering (project-based option) program in either of the Departments of Mechanical or Electrical and Computer Engineering may take both degrees concurrently with modified requirements for each. Both degrees may be completed within 25 months. The MBA program for double degree students consists of 24.5 units. Individual programs of study may differ, but in no case will the MBA degree be awarded on the basis of fewer than 21 units.

Double-degree students complete all MBA course work excluding the Specialization in the first three terms of their program. Students will also normally be waived from MBA 576 and the international project component of MBA 501. Normally, students will then transfer to the Faculty of Engineering to complete MEng course work and Graduate Seminar requirements. The major project requirement for both programs will be satisfied with the successful completion of a single project, MBME 598, jointly supervised by the Faculty of Business and either the Department of Mechanical or Electrical and Computer Engineering. Completion of all required Engineering course work will also be credited as fulfillment of the MBA specialization module requirements.

Students entering with less than three years of full-time work experience will complete a Co-op work term as a requirement of the MBA program.
international project component of MBA 501. Normally, students will then transfer to the Department of Computer Science to complete MSc course work requirements, consisting of CSC 595 and 7.5 units of other courses. The major project requirement for both programs will be satisfied with the successful completion of a single project, MBMS 598, jointly supervised by the Faculty of Business and the Department of Computer Science. Completion of all required Computer Science course work will also be credited as fulfillment of the MBA specialization module requirements.

Students entering with less than three years of full-time work experience will complete a Co-op work term as a requirement of the MBA program.

EDHEC Options

EDHEC is one of the world’s top-ranked business schools. Located in France, it has two main campuses in Lille and Nice that offer, among other programs, a wide array of specialized Masters programs in Business and Finance. For more information about EDHEC, visit www.edhec.edu.

Double Degree Option – EDHEC MSc + UVic MBA

A limited number of Daytime MBA students nominated by the Gill Graduate School of Business who meet normal admission requirements for an EDHEC Master of Science program and who have successfully completed all MBA course work, excluding Specialization and MBA 576, and may apply to complete their MBAs through one of the following EDHEC degree programs:

Business MSc Programs (Lille campus):
- MSc in Entrepreneurship and Innovation Management
- MSc in Global Business
- MSc in Creative Business
- MSc in Marketing Management
- MSc in Management Studies
- MSc in Strategy and Organizational Consultancy

Finance MSc Programs (Nice campus):
- MSc in International Accounting and Finance
- MSc in Corporate Finance and Banking
- MSc in Finance
- MSc in Financial Markets
- MSc in Risk and Finance

Upon successful completion of EDHEC MSc academic requirements (75 ECTS), a student will be awarded the EDHEC degree. UVic students who transfer 4.5 units of appropriate coursework completed within the EDHEC MSc program will also satisfy requirements for the MBA program’s Specialization and MBA 598, qualifying the students for the UVic MBA. Students will be granted their degrees from each institution independently upon successfully completing the requirements for the particular degree program.

Coursework must be completed within five years of starting the first degree.

Double Degree Option – EDHEC Master of International Management (MIM) + UVic Master of Global Business (MGB)

Qualified EDHEC Master of International Management students who have completed their MIM Level 1 requirements may apply to the Gill Graduate School’s MGB program. Credits earned in completing the MGB program can be transferred to EDHEC to satisfy the remaining MIM requirements, allowing students to earn both degrees within two years. Students will be granted their degrees from each institution independently upon successfully completing the requirements for the particular degree program.

Applicants must submit a formal application form after successful completion of the Master of Management (MIM) Level 1 at EDHEC with an overall GPA of 13 out of 20 on the EDHEC scale. Coursework must be completed within five years of starting the first degree.

For program details and more information about fees, the application process, and application deadlines for the EDHEC options, please contact the Gill Graduate School Program office.

MGB Program

The MGB Program consists of four modules including an international research and consulting project and a global internship. The program is normally completed in 12 months. The regular degree program consists of 17.5 units plus 3.0 units of required introductory language training.

Coursework

MGB students are required to take 20.5 units of coursework, as listed below.

a) Global Business Fundamentals Module (4.0 units)
   MGB 510 (1.0) The North American Business Context
   MGB 512 (1.0) International Financial Management
   MGB 516 (1.0) International Marketing and Global Strategy
   MGB 519 (1.0) International Logistics and Supply Chain Management
b) Global Business Opportunities Module (4.5 units)
   MGB 525 (1.5) Developing Business in International Entrepreneurial Environments
   Two* of (for a total of 3 units):
   MGB 520 (1.5) Industry Analysis and the Asian Business Context
   MGB 530 (1.5) The European Business Context
   MGB 540 (1.5) The South American Business Context
   MGB 550 (1.5) The Middle East and North Africa (MENA) Business Context
c) Global Business In Action Module (4.0 units)
   MGB 535 (1.0) Consulting Methods and Practice
d) Global Business Experience Module (1.5 units)

MGB 537 (1.5) Global Internship

Additional courses, running throughout the program:

MGB 570 (2.0) Global Leadership and Cultural Intelligence
MGB 583 (1.5) Language, Communication and Global Business
MGB 180 (1.0) Language Skills I
MGB 181 (1.0) Language Skills II
MGB 182 (1.0) Language Skills III

* Students will take two of MGB 520, 530 and 540 according to the track they are assigned to by the MGB Program Director.

**Residency**

Normally, for the September and January entry points of the program, students will take the Global Business Fundamentals at UVic, (from September to November for the September entry point of the program, and from January to March for the January entry point). The other two taught modules (Global Business Opportunities and Global Business in Action) will involve overseas partner institutions in Asia, Europe and South America, and the MENA Region. The modules will be delivered by Gill Graduate School Business faculty or under the direction of UVic faculty and as approved by Faculty of Graduate Studies.

**Program Length**

Students will normally be expected to complete the program within one year (with a brief orientation prior to the first module).

**GCE and GDE Program Requirements**

**Graduate Certificate in Entrepreneurship**

All students are required to complete the following four 1.5 unit courses:

ENTC 510 (1.5) Entrepreneurship Searching and Screening
ENTC 520 (1.5) Entrepreneurship Planning and Financing
ENTC 530 (1.5) Entrepreneurship Set-up and Launch
ENTC 540 (1.5) Entrepreneurship Growth and Context Expertise

**Graduate Diploma in Entrepreneurship**

All students are required to complete all four 1.5 unit courses for the Graduate Certificate in Entrepreneurship plus ENTD 590 (3.0) Entrepreneurship Practicum and Directed Studies

**PhD Program**

The regular PhD program consists of 34.5 units for students holding a master’s degree. In no case will the PhD degree be awarded on the basis of fewer than 15 units of study completed at the University of Victoria.

Upon admission, the PhD Program Director, in consultation with the incoming student’s PhD Supervisor, will meet with the PhD student to review requirements for graduation that will include the following:

1. Coursework (19.5 units)
2. Comprehensive Candidacy written and oral examinations
3. Thesis proposal and presentation
4. Dissertation and defense (15 units)
5. International Research Exchange (if determined appropriate)
6. Industry Practicum (if determined appropriate)
7. Teacher training (if determined appropriate)
8. Other requirements as determined by the PhD Program Director and the student’s PhD Supervisor

1. **Coursework**

PhD students are required to take 19.5 units of coursework in research methods and foundation courses during their first two years in the program.

a) Theoretical and Empirical Foundation topics (15 units)
   - BUS 601 – Research Foundations (1.5 units)
   - BUS 603 – Strategy (1.5 units)
   - BUS 604 – Business and Sustainability (1.5 units)
   - BUS 605 – Comparative HR Management (1.5 units)
   - BUS 606 – Micro Organizational Behaviour (1.5 units)
   - BUS 607 – Macro Organizational Theory (1.5 units)
   - BUS 655 – Global Management & Society I (1.5 units)
   - BUS 656 – Global Management & Society II (1.5 units)
   - BUS 670 – Academic Career Development (3.0 units)

b) Research Theory and Methods (4.5 units)
   - BUS 640 – Research Methods Fundamentals (1.5 units)
   - BUS 641 – Mixed Methods Research Design (1.5 units)
   - One other course (1.5 units) to be approved by the PhD Program Director, in consultation with the student’s supervisor. A list of eligible courses may be obtained from the PhD Program Office.

If a student has completed PhD-level coursework at another institution, then the Gill Graduate School of Business will evaluate the courses on a case-by-case basis to determine if some course requirements may be waived.

2. **Comprehensive Candidacy Examination**

Normally within two years after commencing PhD studies, students will be required to undertake written candidacy examinations that assess a mastery of the theories and methods prevalent in the field and awareness of the emerging directions in international management and organization. The candidacy examinations will be set and assessed by the PhD Examination Committee, appointed by the PhD Program Director.

3. **Dissertation Proposal and Presentation**

Students will normally be expected to develop a dissertation proposal within six months of passing candidacy exams, and must defend the dissertation proposal within three years of...
entering the program. The student will find a dissertation supervisor as per Faculty of Graduate Studies guidelines on Supervisor Relationship Policy. The student, in consultation with the supervisor, will assemble two other faculty members (usually from the Gill Graduate School of Business) to form a Dissertation Proposal Committee who will assess the oral and written presentation of the dissertation proposal.

4. Dissertation/Oral Examination

Once the Thesis Proposal Committee is satisfied that the dissertation proposal meets the standards of the Faculty of Graduate Studies and of the Gill Graduate School of Business, candidates will begin their dissertation research.

Once the dissertation is nearly ready to be defended, the candidate's thesis supervisor will assemble a Thesis Defense Committee to assess the quality of the work. The Thesis Defense Committee will be made up according to policies as determined by the Faculty of Graduate Studies. Once the Thesis Defense Committee is satisfied with the thesis, candidates will then defend the dissertation in a public oral examination as per the requirements of the Faculty of Graduate Studies.

Candidates are expected to complete their dissertation and final oral exam by the end of their fourth year in the PhD Program.

5. International Research Exchange

To round out their research experience, PhD candidates can participate in an International Research Exchange at select research-focused universities abroad. These short-term residencies are intended to ensure that PhD candidates have direct exposure to international research issues as well as to enhance their international academic networks. An International Research Exchange is optional. The PhD Program Director, in consultation with the candidate's supervisor, may require it as part of the candidate's program.

If an International Research Exchange is included in the candidate's program, the candidate will work with his/her supervisor and the International Programs Office to find an appropriate placement at a university abroad. The length of the International Research Exchange can vary, but could be up to four months and will take place after candidacy exams. A reflective exercise will be required upon completion of the International Research Exchange and requirements will be set out by the PhD Program Director, the candidate's supervisor, and the Business Co-op and Career Center.

6. Industry Practicum

PhD candidates may include work experience in their program by participating in an Industry Practicum to engage in an organization, whether that be a private business, public institution, or not-for-profit entity, to enhance their practical appreciation for the phenomena they are studying. A holistic assessment will be conducted at the time of the candidacy exams to determine a candidate's need for industry experience. The PhD Program Director, in consultation with the candidate's supervisor, may require a practicum for the candidate's program.

If an Industry Practicum is included in the candidate's program, the candidate will work with the his/her supervisor and the Business Co-op and Career Center, on a suitable Industry Practicum program—which is intended to be closely related to their emerging area of academic study. The length of the Industry Practicum can vary, but may be up to four months and will take place after candidacy exams. A reflective exercise will be required upon completion of the Industry Practicum and requirements will be set out by the PhD Program Director, the candidate's supervisor, and the Business Co-op and Career Center.

7. Teacher Training as determined appropriate by the PhD Program Director

Teacher training will be an essential component of the PhD program. Candidates will be given various opportunities to develop teaching skills through Teaching Assistantships and/or Sessional Teaching as well as courses available through the UVic Learning and Teaching Center (e.g., ED-D 600). Teaching activities will be coordinated through the PhD Program Office.

While teacher training is mandatory, the PhD Program Director, in consultation with the candidate's supervisor may waive this requirement if the candidate can demonstrate a high level of teaching experience and expertise. An assessment of the candidate's teaching experience will be completed at the time of the candidacy by the PhD Advisory Group and the candidate's supervisor.

8. Other requirements

These will be determined by the PhD Advisory Group and the student's PhD Supervisor.

PhD Course Prerequisites

Students who have not completed an MBA will normally be expected to complete the MBA Foundation module. Students may be waived from certain courses based on prior coursework or work experience. These requirements will be determined on a case-by-case basis and will be communicated to the prospective students prior to admission into the PhD program.

Research Seminars

Students are expected to attend BUS 670 Research Seminars as scheduled.

Assessment of Progress

A student's progress will be reviewed periodically by the PhD Program Director in consultation with the student's supervisor. In cases where performance is below the required standard, a plan for improvement will be developed between the PhD Program Director and the student, if there is mutual agreement that the student is to continue pursuing PhD studies. Continued financial support is contingent upon satisfactory progress as assessed by the PhD Program Director.

Residency

Students are required to attend full time on campus throughout their PhD studies (aside from their International Research
Exchange, Industry Practicum). Continued financial support is contingent upon full time residency although special arrangements may be possible if agreed upon in advance by the PhD Program Director.

Program Length

PhD students should aim at completing their doctoral program in four years, including research, teacher training, international Research Exchange and industry practicum experiences. The program operates year round.

CO-OPERATIVE EDUCATION

The University regulations with respect to Co-operative Education Programs and specifically the "General Regulations: Graduate Co-op" (page 56) are applicable to the Sardul S. Gill Graduate School of Business Co-op Program except to the extent that they are modified by regulations adopted by the School.

Admission to the MBA Business Co-op Program

Students entering the MBA Program with less than three years full-time relevant (or equivalent) of work experience will be required to undertake either one or two Co-op work terms. The number of work terms required will depend on the amount of relevant prior work experience, as determined by the MBA Program in conjunction with the Business Co-op and Career Centre. If required, the first Co-op work term will normally occur after completion of the eight-month Foundation Module (except for MBA 560). The second Co-op work term is scheduled thereafter.

MBA Co-op General Regulations

The following regulations apply to the Business Co-op program. General regulations found in the Co-operative Education Program section of the Calendar also apply to the Gill Graduate School of Business Co-op program. Where the school’s regulations differ from those of the Co-operative Education Program, the school’s regulations will apply.

Co-operative Education work terms are normally four months of full-time paid work. The work placement must be related to the student’s learning objectives and career goals. The placement must be supervised, and the employer willing to conduct a mid-term and final evaluation of the student in consultation with a Co-operative Education Program Coordinator (known hereafter as a Coordinator).

No MBA student is allowed to take more than 3.0 units of credit while on a full-time work term. If a student is on conditional continuation then no units of credit will be allowed during the work term. Students with a GPA below 4.0 in an academic term will not be eligible to participate in the next scheduled Co-op work term.

Students must sign a current Terms and Conditions document as provided by the Business Co-op Program in order to be eligible to participate in the placement process.

The Co-op Preparation Course is a mandatory requirement for business students. This program is a co-requisite for students participating in the placement process prior to their first work term.

Students will be provided more information regarding the Co-op Preparation Program, its curriculum, and the requirements for completion upon admission to the MBA Co-op Program.

Students are expected to participate fully in the placement process. While every attempt will be made to ensure that all eligible students are placed, the Gill Graduate School of Business is under no obligation to guarantee placement. Students are only permitted to decline one valid Co-op job offer, any more than that and they will be deemed ineligible to participate in the placement process for the remainder of that term. Students should be prepared to spend at least one work term outside the greater Victoria area.

The Business Co-op Program reserves the right to approve any employer that provides placements for students, and to withdraw a student from any placement assigned to a student. The student, however, has the right to be informed in writing of the reasons for any withdrawal and can follow the student appeal procedures as outlined in the “Student Appeal Procedures” on page 58. Students may not withdraw from a placement without approval from a Coordinator. Failure to obtain permission will result in the student receiving a grade of F on the work term.

Students must be officially registered for the work term by completing the Work Term Registration Form, which is provided by the Business Co-op office, and providing any other required documentation by the end of the first month of the work term. Students not registered by that time will not receive credit for that work term. A Co-op program fee is charged for each term of work term registration. This fee is in addition to any tuition fees and student fees. It is due in the first month of each work term and subject to the normal University fee “General Regulations”, page 63.

While on Co-operative Education work terms, students are subject to the provisions of the Principles of Professional Behaviour and the Standards for Professional Behaviour documents developed for Gill Graduate School Students.

Assessment of Work Term Performance

The requirements for a pass grade in a Co-op Work Term include:

1. a satisfactory mid-term evaluation by the Coordinator based on discussion with the student and employer
2. the employer’s satisfactory final evaluation of the student, and
3. the satisfactory completion of a work term report as assessed by the Coordinator and submitted by the deadlines specified below:
   • Spring Work Term Report: due April 15 (unless it falls on a University of Victoria recognized holiday or weekend, in which case the report will be due the next business day)
• **Summer Work Term Report**: due August 15 (unless it falls on a University of Victoria recognized holiday or weekend, in which case the report will be due the next business day).

Late work term reports will not be accepted without a medical certificate unless approval has been obtained from Business Co-op staff before the work term report submission deadline. Normally, pre-approval may be granted only in the event of illness, accident or family affliction.

Variances in work term report due dates resulting from irregular work term start dates may be granted with the written permission of the Manager, Business Co-op Program. Permission must be requested within the first four weeks of the start of the work term.

A grade of COM, F/X or N/X will be assigned to students at the completion of each work term. Students who are not satisfied with the grade they have been assigned may launch an appeal as described in the Co-op General Regulations "Student Appeal Procedures" on page 58.

Students who fail a work term or have not completed a work term by the end of four academic terms may be required to withdraw.

**MGB Internship General Regulations**

The following regulations apply to the MGB 537 Global Internship.

MGB Internships may range from two months to eight months of full-time paid or unpaid work, two months (300 hours) being the minimum. The Internship must be related to the student’s learning objectives and career goals. The Internship must be supervised, and the employer willing to conduct a mid-term and final assessment of the student in consultation with a Co-operative Education Coordinator (known hereafter as a Coordinator).

Students must sign a current Terms and Conditions document as provided by the Business Co-op Program in order to be eligible to participate in the Internship placement process.

The Internship Preparation series of sessions, an integral part of MGB 537 – Global Internship, is typically delivered during the first (Victoria) Module of the MGB program and is a mandatory requirement for University of Victoria MGB students.

Students will be provided more information regarding the MGB 537 – Global Internship, its curriculum, and the requirements for completion upon admission to the MGB Program.

Students are expected to participate fully in the placement process. While every attempt will be made to ensure that all eligible students are placed, the Gill Graduate School of Business is under no obligation to guarantee placement. Students are only permitted to decline one valid Internship offer; more than that will result in no longer being eligible to access postings in the co-op module of the UVic student job posting system (Learning in Motion). The Coordinator reserves the right to approve or deny internships with any employer, and to withdraw a student from any placement assigned to a student. The student, however, has the right to be informed in writing of the reasons for any withdrawal and can follow the "Student Appeal Procedures" on page 58. Students may not withdraw from a placement without approval from the Coordinator. Failure to obtain permission will result in the student receiving a grade of F on the internship term.

Students must be officially registered for the Internship by completing the Co-operative Education Work Term Registration for Graduate Studies Form, which is provided by the Business Co-op office, and providing any other required documentation by the end of the first month of the internship. While on Internship terms, students are subject to the provisions of the Principles of Professional Behaviour and the Standards for Professional Behaviour documents developed for Gill Graduate School Students.

**Assessment of Internship Performance**

The requirements for a pass grade in MGB 537 include:

1. a satisfactory mid-term assessment by the Coordinator based on discussion with the student and employer
2. the employer’s satisfactory final assessment of the student, and
3. the satisfactory completion of a work term report and the student’s final competency assessment, as assessed by the Coordinator and submitted by the deadlines specified below:
   - **Summer Work Term Report**: due August 15 (unless August 15 falls on a University of Victoria recognized holiday or weekend, in which case the report will be due the next business day).
   - **Summer/Fall Work Term Report** (for Internships that begin during the Summer term and extend into the Fall term): due December 15 (unless it falls on a University of Victoria recognized holiday or weekend, in which case the report will be due the next business day).
   - **Fall Work Term Report**: (for January-entry students whose Internships begin in the Fall term): due December 15 (unless it falls on a University of Victoria recognized holiday or weekend, in which case the report will be due the next business day).
   - **Fall/Spring Work Term Report** (for January-entry students whose Internships begin during the Fall term and extend into the Spring term): due April 15 (unless it falls on a University of Victoria recognized holiday or weekend, in which case the report will be due the next business day).

Late work term reports will not be accepted without a medical certificate unless approval has been obtained from the Coordinator before the submission deadline. Normally, pre-approval may be granted only in the event of illness, accident or family affliction.

Variances in work term report due dates resulting from irregular work term start dates may be granted with the written permission of the Manager, Business Co-op Program. Permission must be requested within the first four weeks of the start of the internship term.
A grade of INP, COM, N or F will be assigned to students at the completion of the Internship. Students who are not satisfied with the grade they have been assigned may launch an appeal as described in the Co-op General Regulations, "Student Appeal Procedures" on page 58.

Students who fail an internship or have not completed an internship by the end of four academic terms may be required to pay a re-registration fee to retain student status while they complete the requirement.

**PhD Industry Practicum**

The intention of the PhD Industry Practicum is to provide an opportunity for PhD students to further their research goals within the PhD Program.

Students participating in the PhD Industry Practicum must complete at least one work experience term, that is, normally four months of full-time, disciplined-related work under the supervision of the Business Co-op and Career Centre delegate and/or the PhD Program delegate. These work experience terms are subject to the General Regulations: Graduate Co-op. Students should contact the PhD Program to discuss entry into the Industry Practicum.

**Faculty Members and Areas of Research**

*David Berg, PhD (California, Berkeley)*  
Inorganic synthesis, lanthanide chemistry, organometallic chemistry.

*Cornelia Bohne, PhD (Sao Paulo)*  
Supramolecular dynamics, kinetics, host-guest systems, gels, photochromism, photophysics.

*Alexander G Briggs, PhD (Victoria)*  
Chemical education, organic, physical organic chemistry.

*Alessandro Brolo, PhD (Waterloo)*  
Physical/analytical chemistry: surface spectroscopy, nanostructured materials, surface-enhanced Raman scattering (SERS), biosensors, plasmonics.

*Neil Burford, PhD (Calgary)*  
Synthetic, structural and spectroscopic studies of compounds featuring the p-block elements.

*Natia Frank, PhD (California, San Diego)*  
Organic synthesis and spectroscopy and coordination chemistry relevant to materials chemistry, organic electronics, organic photovoltaics, photochromism, photomagnetism, and spintronics.

*Thomas M. Fyles, PhD (York)*  
Supramolecular chemistry, bilayer membrane transport, synthetic lipids and amphiphiles, sensors.

*David A. Harrington, PhD (Auckland)*  
Electrochemistry: Electrocatalysis, adsorption and surface reactions, microfluidics, materials science, fuel cells.

*Robin G. Hicks, PhD (Guelph)*  
Synthetic main group, organic and coordination chemistry; ligand design; electronic structure, reactivity, and coordination complexes of stable radicals; redox-active ligands; organic pi conjugated materials.

*Fraser Hof, PhD (Alberta)*  
Supramolecular and medicinal chemistry. Organic synthesis and study of small molecules that inhibit protein targets relevant to cancer and epigenetics; basic studies of biomolecular recognition; bioanalytical chemistry; peptide and protein chemistry.
Dennis K. Hore, PhD (Queens)

Optical properties of materials, biophysical chemistry, structural changes accompanying adsorption of biomolecules onto solid surfaces, electronic and vibrational spectroscopy, molecular simulations.

Robert Lipson, PhD (Toronto)

Technique development and applications for MALDI mass spectrometry; laser spectroscopy of small polyatomics; and optical lithography for photonics.

J. Scott McIndoe, PhD (Waikato)

Organometallic chemistry, catalysis, reaction mechanisms, electrospray ionization mass spectrometry, real-time analysis, catalyst discovery and synthesis, ligand design.

Matthew Moffitt, PhD (McGill)

Irina Paci, PhD (Queens)

Theoretical and computational chemistry, multi-scale simulations, functional materials, statistical mechanics, surface self-assembly, surface chirality.

Lisa Rosenberg, PhD (British Columbia)

Catalyst design and mechanism, transition metal, silicon & phosphorus chemistry, E-H activation, new inorganic polymers.

Frank C.J.M. van Veggel, PhD (Twente)

Photonic and magnetic nanomaterials, cancer diagnosis and treatment, MRI contrast agents, biolables, lanthanide ions, quantum structures, synthesis and (photo)physical studies.

Peter C. Wan, PhD (Toronto)

Mechanistic organic photochemistry, reactive intermediates, physical organic chemistry, environmental photochemistry.

Jeremy Wulff, PhD (Calgary)

Synthesis and biological evaluation of complex molecules with potential medicinal properties.

Facilities

The department is exceptionally well equipped. Departmental facilities exist for laser, mass spectrometry, and NMR systems, each having a variety of instrumentation capable of covering traditional through ground-breaking techniques. In addition, there is a wide range of specialized research instrumentation belonging to our researchers and a large inventory of common instrumentation in our undergraduate laboratories, all of which is available for research use with the appropriate permissions. All equipment – in departmental facilities; in research labs; and in teaching labs – is supported by our skilled team of technical staff. Chemistry researchers also have access to instrumental facilities run by several scientific Research Centres on campus.

Financial Support

The department offers a minimum annual stipend for qualified graduate students. This stipend is normally comprised of support from the supervisor (in the form of research assistantships) and the University (teaching assistantships.) Many awards that provide additional funds are also available to exceptional entering and continuing students. Please consult the Graduate Adviser or Graduate Secretary for additional details.

ADMISSION REQUIREMENTS

General

The Chemistry department offers programs of study leading to the degrees of MSc and PhD. Complete admission requirements are supplied as part of the application package. Students accepted for admission are provided with a detailed outline of current policy and procedures for graduate study in the department. Based on past experience and performance, students may be permitted to enter either the MSc or PhD degree. For further information contact either the Graduate Admissions and Records Office or the Chemistry department at email: <chemgsec@uvic.ca>.

Applications are accepted from students who have completed a baccalaureate degree in chemistry or its equivalent. Depending on available positions, admission to the graduate school will be recommended for students who have achieved a grade point average of at least 5.0 (B average) in the last two years of senior courses leading to their undergraduate degree. In addition, students completing a baccalaureate degree at a non-Canadian institution may be required to submit Graduate Record Examination (GRE) General test scores; see the Department’s website for details.

Some international applicants may be exempt from the English language test requirement. International applicants should review the international applicant (language proficiency) area of the graduate admissions web site. Students admitted to Chemistry may still be required to complete additional English language courses in addition to their other course work.
Admission to the MSc Program
1. Normally, students with a BSc in chemistry who achieved a minimum grade point of 5.0 during their last two years of senior courses will be admitted to the MSc program.
2. Applicants who already hold a Master’s degree in chemistry must have their application reviewed by the Department of Chemistry and the Faculty of Graduate Studies before being considered for the MSc program. Normally, applicants already holding an MSc in chemistry will only be considered for admission to the PhD program.

Admission to the PhD Program
1. Students entering with a first class undergraduate degree or a previous MSc degree from a recognized institution may be admitted directly to PhD studies.
2. Graduate students in a Master’s program may transfer to a PhD program with the support of their supervisory committee. Students wishing to transfer to a PhD program must complete a written transfer report summarizing their progress to date and future plans and complete an oral transfer examination within 16 months of entry into the MSc program. Students who have not completed the transfer process within 16 months of first registering will normally be expected to complete an MSc degree.
3. Applicants who already hold a PhD in chemistry must have their application reviewed by the Department of Chemistry and the Faculty of Graduate Studies before being considered for the PhD program. Normally, applicants already holding a PhD in chemistry will not be considered for the PhD program.

Application Deadlines
Students are admitted to the MSc and PhD programs in September, January, and April. The application deadlines for all programs are listed below:

<table>
<thead>
<tr>
<th>Entry point</th>
<th>Deadline for Domestic students</th>
<th>Deadline for International students</th>
</tr>
</thead>
<tbody>
<tr>
<td>September</td>
<td>June 15</td>
<td>May 1</td>
</tr>
<tr>
<td>January</td>
<td>October 15</td>
<td>September 1</td>
</tr>
<tr>
<td>May</td>
<td>February 15</td>
<td>January 1</td>
</tr>
</tbody>
</table>

**Program Requirements**

**Thesis-based Master’s**

**Course Requirements**
Candidates for the MSc degree are required to complete at least 6 units of graduate courses in Chemistry. Substitution of appropriate courses from other departments may be made with the permission of the Chair, Supervisor, Graduate Adviser and Faculty of Graduate Studies. In addition to the course work completed early in the program, candidates are required to complete an MSc Thesis (CHEM 599). The normal course structure for an MSc program is:

**Summary of Course Requirements**

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Seminar (CHEM 509)</td>
<td>1</td>
</tr>
<tr>
<td>Discussion (CHEM 670 or 680)</td>
<td>3</td>
</tr>
<tr>
<td>Graduate lecture courses</td>
<td>3</td>
</tr>
<tr>
<td>Thesis (CHEM 599)</td>
<td>12</td>
</tr>
<tr>
<td>Total</td>
<td>19</td>
</tr>
</tbody>
</table>

1. Students are required to register in CHEM 509 and 599 throughout their degree. The requirements for CHEM 509 are regular attendance at departmental seminars and presentation of a research seminar in the final year of the degree.

2. A graduate lecture course may be substituted for CHEM 670 or 680 when the latter are not offered.

3. Substitution of an equivalent unit value course from another department or institution may be permitted with the permission of Chair, Supervisor, Graduate Adviser and Faculty of Graduate Studies.

**Research**
As part of the admissions process, graduate students will be matched with a research supervisor by mutual agreement prior to the beginning of their studies. The program must be mutually agreed upon between the professor offering a placement and the student accepting that placement.

The research supervisor must name a Supervisory Committee and complete a CAPP form for the student as soon as a choice of project has been made. For the MSc degree, the Supervisory Committee shall consist of two or three chemistry department members including the supervisor.

**Assessment of Progress**
The research progress of all graduate students is reviewed every term by their supervisor. In the event that the student’s progress is deemed unsatisfactory, a meeting with the student’s supervisory committee will be held at which the reasons for the unsatisfactory rating will be discussed. The expectation document for the next term should be written in consultation with the committee and should directly address the issues which were unsatisfactory in the previous term.

**Transfer from MSc to PhD**
Graduate students in a Master’s program who wish to transfer from the MSc to PhD program should first reach mutual agreement with their supervisor toward the end of their first year of study, after their first year’s grades are available. Students who do not transfer within 16 months of first registering will normally be expected to complete a Master’s degree.

A student planning to proceed to transfer should prepare for distribution to the Supervisory Committee a Transfer Report. This document should include an introduction to the student’s field of
research, discussion of what has been achieved thus far, and a summary of future directions and goals. The report should be approximately 1,500-2,000 words in length (excluding references). The report is due to the supervisory committee two weeks prior to a scheduled Supervisory Committee meeting.

At the Supervisory Committee meeting, the student will make an oral presentation (15-20 minutes) on their Transfer Report. The Supervisory Committee will question the student (20-30 minutes) to ensure the student reasonably understands what is to be done in the program. The Supervisory Committee will then discuss the student’s academic (coursework) and research progress and immediately reach a decision regarding transfer.

If the Supervisory Committee decides in favour of transfer, it will advise the Graduate Adviser who will recommend to the Faculty of Graduate Studies that the transfer take place. The student and supervisor must submit an “Application to Re-register” form to the Faculty of Graduate Studies. The transfer takes effect from the start of the next academic term.

Program Length

Normally, completion of an MSc degree in chemistry requires 24 to 30 months.

PhD Program

Course Requirements

Candidates for the PhD degree entering the program with a BSc (or equivalent) degree or students transferring from a MSc to a PhD program are required to complete at least 9 units of graduate courses in Chemistry. Substitution of appropriate courses from other departments may be made with the permission of the Chair, Supervisor, Graduate Adviser and Faculty of Graduate Studies. In addition to the course work completed early in the program, candidates are required to complete a PhD Thesis (CHEM 699). The normal course structure for a PhD program, with the associated unit values is shown in the table below.

Students Entering Directly from a BSc Degree Program

<table>
<thead>

1. Students are required to register in CHEM 509 and 699 (or 599) throughout their degree. The requirements for CHEM 509 are regular attendance at departmental seminars and presentation of a research seminar in the final year of the degree.

2. A graduate lecture course may be substituted for CHEM 670 or 680 when the latter are not offered.

3. Substitution of an equivalent unit value course from another department or institution may be permitted with the permission of Chair, Supervisor, Graduate Adviser and Faculty of Graduate Studies.

4. The decision as to whether a lecture or discussion course is most appropriate will be made by the student’s supervisory committee in consultation with the student.

Students Entering the Program with an MSc

Candidates for the PhD degree entering the program with an MSc (or equivalent) degree are required to complete at least 6 units of graduate courses in Chemistry, normally made up of two lecture and two discussion courses.

<table>
<thead>
<tr>
<th>Summary of Course Requirements</th>
</tr>

</tbody>
</table>

1. Students are required to register in CHEM 509 and 699 (or 599) throughout their degree. The requirements for CHEM 509 are regular attendance at departmental seminars and presentation of a research seminar in the final year of the degree.

2. A graduate lecture course may be substituted for CHEM 670 or 680 when the latter are not offered.

3. Substitution of an equivalent unit value course from another department or institution may be permitted with the permission of Chair, Supervisor, Graduate Adviser and Faculty of Graduate Studies.

Research

As in the case of MSc students, direct entry PhD students may start a program of research immediately upon arrival at the University. Graduate students will be matched with a research supervisor by mutual agreement prior to the beginning of their studies, equivalently to the process for entering MSc students. Students transferring into the PhD program normally will continue the research projects they initiated as MSc students.

Supervisory Committee

The research supervisor must name a Supervisory Committee and complete a Curriculum Advising and Program Planning (CAPP) form for the student as soon as a choice of project has been made. For the PhD degree the Supervisory Committee shall consist of three or four members including the supervisor. One member of the supervisory committee must be from outside the department. For students transferring from an MSc to a PhD program, an additional committee member must be added by the research supervisor as soon after transfer as practical.
Assessment of Progress
The progress of PhD students is reviewed every term, as described above for MSc students.

Candidacy
Before being admitted to candidacy, all PhD students must pass a candidacy examination in their major field as outlined in "Doctoral Candidacy Examinations" on page 23. Chemistry department regulations stipulate that a student must pass a candidacy exam within two years of registration as a provisional doctoral student. Students who transfer from a Master's program will be expected to pass the candidacy exam within 16 months from transfer. CHEM 693 is a co-requisite for CHEM 699. All registrations in CHEM 699 must be accompanied by registration in CHEM 693 until CHEM 693 is passed; students must be registered in CHEM 693 continuously until it is passed or they leave the program. A grade A grade of INP will be assigned for CHEM 693 until the examination is completed.

The PhD examination in Chemistry includes a candidacy report and an oral examination on subject areas relevant to the student's research. The written report is a proposal based on the student's own research which should include (i) pertinent background & literature survey, (ii) a summary of recent results and (iii) future directions and goals of the research, including methodology, outcomes, possible pitfalls, and impact of the work. The proposal should be approximately 4,000-5,000 words (excluding references), and contain figures and references as appropriate. Details on the report structure can be obtained from the Department Web Site (www.uvic.ca/science/chemistry/graduate/index.php). The proposal should be distributed to the supervisory committee 2 weeks prior to the scheduled exam date.

Approximately 5 weeks prior to the candidacy exam date, the supervisor will provide a memo to the student (copy to the supervisory committee, departmental graduate secretary and the Graduate Studies Committee representative) outlining 3-4 topics broadly related to the students research on which the student will be questioned at the exam. A second failure would result in the student being required to withdraw from the university or, if sufficient progress has been achieved, to complete a MSc thesis.

Program Length
Normally, completion of a PhD degree in chemistry requires 48 to 60 months.

Co-operative Education
Participation in the Co-operative Education program – which enables students to acquire knowledge, practical skills for employment, and workplace experience – is optional for Master's and PhD students. Master's students complete two work terms and PhD students complete three (a work term consists of four months of full-time, paid employment). Students require permission from their academic adviser and graduate adviser, as well as the Co-op co-ordinator, to participate in the Co-op program. Interested students should contact the Chemistry Co-op office early in their first term. Students are also referred to "General Regulations: Graduate Co-op", page 56.

Child and Youth Care

General Information
The School of Child and Youth Care, the oldest English-speaking child and youth care program, opened its doors in 1973 at the University of Victoria. The School is known internationally and nationally for its excellence in teaching, research and publication.

For further information or any updates, prospective students are invited to visit our website: <www.uvic.ca/hsd/cyc>

Faculty Members and Areas of Research

James P. Anglin, PhD (Leicester)
Assessment of education and training needs in human services, parent education and parent support, qualitative research approaches, grounded theory, international child and youth care, residential child and youth care, quality assurance in child and family services, child advocacy and youth in care

Sibylle Artz, PhD (Victoria)
The theory practice relationship in human and social development, the process of reflection in action, at risk children and adolescents, adolescent females’ use of violence, youth violence prevention

Jessica Ball, PhD (California, Berkeley)
Cultural ecologies of child development, Indigenous children and families, early childhood care and development, father involvement, community-based research partnerships, early childhood development intercultural partnerships

Sandrina de Finney, PhD (Victoria)
Processes of racialization and youth identities, Aboriginal, ethnic minority and immigrant youth, youth participation in practice and research, community development and community-based practice

Marie Hoskins, PhD (Victoria)
Adolescent girls’ development/eating disorders, family counselling, identity issues

Valerie S. Kuehne, PhD (Northwestern)
Intergenerational caregiving, child development and human development through the life course, multidisciplinary practice with children and families

Doug Magnuson, PhD (Minnesota)
Use of influence methods and mandated authority, professional judgment and decision-making, use of solution-focused methods in domestic violence cases

Veronica Pacini-Ketchabaw, PhD (Toronto)
Diversity in early childhood care and development, social and educational contexts of culturally and linguistically diverse communities in Canada, historically and politically embedded discourses of childhood

Alan R. Pence, PhD (Oregon)
Early childhood education, care and development (ECCD), child community and social development, Indigenous ECCD, ECCD and international development

Daniel Scott, PhD (Victoria)
Children and adolescent spirituality, spiritual development and the lives of early adolescents

Jennifer H. White, EdD (British Columbia)
Youth suicide prevention, early intervention/mental health promotion, program planning practice, narrative research

Emeritus Faculty

Gordon Barnes, PhD (York)
Substance use, families and child and youth care

Roy V. Ferguson, PhD (Alberta)
Children's health care and child life practice/environmental design, children with disabilities/special needs and their families, distance education and educational collaboration

Frances Ricks, PhD (York)
Ethics in child and youth care, consciousness, presencing, and ethical practice

Adjunct and Cross-Listed Appointments

Olatunde Adekola, PhD (Surrey)
Early childhood development (ECD), ECD operational research and education

Carol Amaratunga, PhD (Guelph)
Health, women’s and family issues

Jophus Anamuah-Mensah, EdD (British Columbia)
Teacher education, world view research, science education and cultural practices

Anne Becker, PhD (Harvard), MD (Harvard)
Cultural mediation of body image and eating disorders in Fiji, social transition and risk for eating disorders in Fiji, global mental health

Nancy Bell, PhD (Glasgow)
Human rights, with emphasis on child and youth rights, socio-legal research and human rights, social policy analysis, human rights monitoring and implementation, public services redress structures, non-traditional remedies and
institutional responses to human rights violations, institutional ethnography

Jeremy Berland, MSW (British Columbia)

Working with families where neglect is a concern, outcome measurement in child welfare, workload measurement, organizational culture

Natasha Blanchet-Cohen, PhD (Victoria)

Child and youth agency, participation and resiliency, children's rights, community youth development, child youth friendly cities, governance and planning, environmental action and young people, child-centred evaluation

Larry Brendtro, PhD (Michigan)

Strength-based assessment, treatment, and education, building resilience in youth at risk, Indigenous youth in the dominant culture, building positive youth cultures, from coercive to restorative climates with troubled youth, the resilient brain

Roy Brown, PhD (London) Hon. Dr. Caus (Ghent)

Quality of life for people with disabilities and their families, evaluation of disability service programs, mental imagery amongst persons with disabilities, applying research to practice in the disabilities field, research design in applied research

C. Ann Cameron, PhD (London)

Cross-cultural studies of verbal deception: Canada/China/Japan/USA comparisons, young children's stress reactivity to a moral choice, ecological studies of development in cultural context: the early years in Canada, Thailand, Italy, UK, Peru, USA & Turkey, Day in the Life of resilient adolescents in eight locations around the globe: four communities in Canada paired with communities in India, China, Thailand and South Africa, young children's telephone discourse with family members: relationships with emergent literacy, evaluation of school-based violence prevention, especially gender-sensitive interventions, resilience during transitions: early childhood years, early adolescence, and the transition to university, teenagers' perceptions of intimate relationships

Grant Charles, PhD (Victoria)

Child welfare, young carers, community partnerships, field education and supervision

Margaret Dabor, PhD (Sierra Leone)

Curriculum development, training and policy in Africa, focus on early childhood development (ECD), girl-child education

Enid Elliot, PhD (Victoria)

Bridging theory and practice in early childhood, research that involves children under six, under three, as researchers, the complexities of infant and toddler care, natural play spaces in early childhood programs, the narratives of early childhood educators, children's play, learning and engagement in the outdoors

Nigel Fisher, PhD (McMaster)

International development, children affected by armed conflict, public policy, fragile states, poverty and insecurity, innovation and development, comparative development of Canada’s Aboriginal communities and countries of the global South

Leslie Foster, PhD (Toronto)

Child/youth health and welfare policy development and decision making, youth health and development indicators, mapping health and development indicators, issues related to knowledge transfer for improved decision making

Thom Garfat, PhD (Victoria)

Residential CYC practice, the therapeutic use of daily life events, engagement with families in CYC practice, relational CYC practice, self in CYC, outcomes that matter in working with young people and families, the application of the circle of change

Kiaras Gharabaghi, PhD (Dalhousie)

Life-space intervention, residential care and treatment, education experiences of children and youth in care, social pedagogy models of care, community-based interventions in an international context

Rebecca Gokiert, PhD (Alberta)

Early childhood measurement and evaluation, validity of screening and assessment processes and tools, cross-cultural approaches to screening and assessment, mixed methodologies and community-based research and evaluation

Nevin Harper, PhD (Minnesota)

Outdoor and adventure-based activity, children and nature, experiential teaching and learning, mixed methods and program evaluation, leadership

John Hart, PhD (Southern California)

Gender studies/men's issues, fathering, Indigenous traditional healing, meditation training for youth health and well-being

Elizabeth Jones, PhD (Southern California)

Learning through play, emergent curriculum, active learning for adults, online learning, peacemaking

Sylvia Kind, PhD (British Columbia)

Early childhood curriculum, children’s artistic and expressive languages, studio research and the role of the atelier in early childhood, art practice as living inquiry

Philip C. Lancaster, PhD (Ottawa)

Child soldiers, children affected by armed conflict, sexual and gender-based violence, political philosophy, genocide
Kofi Marfo, PhD (Alberta)

Early child development, including care and education, development science and social policy, socio-cultural contexts of human development, parent-child interaction, early intervention: program efficacy, critical analysis of applied research, cognition, learning, and instruction, evaluation of educational interventions/innovations, mental retardation/developmental disabilities, international perspectives in developmental practice

Gord Miller, PhD (Victoria)

Child and youth health promotion, social welfare services and policy development, community youth development, school as a setting for health promotion, social determinants of health, adolescent health, collaborative action research, evaluation models and approaches

Wayne Mitic, EdD (State, NY)

Utilization-focused evaluation as it pertains to health promotion programs and services, health promotion planning as it relates to chronic disease prevention

Peter Moss, MA (London)

Early childhood services, relationship between early years services, schools, and free-time services, workforce in services for children and young people, leave policies for parents, relationship between care and employment

Michelle Neuman, PhD (Columbia)

International early childhood care and development, child and family policy in comparative perspective, education politics and policy, international education development, program evaluation

Bame Nsamenang, PhD (Ibadan)

Africa’s future hope – children and youth

Esther Oduolowu, PhD (Ibadan)

Early childhood development (ECD), education and literacy

Carmen Rodriguez, PhD (Victoria)

Aboriginal childrearing practices, aboriginal worldviews, bilingual education, identity and child development across cultures, multicultural approaches to teaching and learning

Shlomo Romi, PhD (Toronto)

Non-formal education, qualification of workers and residential schools, psychological assessment, custody cases and psychological characteristics of dropout and delinquent youth, youth in distress, training workers and therapeutic intervention

Blythe Shepard, PhD (Victoria)

Rural youth, families and children living with Fetal Alcohol Spectrum Disorder, training/supervision of helpers, narrative methodology, child and family responses to natural disasters

Hans Skott-Myhre, PhD (Minnesota)

Globalization, radical youthwork, youth subcultures, philosophy of child and youth studies, body practices and creative force of childhood and youth, children, youth and popular culture, qualitative and ethnographic research methods, post-colonial/post-capitalist subjectivity

Victoria Smye, PhD (British Columbia)

Access to mental health and addictions care, inequities in access to mental health and addictions care with a particular focus on Aboriginal peoples and women, long term health effects for women leaving intimate partner violence, Aboriginal women’s experiences of leaving intimate partner violence, suicide prevention

Carol Stuart, PhD (Victoria)

Professional practice standards, evidence based practice, youth resilience and youth at risk, participatory research and qualitative approaches to research

Beth Blue Swadener, PhD (Wisconsin-Madison)

Decolonization of research in cross-cultural contexts, cultural diversity and an early childhood education, inclusion of children with disabilities, homelessness in international context/street children and youth, social policies affecting children and families

Affrica Taylor, PhD (New South Wales)

Geographies of childhood, settler colonial place relations, common worlds childhoods and pedagogies (see webpage: www.commonworlds.net), children’s multispecies relations, Indigenous childhoods and ontologies

Bruce Tobin, PhD (Washington)

Expressive therapies, child abuse and trauma, effects of television on child development, issues in inter-cultural counselling in First Nations communities

Steve Van Bockern, EdD (South Dakota)

Youth placed at risk, strength-based classroom discipline, personal and professional development, best practice teaching and school leadership, emotional intelligence, resiliency

Emily Vargas-Baron, PhD (Stanford)

National-level policy planning for integrated early child development, children’s needs and responsive programs in crisis and post-crisis nations, educational policy planning and systems development, systems for planning, coordinating, and evaluating national-level integrated early child development systems, early child development training systems, curriculum, and materials development, parent education systems
Degrees and Specializations Offered

The School of Child and Youth Care offers a Master of Arts (MA) and a Doctor of Philosophy (PhD) in Child and Youth Care. The programs have an applied focus, preparing professional practitioners in the child and youth care field for leadership in advanced practice, policy and research.

The School of Child and Youth Care has been able to respond to child and international development needs through the Early Childhood Development Virtual University (ECDVU) program. This program is only available on a distributed learning, special delivery basis in international development regions and contexts (for example, Africa, the Middle East). The students participating in these deliveries are identified on a group basis through a country or community nomination process (not through self-registration). See the ECDVU website: <www.ecdvu.org>.

Facilities

The School of Child and Youth Care houses laboratories designed for professional practice with children, youth and families. The School is affiliated with the Centre for Youth and Society and the Centre for Addictions Research. It operates special educational initiatives, including the Early Childhood Development Virtual University (ECDVU) program. This program is only available on a distributed learning, special delivery basis in international development regions and contexts (for example, Africa, the Middle East). The students participating in these deliveries are identified on a group basis through a country or community nomination process (not through self-registration). See the ECDVU website: <www.ecdvu.org>.

Financial Support

The School provides funding to a limited number of students in the form of fellowships, awards, research assistantships, and teaching assistantships. University of Victoria Fellowships (currently up to $15,000 for MA degree candidates, up to $18,000 for PhD candidates) may be awarded annually to registered full-time students of high academic standing (7.0 on the UVic grading scale/A- or above, with applications completed before February 15). Teaching or research assistantships may be obtained from the University through employment in the department.

Students in Child and Youth Care may be nominated for a limited number of additional scholarships. Detailed information on awards and application procedures and deadlines is available at the Faculty of Graduate Studies website: <www.uvic.ca/graduatestudies>. The provincial and federal governments each offer student loans to full-time candidates who meet the requirements. In addition, the University of Victoria Tuition Bursary Fund offers assistance to qualified students in serious financial difficulty.

Students should also apply for external sources of funding through agencies such as Social Sciences and Humanities Research Council and the Canadian Institute for Health Research <www.cihr-irsc.gc.ca/funding>, the Michael Smith Foundation <www.msfrf.org> and from other provincial and federal funding agencies.

Guidelines for Professional Conduct

The School of Child and Youth Care expects graduate students to develop and adhere to a professional code of conduct. The school supports models for professional conduct based on the following guidelines:

- submission of oneself to a professional code of ethics
- exercise of personal discipline, accountability and judgement
- acceptance of personal responsibility for continued competency and learning
- willingness to serve the public, client or patient and place them before oneself
- ability to recognize the dignity and worth of all persons in any level of society
- willingness to assist others in learning
- ability to recognize one’s own limitations
- maintenance of confidentiality of information appropriate to the purposes and trust given when that information was acquired
- acceptance that one’s professional abilities, personal integrity and the attitudes one demonstrates in relationships with other persons are the measure of professional conduct

Unprofessional Conduct

Graduate students in the School of Child and Youth Care are subject to the provisions of the code of ethics of their respective profession, and may be required to withdraw from the school for violating these provisions. Graduate students may also be required to withdraw from their school when ethical, medical or other reasons interfere with satisfactory practice in their respective discipline.

Admission Requirements

General

All candidates for the degree of MA or PhD in Child and Youth Care must meet all general requirements of the Faculty of Graduate Studies, as well as the specific requirements of the School of Child and Youth Care. Candidates need to have been involved in some manner with the CYC field or be strong candidates from a related field. All application materials, except for the sample of academic writing, must be submitted to the Graduate Admissions and Records Office. Entry to the program is on a competitive basis, and enrolment may be restricted in any given year.

Admission to Master’s Programs

Candidates will have a baccalaureate degree from a recognized university, or equivalent qualifications, with an academic standing acceptable to the School and the Faculty of Graduate Studies. In general, this means a B standing (5.0 GPA) or better in the final two years of the undergraduate degree. Students who do not have an undergraduate degree in Child and Youth Care will be expected to have successfully completed an upper level course in developmental theory focused on children, youth and their families and to demonstrate suitability for the master’s program in...
terms of an appropriate vocational background and future career goals. In addition, all applicants typically have two years post-baccalaureate professional employment in the child and youth care field.

Applicants must meet all of the admission requirements of the Faculty of Graduate Studies. In addition, applicants must submit a professional resumé, with complete work, education, training and activity history; professional references; and a sample of academic writing. A personal statement of intent related to the program is also required.

The program admits students on an annual basis for September entry, with limited enrolment. The course delivery offers full- or part-time enrolment.

Initial inquiries regarding the master’s program should be addressed to the Graduate Adviser, School of Child and Youth Care. Application forms may be obtained from the Graduate Admissions and Records office. Each applicant will be assessed individually by the School of Child and Youth Care. Normally, admission will be limited to approximately 10-15 students per year.

Admission to the PhD Program

Candidates will have a minimum of B+ (6.0 GPA) average and a master’s degree in Child and Youth Care or an allied discipline that demonstrates research experience and a capacity to conduct research. (Candidates whose previous degrees do not have a research component will be required to undertake and write a qualifying research activity.)

Each candidate accepted into the program will require one faculty member who is his/her agreed supervisor and a second faculty member who will serve on his/her supervisory committee. Admission to the program is restricted by the availability of faculty supervisors. Admissions decisions are made by the SCYC faculty.

Candidates are strongly encouraged to apply for external funding and should indicate on their applications where they have applied for such funding.

In addition to the documentation required by the Faculty of Graduate Studies, the School of Child and Youth Care requires that applicants submit the following:

- A Curriculum Vitae;
- A comprehensive written statement outlining their intentions and expectations for their PhD program including: (a) an outline of relevant background, (b) their past and current research interests, (c) future professional goals and their work’s potential contribution to the field of child and youth care;
- A sample of writing that demonstrates graduate level writing capacity;
- Two academic references;
- Two professional references from people in positions to comment on the applicant’s professional capacity;
- GRE scores, if available.

All short-listed candidates will be interviewed by a faculty admissions committee.

Deadlines

The deadline for submitting an application is December 15 for international applicants and January 31 for domestic applicants. Please note that the School accepts students for a September entry only. Completed applications submitted by these deadlines are automatically considered for University of Victoria Fellowships. The School accepts MA students annually and will be accepting PhD students every other year, with the next intake in 2017.

Program Requirements

All students in the School of Child and Youth Care must adhere to the Faculty of Human and Social Development’s Guidelines for Professional Conduct, and will be expected to function within the terms of the code of conduct of an appropriate professional association. All travel, accommodation, meal, textbook, course reading and other expenses related to attending course sessions are in addition to the program tuition costs, and are the responsibility of the student.

Students are required to have access to a computer (PC or Macintosh) with Internet capabilities.

Master’s Program

The School of Child and Youth Care offers a Master of Arts in Child and Youth Care in a flexible delivery format to ensure accessibility to individuals working in the field. The program has an applied focus, preparing professional practitioners in the child and youth care field for leadership in advanced practice, training, research and service support roles.

Child and Youth Care practice experience is essential to the master’s program; students are required to complete at least one field-work placement approved in writing by their faculty coordinator. A wide range of child and youth care settings and programs are suitable, and selection should be made in consultation with the faculty coordinator. Individual students are responsible for all related field work costs, including travel, criminal records checks, telephone, accommodation and other costs.

Master’s—Thesis Option

The program of study consists of a total of 18 units:

- 13.5 units of core courses and electives
- 4.5 units of thesis

Course Requirements

<table>
<thead>
<tr>
<th>Course Code</th>

<tr>
<td>CYC 541</td>
<td>Historical and Contemporary Theoretical Perspectives in Child and Youth Care</td>
</tr>
<tr>
<td>CYC 543</td>
<td>Qualitative Research Methods in Child and Youth Care</td>
</tr>
</tbody>
</table>
Other Requirements

As outlined in the course requirements, MA students must complete a practicum. The minimum number of practicum hours for CYC 553 is 165 for a 1.5 unit course or 300 hours for a 3.0 unit course. It is expected that a minimum of 15 hours will be spent in direct (individual or group) supervision with the field site supervisor.

Thesis

The focus of a thesis is on a theoretical issue and methodology. This includes the application of a research question, a thorough literature review, an analysis of data, a presentation of findings, and the implications of findings for further research and practice. Students must follow the Guidelines for the Preparation of Master's Theses and Doctoral Dissertations (available online from Graduate Admissions and Records).

The thesis process has two components: 1) the required CYC 558 Applied Research Seminar, that is the first stage of proposal writing and ethics review (1.5 units) and 2) the research process, thesis writing and oral defence (4.5 units).

Oral Examination

Students are required to pass an oral examination at the end of their thesis.

Program Length

The maximum time limit for the MA Program is 5 years. It is expected that full-time students will complete their programs in less than 3 years.

Project-based Master’s

The program of study consists of a total of 18 units:

- 13.5 units of core courses and electives
- 4.5 units of research project

Other Requirements

As outlined in the course requirements, MA students must complete a practicum. The minimum number of practicum hours for CYC 553 is 165 for a 1.5 unit course. Of these 165 hours, it is...
expected that 15 hours would be dedicated to meetings with the site supervisor to set goals, evaluate progress, and discuss issues.

Final Project
The focus of a project is on practice. It has a service-oriented intent. The project may involve one or more of the following: needs assessment, program design, curriculum development, documented practice intervention, program evaluation, or publishable review/synthesis of an aspect of the CYC literature for the benefit of a particular service group requesting this as a service. Students can discuss other possible projects with their supervisors.

The final project has two components: 1) the required CYC 558 Applied Research Seminar, that is the first stage of proposal writing and ethics review (1.5 units) and 2) the project development, final text and oral defence (4.5 units).

Oral Examination
Students are required to pass an oral examination at the end of their project.

Program Length
The maximum time limit for the MA Program is 5 years. It is expected that full-time students will complete their programs in less than 3 years.

PhD Program
The focus of the PhD program is the preparation of graduates who will play key leadership roles at provincial, national, and international levels in the broad field of Child and Youth Care. Through research and knowledge development, and with a particular emphasis on the scholarship of practice, graduates will influence teaching, research, policy, practice, program development, and evaluation.

The School of Child and Youth Care is also committed to addressing issues related to communities or populations that have been historically oppressed or marginalized. The courses address theoretical and practical foundations for working within and across cultures.

The program of study consists of a total of 30 units. PhD program students will be expected to take a minimum of 7.5 units of core courses, with additional course work if necessary as determined by their committees. The remaining units will consist of at least 3 units of elective courses, 3 units of Candidacy Examinations, and a dissertation normally worth 16.5 units.

Course Requirements
CYC 641 (3.0) Generating Knowledge in Child and Youth Care
CYC 643 (1.5) Qualitative Research in Child and Youth Care
CYC 645 (1.5) Quantitative Research in Child and Youth Care
CYC 671 (1.5) Social and Cultural Contexts of Child and Youth Care Policy, Practice, Research and Pedagogy
CYC 693 (3.0) Candidacy Examinations
CYC 699 (16.5) Dissertation

Program Electives
CYC 564 (1.5) Special Topics in Child and Youth Care Research
CYC 568 (1.5) Program Evaluation and Policy in Child and Youth Care
CYC 569 (1.5) Human and Organizational Change
CYC 571 (1.5) Youth Substance Use: Perspectives on Theory, Research and Practice
CYC 580 (1.5) Child and Youth Care in the Context of International Development
CYC 582 (1.5) Children’s Survival, Health, and Development in Ecocultural Context
CYC 680 (1.5 or 3.0) Doctoral Seminar in Child and Youth Care
CYC 682A (1.5) Internship in Child and Youth Care Research
CYC 682B (1.5) Practice Internship in Child and Youth Care

Other Requirements
Students will normally be in residence while taking core courses.

Candidacy
Students will be expected to complete two candidacy papers (one focused on the substantive area of interest including related theories, and the other on methodology related to their area and topic of interest) and an oral examination before qualifying to undertake PhD research and a dissertation. Within thirty-six months of registration as a provisional doctoral student and at least six months before the final oral examination, a student must pass a candidacy examination.

PhD Proposal
Following the successful completion of candidacies, the doctoral student will produce a research proposal. The student will be expected to outline his/her research proposal and answer questions from his/her supervisory committee as part of the approval process. The committee members will then indicate by signature their support and approval of the proposed research on the proposal and the student will proceed to the ethics review process (as appropriate) and subsequent research.

Dissertation
The doctoral dissertation must be original work and constitute a significant contribution to knowledge in the candidate’s field of study. It should contain evidence of broad knowledge of the relevant literature, and should demonstrate a critical understanding of the works of scholars closely related to the subject of the dissertation. Material in the dissertation should, in the opinion of scholars in the field, merit publication.

Oral Examination
Students are required to pass an oral examination at the end of their dissertation.
Program Length

The maximum time limit for the PhD Program is 7 years. It is expected that full-time students will complete in less than 5 years.

Graduate Diploma in International Child and Youth Care for Development

The School has responded to the child and youth care needs of developing countries by creating a culturally and contextually appropriate graduate diploma program designed to advance country-identified development priorities. The program consists of six 500-level courses that form part of the School’s Master’s degree program (CYC 541, CYC 565, CYC 547, CYC 549, and two CYC 590 courses). This program is available only through specific country partnerships. Successful completion of these six courses does not automatically count towards a Master’s degree from the School, as admissions to the School’s Master’s degree program is through a separate admissions process.

Co-operative Education

Participation in the Co-operative Education program – which enables students to acquire knowledge, practical skills for employment, and workplace experience – is optional for Master’s and PhD students. Master’s students complete two work terms and PhD students complete three (a work term consists of four months of full-time, paid employment). Students require permission from their academic adviser and graduate adviser, as well as the Co-op co-ordinator, to participate in the Co-op program. Interested students should contact the Co-op office (located in HSD A366) early in their first term. Students are also referred to “General Regulations: Graduate Co-op”, page 56.

Faculty Members and Areas of Research

Catherine Althaus-Kaefer, PhD (Griffith University), Associate Professor
Political risk calculation, public sector leadership, policy-making processes, religion and politics

Herman Bakvis, PhD (UBC), Professor
Intergovernmental relations, government structure and organization, political parties and interest groups

Emmanuel Brunet-Jailly, PhD (U Western Ontario), Associate Professor
Local government and politics, cross-border regions, comparative urban politics.

J. Barton Cunningham, PhD (Southern California), Professor
Quality of working life, organizational theory, decision making, stress and motivation, human research management.

Lynda Gagné, PhD (UBC), Assistant Professor
Child care policy, children outcomes, social programs, applied econometrics and microeconomics

David Good, PhD (California, Berkeley), Professor
Public sector reform, budgetary and policy-making process; social policy
Budd Hall, PhD (UCLA), Professor
  International community development, community-university engagement, social movements

John Langford, PhD (McGill), Professor Emeritus
  Canadian politics and government, machinery of government, administrative ethics

Evert A. Lindquist, PhD (California, Berkeley), Director of the School of Public Administration and Professor
  Machinery of government and policy-making, policy communities and networks, the role of think tanks

James N. MacGregor, PhD (Victoria), Professor
  Organizational behaviour, human information processing

Richard T. Marcy, PhD (Oklahoma), Assistant Professor
  Public sector leadership, leadership development, adaptation and cognition in organizations, management of meaning in organizations

James C. McDavid, PhD (Indiana), Professor
  Program evaluation, performance management, local government service delivery

Tara L. Ney, PhD (Southampton), Associate Professor
  Conflict-related impact of policy, discourse theory and conflict, war-affected children, family law policy, health care policy processes, restorative justice

Lynne Siemens, PhD (Hertfordshire), Associate Professor
  Community development; entrepreneurship and small business; rural economic development; government and business relations; organizational behaviour; academic team development

Kimberly Speers, PhD (Alberta), Assistant Teaching Professor
  Policy analysis and public policy; government relations and management consulting; performance measurement and planning

Lindsay Tedds, PhD (McMaster), Associate Professor
  Underground economy; tax non-compliance; economics of taxation; public economics; time use; timing of stock option awards; applied econometrics

Thea Vakil, PhD (Victoria), Associate Director of the School of Public Administration and Associate Professor
  Design and maintenance of organizations; structure and functioning of government and the non-profit sector; principles and values in public administration

Rebecca N. Warburton, PhD (London), Associate Professor
  Health economics, economic evaluation, evidence-based management

Adjunct Faculty Appointments

Oliver Brandes, LLB (UVic), Adjunct Professor
Leslie Brown, BSW (Regina), MPA, PhD (UVic), Adjunct Professor
John L. Fryer, BSc (London), MA (Pitt), Adjunct Professor
Laurie Jackson, BSc, MEd (UofA), PhD (UVic), Adjunct Professor
Harvey Lazar, BSc (McGill), MA (UBC), PhD (LSE), Adjunct Professor
Michelle LeBaron, MA (SFU), LLB (UBC), Adjunct Professor
Catherine Morris, JD (UofA), LLM (UBC), Adjunct Professor
Victor Murray, BA (Manitoba), MA (Minn), PhD (Cornell), Adjunct Professor
Gordon Smith, PhD (MIT), Adjunct Professor
Jo-Anne Stolz, PhD (UVic), Adjunct Professor
Barry Carin, BA (McGill), PhD (Brown), Adjunct Associate Professor
Ryan Compton, PhD (Washington U, St. Louis), Adjunct Associate Professor
Evelyn (Lyn) Davis, PhD (Florida State), Adjunct Associate Professor
Sharon Manson Singer, PhD (Brandeis), Adjunct Associate Professor
Dale Wall, BA (SFU), MPA (UVic), Adjunct Associate Professor
Michelle Brady, BA (Honours) (Murdoch), PhD (UofA), Adjunct Assistant Professor
Tracy Byrne, PhD (Glasgow), Adjunct Assistant Professor
Peter R. Elson, PhD (UofT), Adjunct Assistant Professor
Allison M. Habkirk, BA (UVic), MA (UBC), MPA (UVic), Adjunct Assistant Professor
Yvonne Harrison, PhD (UVic), Adjunct Assistant Professor
Sabine Lehr, BA (Open University), MBA (London), PhD (UVic), Adjunct Assistant Professor
Gordon McIntosh, PhD (UVic) Adjunct Assistant Professor
Brant Popp, MPA (UVic), Adjunct Assistant Professor
Carol-Anne Rolf, MA (UofA), MPP (California, Berkeley), Adjunct Assistant Professor
Diana M. Smith, BSc (UofA), MPA (Carleton), Adjunct Assistant Professor
Sam Weller, CA, MBA, Adjunct Assistant Professor

Degree Offered

Master of Arts (MA).

Financial Support

The University of Victoria funds a limited number of Graduate awards for full-time study. All students admitted to the Master of Arts in Community Development program are automatically considered for this financial support.
ADMISSION REQUIREMENTS

Applicants should have, or be about to receive, a bachelor’s degree in any discipline. Ideally, applicants should have an average of B or better for the final two years of study. They must also have a minimum of four years of professional experience, paid or volunteer, in the community development sector. International students should refer to the Faculty of Graduate Studies’ international admission requirements. Applicants who do not possess a Canadian undergraduate degree will be required to write and submit official results of the Graduate Management Admission Test (GMAT). International students whose first language is not English are required to provide valid test results for the Test of English as a Foreign Language (TOEFL). The minimum score for the TOEFL is 610 on the paper-based test and 102 on the Internet-based test.

Applicants without a B average may be admitted as mature students, provided they have an undergraduate degree and have had four years of relevant professional experience since the completion of their degree. Complete résumés are required to determine the eligibility of mature students for admission, which must be approved by the Dean of Graduate Studies.

In addition to documents required by the Faculty of Graduate Studies, the program requires each applicant to submit the following:

- a detailed résumé of background information, professional or other relevant experience
- two academic or professional references from individuals who can provide a candid assessment of the applicant’s abilities and
- a 750-1000 word statement of intent outlining why they are seeking an MA in Community Development and how the degree relates to their career plans, personal values and goals.

Students will be admitted on the basis of admission requirements established by the Faculty of Graduate Studies and on guidelines established by the Admissions Committee regarding previous academic and work experience relevant to the field of community development.

Initial inquiries should be addressed to the Administrative Assistant, MACD Program.

Applications should be sent to the Graduate Admissions and Records Office.

Deadlines

September 30 for Domestic and International applicants.

PROGRAM REQUIREMENTS

The program consists of 19.5 units of study, including 4.5 units for the Master’s Project (CD 596/598). Students are required to attend a two-week summer residency in the first and fourth terms and a one-week summer residency in the seventh term. The remaining courses are completed online.

Given the cohort nature of the program, students must complete each term successfully before proceeding further through the program.

Course Requirements

Course requirements consist of 9 core courses and one elective.

- Core Courses: CD 501, 504, 505, 506, 510, 512, 524, 525, 526
- Elective Courses: Subject to availability, choice of one elective from CD 507, 508, 509, 518, 519, 521, 522, 523, 590 as well as courses in related fields of study offered by the School of Public Administration or by other departments, with permission of the Graduate Adviser.

- Final Requirement: Beginning during their first summer residency, students will work on a Master’s Project (CD 596/598) addressing a management, policy or program problem for a client in the community development sector.

Program Length

The program begins each May, operates year round and can be completed in 2.25 years.

Master of Arts in Community Development

First Summer: On-Campus and Online Courses

CD 501 (1.5) Anchoring a Change Agenda: Foundations
CD 524 (1.5) Leadership and Organizational Development for Communities
Residency Workshop: On campus

First Fall: Online

CD 504 (1.5) Practices and Perspectives on Forging Change
CD 505 (1.5) Community Based Research: Foundations

First Spring: Online

CD 506 (1.5) Enterprise Development for Community Benefit

Second Summer: On-Campus and Online Courses

CD 510 (1.5) Leadership, Management and Governance within Organizations
CD 525 (1.5) Managing Organizations, Systems and Community Transformations
Residency Workshop: On campus

Second Fall: Online

CD 512 (1.5) Program/Project Design, Management and Evaluation

Second Spring: Online

Choice of one elective

Third Summer: On-Campus and Online Courses

CD 526 (1.5) Agenda for Social Change: Moving Forward
Program requirements for students admitted prior to May 2014 will remain as detailed in previous calendars.

**Master’s Project**

The Master’s Project (CD 596/598) requires students to complete a major project for a community development client, in consultation with an academic supervisor. The project is expected to be a substantial analysis of an organizational issue, policy issue, or other relevant topic approved by the Graduate Coordinator. A written project report will be prepared and submitted to an oral examination committee.

**Oral Examination**

Required for the Master’s project (CD 596/598).

**Guidelines for Professional Conduct**

The School of Public Administration expects graduate students to exhibit professional conduct according to the following guidelines:

- submission of oneself to the professional codes of conduct associated with one’s employment and/or professional membership(s);
- exercise of personal discipline, accountability, and judgement;
- acceptance of personal responsibility for continued competency and learning, including the capacity to be a reflective practitioner;
- willingness to serve the public;
- demonstrated ability to recognize the dignity and worth of all persons;
- willingness to assist others in their learning;
- ability to recognize and work with one’s own limitations;
- maintenance of the confidentiality of information, including all electronic communication, appropriate to the purposes and trust given when that information was acquired;
- acceptance that one’s professional abilities, personal integrity, and the attitudes one demonstrates in relationships with other persons are measures of professional conduct.

**Unprofessional Conduct**

Graduate student conduct in the School of Public Administration is subject to the professional standards of entities including, but not limited to, UVic Co-op and Co-op employers. A student exhibiting behaviour that does not meet the standards required by these relevant entities may be required to withdraw from the School.

### Computer Science

**GENERAL INFORMATION**

The Department of Computer Science offers a graduate program leading to the degree of Master of Science (MSc) or a degree of Doctor of Philosophy (PhD) in Computer Science. The department also participates in the Co-operative Education program at the graduate level. Research areas include strong emphases in software engineering, HCI, software requirements engineering, combinatorial algorithms, graph theory, algorithm design and complexity, music technology, numerical analysis, parallel and distributed computing and digital systems design.

Further information can be found at the department’s web page at <www.csc.uvic.ca>.

**Contact Information**

**Faculty Members and Areas of Research**

Mantis H. M. Cheng, PhD (Waterloo)

Distributed real time systems, embedded systems, theory of concurrency
Yvonne Coady, PhD (British Columbia)
Aspect-oriented software development, scalable system infrastructures, distributed virtualization

Daniela E. Damian, PhD (Calgary)
Software engineering, requirements engineering, computer-supported collaborative work, human-computer interaction, global software development

Alona Fyshe, PhD (Carnegie Mellon)
Machine learning, natural language processing, computational linguistics, neuroscience

Sudhakar N.M. Ganti, PhD (Ottawa)
Trends in data networking, traffic management, quality of service, protocols, routing, traffic engineering, network design, switching architectures, optical networks, performance evaluation, queueing theory

Daniel M. German, PhD (Waterloo)
Software engineering, software evolution, open source software development, and intellectual property

Daniel M. Hoffman, PhD (N Carolina, Chapel Hill)
Software engineering, emphasizing tools for automated testing of network protocols and firewalls

Bruce Kapron, PhD (Toronto)
Logic in computer science, cryptography, foundations of security, verification, computational complexity

Valerie King, PhD (Calif, Berkeley)
Graph algorithms and data structures, randomized algorithms and probabilistic analysis, concrete complexity, applications to computational biology and networks

D. Michael Miller, PhD (Manitoba)
Decision diagrams, reversible and quantum logic, multiple valued logic, design for testability, computer aided design for VLSI systems

Hans (Hausi) A. Müller, PhD (Rice)
Software engineering, software evolution, autonomic computing, adoption-centric software engineering, software architecture, software reverse engineering, software reengineering, program understanding, visualization, and software engineering tool evaluation

Wendy Myrvold, PhD (Waterloo)
Graph theory, graph algorithms, network reliability, embedding graphs on surfaces, Latin squares, combinatorial algorithms

Jianping Pan, PhD (Southeast, Nanjing)
Protocols for advanced networking, performance analysis of networked systems, applied network security

Frank Ruskey, PhD (Calif, San Diego)
Combinatorial algorithms

Venkatesh Srinivasan, PhD (India)
Theory of computation, computational complexity theory

Ulrike Stege, PhD (ETH Zurich)
Computational biology, parameterized complexity, design of heuristics, graph theory, and cognitive psychology

Margaret-Anne Storey, PhD (Simon Fraser)
Software engineering, human-computer interaction, information visualization, social informatics, knowledge management and computer-supported collaborative work

Andrea Tagliasacchi, PhD (Simon Fraser)
Computer graphics, geometry processing, real-time computer vision and its applications to augmented reality

Alex Thomo, PhD (Montreal)
Database and knowledge-base systems (especially new data-models for the web and query processing for such models), graph theory, formal languages and their application to databases

George Tzanetakis, PhD (Princeton)
Audio signal processing, computer music, machine learning, human computer interaction

Jens H. Weber, Dr. rer.nat (Paderborn)
Software engineering, data and knowledge engineering, health informatics, graph transformation systems, reengineering

Kui Wu, PhD (Alberta)
Computer networks, wireless and mobile networking, mobile computing, network security

Brian Wyvill, PhD (Bradford)
Computer graphics, solid modelling, implicit modelling, non-photorealistic rendering, sketch-based modelling

Emeritus Faculty

John A. Ellis, PhD (Northwestern)
Theoretical computer science, computational complexity, algorithms

R. Nigel Horspool, PhD (Toronto)
Compilers, virtual machines, programming language implementation, object-oriented programming

Eric G. Manning, PhD (Illinois)
Computer networks, distributed computing, QoS for multimedia
Jon C. Muzio, PhD (Nottingham)
- VLSI design and test, fault tolerant computing, design for testability, built-in self-test, multiple valued systems

D. Dale Olesky, PhD (Toronto)
- Linear algebra (especially matrix theory and combinatorial matrix analysis), numerical linear algebra, graph theory

Frank D. K. Roberts, PhD (Liverpool)
- Numerical analysis, approximation theory

Micaela Serra, PhD (Victoria)
- Hardware/software co-design, VLSI design and test

Gholamali C. Shoja, DPhil (Sussex)
- Computer communications and networks, multimedia systems, distributed and real-time systems

Maarten van Emden, PhD (Amsterdam)
- Constraint processing in engineering computations, operations research, programming methods and languages

William W. Wadge, PhD (Calif, Berkeley)
- Logic, semantics, programming languages, dataflow computation, artificial intelligence

Sue Whitesides, PhD (Wisconsin)
- Algorithms, discrete and computational geometry, motion planning, discrete mathematics

Adjunct and Cross-Listed Appointments

Ian Barrodale, PhD (Liverpool)
- Scientific programming applications, numerical analysis, operations research, object-relational database applications

Alexandra Branzan Albu, PhD (Bucharest)
- Computer vision, pattern recognition, image processing, human-computer interaction

Peter F. Driessen, PhD (British Columbia)
- Audio and video signal processing, computer music, sound recording, wireless communications, radio propagation

Brian Gaines, PhD (Cambridge)
- Modeling the socioeconomic infrastructure of information technology, human-computer interaction, cognitive psychology, systems theory

David G. Goodenough, PhD (Toronto)
- Remote sensing, software engineering, scientific visualization, artificial intelligence, grid computing, hyperspectral analysis, Kyoto carbon systems

Maia Hoeberechts, PhD (Western Ontario)
- Ocean science technology

Dimitrios Marinakis, PhD (McGill)
- Sensor networks

Patrick McGeer, PhD (Calif, Berkeley)
- Distributed systems and computer networking

Morgan Price, CCFP (British Columbia)
- Informatics, health system improvements

W. Andrew Schloss, PhD (Stanford)
- Electronic and computer music, musical acoustics, ethnomusicology

Pauline van den Driessche, PhD (Wales)
- Mathematical models in biology, combinatorial matrix analysis

Degrees and Specializations Offered

The Department of Computer Science offers graduate programs leading to the degree of Master of Science (MSc) in Computer Science, a double-degree MBA+MSc in Computer Science or a degree of Doctor of Philosophy (PhD) in Computer Science. The department also participates in the Co-operative Education program. Faculty members in the department are pursuing research in areas/groups that include Software Engineering, Software Systems, Theory of Computing, Combinatorial Algorithms, Programming Languages, Parallel, Networked and Distributed Computing, Functional and Logic Programming, VLSI Design and Test, Human Computer Interaction, Numerical Analysis, Visualization, Graphics, and Databases.

Facilities

The department offers its graduate students a range of facilities to support study and research as well as access to office space.

Financial Support

The department believes that adequate financial support of graduate students is a crucial factor in contributing to their overall success. For this reason, we normally accept graduate students only if they can be guaranteed support during their studies. This support comes from four main sources: scholarships, research grants, teaching assistantships, and salaries paid by employers of part-time or Co-op students.

If you are a Canadian citizen or a permanent resident of Canada, you should consider applying for an NSERC (The Natural Sciences and Engineering Research Council of Canada) post-graduate fellowship. Details are available from us, your local University or the NSERC website. Incoming students who hold NSERC post-graduate awards are awarded the President’s Research Scholarship. (Note: Canada Graduate Scholarship Award holders - doctoral level are not eligible to receive the President’s Research Scholarship.)

The University of Victoria awards a limited number of fellowships each year. These fellowships are for one year for MSc students. Fellowships for PhD students are renewable for one year subject
to their achieving first-class results (A-) on courses and a recommendation from the department. These fellowships are awarded mainly on the basis of academic excellence to those applicants who apply for a September entry point or were admitted at the May entry point. Fellowship holders may also apply for up to 120 hours of TA employment for the first two years of their Master’s program, or for the first 4 years of their PhD program. In addition, we typically give research grant support at both the Master’s and PhD levels to fellowship holders.

If you do not receive a fellowship, or other scholarship support, you may normally expect support consisting of up to 240 hours of TA employment in the first two years of your Master’s program, or in the first four years of your PhD program. You may also receive research grant support (or some alternative source funding).

Separate application forms are not required for the minimum support level funding described in the previous paragraph for University of Victoria Fellowships, or for other supplementary grants.

All these sources of financial support are renewable annually, dependent upon satisfactory performance and the availability of funds. Please note that you will be responsible for all tuition and ancillary fees associated with your program including textbooks.

Detailed information on graduate student support may be obtained from the Computer Science website at <www.csc.uvic.ca>.

**ADMISSION REQUIREMENTS**

**General**

Initial inquiries regarding graduate studies in Computer Science should be addressed to the Graduate Secretary, Department of Computer Science. The Faculty of Graduate Studies’ website contains information on how applicants will upload and submit supporting documents to their online application. The application and supporting documents are first evaluated by the Graduate Admissions and Records Office: <www.uvic.ca/graduatetestudies>.

Applicants for admission whose first language is not English must meet the English Competency Requirement as specified by the Faculty of Graduate Studies. The minimum acceptable TOEFL (Test of English as a Foreign Language) score for the Department of Computer Science is 575 on the paper-based test or an overall score of 90 on the Internet-based test (the minimum score for each section is Writing: 20; Speaking: 20; Reading: 20; Listening: 20). An overall score of at least Band 6.5 with no score of less than 6.0 on each academic component of the IELTS will be accepted. Even with passing TOEFL/IELTS scores, students may be required to take English language courses in addition to their other course work. The GRE (Graduate Records Examination) test is highly recommended.

Individuals interested in the Co-operative Master’s degree or Co-operative PhD degree should contact the Computer Science/Math Co-op Office for details about these programs.

**Admission To Master’s Programs**

Applicants for a Master’s Program should have a Major or Honours undergraduate degree in Computer Science/Computer Engineering/Software Engineering (or equivalent) OR a Major or Honours degree in Mathematics with an emphasis on Computer Science. A minimum of B+ (6.0) is required for courses taken in the last two years. A student who does not have such a degree may be admitted to the program but normally will be required to complete additional makeup courses. In doing so, the student must obtain a grade of at least B (5.0) in each makeup course, and an average B+ (6.0) overall in the makeup courses. Mature students are advised to consult the Faculty regulations regarding admittance. Final decisions on admissions are made by potential supervisors.

**Admission to the PhD Program**

PhD applicants must normally have completed a master’s degree in Computer Science, or the equivalent, with a first class standing. Final decisions on admissions are made by potential supervisors.

**Deadlines**

Applications may be submitted at any time, and students may opt to commence in any of the three terms (namely, September, January or May). However, it should be noted that most of our programs are geared toward those who start in September, and not all courses and support facilities are fully available at other times. We offer full-time, part-time and Co-op options for studies in Computer Science.

**Domestic Application Deadlines**

- September entry: deadline of January 15
- January entry: deadline of October 31
- May entry: deadline of January 15

**International Deadlines**

- September entry: deadline of January 15
- January entry: deadline of April 15
- May entry: deadline of September 15

*Primarily for VISA applicants and permanent residents whose most recent transcripts are coming from an overseas institution.

**Program Requirements**

The program of study for each student is determined by the student’s supervisory committee in consultation with the student. Normally, each graduate student is required to work as a teaching and/or research assistant as part of their program.

**Thesis-based Master’s**

**Course Requirements**

The Master’s Program consists of a minimum of 15 units, which include course work, a Research Skills course (CSC 595) and a Master’s thesis (CSC 599). All courses are valued at 1.5 units. At
at least 12 units of the program must be at the 500 level or higher. The remaining units must be at the 400 level or higher. A typical program would include: CSC 595 (1.5 units); three courses at the 500 level (4.5 units); two courses at the 400 or 500 level (3.0 units); and the Master's project, CSC 599 (6.0 units). Each student must satisfy the MSc Breadth Requirements as specified in the department MSc Regulations at <www.csc.uvic.ca/grad>.

**Oral Examination**

The Master's thesis must be defended in an oral examination.

**Program Length**

The department expects students to complete their Master's degree within the time limits set by the Faculty of Graduate Studies. Most students complete their program within two years. Students enrolled in a co-operative education program will have additional months added to the normal completion times equal to the time spent on Co-op work terms.

**Project-based Master's**

**Course Requirements**

Students may register for a Master's project (CSC 598), valued at 3 units, instead of a thesis. The Master's Program still consists of a minimum of 15 units, which include course work, a Research Skills course (CSC 595) and a Master's project (CSC 598). All courses are valued at 1.5 units. At least 12 units of the program must be at the 500 level or higher. The remaining units must be at the 400 level or higher. A typical program would include: CSC 595 (1.5 units); five courses at the 500 level (7.5 units); two courses at the 400 or 500 level (3.0 units); and the Master's project, CSC 598 (3.0 units). Each student must satisfy the MSc Breadth Requirements, as specified in the department MSc Regulations at <www.csc.uvic.ca/grad>.

**Final Examination**

A student who chooses the project option will also have an oral examination. This examination will cover the project as well as material from three courses chosen by the student's supervisory committee in consultation with the student.

**Program Length**

The department expects students to complete their Master's degree within the time limits set by the Faculty of Graduate Studies. Most students complete their program within three years. Students enrolled in a co-operative education program will have additional months added to the normal completion times equal to the time spent on Co-op work terms.

**PhD Program**

**Program Requirements**

For students entering with a master's degree, the PhD program consists of a minimum of 49.5 units, which include eight courses at the 500 level or higher, the Research Skills course (CSC 595), the PhD Candidacy (CSC 693), and a dissertation (CSC 699).

For students entering with a bachelor's degree, the PhD program consists of a minimum of 43.5 units, which include four courses at the 500 level or higher and the rest at the 400 level or higher, as well as (CSC 595), the PhD Candidacy (CSC 693), and a dissertation (CSC 699).

The student, with the approval of the supervisor, can apply for having the seminar course CSC 595 waived if he/she has already taken an equivalent course.

Each student must satisfy the PhD Breadth Requirements as specified in the department PhD Regulations at <www.csc.uvic.ca/grad>.

**Candidacy**

Each student must pass CSC 693 within two years of first registering as a provisional doctoral student and at least six months before the PhD dissertation is defended in an oral examination. A PhD student should be registered in CSC 693 from the start of the program. After passing CSC 693, a student should register in CSC 699. At any given time in the program, a PhD student should be registered in either CSC 693 or CSC 699, but not both. Details are specified in the department PhD Regulations at <www.csc.uvic.ca/grad>.

**Final Examination**

A student who chooses the industrial option will also have an oral examination. This examination will cover the project for CSC 597 as well as material from three courses chosen by the student's supervisory committee in consultation with the student.

**Program Length**

The department expects students to complete their Master's degree within the time limits set by the Faculty of Graduate Studies. This Master's option can be completed in four terms. Students enrolled in a co-operative education program will have additional months added to the normal completion times equal to the time spent on Co-op work terms.

**Master's – Industrial Option**

**Course Requirements**

Students may register for an Industrial project (CSC 597) valued at 1.5 units, instead of CSC 599 or CSC 598. This Master's program option consists of a minimum of 15 units, which includes course work, as well as CSC 595 and CSC 597. All courses are valued at 1.5 units. At least 12 units of the program must be at the 500 level or higher. The remaining units must be at the 400 level or higher. A typical program would include: CSC 595 (1.5 units); six courses at the 500 level (9 units); two courses at the 400 or 500 level (3 units); and CSC 597 (1.5 units).

**Oral Examination**

A student who chooses the industrial option will also have an oral examination. This examination will cover the project for CSC 597 as well as material from three courses chosen by the student's supervisory committee in consultation with the student.
Program Length

The department expects students to complete their PhD degree within the time limits set by the Faculty of Graduate Studies. Most students complete their program within three years. Students enrolled in a co-operative education program will have additional months added to the normal completion times equal to the time spent on Co-op work terms.

Co-operative Education

Participation in the Co-operative Education program, which enables students to acquire knowledge, practical skills and workplace experience, is optional for full-time Master’s and PhD students. Graduation with a co-operative education designation requires master’s students to complete two work terms and PhD students to complete three (a work term consists of four months of full time, paid employment). Students require permission from their academic supervisor and the Co-op coordinator to participate in the Co-op program. Interested students should contact the Engineering and Computer Science/Math Co-op office during their first year. Students should also consult “Co-operative Education” on page 55.

Certificate and Diploma Offerings

The Cultural Heritage Management Program offers a Graduate Professional Certificate in Cultural Heritage Studies that can be completed on its own or laddered to a Graduate Professional Diploma in Cultural Heritage Management. Both programs address issues and practices involved in the fields of cultural heritage, and are designed for individuals working with cultural heritage in settings such as museums, cultural centres, galleries, historic sites, parks and landscapes, urban revitalization and public service. The Graduate Professional Certificate is also designed to enable students engaged in graduate degree studies in related fields at UVic to undertake concurrent degree/certificate programs in which selected certificate courses are transferrable to the degree with the approval of the academic unit. Concurrent degree/certificate students can receive both a graduate degree and a graduate professional certificate upon completion of program requirements.

Admission Requirements

Graduate Professional Certificate in Cultural Heritage Studies

To be eligible for admission, students must have a baccalaureate degree with a minimum B (5.0) average in their last two years (30) units leading to the baccalaureate degree. Applicants with four or more years of relevant cultural heritage professional experience whose grade point average in their baccalaureate degree is below B may be considered for admission as a mature student.

Applications for admission are first received by the Graduate Admissions and Records Office which collaborates with the Program Admissions Committee to determine admissibility. Admission is a competitive process, based on both grades from prior studies, and evidence of professional experience and achievements that enable the Admission Committee to assess an applicant’s ability to successfully complete the program.

To apply for the Graduate Professional Certificate if you are not also enrolled in a graduate degree program, please complete the following, and submit either online or by mail, to Graduate Admissions and Records:

• the Faculty of Graduate Studies Application for Admission, available from the Faculty of Graduate Studies website <www.uvic.ca/gradstudies>
• two Assessment Reports
• relevant transcripts
• a professional resumé
• a statement of intent

As the starting date for the program may vary from year to year, application deadlines for current students and new domestic and international students are posted on the program website.

To apply for concurrent Graduate Professional Certificate status while enrolled in a graduate degree program, please assemble
the following and submit, either online or by mail by the posted
deadline, to Graduate Admissions and Records:

- an application to the Faculty of Graduate Studies specifying
  this program
- two Assessment Reports and, if you have worked,
  volunteered or done project work in the cultural heritage
  sector, one letter of reference from a workplace referee
- a professional resumé
- a statement of intent
- a memorandum from your Graduate Adviser confirming the
  number of Certificate units that can be applied to your
  graduate degree

**Graduate Professional Diploma in Cultural Heritage Management**

Admission to the Graduate Professional Diploma in Cultural Heritage Management is based on completion of the Graduate Professional Certificate in Cultural Heritage Studies, the Diploma in Cultural Resource Management, the Professional Specialization Certificate in Collections Management, or the Professional Specialization Certificate in Heritage Conservation Planning within the previous six years, and with a 5.0 (B) average. Applicants holding a graduate degree or certificate in museum studies or heritage conservation may also be considered.

If you are completing, or have completed, the Graduate Professional Certificate in Cultural Heritage Studies, you can apply by completing and submitting the following by the posted deadline:

- an application to the Faculty of Graduate Studies specifying
  this program

If you have completed the Diploma in Cultural Resource Management, the Professional Specialization Certificate in Collections Management, the Professional Specialization Certificate in Heritage Conservation Planning within the previous six years, or a related graduate degree or certificate please assemble the following and submit, either online or by mail by the posted deadline to Graduate Admissions and Records:

- the Faculty of Graduate Studies Application for Admission,
  available online from the Faculty of Graduate Studies website
  <www.uvic.ca/gradstudies>
- two Assessment Reports from academic referees and one
  letter of reference from a workplace referee (e.g. current or
  former supervisor) in a cultural heritage workplace
- relevant transcripts
- a professional resumé

**Program Requirements**

**Graduate Professional Certificate in Cultural Heritage Studies**

This program is designed to be completed on a part-time basis, to enable students to balance work or graduate study commitments. Students can focus on either a museum studies or heritage planning option by completing the following courses.

**Museum Option**

- Social Engagement (CH 561) .................................................... 1.5
- Curatorial Planning and Practices (CH 562) ............................ 1.5
- Visitor Experiences (CH 563) ..................................................... 1.5

**Heritage Planning Option**

- Heritage Conservation in Context (CH 570) .............................. 1.5
- Determining Significance of Heritage Resources (CH 571) ........ 1.5
- Heritage Conservation Planning (CH 572) ............................... 1.5

**Elective**

The final 3.0 units are selected from the AHVS 488A-U or AHVS 489A-L series of courses, or from CH 560 Cultural Heritage Stewardship and Sustainability (1.5), AHVS 591 Practicum (1.5), CH 584 Topics in Cultural Heritage Management (1.5), CH 588 or 589 Special Studies (1.5).

Students pursuing the museum studies specialization currently enrolled in the Diploma in Cultural Resource Management or the Professional Specialization Certificate in Collections Management may transfer 1.5 units of AHVS 488 or AHVS 489 credit to the Graduate Professional Certificate with the approval of the Program Adviser to satisfy the elective requirement. If they have completed AHVS 488B and AHVS 488J in their studies, they may request 3.0 units of transfer credit to replace CH 562 and satisfy the elective requirement.

Students pursuing the heritage planning specialization currently enrolled in the Diploma in Cultural Resource Management or the Professional Specialization Certificate in Heritage Conservation Planning may request to transfer AHVS 489C, AHVS 489K, and/or AHVS 489L, to a maximum of 4.5 units to the Graduate Professional Certificate with the approval of the Program Adviser.

**Graduate Professional Diploma in Cultural Heritage Management**

This program is designed to be completed on a part-time basis, one course per term, to enable students to balance work commitments. You are expected to take the two core courses sequentially over two terms. You are able to complete diploma requirements in two to three terms, depending upon your selection of a final course. Note: CH 560 Cultural Heritage Stewardship and Sustainability is a prerequisite to Graduate Professional Diploma coursework for those students entering on
the basis of a Diploma in Cultural Resource Management or a Professional Specialization Certificate in Heritage Conservation Planning or Collections Management.

Core Courses

Leadership in Cultural Heritage Management (CH 582) ... 1.5
Planning for Cultural Heritage Management (CH 583) .... 1.5

Elective

The final 1.5 units are selected from AHVS 488A, AHVS 488M, AHVS 488P, AHVS 488Q, or other AHVS 488 or AHVS 489 courses, or CH 584 Topics in Cultural Heritage Management (1.5), with the approval of the Program Adviser.

Faculty Members and Areas of Research

Tim Anderson, PhD (British Columbia)
TESOL/Applied linguistics, Language socialization, Second-language writing, Chinese as an additional language, Internationalization of higher education, Case study as a research method

Deborah L. Begoray, PhD (British Columbia)
Secondary English language arts, literacy, visual literacy and media, literacy and health

Donald L. Bergland, EdD (British Columbia)
Digital arts and technology, 3D interactive environments, multimedia, digital graphics, audio production, technology and art, techno-ethnography, creativity, studio production

David W. Blades, PhD (Alberta)
Theory and philosophy of science education curriculum, science education methodology, aesthetics in/of science education, ethics and curriculum development, curriculum history and theory, post-structuralism and curriculum change

Jillianne Code, PhD (Simon Fraser)
Teacher preparation elementary, teacher preparation secondary, applied research, educational psychology, twenty-first century learning, distributed e-learning, personal learning networks, online learning community development, educational technology

Michael J. Emme, EdD (British Columbia)
Creative play strategies and collaborative research with children, children's visual experience of school, art as self-directed therapy, artists collectives and community, photography as an art form, visual narrative forms in research including photonovela as multimodal inquiry and expression, lens media and communication, visual and arts-based methodologies

Leslee G. Francis-Pelton, PhD (Brigham Young)
Secondary mathematics methodologies, elementary mathematics methodologies, mathematics curriculum, assessment as/for/of learning in mathematics, development and use of iOS apps for learning mathematic

Wanda Hurren, PhD (British Columbia)
Curriculum theory, arts-based research, aesthetics and knowing, social studies and geography education, notions of identity and place, post-structural perspectives, poetic representation in writing and research

Valerie M. Irvine, PhD (Alberta)
Teacher preparation elementary, teacher preparation secondary, adult and lifelong learning, curriculum studies, applied research, twenty-first century learning, distributed e-learning, personalized learning networks, online learning community development, educational technology, theories of technology adoption

Graham P. McDonough, PhD (Toronto)
Philosophy of education, moral education; dissent, religious education, Catholic education; religion/spirituality in schools; philosophy in high schools
Onowa McIvor, PhD (British Columbia)

Todd Milford, PhD (Victoria)
Teacher preparation- elementary; science education, elementary; educational measurement, quantitative methods

James L. Nahachewsky, PhD (Alberta)
Twenty-first century literacies, teacher education, curriculum theory, e-readers and reading processes

Sylvia J. Pantaleo, PhD (Alberta)
Children's and young adult literature, response to literature, literature-based literacy programs, language and literacy, visual literacy, multimodality

Timothy Pelton, PhD (Brigham Young)
Mathematics education, applications of technology in education, assessment, development of educational apps

Monica Prendergast, PhD (Victoria)
Theatre, teacher preparation elementary, curriculum studies, aesthetic philosophy, drama/theatre education (K-12, and post secondary), applied drama/theatre, curriculum studies/ theory/philosophy, performance theory/performance studies, arts-based qualitative research methods

Anita Prest, PhD (British Columbia)
Music education, rural education, social capital, place-based and place-conscious education, paraxial music education philosophy, critical pragmatism, integrating Indigenous knowledge and perspectives in music education

Jason Price, PhD (OISE)
Teacher and educational leadership preparation, Indigenous/ countercultural education, education for ecological restoration, education for the advancements of human rights and happiness, educational policy and governance, peace education, governance simulations and youth leadership

Helen Raptis, PhD (Victoria)
Aboriginal education, applied research, social policy, gender, immigration/multiculturalism, native and aboriginal Canadians, race and ethnic relations, sociology, history

Theodore J. Riecken, EdD (British Columbia)
Teacher preparation elementary, aboriginal education, curriculum studies, educational change and innovation, technology in education, participatory research

Carmen Rodriguez de France, PhD (Victoria)
Indigenous education and culture, early childhood education, diversity, social justice, and anti-racist education, bilingualism and language development, internationalization

Patricia Rosborough, EdD (British Columbia)
Indigenous language revitalization, Indigenous language teacher education, Indigenous curriculum pedagogy in K-12 education

Wolff-Michael Roth, PhD (Southern Mississippi)
Workplace studies (aviation, software design), cultural-historical activity theory, conversation analysis, semiotics, gesture studies, applied cognitive science, phenomenology, human-computer interaction, interaction analysis, representation in scientific practice, discourse analysis, research methods (quantitative and qualitative)

Katherine J. Sanford, EdD (Alberta)
Teacher education, new literacies, learning through video games, gender and pedagogy, assessment, electronic portfolios, community-based engagement, museum and library education, qualitative research methodologies

Jodi Streelasky, PdD (British Columbia)

Michele Tanaka, PhD (Victoria)
Transformative Inquiry, teacher identity, holistic education, indigenous ways of learning and teaching, cross-cultural understanding, mindfulness in education, and place-based learning

Jennifer Thom, PhD (British Columbia)
Curriculum studies and elementary mathematics education, theories of mathematical understanding, ecological/ complex/EMBODIED forms of teaching and learning

Ruthanne Tobin, PhD (Victoria)
Elementary English language arts, instructional practices for struggling literacy learners, personalized learning

Michelle Wiebe, EdD (Montana)
Assessment in art (studio assessment, self assessment, theory assessment), leadership in the arts, arts program reform curriculum development, creativity development

Degrees and Specializations Offered
The Department of Curriculum and Instruction may offer programs leading to the Master of Education degree in the following areas:

- Art
- Curriculum Studies
• Early Childhood Education
• Language and Literacy
• Mathematics, Science, Social Studies or Educational Technology
• Social, Cultural and Foundational Studies

The Department of Curriculum and Instruction offers a Master of Arts and a Doctor of Philosophy in Educational Studies.

Facilities
MacLaurin Building: multi-media laboratories, Curriculum Laboratory.

Financial Support
All eligible graduate students are encouraged to apply for funding from provincial, federal and external sources. The Department of Curriculum and Instruction cannot guarantee funding but encourage students to consider the following.

University Fellowships:
Students who have an A- (7.0 on the UVic grading scale) may qualify for a University Fellowship. For full-time applicants seeking this Fellowship, the application deadline is February 15th.

Sessional Lecturers:
These are unionized positions for undergraduate courses. An interested student should submit their resume and cover letter to the Chair of Curriculum and Instruction. These positions are normally held for students who have completed at least one term of course work in the PhD program.

Research Assistants:
Individual faculty members with external research grants may employ graduate students as research assistants. The details about these appointments (salary, hours, etc.) are worked out between the individual graduate student and the faculty member.

Workstudy Positions:
Please visit the Office of the Registrar website for further information <www.uvic.ca/registrar/safa/work-study/index.php>.

Application Deadlines
Regular Student Application Deadlines for Complete Applications

February 15:
For full-time applicants seeking University Fellowships.

February 15:
For applicants seeking admission the September of that calendar year.

January 31:
For applicants seeking admission the May of that calendar year.

International Student Application Deadlines for Complete Applications

December 15:
For applicants seeking admission September of the following year.

October 15:
For applicants seeking admission for May of the following year.

ADMISSION REQUIREMENTS
For all degree programs, the following items are required to be uploaded when submitting an online application: resume, letter of intent, email contact information for two references, unofficial transcripts, and, for international students, TOEFL score. Official transcripts should be ordered after receiving the provisional admission email from Graduate Admissions and Records. Examples of writing are required if you are applying to the PhD program only. See “Faculty Admissions”, page 18, for Graduate Studies requirements. All materials are to be sent to the Graduate Admissions and Records Office.

The selection process is based on the strength of the application file and the availability of an appropriate supervisor.

Master of Arts
In addition to the usual admission requirements of the Faculty of Graduate Studies, some programs may require relevant professional experience.

Master of Education
In addition to the usual admission requirements of the Faculty of Graduate Studies, applicants must have had at least two years of successful relevant professional experience.

PhD Programs
Admission requirements include a master’s degree, good academic standing, and demonstrated research and writing ability.

PROGRAM REQUIREMENTS
Master of Education
MEd programs require 15.0 units of course work, including a project. No more than 3 units of course work may be at the 300 and 400 level. A project in research and/or curriculum development is required, and a comprehensive final examination (written and/or oral). MEd programs are normally offered as cohort groups.

Art Education (MEd)
This degree is a career credential intended for students who wish to develop their competencies in teaching studio-based art activities at the elementary and secondary school levels as well as in community settings. For the next intake date, please refer to website: <www.uvic.ca/education/curriculum/programs-courses/graduate/ae>.
**Course Requirements: Total = 15 units**
- EDCI 510 (3.0)  Research Issues & Studio Development
- EDCI 511 (3.0)  Drawing & Studio Development
- EDCI 513 (3.0)  Community Art Education
  
  either
  
  EDCI 512A (1.5)  Digital Arts
  
  and
  
  EDCI 512B (1.5)  Digital Presentation
  
  or
  
  EDCI 591 (3.0)  Selected Topics in Art Education
- EDCI 597 (1.5)  Comprehensive Examination
- EDCI 598A (1.5)  Project Proposal and Literature Review
- EDCI 598B (1.5)  Project

**Curriculum Studies (MEd)**

This program fosters critical analysis of educational discourses (for example, discourses of planning, implementation, evaluation, learning and teaching) to discern unintended as well as intended effects. This analysis is focused not only at the system level, but also and more importantly, at the level of each person’s daily professional practice, where the political and the personal are inevitably intertwined. The ethical question of how to act responsibly and appropriately is paramount.

**Course Requirements: Total = 15 units**

**Curriculum Studies—Project-based Option (MEd)**
- EDCI 531 (1.5)  Critical Discourses in Curriculum Studies
- EDCI 532 (1.5)  Emerging Trends and Topics in Curriculum Studies
- EDCI 580 (1.5)  Qualitative Research Methods
- EDCI 598A (1.5)  Project Proposal and Literature Review
- EDCI 598B (1.5)  Project
- EDCI 597 (1.5)  Comprehensive Examination (MEd program only)
- Electives (6.0)  Approved in consultation with student’s supervisor

**Early Childhood Education – Project-based Option (MEd)**

**Course Requirements: Total = 15 units**
- EDCI 531 (1.5)  Critical Discourses in Curriculum Studies
- EDCI 554 (1.5)  Comparative ECE: Curriculum, Context and Culture
- EDCI 580 (1.5)  Qualitative Research Methods
- EDCI 597 (1.5)  Comprehensive Examination
- EDCI 598A (1.5)  Project Proposal and Literature Review
- EDCI 598B (1.5)  Project
- Electives (6.0)  Approved in consultation with student’s supervisor

**Social, Cultural and Foundational Studies (MEd)**

The MEd provides students with the research skills and knowledge to work as master teachers, educational leaders, administrators, policy analysts, and consultants to government and other educational and community agencies. The MEd program consists of 15.0 units including a 3.0 unit project and 1.5 unit comprehensive examination. The program must be determined through consultation between the student and the supervisor.

**Course Requirements: Total = 15 units**

**Social, Cultural and Foundational Studies – Project-based Option (MEd)**

ONE Research Methodology course (1.5) (to be selected by student and supervisor) And TWO additional courses from the following list:
- EDCI 520 (1.5)  Seminar in Contemporary Issues in Philosophical Perspective
- EDCI 521 (1.5)  Contemporary Educational in Historical Perspective
- EDCI 522 (1.5)  Philosophy of Education Through Film and Media
- EDCI 523 (1.5)  Diverse Voices and Visions in Education
- EDCI 525 (1.5)  Planning for Effective Schools

PLUS
- EDCI 598A (1.5)  Project Proposal and Literature Review
- EDCI 598B (1.5)  Project
- EDCI 597 (1.5)  Comprehensive Examination
- Electives (6.0)  Approved in consultation with student’s supervisor

**Language and Literacy (MEd)**

The program is intended for those wishing to further their knowledge of pedagogical issues and practices relating to the teaching of Language and Literacy in populations ranging from pre-school to adult. The program is designed to accommodate students’ individual interests and objectives, and are undertaken with the guidance and direction of an academic supervisor.

**Course Requirements: Total = 15 units**

**Language and Literacy – Project-based Option (MEd)**
- EDCI 517 (1.5)  Reading Processes in the School Curriculum: Research and Processes
- EDCI 536 (1.5)  Language Processes in the School Curriculum: Oracy
- EDCI 556 (1.5)  Language Processes in the School Curriculum: Writing and Representing
- EDCI 597 (1.5)  Comprehensive Examination
- EDCI 598A (1.5)  Project Proposal and Literature Review
- EDCI 598B (1.5)  Project
Mathematics, Science, Social Studies and Educational Technology—Project-based Option (MEd)

This four-stream combined program is designed to provide a strong content component within the 15.0-unit degree while providing a central core of professional education in curriculum and instruction courses. The following courses outline a typical program, but all courses must be determined by the supervisor at the beginning of the program.

**Course Requirements: Total = 15.0 units**

- EDCI 532 (1.5) Emerging Trends and Topics in Curriculum Studies
- EDCI 570 (1.5) Research in Curriculum and Instruction in the Elementary Grades
  or
- EDCI 571 (1.5) Research in Curriculum and Instruction in the Secondary Grades
- EDCI 572 (1.5) Development and Implementation of the Curriculum in a Specific Area
- Approved Research Methods Course (1.5)
- EDCI 597 (1.5) Comprehensive Examination
- EDCI 598A (1.5) Project Proposal and Literature Review
- EDCI 598B (1.5) Project
- Electives (4.5) Approved in consultation with student's supervisor

Master of Arts

The MA in Educational Studies is a research-based program designed to accommodate students' individual interests and is undertaken with the guidance and direction of an academic supervisor. This 15.0 unit program requires 3.0 units of core courses, 4.5 units of specialty and elective courses, and a 7.5 unit thesis. No more than 1.5 units of course work may be at the 300 and 400 level. A research-based thesis must be written and successfully defended in an oral examination.

**Course Requirements: Total = 15 units**

- EDCI 514 (1.5) Educational Discourses
- EDCI 581 (1.5) Research Methodologies in Education
- Electives (4.5) Approved by the academic supervisor
- EDCI 599 (7.5) Thesis

Doctor of Philosophy (PhD)

The PhD in Educational Studies is a research-oriented program designed for students who wish to develop a comprehensive understanding and an integrated perspective of current educational theory and practice. It prepares graduates for professional, research and teaching positions in colleges and universities, or for leadership roles in school districts, provincial ministries and other public and private organizations, with regard to planning and implementation of curricula, instructional innovations and staff development programs. There are six areas of specialization within this program: Art Education; Curriculum Studies; Early Childhood Education; Language and Literacy; Mathematics, Science, Technology, and Environmental Education; Social, Cultural and Foundational Studies.

**Course Requirements: Total = 39 units**

The PhD program consists of 39.0 units, of which there is a 30-unit dissertation and 6.0 units of coursework, and a 3.0 unit candidacy examination. The coursework is made up of 3.0 units of core courses and 3.0 units of specialty and elective courses. The core courses are required to be taken in the first year of the program.

**Core Courses: 3.0 units**

- EDCI 614 (1.5) Discourses in Educational Studies
- EDCI 681 (1.5) Advanced Research Design

**Specialty and Elective Courses: 3.0 units**

* Normally up to 1.5 units of contemporary equivalent or appropriate graduate coursework not used towards another degree may be transferred into the specialty area from recognized universities with the approval of the supervisory committee, the departmental Graduate Adviser, and the Faculty of Graduate Studies (see "Transfer of Academic Credit", page 35). A maximum of 1.5 upper level undergraduate level units may be used toward the degree with the approval of the supervisor in consultation with the supervisory committee, the departmental Adviser, and the Faculty of Graduate Studies. In special cases, assessment of prior learning involving other educational activities, professional experiences, or credentials may be evaluated as equivalent to
courses required in the specialty area allowing students to substitute appropriate elective courses for the required courses. All applications for transfer credit and equivalent prior learning must be made at the time of admission or in the first semester of study.

**Candidacy Examination: 3.0 units**
EDCI 693 (3.0) Candidacy Examination

**Dissertation: 30 unit**
EDCI 699 (30) PhD Dissertation

**Candidacy**
Candidacy Examinations will be completed in both the core and specialization areas as set by the Supervisory Committee in conjunction with the department’s Graduate Admissions and Programs Committee. Students must be within 1.5 units of completion of all coursework before they may complete the candidacy requirement. The candidacy examinations will be both written and oral.

**Program Length**
At least two years.

**CO-OPERATIVE EDUCATION**
Participation in the Co-operative Education program - which enables students to acquire knowledge, practical skills for employment, and workplace experience - is optional for Master’s and PhD students. Master’s students complete two work terms, and PhD students complete three (a work term consists of four months of full-time, paid employment), and students undertake study and work terms in alternating sessions). Students require permission from their academic adviser and graduate adviser, as well as the Co-op coordinator, to participate in the Co-op program. Interested students should contact the Co-op office (located in MCK 112) early in the term in which they are applying. Students are also referred to “General Regulations: Graduate Co-op”, page 56.

**Dispute Resolution**

**Faculty Members and Areas of Research**
Lindsay Tedds, PhD (McMaster), Interim Director of the School of Public Administration, Associate Professor
Underground economy; tax non-compliance; economics of taxation; public economics; time use; timing of stock option awards; applied econometrics

Herman Bakvis, PhD (UBC), Professor
Intergovernmental relations, government structure and organization, political parties and interest groups

Emmanuel Brunet-Jailly, PhD (U Western Ontario), Professor
Local government and politics, cross-border regions, comparative urban politics.

J. Barton Cunningham, PhD (Southern California), Professor
Quality of working life, organizational theory, decision making, stress and motivation, human research management.
Lynda Gagné, PhD (UBC), Assistant Professor
  Child care policy, children outcomes, social programs, applied econometrics and microeconomics

Budd Hall, PhD (UCLA), Professor
  International community development, community-university engagement, social movements

Evert A. Lindquist, PhD (California, Berkeley), Professor
  Machinery of government and policy-making, policy communities and networks, the role of think tanks

James N. MacGregor, PhD (Victoria), Professor
  Organizational behaviour, human information processing

Richard T. Marcy, PhD (Oklahoma), Assistant Professor
  Public sector leadership, leadership development, adaptation and cognition in organizations, management of meaning in organizations

James C. McDavid, PhD (Indiana), Professor
  Program evaluation, performance management, local government service delivery

Tara L. Ney, PhD (Southampton), Associate Professor
  Conflict-related impact of policy, discourse theory and conflict, war-affected children, family law policy, health care policy processes, restorative justice

Lynne Siemens, PhD (Hertfordshire), Associate Professor
  Community development; entrepreneurship and small business; rural economic development; government and business relations; organizational behaviour; academic team development

Kimberly Speers, PhD (Alberta), Assistant Teaching Professor
  Policy analysis and public policy; government relations and management consulting; performance measurement and planning

Thea Vakil, PhD (Victoria), Associate Director of the School of Public Administration and Associate Professor
  Design and maintenance of organizations; structure and functioning of government and the non-profit sector; principles and values in public administration

Rebecca N. Warburton, PhD (London), Associate Professor
  Health economics, economic evaluation, evidence-based management

Emeritus, Visiting, and Adjunct Appointments

Robert L. Bish, PhD (IN), Professor Emeritus

James Cutt, MA (Edinburgh), MA, PhD (Uof), Professor Emeritus

A. Rodney Dobell, BA, MA (UBC), PhD (MIT), Professor Emeritus

John J. Jackson, MSc (Ottawa), PhD (UofA), Professor Emeritus

John Langford, BA (Carleton), MA (Oxford), PhD (McGill), Professor Emeritus

Hartmut J. Will, Dipl-Kfm (FU, Berlin), PhD (Ill), Professor Emeritus

Oliver Brandes, LLB (UVic), Adjunct Professor

Leslie Brown, BSW (Regina), MPA, PhD (UVic), Adjunct Professor

John L. Fryer, BSc (London), MA (Pitt), Adjunct Professor

David Good, PhD (California, Berkeley), Adjunct Professor

Laurie Jackson, BSc, MEd (UofA), PhD (UVic), Adjunct Professor

Harvey Lazar, BSc (McGill), MA (UBC), PhD (LSE), Adjunct Professor

Michelle LeBaron, MA (SFU), LLB (UBC), Adjunct Professor

Catherine Morris, JD (UofA), LLM (UBC), Adjunct Professor

Victor Murray, BA (Manitoba), MA (Minn), PhD (Cornell), Adjunct Professor

Gordon Smith, PhD (MIT), Adjunct Professor

Ryan Compton, PhD (Washington U, St. Louis), Adjunct Associate Professor

Evelyn (Lyn) Davis, PhD (Florida State), Adjunct Associate Professor

Dale Wall, BA (SFU), MPA (UVic), Adjunct Associate Professor

Michelle Brady, BA (Honours) (Murdoch), PhD (UofA), Adjunct Assistant Professor

Tracy Byrne, PhD (Glasgow), Adjunct Assistant Professor

Peter R. Elson, PhD (UofT), Adjunct Assistant Professor

Allison M. Habkirk, BA (UVic), MA (UBC), MPA (UVic), Adjunct Assistant Professor

Yvonne Harrison, PhD (UVic), Adjunct Assistant Professor

Sabine Lehr, BA (Open University), MBA (London), PhD (UVic), Adjunct Assistant Professor

Marion Little, MADR (UVic), Adjunct Assistant Professor

Gordon McIntosh, PhD (UVic) Adjunct Assistant Professor

Brant Popp, MPA (UVic), Adjunct Assistant Professor

Carol-Anne Rolf, MA (UofA), MPP (California, Berkeley), Adjunct Assistant Professor

Rajesh Tandon, Ph.D. (Western Reserve U.), Adjunct Assistant Professor

Sam Weller, CA, MBA, Adjunct Assistant Professor

Sarah Marie Wiebe, Ph.D. (UofO), Adjunct Assistant Professor

Veda Weselake, BA (UofM), MA (UofM), Adjunct Assistant Professor
Degrees and Specializations Offered

MA in Dispute Resolution

Financial Support

The University of Victoria awards a limited number of Graduate Awards for full-time study. All students admitted to the Master of Arts in Dispute Resolution program are automatically considered for this financial support, with the level of support based on a student’s GPA and other qualifications. As well, the MADR Program offers several awards based on students’ academic interests and career plans.

Admission Requirements

General

The interdisciplinary Master of Arts in Dispute Resolution program is administered by the School of Public Administration. The focus of the program is on public sector dispute resolution, including:

- foundation content on general dispute resolution theory and practice
- application of skills and knowledge to the design and implementation of multi-party decision making processes
- applications of skills and knowledge to the design and implementation of institutionalized public dispute resolution systems
- the impact of social inequalities on conflict, including power, gender and culture.

Students come from a variety of undergraduate backgrounds and may have relevant professional experience.

The program admits only full-time students, and requirements must be completed within five years of admission to the program.

Admission to Master’s Programs

Applicants should have a bachelor’s degree in a relevant field of study. Normally, a B+ average (6.0 GPA) for the last two years of university work is a minimum requirement. Relevant post-baccalaureate professional experience is desirable but not necessary. In addition to documents required by the Faculty of Graduate Studies, the program requires applicants to submit the following:

- a detailed and up-to-date resumé of background information, professional or other relevant experience
- a 500 word statement of intent outlining reasons for applying to the program. The statement of intent should show how personal objectives relate to the program content.

Students will be admitted on the basis of admission requirements established by the Faculty of Graduate Studies and on guidelines established by the Admissions Committee regarding previous academic and work experience relevant to the field of dispute resolution.

Initial inquiries should be addressed to the Graduate Administrative Assistant, MA in Dispute Resolution Program. Applications should be sent to the Graduate Admissions and Records Office.

GMAT and TOEFL requirement

Applicants who do not possess a Canadian undergraduate degree will be required to write and submit official results of the Graduate Management Admission Test (GMAT). International students whose first language is not English are required to provide valid test results for one of the following:

- The Test of English as a Foreign Language (TOEFL) with a minimum score of 610 on the paper-based test and 102 on the Internet-based test, or
- The International English Language Testing System (IELTS) with an overall score of at least Band 7.0 with no score of less than 6.5 on each academic component.

Deadlines

- December 15 for International Students.
- January 31 for Domestic students. Applicants with a first class (A minus) average over the last two years of their undergraduate and graduate course work are automatically considered for graduate entrance awards. It is to the applicants’ benefit to do their best to ensure that their file is complete as soon as possible for the Admissions Committee’s consideration.

Program Requirements

The program consists of 21.0 (Master’s Project) or 22.5 (Master’s Thesis) units and one or two co-operative work term placements or DR 517. Students may choose a thesis or a project-based program. Completion of the degree is by project or thesis defense in an oral examination.

Course Requirements

- Elective Courses: Two elective courses chosen from DR 507, 508, 510, 516 517 and others as available. Other elective courses may be selected, with permission of the Graduate Adviser, from approved courses in related fields of study offered by other programs in the School or in other departments. One elective may be completed (online) during co-op placements.
- PADR 589: This Co-op preparatory course is required for all students.
- Co-operative Education: at least one co-op work term placement OR DR 517.
- Final Requirement: Students choose to complete a Master’s Project (DR 598) or a Master’s Thesis (DR 599)
Master of Arts in Dispute Resolution

Fall: First Academic Term (Sep-Dec)
- DR 502 (1.5) Conflict, Culture and Diversity
- DR 503 (1.5) Public Policy, Law, and Dispute Resolution
- PADR 501 (1.5) Collaboration and Engagement
- PADR 502A (1.5) Analysis for the Public and Non-Profit Sectors
- PADR 589 (0.0) Co-op Seminar: Introduction to Professional Practice

Spring: First Co-op Work Term (Jan-Apr)
- Co-op Placement
- Or
- DR 517 Issues in Dispute Resolution: Working in the Community
- Elective (1.5) While on co-op, students may choose to take one online elective. Students enrolled in DR 517 may also take another elective (on campus or online).

Summer: Second Academic Term (May-Aug)
- DR 506 (1.5) Mediation Processes and Skills
- DR 509 (1.5) Dispute Resolution System Design and Public Interest Disputes
- PADR 503 (1.5) Professional Integrity in the Public and Non-profit Sectors
- PADR 504 (1.5) Public Leadership and Management
- PADR 505 (1.5) Policy-making and Policy Communities

Fall: Second Co-op Work Term (Sep-Dec)
- Co-op placement (optional)
- and/or
- Elective (1.5) Students may choose to take one online elective, whether on co-op or not

Spring: Third Academic Term (Jan-Apr)
- DR 598 (4.5) Master’s Project
- or
- DR 599 (6.0) Master’s Thesis
- Elective (1.5) If electives not completed, students may opt to take an elective this term.

Master’s Project or Thesis

Prior to enrolling in either the Master’s Project (DR 598) or the Thesis (DR 599), students are expected to have completed their DR and PADR core courses. All program requirements, including a third Co-op term (if taken), must be completed by the same semester in which they defend their Project or Thesis.

Master’s Project Option

The Master’s Project (DR 598) requires students to complete a major project for a client in consultation with an academic supervisor. The project is expected to be a substantial analysis of a conflict situation or process, policy issue, or other relevant topic approved by the Graduate Adviser. A written project report will be prepared and submitted to an oral examination committee. Students undertaking the Master’s Project option (4.5 units) will complete a program of 21.0 units.

Master’s Thesis Option

The Master’s Thesis (DR 599) requires original research on a topic chosen in consultation with the student’s academic supervisor and the Graduate Adviser. Students undertaking the Master’s Thesis option (6.0 units) will complete a program of 22.5 units.

Oral Examination

Required for both the Master’s Project (DR 598) and Master’s Thesis (DR 599) options.

Program Length

Full-time students can complete the program within two years. All students must complete the program within five years.

Co-operative Education

Participation in the Co-operative Education program enables students to acquire knowledge, practical skills for employment, and workplace experience. It will be strongly recommended for students to participate in this option. Students in the Co-operative Education program are normally required to undertake two Co-op work terms (a work term normally consists of four months of full-time, paid employment.) Note that as there is a presumption that students will participate in the Co-op program, the School does not offer core courses in the Spring term, although students could opt to take electives. The number of work terms required will depend on the amount of relevant prior work experience, as determined by the MADR program in conjunction with the Co-op program. To be eligible for a Co-op placement, students are required to register in PADR 589 Co-op Seminar: Introduction to Professional Practice in their first term in the program. Students are also referred to "General Regulations: Graduate Co-op", page 56.

Completion of additional work terms is permitted, with the approval of the Co-op Coordinator and based on availability (students in their first or second work terms may receive priority). Additional work terms must be completed in or before the same semester in which the project/thesis is defended.

Guidelines for Professional Conduct

The School of Public Administration expects graduate students to exhibit professional conduct according to the following guidelines:

- submission of oneself to the professional codes of conduct associated with one’s employment and/or professional membership(s);
• exercise of personal discipline, accountability, and judgement;
• acceptance of personal responsibility for continued competency and learning, including the capacity to be a reflective practitioner;
• willingness to serve the public;
• demonstrated ability to recognize the dignity and worth of all persons;
• willingness to assist others in their learning;
• ability to recognize and work with one’s own limitations;
• maintenance of the confidentiality of information, including all electronic communication, appropriate to the purposes and trust given when that information was acquired;
• acceptance that one’s professional abilities, personal integrity, and the attitudes one demonstrates in relationships with other persons are measures of professional conduct.

Unprofessional Conduct
Graduate student conduct in the School of Public Administration is subject to the professional standards of entities including, but not limited to, UVic Co-op and Co-op employers. A student exhibiting behaviour that does not meet the standards required by these relevant entities may be required to withdraw from the School.

Earth and Ocean Sciences

GENERAL INFORMATION
The School of Earth and Ocean Sciences (SEOS) offers a graduate research program with a focus on earth system science and special studies in marine geology and geophysics, palaeoceanography, climate modeling, atmospheric modeling, air-sea interaction, ocean physics, geophysical fluid dynamics, ocean mixing, ocean acoustics, biological oceanography, tectonics, petrology, geochemistry, biogeochemical cycles, seismology, paleobiology, sedimentology and stratigraphy.

Further information on the School of Earth and Ocean Sciences can be found on the School’s web page at <www.seos.uvic.ca>.

Faculty Members and Areas of Research

Dante Canil, PhD (Alta), FRSC, Professor
Experimental and igneous petrology; petrogenesis of mantle-derived rocks

Laurence Coogan, PhD (Leicester), Professor
Mid-ocean ridge processes, oceanic crust, hydrothermal fluxes, geospeedometry, experimental petrology, mantle dynamics

Jay Cullen, PhD (Rutgers), Professor
Chemical oceanography, marine geochemistry, phytoplankton-trace metal interactions, marine biogeochemistry of trace metals, bio-inorganic chemistry, palaeoceanography and global change, stable isotope geochemistry and development of novel techniques for trace metals

Stanley E. Dosso, PhD (UVic), Professor
Ocean and arctic acoustics, marine seismology and seismo-acoustics, geophysical inverse theory, acoustic signal analysis

John F. Dower, PhD (UVic), Professor
Effects of interactions between biology and physics on the ecology of larval fish and zooplankton; the structure of pelagic marine ecosystems
Kathryn M. Gillis, PhD (Dal), Professor and Associate Dean of Science
Marine geology; fluid-rock interaction in oceanic hydrothermal systems; formation of the oceanic crust; metamorphic petrology

Colin Goldblatt, PhD (East Anglia), Assistant Professor
Earth system evolution, climate modelling, the early Earth, evolution of planetary atmospheres

Roberta C. Hamme, PhD (Wash), Associate Professor (Canada Research Chair)
Carbon cycle, deep-water formation, ocean mixing, ocean productivity, dissolved oxygen, dissolved noble gases

S. Kim Juniper, PhD (Canterbury), Professor (BC Leadership Chair) and Director (Science & User Engagement) Ocean Networks Canada Society
Marine systems and global change

Jody M. Klymak, PhD (Wash), Associate Professor
Physical oceanography - waves, turbulence, fronts, eddies; processes that dissipate energy from the mean ocean circulation and mediate the mixing of momentum, heat, salt, and passive tracers

Lucinda Leonard, PhD (UVic), Assistant Professor Limited Term
Current tectonics, especially of western North America; seismic and tsunami hazard assessment

Adam Monahan, PhD (UBC), Professor
Climate physics, interaction of weather and climate, meteorology of surface winds, probabilistic and stochastic methods in climate modelling and analysis

Kristin Morell, PhD (Penn State), Assistant Professor
Tectonic geomorphology, landscape evolution, active tectonics, natural hazards

Thomas F. Pedersen, PhD (Edin), FRSC, FAGU, Professor
Paleoclimatology and paleoceanography, sedimentary geochemistry, aquatic chemistry, geochemistry of submerged mine wastes

Vera F. Pospelova, PhD (McGill), Associate Professor
Quaternary palynology, climatic and anthropogenic changes in coastal environments, paleoecology, paleoceanography

Vera F. Pospelova, PhD (McGill), Associate Professor
Quaternary palynology, climatic and anthropogenic changes in coastal environments, paleoecology, paleoceanography

Verena Tunnicliffe, PhD (Yale), FRSC, Professor (Canada Research Chair)
Evolution of marine communities, hydrothermal vents, seamounts and fjords; interaction with physical and geological processes

Diana E. Varela, PhD (UBC), Associate Professor
Biological oceanography; biogeochemical cycles; phytoplankton physiology and ecology - variations in marine primary productivity and export production; phytoplankton utilization of nitrogen, silicon and carbon; silicon isotopic fractionation by diatoms

Andrew J. Weaver, PhD (UBC), FRSC, Professor
The role of the oceans in climate change/variability, ocean/climate modelling, paleoclimate, physical oceanography, geophysical fluid dynamics

Michael Whiticar, PhD (Christian Albrechts), Professor
Biogeochemistry and stable isotope organic geochemistry of aquatic and terrestrial systems, including investigation of biosphere-geosphere interactions with greenhouse gases, sediments, soils, ice, gas hydrates and applications with environmental, energy and forensic sciences

Adjunct and Emeriti Faculty

Vivek Arora, PhD (Melbourne)
Biophysical and biogeochemical interactions between the terrestrial biosphere and the atmosphere, terrestrial carbon and nitrogen cycle modelling at large spatial scales, dynamic global vegetation models, land surface parameterizations for climate models, and hydrological processes in climate models

Christopher R. Barnes, PhD (Ott), DSc (Wat), CM, FRSC, PGeo
Paleozoic paleontology, stratigraphy, paleoecology, conodont paleobiology, paleoceanography, paleoclimatology, cabled ocean observatories

J. Vaughn Barrie, PhD (Wales)
Quaternary marine geology, shelf sedimentation processes, marine geohazards, ocean management, marine placers

Peter Bobrowsky, PhD (Alta)

John F. Cassidy, PhD (UBC)
Earthquake hazard studies, including earth structure, earthquake source determination and wave propagation

N. Ross Chapman, PhD (UBC)
Ocean acoustics, acoustic signal processing, ambient noise, marine seismology, seismic inversion methods

James R. Christian, PhD (Hawaii)
The global carbon cycle, ocean biogeochemistry, ecology of aquatic microorganisms, ocean colour remote sensing

Charles Curry, PhD (St. Mary’s)
Global and regional climate modelling, statistical downscaling, carbon cycle modelling, atmospheric radiation and chemistry of trace gases, physical and chemical parameterizations for climate models

Kenneth L. Denman, PhD (UBC), FRSC
Biological/physical oceanographic interactions, ocean biogeochemical fluxes and climate change
Jan Dettmer, PhD (UVic)
Earth structures and processes probed remotely through inversion of geophysical data, computational (Bayesian) methods to understand data information content to resolve the Earth, tsunami- and earthquake-source studies, fine structure of shallow crust and seabed, crust and mantle structure

Richard Dewey, PhD (UBC)
Physical oceanography, tides, mixing, boundary layers and coastal flows

Michael Eby, BASc (UBC)
Earth system modelling, UVic Earth System Climate Model, carbon cycle - climate feedbacks, carbon emission budgets, terrestrial and ocean biomegeochemistry, sea and land ice modelling, paleoclimatic control of glacial cycles, longevity of climate change

David Farmer, PhD (Dal), FRS, FRSC
Physics of ocean surface processes and air-sea interaction; oceanography of straits and coastal waters; internal hydraulics, stratified flows, convection; acoustical oceanography

Greg Flato, PhD (Dartmouth)
Numeric modelling of sea ice dynamics and thermodynamics; role of sea ice and polar oceans in climate; global climate modelling

Michael G.G. Foreman, PhD (UBC)
Numerical modelling, physical oceanography, data assimilation, satellite altimetry, tidal analysis

John C. Fyfe, PhD (McGill)
Climate modelling and analysis; coupled models of atmosphere-ocean variability in the extratropics, middle atmosphere variability, synoptic to low-frequency tropical variability, regional climate modelling

Ann Gargett, PhD (UBC)
Ocean turbulence and its parameterization in climate models, biological/physical interactions

Christopher J.R. Garrett, PhD (Cantab), FRS, FRSC
Physical oceanography, geophysical fluid dynamics and ocean mixing processes

Nathan Gillett, DPhil (Oxford)
Attribution of the causes of climate change; atmosphere circulation changes; stratosphere troposphere coupling and ozone influence on climate; carbon-climate feedbacks

Tom Gleeson, PhD (Kingston)
Groundwater sustainability, mega-scale groundwater systems, groundwater recharge and discharge and fluid flow around geologic structures

Richard J. Hebda, PhD (UBC)
Quaternary stratigraphy, vegetation and climate change; Holocene palynology to decode diet, medicine and agriculture of native peoples

Martin Heesemann, PhD (Bremen)
Marine geophysics, seafloor observatories and instrumentation, earthquake seismology, tectonics, tsunamis, and scientific ocean drilling

Philip Hill, PhD (Dal)
Sedimentological study of the Fraser River delta, forming part of the Georgia Basin Geohazards Initiative

Paul Hoffman, PhD (Johns Hopkins)
Snowball Earth, Neoproterozoic Earth history, origin and tectonic history of continents, stable isotopes, paleoceanography, paleoclimate, sedimentary geology, geological mapping

Roy D. Hyndman, PhD (ANU), FRSC
Geophysics, marine and land; active continental margin tectonics and structure; geothermal studies; seismotectonics; magnetotellurics; physical properties of rocks

Debby Ianson, PhD (UBC)
Coastal upwelling regions and the under-studied mid-water (100-1000m) region of the open ocean

Thomas S. James, PhD (Princeton)
Computer modelling focussing on glacio-isostatic adjustment for inferring ice mass history and Earth rheology; high-precision geodetic techniques for measuring crustal deformation and gravity changes; relative sea level and glacial history of British Columbia

Stephen T. Johnston, PhD (Alta)
Tectonic and structural geology; evolution of convergent margins

Hann Kao, PhD (UIUC)
Earthquake seismology: earthquake source studies, velocity structure inversion, seismogenic behaviour and processes in subduction zones, moment-tensor inversion and seismotectonics

David V. Lefebure, PhD (Carlton)
Economic geology and Cordilleran metallogeny, with emphasis on deposit models, mineral potential assessments and databases
Victor Levson, PhD (Alta)
Till geochemistry and glacial dispersal processes, seismic microzonation, sedimentology of coarse clastics and placer deposits, Quaternary stratigraphy, oil and gas geosciences

Norman McFarlane, PhD (Mich)
Global climate modelling; parameterization of physical processes in atmospheric models; middle atmospheric dynamics and modelling

Katrin Meissner, PhD (Bremen)
Paleoclimate modelling; climate system; climate variability; the role of vegetation and ocean in climate change; geophysical fluid dynamics

Joseph Melton, PhD (UVic)
Development and application of terrestrial ecosystem and land surface models for stand-alone simulations and implementation in Earth system models; process modelling, including wetland methane, fire and permafrost carbon

William J. Merryfield, PhD (Colorado)
Climate forecasting, climate variability, ocean circulation models, predictability, subgrid-scale parameterization, geophysical turbulence, double diffusion, ocean mixing processes, numerical methods in fluid dynamics

Michael Riedel, PhD (UVic)
Marine geophysics and geology, gas hydrates, physical properties of sediments, logging data analyses

Garry C. Rogers, PhD (UBC)
Earthquake seismology and related tectonic processes, earth structure using earthquake generated waves, earthquake hazard

Stephen Rowins, PhD (W Aust)
Genesis of magmatic-hydrothermal ore deposits and mineral exploration methodologies

Oleg Saenko, PhD (MHI NASU, Ukraine)
Global ocean circulation and its influence on climate; water masses; climate variability and feedbacks

Martin Scherwath, PhD (Wellington)
Marine geophysics and geology; gas hydrates; active and passive seismology including seismic processing, structural modelling and seismic imaging; subduction zone processes; continental collision

John F. Scinocca, PhD (Tor)
Atmospheric/oceanic fluid dynamics, climate model development and physical parameterization

Christian Seiler, PhD (Wageningen, Netherlands)
Atmospheric dynamics, extratropical cyclones, global and regional climate models, terrestrial carbon cycle

Michael Sigmond, PhD (Eindhoven)
Seasonal climate predictions (sea ice, stratosphere-troposphere coupling), atmospheric large-scale circulation, regional climate change, ozone hole impacts, Arctic sea ice impacts

George J. Simandl, PhD (École Poly Mtrl)
Industrial minerals, high technology metals, nonsulphide Zn-Pb, and gemstone deposits - exploration, evaluation and origin, applied and fundamental research

George D. Spence, PhD (UBC), Professor
Refraction and reflection seismology, marine and land-based; geophysics and tectonics of western Canadian margin and Cordillera

Nadja Steiner, PhD (Inst. Meereskunde Kiel)
Modelling of ocean biogeochemistry; atmosphere-ocean-sea-ice-biochemistry interactions; sulphur cycle; global and site specific modeling

Neil Swart, PhD (UVic)
Climate change and variability, with a focus on change in the physical dynamics and carbon cycle of the ocean

Richard Thomson, PhD (UBC), FRSC
Physical oceanography of the NE Pacific Ocean

Svein Vagle, PhD (UVic)
Air-sea exchange processes, modelling and measurements of bubble dynamics and bubble gas transfer, observations of coastal oceanographic processes including tidal mixing, underwater ambient noise, low-power self-contained data acquisition systems, marine mammal acoustics, and new techniques in fishery acoustics

Knut von Salzen, PhD (Hamburg)
Modelling of physical and chemical processes in the troposphere; cloud and aerosol processes; global climate modelling

Kelvin Wang, PhD (W Ont)
Subduction zone processes, lithospheric stresses, earthquake mechanics, crustal thermal and hydrological processes

John T. Weaver, PhD (Sask)
Geomagnetism; numerical modelling and inversion of electromagnetic induction in the earth and oceans
Michael J. Wilmut, PhD (Queen’s)
Signal processing, statistical characterization of underwater ambient noise, and matched-field inversion, processing and tracking

Hidekatsu Yamazaki, PhD (Texas A & M)
Chemical oceanography, particularly the role of the carbon cycle in global climate change; pathways of ocean pollution, especially metals and hydrocarbons

Degrees and Specializations Offered
The School of Earth and Ocean Sciences offers programs leading to Master of Science (MSc) and Doctor of Philosophy (PhD) degrees in the general areas of geology, geophysics, oceanography and atmospheric science, with an emphasis on earth system science.

Facilities
The School offers its graduate students access to a range of equipment for study and research. In-house facilities include labs for Petrology, Geochemistry, Paleogeochemistry, Marine Geochemistry, Marine Biogeochemistry/Phytoplankton, Biological Oceanography, Marine Biology, Ocean Mixing, Ocean Acoustics, Climate Theory and Modelling, Hydrothermal Studies, Structural Geology, Sedimentology and Geophysics, as well as a departmental mass-spectrometer. Arrangements are also commonly made to use equipment at nearby government laboratories. Students have access to the 16-metre Marine Science Vessel John Strickland.

Financial Support
All MSc and PhD students receive financial support at a minimum of $18,500 for two years provided the student maintains an acceptable level of academic performance. Graduate financial support is comprised of funding from various sources including research account support, teaching assistant salary, general award support, etc.

Admission Requirements
Applicants for a graduate degree in Earth and Ocean Sciences should have a Major or Honours degree in a closely related science. A student who does not have such a degree can be admitted to the program but may be required to complete additional makeup courses. In doing so, the student must obtain a grade of at least B (5.0) in each makeup course, and an average of B+ (6.0) in the makeup courses. Mature students are advised to consult the Faculty regulations regarding conditional admittance.

Inquiries concerning the graduate program may be addressed to the SEOS Graduate Secretary, School of Earth and Ocean Sciences. Application forms for admission, which include the indication of need for financial assistance, can be obtained directly from the Graduate Admissions and Records Office (<uvic.ca/garo>). A statement of research interests must be submitted with the completed application.

Applicants whose native language is not English must write the TOEFL (Test of English as a Foreign Language) and submit the scores to the Graduate Admissions and Records Office (see “English Language Proficiency”, page 30) together with their application forms. Even with passing TOEFL scores, students may be required to take English language courses in addition to other course work.

Deadlines
Applications to graduate studies are considered year round.

Program Requirements
The spectrum of research in the School is broad and will be attractive to students from many areas of the basic and applied sciences; cross-disciplinary research involving faculty and facilities in other departments is encouraged. As an integral part of their program, students are normally required to undertake teaching or research assistantships or equivalent duties within the School.

All graduate students in the School of Earth and Ocean Sciences are required to take EOS 525 (1.5 units). All students are also required to present at the Annual Graduate Student Workshop at least once during their degree program.

The supervisory committee, in consultation with the student, determines the content of the program and the exact division of units between coursework and thesis for each student. For example, the supervisory committee may decide that additional coursework is required depending on the student’s background. Coursework may include graduate courses in SEOS or other departments, including directed studies courses (EOS 580) and 300- or 400-level undergraduate courses.

Master’s Program
Course Requirements
The Master’s program consists of a minimum of 15 units with no fewer than 12 graduate-level credits (i.e. excluding 300- and 400-level undergraduate courses). Normally, students must complete a minimum of 4.5 units of graduate or upper-level undergraduate coursework, with a Master’s thesis (EOS 599) making up the remaining units.

Oral Examination
MSc students will be required to defend their completed thesis in a final oral examination open to the public.

Program Length
A student proceeding towards a Master’s degree will be required to complete all the requirements for the degree within five years (60 consecutive months) from the date of the first registration in the Master’s program.

PhD Program
The PhD program is a full-time program of full-time independent research. Students can expect to take a minimum of two years to complete the program.
Course Requirements

The PhD program consists of 45 units beyond the Bachelor’s level, or 30 units beyond the Master’s level. PhD students who enter the program with a Master’s are normally expected to complete a minimum of 3 graduate or upper-level undergraduate course units. Students who enter the PhD program with a Bachelor, including students who transfer from a Master’s to a PhD at UVic, are normally expected to complete a minimum of 7.5 units of coursework. Students enroll in EOS 699 upon registering in the PhD program (or upon switching to the PhD program from the MSc program) and remain enrolled until all dissertation requirements have been completed.

All PhD students are required to give a one hour seminar to the School on their research, normally within six months before the defense of their PhD dissertation. All PhD students must register in EOS 525 as part of their 3-unit graduate course requirement, unless they have previously taken this course in the MSc program. In addition to the minimum 3 graduate or upper-level undergraduate course units, all PhD students must register in EOS 693 (PhD Candidacy Examination). The PhD dissertation (EOS 699) makes up the remaining program units.

Students should consult the department for courses that will be offered in any given year. Admission to any graduate course requires permission of the instructor.

Candidacy

The Candidacy Examination is a requirement of the Faculty of Graduate Studies and cannot be waived. SEOS requires that within two years of first registration as a provisional doctoral student (or 18 months of transferring from a MSc program) and at least six months before the final oral examination, a PhD student must submit a written dissertation research proposal, defining the research topic, the goals of the research and the methodology to be used. This thesis proposal will be defended in an oral candidacy exam. The Examining Committee will question the candidate to determine that the candidate has the appropriate background knowledge and skills to undertake the proposed project, and that the project is likely to lead to results suitable for a PhD dissertation.

Students enroll in EOS 693 (PhD Candidacy Examination) upon registering in the PhD program (or upon switching to the PhD program from the MSc program) and remain enrolled until all candidacy requirements have been completed.

Oral Examination

PhD students will be required to defend their completed dissertation in a final oral examination open to the public.

Program Length

A student proceeding toward a doctoral degree will be required to complete all the requirements within seven years (84 consecutive months) from the date of first registration in the program. If the student transfers to the doctoral program after an initial period in a master’s program, completion is required within seven years of the date of the first registration in the Master’s program. A doctoral degree will not be awarded in less than twenty-four consecutive months from the time of first registration.

Co-operative Education

Participation in the Co-operative Education program – which enables students to acquire knowledge, practical skills for employment, and workplace experience – is optional for Master’s and PhD students. Master’s students complete two work terms and PhD students complete three (a work term consists of four months of full-time, paid employment). Students require permission from their academic adviser and graduate adviser, as well as the Co-op coordinator, to participate in the Co-op program. Interested students should contact the Earth and Ocean Sciences Co-op office early in their first term. Students are also referred to “General Regulations: Graduate Co-op” on page 56.

Economics

General Information

The Department of Economics is recognized for its strengths in both research and teaching. Areas of faculty research include both theoretical and applied economics and econometrics. All faculty members have active research programs and publish regularly in academic journals. In addition, faculty members have made important applied contributions to industry and governments at various levels. The department’s teaching is highly regarded, with a strong emphasis at the graduate level on econometrics and economic theory as tools for understanding economic phenomena and for developing economic policy.

Further information can be found at <www.uvic.ca/socialsciences/economics/graduate>

Faculty Members and Areas of Research

M. Christopher Auld, PhD (Queen's)
  Health economics, microeconometrics

Judith A. Clarke, PhD (Canterbury)
  Theoretical and applied econometrics

Pascal Courty, PhD (Chicago)
  Industrial organization, personnel economics, behavioural economics

Marco Cozzi, PhD (UCL)
  Macroeconomics, empirical microeconomics, computational economics

Merwan Engineer, PhD (Queen's)
  Economic development and growth, quality of life

Martin Farnham, PhD (Michigan)
  Public finance, labour economics, urban economics

Donna Feir, PhD (UBC)
  Labour economics, applied econometrics, aboriginal policy

Rob Gillezeau, PhD (Michigan)
  Economic history, labour economics

David E. Giles, PhD (Canterbury)
  Econometrics, statistics

Elisabeth Gugl, PhD (Rice)
  Public economics, family economics, applied microeconomic theory

Emma Hutchinson, PhD (Michigan)
  Environmental economics, law and economics, applied microeconomics

Peter W. Kennedy, PhD (Queen's)
  Microeconomic theory

Alok Kumar, PhD (Queen's)
  Monetary economics, macroeconomics, development economics

Daniel Rondeau, PhD (Cornell)
  Environmental and resource economics, microeconomics, experimental methods

Nilanjana Roy, PhD (California, Riverside)
  Econometrics, development economics

Herbert J. Schuetze, PhD (McMaster)
  Labour economics

Paul Schure, PhD (EUI, Florence)
  Financial economics, financial intermediation theory, industrial organization

David Scoones, PhD (Queen's)
  Applied microeconomics, microeconomic policy, conflict economics

Kenneth G. Stewart, PhD (Michigan)
  Econometrics, macroeconomics

G. Cornelis van Kooten, PhD (Oregon State)
  Agricultural and resource economics

Graham M. Voss, PhD (Queen's)
  Macroeconomics, international economics, monetary economics

Linda A. Welling, PhD (Western)
  Economics of the family, industrial organization, microeconomic theory

Adjunct and Cross-Listed Appointments

Jen Baggs, Business, PhD (UBC) (2016-2019)
  International business

  Economic evaluation, health economics, ecological economics

  Economic history

Jill R. Horwitz, Adjunct Professor, JD, PhD (Harvard) (2016-2019)
  Health Policy, law and economics

Alan Mehlenbacher, Adjunct Assistant Professor, PhD (UVic) (2015-2018)
  Applied computational economics
Bradley Stennes, Adjunct Associate Professor, PhD (UBC) (2016-2019)
  Forest economics, natural resource economics
Lili Sun, Adjunct Assistant Professor, PhD (UVic) (2015-2017)
  Forest economics, natural resource economics
  Applied economics, public economics, economies of taxation

Degrees and Specializations Offered
The Department of Economics offers an MA program and a PhD program. Both programs combine strong training in core economic theory and econometrics with electives in applied areas and a co-operative option. MA graduates will be well prepared for doctoral studies in economics or for research and analysis positions in the private or public sectors. The PhD program provides more advanced training in applied economics, to prepare graduate students for academic and non-academic careers.

Facilities
The department has a range of facilities to support both MA and PhD students in their studies. These include office space and a computer lab, solely for graduate students, which has the requisite software and databases for word-processing, econometric analysis and computer modeling. The Reid Elliot Reading room is also available for students.

Financial Support
All students admitted to the graduate program are automatically considered for financial support, with the level of support determined on a competitive basis. Incoming students with first-class records (A-, or 7 on the University of Victoria 9-point scale) are considered for University of Victoria Fellowships. Consideration for these awards is automatic upon receipt of application by February 15 of the same calendar year. In addition, the department has a number of fellowships and scholarships available each year that are awarded on the basis of academic excellence. Further support is provided in the form of Teaching Assistantships (TA). Research Assistantships may also be available. All eligible students are encouraged to apply for provincial, federal and external funding, particularly from the Social Sciences and Humanities Research Council <www.sshrc.ca>.

For students who receive funding support, funding is usually promised for one year for MA students and three years for PhD students. Students do not necessarily receive funding, though in recent years every effort has been made to provide all students with some level of funding, usually a TA position and, in many instances, additional funds in the form of fellowships or scholarships.

ADMISSION REQUIREMENTS

General
Applicants to either program must satisfy the department that they have the necessary skills in mathematics, statistics, as well as written and verbal communication to undertake the program. To this end, the department may require evidence of appropriate writing skills prior to admission.

Applicants with an undergraduate degree from a Canadian or U.S. university are ordinarily not required to take the Graduate Record Exam (GRE), although it may be an advantage to do so. All other students must take the GRE. The Faculty of Graduate Studies and/or the Graduate Adviser may require any student to complete this aptitude exam. Applicants for admission whose first language is not English, who are not holding a recognized degree from a country where English is an official language, and who have not resided in Canada or other English speaking countries for at least three consecutive years immediately prior to the session applied for, must meet the “English Language Proficiency”, page 19, for admission.

Applicants who have minimal undergraduate training in economics may be considered for a preliminary program. Such students typically have a cumulative GPA of 7.0 (A-) or higher from their undergraduate degree, have strong skills in mathematics and statistics and have undertaken some undergraduate courses in economics. This preliminary program, taken as a non-degree undergraduate student, requires 15 units of Economics courses, including microeconomic, macroeconomic and econometric theory, as well as electives tailored to the student’s needs and interest, chosen in consultation with the department Graduate Adviser. A minimum GPA of 7.0 (A-) in these courses will result in automatic admission to the MA program; a student with a lower GPA may enter after selection in the regular admission process. To be considered for the preliminary program, applicants must first apply to the MA program and then email the Graduate Adviser, providing a brief rationale as to why they are looking to be admitted to the preliminary program. Applicants will not be admitted to the preliminary program as a way to better their existing economics undergraduate degree.

Entry into either the MA or PhD program is in September. Availability of courses and faculty varies from year to year. The department web page should be consulted for the most up-to-date information: <www.uvic.ca/socialsciences/economics/graduate>.

Admission To Master’s Programs
Admission to the MA program requires an undergraduate degree in economics, with at least a B (5.0) average in the last two years leading to the degree. Selection is competitive, based upon undergraduate performance, nature of undergraduate training and (if relevant) GRE results.

Admission to the PhD Program
Admission to the PhD program normally requires a master’s degree (or equivalent) from a recognized academic institution. All
applicants are required to provide a detailed statement of research interests as part of their application. Selection is competitive, based upon the research statement, performance in previous degrees, nature of training and (if relevant) GRE results. An outstanding applicant may be admitted with an appropriate baccalaureate degree, or the completion of at least two terms in a master’s program at the University of Victoria. Students wishing to transfer from the MA program should normally have achieved an A- (7.0) average in their graduate courses, and may receive a waiver for up to 12 units of required course work towards their PhD program. Students wishing to transfer from another graduate program may also receive credit towards their program. The student’s supervisory committee, in consultation with the Graduate Adviser, will determine the transfer of credits.

**Deadlines**

The entry point to the Department of Economics is September of every year. Non-Canadian citizens and non-Canadian permanent residents must apply to the Graduate Admissions and Records Office by December 15. Applications for Canadian citizens and Canadian permanent residents must be received by the Graduate Admissions and Records Office by January 31. All documents should be submitted by these dates.

Applicants should keep in mind that substantial lead time is required to register for and take (if required) the GRE and the English language proficiency test in time for results to be received within the deadline.

**PROGRAM REQUIREMENTS**

**Thesis-based Master’s**

The department offers two programs leading to the MA degree in Economics: a thesis option, and a project-based option. Both programs require a minimum of 15 units.

**Course Requirements**

Successful completion of the core program (4.5 units), consisting of:

- ECON 500 (1.5) Microeconomic Analysis
- ECON 501 (1.5) Macroeconomic Analysis
- ECON 545 (1.5) Econometric Analysis

Successful completion of an additional 6 units of courses subject to the approval of the student’s supervisory committee. Courses are normally chosen from the graduate course offerings of the department, but with the permission of the department may include up to 3 units of courses numbered at the 400 level as well as graduate courses in other departments. Directed Studies (ECON 595) provides the means of pursuing subject areas that are not covered in the listed courses. (Students should apply to individual instructors for Directed Studies.) Students who take the Co-operative Education Option (see below) must include ECON 516 in their course work.

**Thesis**

Successful completion of a formal written thesis prospectus. Successful completion of a Master’s thesis (ECON 599). The thesis is awarded 4.5 units.

The thesis is based on a major research project, the topic of which is determined by the student in consultation with his or her supervisory committee. The appropriate nature and length of the thesis is determined by the supervisory committee, with more technical theses generally being shorter than those with more literary content. Each candidate shall defend their thesis in a final oral examination, in accordance with the regulations of the Faculty of Graduate Studies.

**Program Length**

Students are expected to complete the requirements of the MA program, including fulfillment of the Co-operative Education requirements, if relevant, within 26 months of enrolment. This limit may be extended for up to one year with the permission of the Graduate Adviser.

**Project-based Master’s**

The department offers two programs leading to the MA degree in Economics: a thesis option, and a project-based option. Both programs require a minimum of 15 units.

**Course Requirements**

Successful completion of the core program (4.5 units), consisting of:

- ECON 500 (1.5) Microeconomic Analysis
- ECON 501 (1.5) Macroeconomic Analysis
- ECON 545 (1.5) Econometric Analysis

Successful completion of an additional 7.5 units of courses. Courses are normally chosen from the graduate course offerings of the department, but with the permission of the department may include Economics courses numbered at the 400 level, and graduate courses offered by other departments, up to a combined maximum of 3 units. Directed Studies (ECON 595) provides a means of pursuing subject areas that are not covered in the listed courses. (Students should apply to individual instructors for Directed Studies.) Students who take the Co-operative Education Option (see below) must include ECON 516 in their course work.

**Final Project**

Successful completion of an Extended Essay (ECON 598). The Extended Essay is awarded 3 units.

The essay is based on an independent research project and may consist of an extended version of a course project. The topic is decided by the student in consultation with the student’s supervisory committee. The appropriate nature and length of the essay is determined by the supervisory committee, with more technical essays generally being shorter than those with more literary content. Each candidate shall defend their essay in a final oral examination, in accordance with the regulations of the Faculty of Graduate Studies.
Program Length
Students are expected to complete the requirements of the MA program, including fulfillment of the Co-operative Education requirements, if relevant, within 26 months of enrolment. This limit may be extended for up to one year with the permission of the Graduate Adviser.

PhD Program
Course Requirements
Students are required to take the six core courses (9 units) listed below as well as a minimum of three field courses (4.5 units) for a total of at least 13.5 units. A student’s supervisory committee determines the field courses required.

Core Courses
- ECON 500 (1.5) Microeconomic Analysis
- ECON 501 (1.5) Macroeconomic Analysis
- ECON 545 (1.5) Econometric Analysis
- ECON 546 (1.5) Themes in Econometrics
- ECON 551 (1.5) Information and Incentives
- ECON 552 (1.5) Macroeconomic Issues

Students who enter the PhD with an MA degree may receive a waiver for a maximum of 12 units of required course work, depending on the nature of the courses they completed as part of their MA program.

Candidacy
Successful completion of the Candidacy Examination ECON 693 (3 units), which is based on overall performance in the program as well as:
1. Successful completion of two of the three comprehensive examinations: Microeconomic Theory, Macroeconomic Theory, and Econometrics.
2. An oral examination of the student’s progress towards a dissertation research program.

A student’s supervisory committee determines the comprehensive examinations required. A student may not take a comprehensive examination more than twice. Comprehensive examinations will be offered twice a year. Each examination will be set and graded by a Comprehensive Exam Committee consisting of at least two faculty members of the department.

A student’s supervisory committee determines the requirements of the oral examination for Candidacy.

Students are required to register continuously for ECON 693 until the Candidacy Examination requirements have been completed and a decision on candidacy has been submitted to the Faculty of Graduate Studies. The Department requires that within thirty months of registration as a provisional doctoral student and at least six months before the final oral examination, a student must pass the candidacy examination.

In exceptional circumstances, a student’s supervisory committee, with the approval of the Department’s Graduate Committee, may set alternative Candidacy requirements.

Dissertation
Successful completion of a dissertation (ECON 699). The dissertation is written under the supervision of a supervisory committee, nominated by the Department of Economics, and approved by the Dean of Graduate Studies. The supervisory committee shall comprise at least four members, all of whom normally will be members of the Faculty of Graduate Studies, and at least one of whom will be from a department outside the Department of Economics. The student’s academic supervisor shall be the Chair of the supervisory committee. A written proposal for the dissertation is to be approved by the supervisory committee. The appropriate nature and length of the dissertation is determined by the supervisory committee. The expected length of the dissertation will vary with the nature of the work, with more technical dissertations generally being shorter than those with more literary content.

Oral Examination
Each candidate shall defend their dissertation in a final oral examination, in accordance with the regulations of the Faculty of Graduate Studies.

Program Length
Students are expected to complete the requirements of the PhD program, including fulfillment of the Co-operative Education requirements, if relevant, within five years of enrolment.

Co-operative Education
Participation in the Co-operative Education program - which enables students to acquire knowledge, practical skills for employment, and workplace experience - is optional for Master’s and PhD students. Master’s students complete two work terms, and PhD students complete three (a work term consists of four months of full-time, paid employment).

Students must maintain a B (5.0) average to be eligible for a work term. MA students must have successfully completed 9.0 units of graduate course work prior to the commencement of their first work term and ECON 516 must be included in the student’s MA program. It is highly recommended that MA students complete ECON 516 early on in their program. PhD students must normally complete ECON 693 Candidacy prior to the commencement of their first work term.

Students require permission from their supervisor and graduate adviser, as well as the Co-op coordinator, to participate in the Co-op program. Interested students should contact the Economics Co-op office early in the term in which they are applying.

Students are also referred to “General Regulations: Graduate Co-op”, page 56.
Educational Psychology and Leadership Studies

General Information

Three graduate programs are offered: (1) Counselling Psychology, (2) Educational Psychology with three focus areas (Learning and Development; Measurement, Evaluation, and Computer Applications; Special Education) and (3) Leadership Studies.

Faculty Members and Areas of Research

Timothy G. Black, PhD (British Columbia) R. Psych.
   Military to civilian transition, group counselling, Integral psychology, military and civilian trauma; Posttraumatic Stress Disorder (PTSD); counsellor training/education, Therapeutic Enactment, counselling men

Wanda Boyer, PhD (Southern Mississippi)
   Early childhood and Elementary Education: learning and development, self-regulation and emotion regulation, play therapy, special education, family development, research methodology and designs, and research ethics

Darlene E. Clover, PhD (Toronto)
   Women and leadership, community and cultural activism and leadership, feminist pedagogy, nonformal and adult education, arts-based research and education, international comparative education and research, arts and cultural institutions, environmental adult education and ecological leadership

Carolyn L. Crippen, PhD (North Dakota)
   Servant-leadership, educational history, learning organizations and cultural change, senior and school administration, school board governance, chaos theory, Icelandic culture, teacher education

M. Honore France, EdD (Massachusetts)
   Diversity and cultural issues related to counselling, transpersonal psychology, ecopsychology, Spirituality, Indigenous forms of counselling, working with residential school survivors, group dynamics and international education

Tatiana Gounko, PhD (Alberta)
   Internationalization and educational reform, comparative and international education, higher education, educational administration and leadership, international agencies and educational policy

Allyson Hadwin, PhD (Simon Fraser)
   Self-regulation, motivation and procrastination, emotion regulation, collaborative learning, classroom tasks, environments and technologies for learning, engagement, retention and transitions

Gina Harrison, PhD (British Columbia) R. Psych.
   Cognitive and linguistic processes of reading and writing in children and adults, applied psycholinguistics, neurodevelopmental disorders especially learning disabilities, assessment and intervention in school psychology and special education

E. Anne Marshall, PhD (Toronto) R. Psych., Provost’s Community-Engaged Scholar
   Adolescent and emerging adult transitions and identity, counselling and research in Indigenous communities, cultural approaches to counselling, interdisciplinary and community-engaged research, qualitative inquiry, relational-cultural theory, counsellor skill development, career and life planning
Joan M. Martin, PhD (Notre Dame)
Child and adolescent development, achievement motivation, emotion and cognition, developmental psychopathology

Donna McGhie-Richmond, PhD (OISE, Tor)
Inclusive education, teacher beliefs and practices in diverse and inclusive classrooms, teacher education, online teaching, universal design for learning, assistive technology

Catherine McGregor, PhD (Simon Fraser)
Social justice leadership including democratic, distributed and teacher leadership; civic and social justice learning, including situated and/or place based learning; women in leadership; policy and politics in education; qualitative design in educational research including narrative and discourse analysis, arts based, participatory, feminist, critical, queer and post structuralist approaches to research

Natalee Popadiuk, PhD (Calgary) R. Psych.
Relational perspectives of international student adjustment; international student career decision-making and university-to-work transitions; international student strengths and successes; middle school students’ cultural identity construction; internationalizing the curriculum; women’s experiences of breast cancer treatment; sibling bereavement experiences during childhood; qualitative research approaches

Jillian Roberts, PhD (Calgary) R. Psych.
Medically fragile school children, concepts of quality of life, psychology of the individual, program planning, ethics and qualitative research methodology, multimedia applications in educational psychology, children’s sexual education

Susan L. Tasker, PhD (McMaster) CCC
The human condition, wellbeing, and adjustment in the face of unplanned major life-events such as brain injury and homicidal loss

W. John C. Walsh, PhD (Simon Fraser) R.Psych.
Cognition and motivation, quantitative methods, multivariate techniques; school psychology, assessment of children with learning problems

Degrees and Specializations Offered

- Counselling Psychology — project-based MA, thesis-based MA
- Indigenous Communities Counselling — project-based MA, thesis-based MA
- Educational Psychology — MEd, MA, PhD
  - Learning and Development
  - Measurement, Evaluation, and Computer Applications
  - Special Education
- Leadership Studies — MEd, MA

Counselling Psychology
The Counselling Psychology Graduate Program assists students in developing the knowledge, skills, and understanding necessary to work as professional counsellors in a wide variety of settings. The program is characterized by relatively small classes, ongoing contact with a program supervisor, and a focus on the practicum/internship component of counsellor preparation.

Indigenous Communities Counselling
The Department of Educational Psychology and Leadership Studies in partnership with Indigenous Education in the Faculty of Education and community partners have collaborated to develop a unique graduate counselling program that is relevant to and consistent with the values and traditions of Indigenous communities.

Seven key values and principles, developed together with Indigenous community partners, educators, and helping professionals, guide the program framework and delivery:

- The Indigenous paradigm as central
- The sacred and the spiritual dimension
- The ancestral dimension
- Stories, ceremony, culture, language, and communal healing
- The earth and our relatives
- The circle
- Counselling vocation and practice

Educational Psychology Focus Areas
All Educational Psychology focus areas share foundational courses in learning, development, and measurement. Each focus area builds on this foundation with additional courses, faculty supervision, and culminating theses or projects. This specialization provides externally identifiable areas of expertise as well as programs of study that can flexibly meet individual career goals.

We currently offer three Educational Psychology focus areas:

- Learning and Development
- Measurement, Evaluation and Computer Applications
- Special Education

All Educational Psychology focus areas are characterized by small classes that provide rich dialogue, development of critical thinking skills, and active integration of research and theory with practice. All students are offered individualized mentoring and supervision, and all have opportunities to gain research experience.

Please note that Educational Psychology programs are suitable for achieving advanced TQS standing for previously qualified teachers, but none of our graduate programs lead to BC Teacher Certification.
Learning and Development - This program integrates the psychology of learning and instruction with the psychology of human biological, cognitive, emotional, and social development. The developmental content of this focus area embraces a life-span methodological perspective, but focuses primarily on the first two decades of life. The learning portion of this focus area is applicable across the life-span.

General objectives of the Learning & Development focus area:

- To update students’ knowledge of what is currently known about human learning, self-regulation, and motivation.
- To update students’ knowledge of what is currently known about human development from birth through emerging adulthood.
- To develop students’ ability to critically integrate educational psychology theory and research with their personal observations and professional practices.
- To provide students with opportunities to develop specific research competencies and to teach effective communication of information in both research and applied educational psychology settings.

Measurement, Evaluation and Computer Applications - The Measurement, Evaluation and Computer Applications focus area provides students with the opportunity to pursue advanced study in measurement, statistics, evaluation, and technology; and to support individual research investigation of a significant topic within these areas. Topics of interest include large-scale assessment, classroom assessment of student achievement, and educational technology.

The general objectives of the Measurement, Evaluation, and Computer Applications focus area:

- To provide students with current theoretical, research and practical knowledge as a basis for professional development in educational psychology.
- To provide students with opportunities to investigate significant issues in the field of educational psychology.

Special Education - The Special Education focus area provides the opportunity for advanced study in research and practice to support the needs of students with exceptionalities such as students with learning disabilities, emotional and behaviour disorders, sensory impairments, communication disorders, intellectual and physical disabilities, chronic health conditions, or students who are gifted. Practices that promote inclusion, resilience, and the developmental health of exceptional populations across multiple contexts (e.g., school, home, community) are emphasized.

The general objectives of the Special Education focus area:

- To meet the advanced training needs of current or prospective special educators in contemporary research and practice within inclusive education.
- To cultivate professional knowledge and skills in assessing, programming, and supporting individuals with special needs, and to enhance consultative and administrative skills within special education and related health fields.
- To promote research and guide graduate students in empirically examining important issues in special education and related health fields.

Leadership Studies

The University of Victoria offers programs leading to the Master of Education (MEd) and the Master of Arts (MA) in Leadership Studies. These degrees are intended for students with diverse backgrounds who have earned undergraduate degrees. The aim of the program is to broaden understandings of contemporary theories and practices of leadership, education, learning and issues that affect schools, community, and society. Candidates will choose their specific degree, MEd or MA, before entering the program.

We are in the process of developing a PhD program with a focus on social justice, school and/or community emphasis and life-long learning. Presently a PhD in Leadership Studies is offered by Individual Graduate Programs by Special Arrangement (see "Individual Graduate Programs by Special Arrangement (SPARR)", page 34) with a quota on admissions.

Ethical and Professional Behaviour

Graduate students in the Department of Educational Psychology and Leadership Studies are expected to adhere to a professional code of conduct for the basis of their relationships with peers, faculty and for any children/adolescents for whom they may provide services. Students will be subject to the provisions of the ethical guidelines of their respective professions. Students may be required to withdraw from a course or program when ethical, medical, or other reasons interfere with satisfactory practice in their respective professions.

Facilities

- MacLaurin Building
- McPherson Library
- Curriculum Library

Financial Support

Fellowships and Scholarships

The University of Victoria awards a limited number of Graduate Fellowships for full-time study. No duties are involved. The awards are competitive and are based on academic standing. All students admitted to the program and assessed with a 7.0 or higher GPA will be considered. A small number of Faculty scholarships, fellowships and awards are available to students, usually in their second year of study. Students with strong GPAs are encouraged to apply for SSHRC fellowships early in the fall semester. These awards are competitive and compare students on three main criteria:
academic excellence, research potential, and communication skills. For more information about these awards see: <www.sshrc-crsh.gc.ca>.

A list of awards and financial support can be found at: <www.uvic.ca/graduatestudies/finances/financialaid/index.php>.

### Paid Research Assistantships

Paid research assistantships are available with individual faculty in the department. These assistantships are usually supported through grant funding. They are available to a limited number of qualified students. Students interested in research assistantships should contact faculty members directly.

### Paid Teaching Assistantships

Paid teaching assistantships are available within the Department of Educational Psychology and Leadership Studies to a limited number of qualified students. The number of teaching assistantships varies yearly. For information, contact the Graduate Secretary (eplsgrad@uvic.ca) and review postings on the departmental website.

### Work Study Program

The Work Study Program is funded by the University of Victoria Student Awards and Financial Aid Office. The objective of the program is to provide additional financial assistance through on-campus part-time employment opportunities for students who have documented financial need. The Work Study Program runs from September to April of each academic year and students may earn up to a maximum of $3,400 for this 8 month period. Students may only hold one work study position at one time. Additional information is available online at: <www.uvic.ca/registrar/safa/work-study/index.php>.

### Co-operative Education and Work Placements

It is possible for graduate students to combine their graduate studies with Co-op education semesters in which they apply knowledge and skills in paid work placements across Canada. This usually involves extending program completion by two semesters. For more information please contact: ephecoop@uvic.ca.

### ADMISSION REQUIREMENTS

#### General

Candidates seeking admission should normally be able to satisfy the entrance requirements of the Faculty of Graduate Studies. Further to these requirements, the Department of Educational and Leadership Studies requires an acceptable bachelor’s degree from an accredited university and normally a grade point average of 6.0 (B+) in the last two years of academic work. Entry to the program is on a competitive basis and enrollment may be restricted in any given year. All applicants should submit a current résumé and a brief letter of intent. Other requirements include information on prerequisite courses, previous field experience, assessment reports, references, and personal statements.

Applicants for admission whose first language is not English should consult www.uvic.ca/education/psychology/future/home/elpr/index.php for English Language proficiency requirements.

Potential applicants may contact the Graduate Program Assistant for application information about specific programs. They may also visit our website: <www.uvic.ca/education/psychology>

For community based programs, phone: 250-721-7875.

### Admission To Master’s Programs

#### Counselling Psychology

Applicants are expected to have a broad understanding of psychological principles and issues as a result of their academic course work. Thesis-based MA applicants must have at least 1.5 senior undergraduate credit in statistics that cover descriptive statistics including univariate and regression analysis. Thesis-based MA applicants must submit a one-page description of past research experience and present research interest.

Please note: Each year the Department of Educational Psychology and Leadership Studies in Education receives a considerable number of applications for entry into the graduate counselling programs, thus, the admissions process is a competitive one. Meeting admission requirements does not guarantee entry to the program. Only a limited number of places are available, typically 12-16 for on campus programs and 18 for Community-based programs. Recommendations for admissions are for a particular program and start date, and cannot be deferred. Applicants declining an offer of admission must re-apply. See our web site at: <www.uvic.ca/education/psychology/future/masters/counselling/index.php> for more detailed information and guidelines.

1. An acceptable bachelor’s degree from an accredited university and normally a grade point average of 6.0 (B+) in the last two years of academic work.

2. Applicants are expected to have a broad understanding of psychological principles and issues as a result of their academic course work. All applicants are required to have three units of relevant 3rd or 4th year coursework in Educational Psychology, Psychology or a related helping discipline in the following two areas: Learning/Cognition and Abnormal Psychology/Psychopathology. Thesis-based MA applicants must have at least 1.5 units of undergraduate credit in statistics that covers descriptive statistics and univariate inferential statistics.

3. Completion of prerequisite courses ED-D 414, 417, and 418 with at least a B+ grade. Applicants must have completed ED-D 417 and ED-D 418* by December 31st of the year prior to program start. Applicants who have not completed ED-D 414 (or an equivalent course) prior to application submission may be granted admission to the program conditional on completing ED-D 414 (or equivalent) prior to beginning the program in September. ED-D 414 is usually offered several times throughout the year, including during the summer.
1. Applicants are required to have completed a baccalaureate degree with at least a B+ average (78%) in the last two years of course work.

Applicants with less than a "B+" average (6.0 GPA) on their undergraduate degree may be eligible for admission as a Mature Student.

2. In order to be eligible for registration with provincial and national counsellor certification bodies, applicants are expected to have a broad understanding of helping principles and issues as a result of their academic course work. A minimum of 3.0 units of relevant 3rd and 4th year coursework is required, in Aboriginal or Indigenous helping/healing, educational psychology, psychology, child and youth care, or a related helping discipline. Examples include PSYC 330 Personality, ED-D 419 Introduction to Indigenous Helping and Healing, or CYC 338 Applying Developmental Theory in Child and Youth Care. Applicants should provide a list of these relevant courses and the grades obtained with their application.

3. Completion of pre-requisite courses ED-D 414 Group Processes, ED-D 417 Effective Interpersonal Communication, and ED-D 418 Introduction to Theories of Counselling with at least a B+ grade is required. Applicants requesting equivalency must send detailed course outlines (syllabi) and other supporting information to the Graduate Advisor prior to application.

Applicants who have not completed all required pre-requisite courses should be registered in these courses by March 15 of application year and indicate this in their personal statement. Applicants may be offered admission to the program conditional upon completion of whatever required courses are outstanding. All courses must be completed before program start.

4. Successful, relevant field experience must be completed prior to the application deadline and documented in a complete résumé. For the Indigenous Communities Counselling program, we are particularly interested in applicants who have completed all or part of their field experience in Indigenous based settings. Field experience is defined as working in a helping capacity in a counseling, helping-related or teaching-related setting with children, adolescents, or adults. 200 hours are recommended.

5. Two Assessment Reports (references to be sent directly to Graduate Records and Admissions) from professors and/or supervisors are required.

Applicants who have not completed all required pre-requisite courses should be registered in these courses by March 15 of application year and indicate this in their personal statement. Applicants may be offered admission to the program conditional upon completion of whatever required courses are outstanding. All courses must be completed before program start.

6. Applicants are required to submit a minimum of two Counselling Skills Evaluations. One must be from an instructor of ED-D 417 (or equivalent). The other may be from a supervisor of the applicant’s counselling or other applied work setting.

7. A personal statement (3 to 5 pages) describing future work plans and motivation for graduate work in Counselling is also required. Please address the following:

Indigenous Communities Counselling

The program is open to both Indigenous and non-Indigenous applicants. Consistent with University of Victoria policy on equity and access, preference will be given to Indigenous applicants and those working in a helping capacity with Indigenous Communities.
• How your enrolment in the ICCP at the University of Victoria might help you meet important personal and/or community goals. What background and/or experience do you have related to helping in Indigenous communities?
• What preferences do you have in terms of course content and style of teaching, skill development, and personal learning?
• What are your strengths and weaknesses as a person, learner, and counsellor?
• What personal and/or cultural values are most important to you and how do they influence your views about being a counsellor?
• In what type of setting would you like to work following graduation from a counselling program and with what client population would you like to work?
• Add any other relevant information that you think would help the admissions committee to know about you as a person, a community member and a potential counsellor.
• Indicate the names of the people who have been asked to submit your Counselling Skills Evaluations.
• Applicants are advised to use the above headings in abbreviated form in the Personal Statement, to facilitate the reading of material. The personal statement should be typed, double spaced, with normal margins and should be no longer than 5 pages. Please include on the first page: current date, name, address, phone number, and fax number/e-mail address (if available). Students who reactivate their file should submit an updated personal statement and résumé.

8. Applicants reactivating their file for reconsideration must detail in a letter the actions they have taken to strengthen their new application over the previous one.

9. Applicants requesting admission consideration due to disability must put their request in writing at the time of application, providing an explanation of their situation and appropriate medical or other documentation.

10. As of September 2011, successful applicants must undergo a criminal record check in compliance with the BC Criminal Records Review Act and submit it to the Department of Educational Psychology and Leadership Studies for review before full acceptance is given.

Additional information about the Indigenous Communities Counselling program can be found at <www.uvic.ca/education/psychology/programs/graduate/counsellingpsych/community/index.php>.

Please contact our Program Coordinator or current Academic Advisor if you have any questions regarding the application process and/or whether you meet the above admission criteria.

**Educational Psychology Focus Areas**

**General Requirements**

• An acceptable bachelor’s degree from an accredited university and normally a grade point average of 6.0 (B+) in the last two years of academic work. Senior undergraduate courses directly related to the focus area (Special Education, Learning and Development, or Measurement, Evaluation and Computer Applications).
• Two references (assessment reports) from academic or field based contexts.
• A letter of intent outlining research, academic and professional goals specific to the focus area for which they are applying.
• Current curriculum vitae (résumé).
• Criminal Record Check in compliance with the BC Criminal Records Review Act.

Applicants reactivating their file should detail in a letter the actions they have taken to strengthen their new application.

**Prerequisite Courses**

• A senior undergraduate course in educational psychology, instructional psychology, learning theory, or learning principles applied to children (e.g., ED-D 300, ED-D 401).
• A senior undergraduate course in development (life-span, childhood, and/or adolescent development) (e.g., ED-D 305, ED-D 406).

**For the Special Education focus area:** A senior undergraduate course in special needs, developmental psychopathology or related course, OR 2-years of related field experience (e.g., providing services to children, youth, or adults with special needs in school or community contexts).

• **For the Learning and Development, and Measurement, Evaluation and Computer Applications focus areas:** A senior undergraduate course in Statistical analysis and/or classroom assessment (e.g. PSYC 300A, ED-D 337).

**Leadership Studies**

Candidates seeking admission should be able to satisfy the entrance requirements of the Faculty of Graduate Studies. Further to these requirements, the Department of Educational Psychology and Leadership Studies requires an acceptable Bachelor’s degree from an accredited University and normally a grade point average of 6.0 (B+) in the last two years of academic work. Entry to the program is on a competitive basis, and enrolment may be restricted in any given year. All applicants should submit a brief résumé and a letter of intent. *Applicants require 3 years of work experience or a leadership role in education, community and/or public service. Recognition is given for experience in school and the community. Course work completed within the last five years, which was not part of the academic work considered for admission, may be eligible for transfer credit towards the Master’s degree. *Applicant must contact leadgrad@uvic.ca prior to applying.
Leadership Studies’ students whose course work or research involves contact with vulnerable populations will be required to undergo a Criminal Record Check in compliance with the BC Criminal Records Review Act.

**Admission to the PhD Program in Educational Psychology**

Admission to the doctoral degree program requires completion of a master’s degree from a recognized university. The completed degree can be with or without thesis.

Applicants who have completed a project-based master’s degree are required to have completed a research paper in which design principles and analytic techniques are demonstrated.

Applicants must have completed ED-D 560 (Statistical Methods in Education) and ED-D 561A (Methods in Educational Research), or their equivalents within their Master’s degree program.

Applicants must submit Graduate Record Examination scores from the verbal, quantitative, and analytical writing sections of the GRE.

Applicants must submit a statement of research experience and interests, a letter of intent, and current curriculum vitae.

Applicants must provide a minimum of one single-authored published or unpublished article that is appropriate to the field of future studies. A copy of the applicant’s master’s thesis, a major paper, published research or a professional report may be submitted to fulfill this requirement.

**Admission to the PhD Program in Leadership Studies**

A limited number of candidates are accepted for a PhD in the Leadership Studies program by Special Arrangement only. Contact the Leadership Studies Program unit for more information.

**Deadlines**

Please consult the department website for specific deadline dates: <www.uvic.ca/education/psychology/index.php>.

**PROGRAM REQUIREMENTS**

**Master’s in Counselling Psychology**

The program requirement for the project-based MA degree is a minimum of 27 units of study. The thesis-based MA degree is a minimum of 28.5 units of study. The following ED-D courses are restricted to graduate students who have been admitted to either the project-based MA or thesis-based MA counselling program, or by permission of the department: ED-D 514, 518, 519 (A, C, D, E, G, H, J, K, L, N, and P), 521, 522, 523, and 524.

**Project-based MA Program Requirements**

A minimum of 27 units of course work is required in the project-based MA program and a comprehensive exam. The program of study includes the following required courses:

- **ED-D 503 (1.5)** Program Development and Evaluation
- **ED-D 514 (1.5)** Assessment in Counselling
- **ED-D 518 (1.5)** Advanced Seminar in Theories of Counselling Psychology
- **ED-D 519C (1.5)** Ethics and Legal Issues in Counselling
- **ED-D 519H (1.5)** Career Development and Counselling Across the Life Span
- **ED-D 519L (1.5)** Group Counselling

**Thesis-based MA Program Requirements**

A minimum of 28.5 units of study is required in the thesis-based MA program, and includes a thesis and its oral defense. Students choosing to conduct a thesis involving qualitative methodology are required to complete ED-D 563 or equivalent in addition to ED-D 560 and ED-D 561A. The program of study includes the following required courses:

- **ED-D 503 (1.5)** Program Development and Evaluation
- **ED-D 514 (1.5)** Assessment in Counselling
- **ED-D 518 (1.5)** Advanced Seminar in Theories of Counselling Psychology
- **ED-D 519C (1.5)** Ethics and Legal Issues in Counselling
- **ED-D 519H (1.5)** Career Development and Counselling Across the Life Span
- **ED-D 519L (1.5)** Group Counselling

Electives may be taken from several sources. Each year additional courses in counselling are taught, generally on a rotating basis from the ED-D 519 series. Graduate courses are offered by other sections of the Department of Educational Psychology and Leadership Studies (i.e. Learning and Development, Special Education, Measurement, Evaluation and Computer Applications). As well, there is a range of courses being offered in other graduate programs across campus.

Students may focus on one or more of the following four areas:

- Trauma
- School/Higher Education Counselling
- Aboriginal Counselling
- Addictions

Course approval will be granted by the student’s Supervisor or Graduate Adviser.

- School/Higher Education Counselling
- Aboriginal Counselling
- Addictions

Course approval will be granted by the student’s Supervisor or Graduate Adviser.

**Program Length**

The project-based MA degree generally takes two years of full-time study on campus to complete. The thesis-based MA degree also requires a minimum of two years of full-time study and often will require at least one additional semester to complete the thesis.

**Master’s in Indigenous Communities Counselling**

The program requirement for the project-based MA degree is a minimum of 25.5 units of study. The thesis-based MA degree is a minimum of 28.5 units of study. The following ED-D courses are restricted to graduate students who have been admitted to either the project-based MA or thesis-based MA counselling program, or by permission of the department: ED-D 514, 518, 519 (C, L, P, R and S), 521, 522, 523, 525 and 564A.

**Project-based MA Program Requirements**

A minimum of 25.5 units of course work is required in the project-based MA program and a comprehensive exam. The program of study includes the following required courses

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ED-D 525</td>
<td>Indigenous Healing and Spirituality</td>

<td>Assessment in Counselling</td>
</tr>
</tbody>
</table>

**Total:** 25.5 units

**Thesis-based MA Program Requirements**

Students in the project-based MA program may apply to transfer to the thesis-based MA program. Transfer application requires a letter of intent, a minimum 20-page thesis proposal, and a statement of support from a potential thesis supervisor. Only a very small number of transfer students can be accommodated, depending on supervisor match and availability. Transfers would normally be considered in the second year of the program.

**Thesis-based MA Program Requirements**

A minimum of 28.5 units of study is required in the thesis-based MA program, and includes a thesis and its oral defense. The program of study includes the following required courses:

<table>
<thead>
<tr>
<th>Course Code</th>

**Total:** 28.5 units

**Master’s Degrees in Educational Psychology**

Across all three Educational Psychology focus areas, the MA degree and the MEd degree consist of parallel program requirements with the exception of the closing or final activity: (a) thesis for the MA degree, or (b) project for the MEd degree.
A minimum of 19.5 units of study is required for the MEd and includes a comprehensive exam. A minimum of 21.0 units of study is required for the MA and includes a thesis defense.

The MA degree is a course and thesis based research degree. The MA is most suited to students who seek a future career involving research and teaching in government, agency, or post-secondary contexts. Thesis work typically advances theory, research, and practice in the field of Educational Psychology. Persons who anticipate proceeding on to a doctoral program should apply for the MA degree. Applicants who enjoy and wish to develop the skills of conducting research, writing, and presenting and publishing academic papers frequently select this degree.

Important features of the MA include:
- Minimum of 21 units (students may take more)
- Minimum of 2 years to complete
- Requires the development of quantitative and qualitative research analyses skills
- Culminates in a research based thesis
- It is a prerequisite for entry into PhD programs

The MEd degree is a primarily course based applied degree that culminates in a major project or paper. The MEd is useful for persons seeking employment or advancement in applied educational settings, community organizations, or the Ministry of Education. Projects and papers emphasize the application of theory and research to practice. The MEd program is useful for applicants who are interested in the development and evaluation of programs and services. Please note that MEd students who wish admission into doctoral programs generally require additional research method courses and must demonstrate their research and writing skill.

Important features of the MEd include:
- Minimum of 19.5 units (students often take more)
- Normally completed within 2 years
- Primarily course-based
- Culminates in an applied project or paper
- Is normally not suitable for entry into a PhD program

Transfer between MEd and MA Programs:
Persons admitted to either degree program may apply for transfer to the other. Please note that transfers are not automatic; each transfer request will be evaluated by faculty before approval. This is normally done in the Spring with the new application reviews.

Program Length
The MEd degree generally takes two years of full-time study on campus to complete. The MA degree also requires a minimum of two years of full-time study and often will require at least one additional semester to complete the thesis.

Learning and Development Focus Area Requirements (MA and MEd)

Required Courses (12 units)
3.0 units in Learning composed of:
ED-D 500 (1.5) Learning Principles
ED-D 508 (1.5) Theories of Learning
3.0 units in Development composed of:
ED-D 505 (1.5) Basic Concepts in Human Development
ED-D 506 (1.5) Topics in Human Development
(at least one of the following)
- 506A: Cognitive Development
- 506B: Social and Emotional Development
- 506C: Adolescent Development
- 506D: Early Childhood and Middle Years Development

3.0 units in Research and Statistics composed of:
ED-D 560 (1.5) Statistical Methods in Education
ED-D 561A (1.5) Methods in Educational Research

3.0 units in Learning and Development not previously counted above and selected from
ED-D 506 (1.5) Topics in Human Development
- 506A: Cognitive Development
- 506B: Social and Emotional Development
- 506C: Adolescent Development
- 506D: Early Childhood and Middle Years Development
ED-D 570 (1.5) Instruction and Technologies to Promote Self-Regulated Learning and Strategy Use
ED-D 509 (1.5) Psychology of Learning and Instruction
ED-D 591 (1.5) Selected Topics in Education
ED-D 562 (1.5) Advanced Statistical Methods in Education

3.0 units of elective courses chosen in consultation with the student’s supervisor

Degree Completion Requirements for MEd (4.5 units)
ED-D 598 (3.0) Project: Educational Psychology and Leadership Studies (Project structure varies by area)
ED-D 597 (1.5) Comprehensive Examination: (Examination structure varies by area)

Degree Completion Requirements for MA (6.0 units)
ED-D 599 (6.0) Thesis and oral defense

Measurement, Evaluation, and Computer Applications Focus Area Requirements (MA and MEd)

Required Courses (12 units)
1.5 units in Learning selected from
ED-D 500 (1.5) Learning Principles
ED-D 508 (1.5) Theories of Learning
1.5 units in Development selected from
ED-D 505 (1.5) Basic Concepts in Human Development
ED-D 506 (1.5) Topics in Human Development
Gradsitt Program (12 units)

(any of the following)
- 506A: Cognitive Development
- 506B: Social and Emotional Development
- 506C: Adolescent Development
- 506D: Early Childhood and Middle Years Development

3.0 units in Research and Statistics composed of:
ED-D 560 (1.5) Statistical Methods in Education
ED-D 561A (1.5) Methods in Educational Research

6.0 units in Measurement, Evaluation, and Computer Applications not previously counted above
ED-D 501 (1.5) Theory of Measurement
ED-D 503 (1.5) Program Development and Evaluation
ED-D 562 (1.5) Advanced Statistical Methods in Education
ED-D 591B (1.5) Selected Topics in Measurement, Evaluation and Computer Applications

3.0 units of elective courses chosen in consultation with the student's supervisor

Degree Completion Requirements for MEd (4.5 units)
ED-D 598 (3.0) Project: Educational Psychology and Leadership Studies (Project structure varies by area)
ED-D 597 (1.5) Comprehensive Examination: (Examination structure varies by area)

Degree Completion Requirements for MA (6.0 units)
ED-D 599 (6.0) Thesis and oral defense

Special Education Focus Area Requirements (MA and MEd)

Required Courses (13.5 units)

ED-D 571 (1.5) Advanced Assistive Technology in the Inclusive Classroom

1.5 units of elective coursework chosen in consultation with the student's supervisor

Degree Completion Requirements for MEd (4.5 units)
ED-D 598 (3.0) Project: Educational Psychology and Leadership Studies (Project structure varies by area)
ED-D 597 (1.5) Comprehensive Examination: (Examination structure varies by area)

Degree Completion Requirements for MA (6.0 units)
ED-D 599 (6.0) Thesis and oral defense

Master's in Leadership Studies

MEd Program Requirements

The MEd degree requires 18.0 units of study including a research project (ED-D 598 - 3.0 units) and the comprehensive exam (ED-D 597 - 1.5 units).

Compulsory Core Courses (1.5 units): Students are required to select one of the following courses
ED-D 531 (1.5) Concepts and Theory of Organization
ED-D 533D (1.5) Concepts and Theories of Leadership in Learning Contexts: Leadership
ED-D 538A (1.5) Community Leadership and Adult Learning
ED-D 539A (1.5) Leadership, Learning and Social Justice

Compulsory Core Courses: (4.5 units) Students are required to register in the following two courses which are taught in conjunction BUT only after successful completion of 10.5 units of course work
ED-D 561B (1.5) Research Methods in Leadership
ED-D 598 (3.0) Project

Other Courses: (10.5 units). Students may select from among courses numbered ED-D 531, 532, 533, 534, 535, 536, 537, 538, 539, 541, 542, 590, 591E, 610.

Up to 3.0 units can be in the form of an Independent Directed Study (ED-D 590) and the student is required to find the instructor to teach this course.

Normally up to 4.5 units of electives are allowed from outside of Leadership Studies and faculties across campus. All electives must be at the 500 level and approved by the Graduate Adviser. To obtain approval, students must demonstrate how proposed electives are pertinent to their program of study.

Compulsory Comprehensive Examination (1.5 units): ED-D 597 is the final requirement of the program, which is set three times each year in November, April and late-August. It consists of a three hour written exam in which a candidate is expected to demonstrate the synthesis and application of concepts and theories in Leadership Studies.
MA Program Requirements
The MA degree requires 18.0 units of study including a thesis (ED-D 599 – 6.0 units) and an oral examination.
Compulsory Core Courses: (1.5 units) Students are required to register in one of the following courses
ED-D 531 (1.5) Concepts and Theory of Organization
ED-D 533D (1.5) Concepts and Theories of Leadership in Learning Contexts: Leadership
ED-D 538A (1.5) Community Leadership and Adult Learning
ED-D 539A (1.5) Leadership, Learning and Social Justice
Compulsory courses
ED-D 599 (6.0) Thesis
A total of 3 units in qualitative and/or quantitative research design taken within any faculty at UVic. These will be completed prior to beginning the thesis.
Other Courses: (7.5 units). Students may select from among courses numbered ED-D 531, 532, 533, 534, 535, 536, 537, 538, 539, 541, 542, 590, 591E, 610.

Up to 3.0 units can be in the form of an Independent Directed Study (ED-D 590) and the student is required to find the instructor to teach this course.
Other courses: (3 units). Normally, up to 3 units can be taken from other departments (EDCI, EPHE) in the Faculty of Education or other faculties across campus (permission of supervisor required).

Program Length
The MEd degree program generally takes two years of full-time study on campus to complete. The MA degree also requires a minimum of two years of full-time study and will often require at least one year to complete the thesis.
PhD Program in Educational Psychology
Advanced doctoral studies in Educational Psychology with special focus in one of the following: Special Education; Learning and Development; or Measurement, Evaluation and Computer Applications.

This program prepares students to contribute to theory, research and practice in the field of Educational Psychology relevant to their chosen area of focus. Graduates of the program pursue academic, research, government, and professional careers. The flexibility of the program and breadth of faculty expertise provide students with opportunities to pursue individualized scholarly and professional goals in close collaboration with faculty supervisors. Students are encouraged to complete a research apprenticeship and an apprenticeship in teaching in higher education.

Program requirements
The minimum total number of units required for the PhD program is 46.5 units. The program requires a minimum of 13.5 units of coursework, a candidacy examination (3.0 units), and a dissertation (minimum 30.0 units). Of the 13.5 units of coursework required, all students must take ED-D 660 (Doctoral Seminar in Contemporary Issues in Educational Psychology), and a minimum of 4.5 units of advanced statistics/research methodology.

A student may transfer a maximum of 3.0 units of graduate credits to his/her doctoral program if the course(s) was completed before entering the doctoral program and not used to obtain any degrees. Courses eligible for transfer must be relevant to the program of study and completed within five years of the date of application. The transfer must be approved by the student’s supervisory committee and the graduate advisor for the program area.

Other Requirements
PhD students write candidacy examinations in research methodology and in their area of specialization (for example, learning and development) within educational psychology. The format will consist of two written papers followed by an oral examination. In the oral examination, the candidate will be examined in both research methodology and his/her area of specialization. Normally, within thirty six months of registration as a provisional doctoral student and at least six months before the final oral examination, a student must pass the candidacy examination.

Students are required to submit a report of their progress to their supervisory committee each year by July 1. Failure to submit a report may jeopardize a student’s subsequent registration.

The degree requires a minimum of 24 consecutive months from the time of first registration. Students are required to register in every term from the time of admission until the requirements of the degree have been met, or formally withdraw in accordance with regulations set out in the University of Victoria Calendar.

Program Length
A minimum residency of one academic year is required. During the residency year, students are expected to be committed full time to their studies. Normally, a student proceeding toward a doctoral degree will be required to complete all the requirements within seven years from the date of first registration in the program.

Note
Students who wish to be eligible for registration as a psychologist with the B.C. College of Psychologists must consult the College of Psychologists of British Columbia.

Graduate Certificate in Learning and Teaching in Higher Education (LATHE)
The LATHE Graduate Certificate is a 6.0 unit program that is designed for graduate students who will be pursuing a career in post-secondary teaching or in other settings where extensive teaching of adults occurs. By completing a series of courses, workshops and guided experiences, students will acquire knowledge of current research, theory and pedagogical skills that will enable them to become effective instructors in higher-education and similar settings.
Students normally will enroll in the LATHE program concurrently with their discipline-based Master’s or Doctoral studies. During the certificate, students take ED-D 600 (1.5) Learning and Teaching in Higher Education; ED-D 605 (3.0) Educational Psychology: Apprenticeship in Teaching in Higher Education; and ED-D 610 (1.5) Contemporary Issues in Higher Education.

NOTE: The LATHE certificate is not designed to lead to certification as a K-12 teacher in the Public School System.

Co-operative Education Program

Participation in the Co-operative Education program - which enables students to acquire knowledge, practical skills for employment, and workplace experience - is optional for Master’s and PhD students. Master’s students complete two work terms, and PhD students complete three (a work term consists of four months of full-time, paid employment), and students undertake study and work terms in alternating sessions). Students require permission from their academic adviser and graduate adviser, as well as the Co-op coordinator, to participate in the Co-op program. Interested students should contact the Co-op office (located in MCK 112) early in the term in which they are applying. Students are also referred to “General Regulations: Graduate Co-op” on page 56.

Electrical and Computer Engineering

General Information

The Department of Electrical and Computer Engineering offers graduate programs leading to the degree of Master of Applied Science (MASc), or a degree of Master of Engineering (MEng), or a degree of Doctor of Philosophy (PhD) in Electrical Engineering or Computer Engineering. The department also participates in the Co-operative Education program at the graduate level. Research areas include the following:

- biomedical engineering
- communication, signal processing and control
- computer engineering and networking
- computer security and forensics
- electromagnetics and photonics
- electronics and energy
- materials and devices
- software engineering

Further information can be found at the department’s web page at www.ece.uvic.ca/researchareas.shtml.

Faculty Members and Areas of Research

Professors Emeritus

Andreas Antoniou, PhD (London)
Analog and digital filter design, digital signal processing, electronic circuits, optimization methods

Wolfgang J.R. Hoefer, Dr-Ing (Grenoble)
Microwave, millimeter wave, optical theory and applications, computational electromagnetics and numerical field modelling, high speed circuit analysis and synthesis, metamaterials, superresolution imaging

R. Lynn Kirk, PhD (Utah State)
Statistical signal processing, detection and estimation: speech, sonar, HF and K-band radar, image, seismic; sensor array processing; adaptive filters; noise suppression; pattern recognition, clustering and classification; wavelet and time-frequency analysis; data compression; blind separation of signals and blind deconvolution; spectral design of randomized switching in dc/dc and dc/ac converters

Eric G. Manning, PhD (Illinois)
Computer networks, distributed computing, multimedia
Adam Zielinski, PhD (Wroclaw)
Underwater acoustic systems; acoustic communications, telemetry and navigation; application of acoustics, ocean electronic instrumentation, signal acquisition and processing, electronic circuits and sensors

Professors

Panajotis Agathoklis, Dr ScTech (Swiss Fed Inst of Tech)
Digital signal processing, multidimensional systems, control systems

Amirali Baniasadi, PhD (Northwestern)
Low-power design, power-aware architectures, VLSI, interconnect, high-performance processors, graphics processing unit

Ashoka K.S. Bhat, PhD (Toronto)
Power electronic controls, high-frequency link power conversion-resonant and pulse with modulation, power converters for alternative energy sources, design of electronic circuits for power control

Jens Bornemann, Dr-Ing (Bremen)
RF/wireless/microwave/millimeter-wave components and feed systems, ultra-wideband and multi-band RF systems in modern integrated circuits, EM-based computer-aided antenna and component design

Lin Cai, PhD (Waterloo)
Wireless networks and mobile computing, resource and mobility management, flow and congestion control, medium access control, multimedia services, cross-layer design

David W. Capson, PhD (McMaster)
Computational vision, algorithms and architectures for accelerated and embedded image analysis, vision-based applications in robotics, metrology, inspection, and servo systems

Thomas E. Darcie, PhD (Toronto) - Tier I Canada Research Chair in Optical Systems for Communications, Imaging and Sensing
Optical systems, optical communications, fiber-optic systems and technology, broadband networks, microwave/terahertz photonics, optical imaging and image processing systems, broadband applications

Nikitas J. Dimopoulos, PhD (Maryland) - Lansdowne Chair in Computer Engineering
Computer architecture, power aware computing, neural networks

Xiaodai Dong, PhD (Queen’s) - Tier II Canada Research Chair in Ultra Wideband Communications
Wireless communications theory and systems, ultra-wideband communications, radio propagation, cooperative communications, cognitive radio, green communications, machine-to-machine communications, wireless security, smart grid, nano communications

Peter F. Driessen, PhD (British Columbia)
Audio and video signal processing, computer music, sound recording, wireless communications, radio propagation

Fayez Gebali, PhD (British Columbia)
Parallel algorithms, computer communications, computer architecture, computer arithmetic, multicore systems

Reuven Gordon, PhD (Cambridge) - Tier II Canada Research Chair in Nanophasmonics
Nanophotonics, plasmonics, biophotonics, biosensors, optical trapping, lab-on-chip devices, nanotechnology and nanofabrication

T. Aaron Gulliver, PhD (Victoria) - Tier I Canada Research Chair in Advanced Wireless Communications
Wireless communications, ultra-wideband systems, wireless networks, cross-layer design, optical communications, cognitive radio, OFDM and MIMO systems, source coding, algebraic coding theory, information theory, cryptography and security, software radio, communication algorithms, smart grid

Harry H. L. Kwok, PhD (Stanford)
Advanced materials, electronic devices and IC design, mixed-mode circuits

Kin Fun Li, PhD (Concordia)
Web mining, human machine interface, computer architecture

Wu-Sheng Lu, PhD (Minnesota)
Design and analysis of digital filters, wavelets and filter banks, DSP for telecommunications, numerical optimization and applications

Thomas Tiedje, PhD (British Columbia)
Epitaxial semiconductor and oxide film growth by molecular beam epitaxy; modeling of thin film growth by computational and analytic methods, electronic, optical and structural properties of expitaxial films; optical device fabrication

Issa Traoré, PhD (Institut National Polytechnique, Toulouse)
Secure information systems, distributed systems, formal methods, requirements specification, object-oriented design and programming

Hong-Chuan Yang, PhD (Minnesota)
Wireless communications and networks, diversity techniques, performance analysis, cross-layer design, and energy efficient communications
Associate Professors

Michael D. Adams, PhD (British Columbia)
Digital signal processing; image/video/audio processing and coding; digital geometry processing; wavelets, subdivision, and filter banks; algorithms; multimedia systems; data compression; computer graphics

Alexandra Branzan Albu, PhD (Bucharest)
Computer vision, pattern recognition, image processing, human computer interaction

Tao Lu, PhD (Waterloo)
Photonic devices, bio-photronics, nano-photons, optical device fabrication and modelling

Michael L. McGuire, PhD (Toronto)
Model-based and adaptive filtering, digital signal processing and wireless network control

Stephen W. Neville, PhD (Victoria) - Director, ASPIRe Centre
Computer and network privacy and security, engineering of large-scale software systems, artificial intelligence, statistical signal processing and pattern recognition, analysis of big data, data science

Christo Papadopoulos, PhD (Brown)
Nanoelectronics, nanomaterials, nanofabrication and self-assembly

Daler N. Rakhmatov, PhD (Arizona)
Energy-efficient computing, dynamically reconfigurable systems, electronic design automation

Mihai Sima, PhD (Bucharest), PhD (Delft)
Computer architecture, reconfigurable computing, circuit design, embedded systems, digital signal processing, speech recognition

Poman P.M. So, PhD (Victoria)
Object-oriented computational electromagnetics, biomedical electromagnetics and instrumentation, computer-aided microwave circuit analysis and synthesis

Adjunct Professors

Mostafa I.H. Abd-El-Barr, PhD (Toronto)
Parallel processing, computer architecture, reliable and fault tolerant computer systems design, digital systems testing, networks optimization, multiple-valued logic systems design

Andrea Basso, PhD (Swiss Fed Inst of Tech)
Multimedia networked services, including speech and video coding, media adaptation and transcoding, multimedia delivery for broadband and wireless networks, caching, scalability and interworking aspects of multimedia

Leonard Bruton, PhD (Newcastle Upon Tyne)
Theory and implementation of real-time analog and digital filters; multidimensional filtering in space-time; 2D, 3D and 4D array processing for the directional filtering of wireless, audio, video and image signals

Kris Caputa, PhD (Victoria)
Electronics for astronomy, adaptive optics, control engineering, analog and digital circuits, sensor arrays, RF and microwaves

M. Watheq El-Kharashi, PhD (Victoria)
Secure hardware, 3D-chips, Systems-on-Chip (SoC), Networking Processing Units (NPU's), multi-core systems, advanced microprocessor design, computer architecture and computer networks education

Morteza Esmaeili, PhD (Carleton)
Information theory, public-key cryptography, algebraic coding theory, graphical representation of codes, LDPC codes, iterative decoding algorithms, linear programming decoding, combinatorics (graph theory, finite geometry, design theory), combinatorial and linear optimization

Mazen O. Hasna, PhD (Minnesota)
Digital communication theory and its application to performance evaluation of wireless communication systems over fading channels, cooperative communications, ad hoc networks, cognitive radio, network coding

Atef A. Ibrahim, PhD (Cairo)
Bioinformatics, Digital VLSI design, System-on-Chip design, embedded hardware systems for cryptosystems, computer arithmetics (addition, multiplication, division), hardware implementation for modular arithmetic, parallel algorithms, reconfigurable computing, parallel computing and multicore design

Wei Li, PhD (Victoria)
Wireless communications, ultra-wideband transmission, wireless sensor network, DSP for wireless communication, dynamic spectrum allocation, smart grids

Wyatt H. Page, PhD (Massey)
Acoustics, noise and human health, immersive sound - recording and reproduction, gesture capture for expressive user interfaces, motion capture and biomechanics, multimedia signal processing

Dale J. Shpak, PhD (Victoria)
Digital filter design and implementation; digital signal processing for audio, wireless, and wireline systems; embedded, distributed, and concurrent processing; wireless remote sensing systems
Isaac Woungang, PhD (Toulon & Var)
Network security, computer communication networks, mobile communication systems, secure information systems

Hao Zhang, PhD (Victoria)
Wireless communications, ultra-wideband systems, wireless sensor network, cognitive radio, OFDM and MIMO systems, secure communications, internet of things, underwater communications, GPS, compass, satellite communications, 60GHz, underwater vehicle

Degrees and Specializations Offered
Master of Applied Science, Master of Engineering and Doctor of Philosophy in Electrical Engineering and in Computer Engineering.

An intensive one-year course-based program, MEng in Telecommunications and Information Security, is available to provide advanced engineering skills in the telecommunications and information security areas.

The department participates in the Co-operative Education Program in the Faculty of Graduate Studies by individual arrangement. Engineering graduate students may participate in a Co-operative Education graduate program as described in “General Regulations: Graduate Co-op”, page 56.

Facilities
The department has excellent computing facilities and well-equipped laboratories which enable faculty and students to conduct research in communications, signal processing, acoustics, automatic control, computer engineering, software engineering, artificial intelligence, expert systems, electromagnetics, optics, optoelectronics, power electronics, modelling and fault diagnosis of electric machines, VLSI, nanoelectronics, devices and computer architecture. For further details, refer to the webpages of individual research groups on the departmental website at <www.ece.uvic.ca>.

Financial Support
It is the intention of the department to fund MASc and PhD students from research grants, scholarships and fellowships. While there is no guarantee, additional funding may be available though Teaching Assistantships. Students with their own funding will also be considered.

Admission Requirements
General
Please apply on line by following the steps found at <www.uvic.ca/application>.

Instructions on how to submit your documents are also available from this link. To review your application status, go to “My UVic Application”.

Additional information about graduate studies in the Department of Electrical and Computer Engineering is available at <www.ece.uvic.ca>. Specific information on MEng in Telecommunications and Information Security (MTIS) is available at <www.MTIS.ece.uvic.ca>.

Admission to MTIS Program
Applicants for admission to the MTIS program require a bachelor’s degree in electrical or computer engineering, computer science, or related disciplines, normally with a first-class standing.

Admission To Master’s Programs
Applicants for admission to the master’s programs require a bachelor’s degree, preferably in Engineering. International students normally require a first-class standing.

Admission to the PhD Program
Applicants for admission to the PhD program require a bachelor’s and a master’s degree, preferably in Engineering. International students normally require a first-class standing.

Program Requirements
MEng in Telecommunications and Information Security (MTIS)
Course Requirements
The MTIS consists of nine technical and two professional career development courses for a total of 15 units of course work:

• Three compulsory courses:
  - ELEC 514 Design and Analysis of Computer Communications Networks
  - ELEC 567 Advanced Network Security
  - ELEC 570 Computer Forensics Methodologies

• Three elective courses from List 1

• Three elective courses from either List 1 or 2

• ELEC 591 Professional Practice
• ELEC 592 Career Development

MTIS List 1 Electives:
• CSC 529 Cryptography
• ELEC 512 Digital Communications
• ELEC 515 Information Theory
• ELEC 516 Advanced Wireless Communications
• ELEC 548 Hardware Security
• ELEC 572 Security, Privacy and Data Analytics
• ELEC 574 Practice of Information Security and Privacy

MTIS List 2 Electives:
• Up to 3.0 units at the 400-level may be taken for credit
• CSC 529 Cryptography
- CSC 567 Switching, Network Traffic and Quality of Service
- CSC 569 Wireless and Mobile Networks
- CSC 579 Overlay and Peer-to-Peer Networking
- CSC 586E Data Mining
- ELEC 504 Random Signals
- ELEC 511 Error Control Coding
- ELEC 513 Data and Computer Communications
- ELEC 519A Selected Topics in Digital Communications
- ELEC 519B Selected Topics in Computer Communications
- ELEC 519C Selected Topics in Secure Communications
- ELEC 521 Microwave and Millimeter Wave Engineering
- ELEC 522 Antennas and Propagation
- ELEC 535 Pattern Recognition
- ELEC 569A Selected Topics in Computer Engineering (upon approval)
- ELEC 586 Multiresolution Signal and Geometry Processing with Software Applications
- ELEC 590 Directed Study upon approval

**Program Length**
The MTIS program will normally be completed in one year (three consecutive academic terms), followed by one to three optional Co-op Internship terms.

**MASc Program**

**Course Requirements**
The MASc program consists of a minimum of 7.5 units of course work, plus ELEC 509 Seminar of 1 unit, plus the ELEC 599 MASc Thesis of 12 units.

The course work may include 1.5 units of ELEC 590. Subject to the approval of the department and the appropriate Faculty regulations, the course work may include a maximum of 3 units at the 400-level. In exceptional circumstances the undergraduate course work may include 1.5 units at the 300-level.

The actual combination of courses is subject to the approval of the supervisory committee and the department.

**Thesis**
The format of the MASc Thesis is according to faculty guidelines.

**Oral Examination**
The MASc Thesis must be defended in an oral examination.

**Program Length**
The MASc program will normally be completed in two years.

**MEng Program (non-MTIS)**

**Admission requirements**
In addition to regular University admission requirements, admission to this program requires permission of the department.

**Course Requirements**
The MEng program consists of a minimum of 12 units of course work, plus ELEC 509 Seminar of 1 unit, plus the ELEC 598 MEng Project of 2 units.

The course work may include a maximum of 3.0 units of ELEC 590. Subject to the approval of the department and the appropriate Faculty regulations, the course work may include a maximum of 3 units at the 400-level. In exceptional circumstances the undergraduate course work may include 1.5 units at the 300-level.

The actual combination of courses is subject to the approval of the supervisory committee and the department.

**Final Project**
The format of the MEng Final Project is according to faculty guidelines.

**Oral Examination**
The MEng Final Project must be defended in an oral examination.

**Program Length**
The MEng program will normally be completed in five terms.

**MBA+MEng Double-Degree Program**
Together with the School of Business, the department is offering an MBA+MEng double-degree program. Additional tuition fees will apply. For more information, please contact the Chair of the department or the Graduate Adviser.

**Fast Track Master’s Option**
The Department of Electrical and Computer Engineering offers outstanding undergraduate students an opportunity for a head start in a master’s program. Qualified students will be permitted to enrol in graduate level courses during their fourth year. These courses will be extra to any undergraduate requirements and thus can be transferred to the MASc or MEng degree program. All of the admission and transfer credit regulations of the Faculty of Graduate Studies must be met. For more information, please contact the Chair or the Graduate Adviser of the department.

**PhD Program**

**Course Requirements for students admitted with a Master’s degree**
The PhD program consists of a minimum of 4.5 or 15 units of course work depending on whether the student is admitted with an MASc degree or is transferred to a PhD program from an MASc program, plus the ELEC 693 Candidacy Examination of 3 units, plus ELEC 609 Seminar of 1 unit, plus the ELEC 699 PhD Dissertation of 30-36 units.
The course work may include a maximum of 1.5 units at the 400-level or of ELEC 590.

The actual combination of courses is subject to the approval of the supervisory committee and the department.

**Course Requirements for students transferred from an MASc program**

The PhD program consists of a minimum of 12 units of course work, plus ELEC 693 Candidacy Examination of 3 units, plus ELEC 609 Seminar of 1 unit, plus ELEC 699 PhD Dissertation of 30 units.

The course work may include a maximum of 3.0 units of ELEC 590. Subject to the approval of the department and the appropriate Faculty regulation, the course work may include a maximum of 3.0 units at the 400-level.

The actual combination of courses is subject to the approval of the supervisory committee and the department.

**Candidacy Examination (ELEC 693)**

The PhD Candidacy Examination in the Department of Electrical and Computer Engineering will consist of an Oral Examination. The Oral Examination should be taken and passed not later than three years from initial PhD registration. ELEC 693 is a co-requisite. All registrations in ELEC 699 must be accompanied by registration in ELEC 693 until ELEC 693 is passed.

**Dissertation**

The format of the PhD Dissertation is according to faculty guidelines.

**Oral Examination**

The PhD dissertation must be defended in an oral examination.

**Program Length**

The PhD program will normally be completed in three to four years.

**Co-operative Education**

Participation in the Co-operative Education program, which enables students to acquire knowledge, practical skills and workplace experience, is optional for full-time Master’s and PhD students. Graduation with a co-operative education designation requires master’s students to complete two work terms and PhD students to complete three (a work term consists of four months of full time, paid employment). Students require permission from their academic supervisor and the Co-op coordinator to participate in the Co-op program. Permission may be granted for additional work terms typically to a maximum of four. Interested students should contact the Engineering and Computer Science/Math Co-op office during their first year. Students should also consult “Co-operative Education” on page 55.

---

**Faculty Members and Areas of Research**

G. Kim Blank, PhD (Southampton)
  Romantic poetry; cultural studies; professional writing
Nicholas P.R. Bradley, PhD (Toronto)
  Literatures of the West Coast; Canadian literature; American literature; poetry; literature and the environment
Luke Carson, PhD (Calif, Los Angeles)
  Modern American poetry
Lisa A. Chalykoff, PhD (British Columbia)
  Modern and contemporary Canadian fiction and poetry; Canadian literary history; literary regionalism; literary nationalism; First Nations literature; ethnic minority literatures
Alison Chapman, PhD (Glasgow)

Victorian literature and culture, especially women's poetry

Misao A. Dean, PhD (Queen's)

Canadian novel; postcolonial and gender theory; affective approaches to fiction; maternal and contemporary feminisms; whiteness theory; animals and hunting in literature; travel and exploration narratives, including motorcycling narratives

James A. Dopp, PhD (York)

Contemporary Canadian poetry and fiction; critical theory; popular culture

Christopher D. Douglas, PhD (Toronto)

American literature; contemporary American fiction; multicultural American literatures; religion and literature; postmodernism and modernism

Erin Ellerbeck, PhD (Toronto)

Renaissance literature; early modern English drama; history of medicine, science, and horticulture

Gordon D. Fulton, PhD (London)

Restoration and 18th-century literature; 18th-century religious literature; literary stylistics; critical discourse analysis; history of the English language

Joseph Grossi, PhD (Ohio State)

Anglo-Saxon literature and culture; Middle English literature; early East Anglian regional identity; medieval Italian literature

Elizabeth M. Grove-White, PhD (Trinity College, Dublin)

Literacies; electronic communication and social media; digital editions; transactional writing

Iain M. Higgins, PhD (Harvard)

Medieval and Renaissance literature, including early Scottish literature; contemporary poetry; travel and nature writing

Janelle A. Jenstad, PhD (Queen's)

Shakespeare; Digital Humanities; early modern literature; editing and textual studies; London studies; text encoding; performance criticism

Magdalena M.A. Kay, PhD ( Calif, Berkeley)

20th-century British literature; Irish literature; Polish literature; comparative literature; poetry and poetics

Erin E. Kelly, PhD (Maryland)

Renaissance literature; early modern English drama; 16th- and 17th-century religious discourse; history of the book; rhetoric and composition

Gary Kuchar, PhD (McMaster)

Renaissance literature; 17th-century poetry and prose; literature and post-reformation culture; intellectual history; Shakespeare and religion; literary-critical theory

Mary Elizabeth Leighton, PhD (Alberta)

Victorian literature, especially fiction and the periodical press; Victorian book illustration; dance adaptations of Victorian literature; the disciplinary history of English

Robert Miles, PhD (Sheffield, England)

Romantic period, especially Gothic writing and prose fiction

Eric Miller, PhD (Virginia)

Restoration and 18th-century literature; contemporary poetry; nature writing

J. Allan Mitchell, PhD (Dalhousie)

Middle English poetry and prose; rhetoric; ethics; ecology

Michael Nowlin, PhD ( Calif, Los Angeles)

19th- and 20th-century American literature; European and American modernism; African-American fiction

Richard Pickard, PhD (Alberta)

Environmental Humanities; ecocriticism; nature writing; 18th-century poetry; Literatures of the West Coast; Canadian literature; teaching composition and writing

Sheila M. Rabillard, PhD (Princeton)

Modern drama; theories of drama and performance; gender studies; modern literature

Stephen Ross, PhD (Queen's)

International modernism (especially the novel); critical theory; Digital Humanities

Jentery Sayers, PhD (Washington)

Digital Humanities; comparative media studies; literary modernism; sound studies; cultural histories of technologies; hybrid pedagogy

Lincoln Shlensky, PhD ( Calif, Berkeley)

Postcolonialism; cultural studies; film studies; critical theory; Jewish studies; francophone and anglophone Caribbean literature

Nicole Shukin, PhD (Alberta)

Canadian literature; cultural studies; animal studies; critical theory; cultural histories of capitalism; biopolitics

Raymond G. Siemens, PhD (British Columbia)

Renaissance literature; textual culture; editorial theory; academic publishing; Humanities computing and Digital Humanities; social knowledge
Lisa A. Surridge, PhD (Toronto)

- 19th-century British fiction; Victorian book illustration; Victorian serial fiction; Victorian sensation fiction; Victorians and marital violence; judicial and legal writing

Richard van Oort, PhD (Calif, Irvine)

- Shakespeare; Renaissance literature; literature and the other disciplines (especially anthropology); literary theory; generative anthropology

Adrienne S. Williams Boyarin, PhD (Calif, Berkeley)

- Old and Middle English; Early Middle English; Medieval English history and culture; Marian literature and legends; hagiography (especially women’s); manuscript studies; Medieval anti-Jewish discourse and Christian-Jewish dialogue; law and literature

Samuel G. Wong, PhD (Princeton)

- Renaissance literature; Restoration literature; history of science; early modern philosophy

**Degrees and Specializations Offered**

The Department of English offers a course-only or project-based MA (thesis by special approval only) and PhD degrees in British, Canadian, American, Irish, and Postcolonial Literature, and in Critical Theory. It also offers a PhD and thesis-based MA with a concentration in Cultural, Social and Political Thought (CSPT); a course-only or project-based MA (thesis by special approval only) with a concentration in Literatures of the West Coast (LWC); a course-only or project-based MA with a concentration in Medieval and Early Modern Studies (MEMS); and a course-only or project-based MA with a concentration in Nineteenth Century Studies (NCS).

**Facilities**

The main research library for the Humanities is the McPherson Library. Collectively, the libraries house over 1.9 million volumes, 40,000 serials, 2.3 million items in microform, and many thousands of records, tapes, compact disks, scores, films and videos. Holdings include primary and secondary titles related to Canadian, British, American, Latin American, African, Asian, and Antipodean literatures. The Library’s special collections total approximately 75,000 volumes, of which about one half are related to the study of English literature. The rare books and valuable manuscripts material from the medieval period to the present day include collections of Herbert Read, John Betjeman, Robert Graves, T.S. Eliot, W.B. Yeats, and Wyndham Lewis.

The library’s online subscriptions and CD-ROM holdings include several of the most notable research indices, including the MLA, the Humanities and Social Sciences, and the Periodicals Contents Indexes. The Library offers an interlibrary loans service for books it does not hold, and subscribes to a variety of electronic journals and article delivery services to provide access to articles in journals not held locally.

Financial support is available to incoming students on a competitive basis. No separate application is necessary; the application for admission also serves as application for Fellowships, Teaching Assistantships, and Research Assistantships. To be eligible, students must maintain continuous full-time registration during the tenure of award, and must have an outstanding academic record (usually a minimum GPA of 7.0 on a 9-point scale). Students may not normally hold another major award (e.g., SSHRC) in conjunction with a Fellowship or Teaching Assistantship.

Students may apply for work as Research Assistants within the University by approaching faculty members directly. All eligible students are encouraged to apply for funding from provincial, federal, and external sources.

**MA:** The number and value of fellowships, teaching assistantships, and research assistantships awarded to new students varies from year to year, but they are currently valued at $2,500 to $15,000 for one year. Unfortunately, we are unable to fund students beyond their first year. Students applying to the CSPT concentration should approach the CSPT Director for information on fellowships specifically awarded to CSPT students.

**PhD:** The number and value of fellowships, teaching assistantships, and research assistantships awarded to new students varies from year to year, but they are currently valued at $15,000 to $25,000 per year for four years. In their third or subsequent years, all students may apply to teach first-year English (one section per term, to a maximum of three sections) if they are registered full-time, have maintained a minimum 7.0 GPA, and show scholarly and teaching potential. Students should have completed their Candidacy Examinations before receiving teaching appointments. Students applying to the CSPT concentration should approach the CSPT Director for information on fellowships specifically awarded to CSPT students.

**ADMISSION REQUIREMENTS**

**General**

The admission selection process is competitive. Applications are reviewed by the Graduate Admissions and Records Office and then by the English Graduate Committee, who usually makes admission decisions in February and March. Not all students who meet the minimum requirements can be admitted.

In addition to the application materials required by the Faculty of Graduate Studies (see “Faculty Admissions”, page 18), the department requires a statement of intent (not to exceed 1 typed page for MA applicants or 2 typed pages for PhD applicants), a 10-15 page typed essay demonstrating advanced literary and/or critical studies ability, and a CV. GRE scores are not specifically required, but students who have taken the exam are advised to...
submit the results since a high score can only strengthen their application.

International students whose first language is not English may be
required by the Faculty of Graduate Studies to demonstrate
competency in English (see “English Language Proficiency”, page
19) by providing results of the Test of English as a Foreign
Language/TOEFL (with a minimum 630 on the paper-based test
or 101 on the internet-based test) or the International English
Language Testing System/IELTS (with an overall score of at least
Band 7).

Admission to the Master’s Program
September is the primary entry point. Only students who enter in
September are eligible for fellowships or teaching assistantships,
and a limited number of courses are offered in the Summer.

Admission to the MA program requires a bachelor’s degree,
preferably with an Honours or Major that includes courses in all or
most areas of English literature including critical theory, with a
minimum overall average of at least A- (7.0 GPA on a 9-point scale,
3.7 GPA on a 4-point scale, or a high second-class standing) in the
final two full years of credit units of undergraduate work.

Admission to the PhD Program
September is the only entry point for PhD students. Admission to
the program usually requires an MA degree, with a minimum
average of A- in graduate courses. It may be possible for an
exceptional student in the University of Victoria MA program to
enter the PhD program before completing the MA, but not before
the completion of one Winter Session and a superior
performance in five graduate courses. A limited number of
students may also be admitted each year without funding or if
they arrive with fellowship funding.

Concentration in Cultural, Social, and Political
Thought (CSPT)
Students applying to the Cultural, Social, and Political Thought
(CSPT) concentration—an interdisciplinary graduate
concentration open to selected MA and PhD students in English,
Environmental Studies, History, Political Science, and Sociology—
must meet the admission requirements for the MA or PhD
program. MA applicants are expected to have some background
in theory; PhD applicants are expected to have a strong
competence in theory. Students must apply online, choosing the
Concentration in Cultural, Social and Political Thought (CSPT)
option for English. If approved by the department, the application
will be reviewed by the CSPT Admissions Committee. For full
information about the program see http://www.uvic.ca/
interdisciplinary/cspt/. Students must meet the core graduating
requirements of the individual departments as well as specific
requirements of the CSPT Program.

See also the entry for “Concentration in Cultural, Social and
Political Thought (CSPT)”, page 115.

Only students who have already been accepted into the MA or
PhD program may be admitted to CSPT; however, acceptance to
the MA or PhD program does not guarantee admission to the
CSPT concentration. The requirements for the concentrations in
the departments of Environmental Studies, History, Political
Science and Sociology differ from those in English.

Concentration in Literatures of the West Coast
(LWC)
The Literatures of the West Coast concentration is an innovative
MA program that combines interdisciplinary study of Canadian
and US literature with topics in the local histories, environments,
and aboriginal traditions of the West Coast. Students applying for
admission to the general MA in English should indicate their
interest in the Literatures of the West Coast concentration in their
Statement of Intent.

The Literatures of the West Coast concentration is open to
students from a broad range of disciplines. Applicants from a
variety of undergraduate and professional backgrounds are
encouraged to apply. Students who are deemed admissible by the
Graduate Committee, and who have specified an interest in the
Literatures of the West Coast concentration, will be admitted
and considered for funding along with those pursuing the
general MA degree.

Concentration in Medieval and Early Modern
Studies (MEMS)
The Medieval and Early Modern Studies concentration is
designed for MA students who wish to make an intensive study of
medieval and early modern literature. Students may declare the
concentration at any time. Graduates receive an MA in English,
with a concentration in Medieval and Early Modern Studies.

The substance of the concentration will vary according to
individual interests and annual course offerings.

Concentration in Nineteenth Century Studies (NCS)
The Nineteenth Century Studies concentration is designed for MA
students who wish to make an intensive study of Victorian,
Romantic, and nineteenth century American and Canadian
literatures and cultures. Students may declare the concentration
at any time. Graduates receive an MA in English, with a
concentration in Nineteenth Century Studies.

The substance of the concentration will vary according to
individual interests and annual course offerings; depending on
course availability, this concentration can take more than 12
months to complete.

Deadlines
Students who wish to be considered for funding should apply for
September entry by January 15. For applicants who hold any
post-secondary documents from academic institutions outside of
Canada, however, the application deadline is December 15
(applications received after this date will still be accepted, but
may not be processed in time to allow registration in September).
International MA applications received by April 30 and domestic
MA applications received by May 31 will still be considered but
may not be eligible for funding. PhD applications received after January 15 cannot be considered.

**Program Requirements**

The department offers three paths through the MA degree: a course-only degree; a course and research project degree; and a course and thesis degree. The thesis option is usually restricted to students participating in the CSPT concentration, who are required to complete a thesis. Students doing a concentration in Medieval and Early Modern Studies or Nineteenth Century Studies are required to complete a course-only degree, or course and research project degree.

Students—other than those in the CSPT, MEMS or NCS concentrations—who wish to pursue a thesis program (or, for LWC students, a thesis or alternative creative, historical, or multimedia project) must find a supervisor willing to direct their thesis or project and must submit for the approval of the Graduate Committee a proposal, a rationale for pursuing the thesis option, and a letter of support from the prospective supervisor. Students in the LWC concentration must also submit a letter of support from the LWC Area Committee Chair. If a student’s proposal is denied by the Graduate Committee, the student will have one opportunity to revise and resubmit; if the proposal is denied a second time, the student will be required to complete the course-only option or the course and research project option.

In designing their programs, students may benefit from consulting the Graduate Adviser and, if applicable, the Area Committee Chairs (for students with an interest in particular fields).

Not all Graduate English courses will be offered in a particular year. Students should consult the department to determine the courses that will be offered each year.

All courses except ENGL 500, 502, 507 and 582 are variable courses that will be offered each year.

Courses designated as Area Courses (ENGL 505, 515, 520, 530, 540, 550, 560, 570, 581, 586, 587, 588) offer a study of representative texts (canonical and non-canonical) in light of current scholarly debate in a given field. While remaining attentive to broader interpretive issues, Area Courses will explore some of the most vital critical methodologies now practiced in the field. In any given year, the instructor will select the works and methodologies to be studied. Students may take an Area course in a given field more than once in their program of studies only with the permission of the Graduate Adviser.

Seminars designated as Special Topic courses (ENGL 503, 504, 506, 508, 510, 516, 521, 531, 541, 551, 561, 572, 581, 586) focus on specific topics designed around the current research interests of faculty members. Students may take different Special Topics courses with the same number more than once.

**Thesis-based Master’s**

**Course Requirements for MA**

Students are required to complete 7.5 units of English graduate courses, 1.5 units of which will be ENGL 500 (Textual Studies and Methods of Research). ENGL 502 (Teaching Literature and Composition) may not be taken as one of the required courses; however, students are encouraged to take it as an extra course.

**Summary of Course Requirements:**

**Course Requirements for MA With a Concentration in CSPT**

Students accepted into the CSPT concentration are required to complete 4.5 units of English graduate courses, 1.5 units of which will be ENGL 500 (Textual Studies and Methods of Research). ENGL 502 (Teaching Literature and Composition) may not be taken as one of the required courses; however, students are encouraged to take it as an extra course. Students are also required to take CSPT 501 (Contemporary Cultural Social and Political Thought I) plus another 1.5-unit CSPT course at the 500 level (with permission of the CSPT Director, a student may substitute a graduate theory seminar taught by a CSPT faculty member in another department for the 1.5-unit CSPT course at the 500 level).

**Course Requirements for MA With a Concentration in LWC**

Students accepted into the LWC concentration are required to complete 7.5 units of graduate courses, including ENGL 500 (Textual Studies and Methods of Research) for 1.5 units, and ENGL 582 (Core Seminar in Literatures of the West Coast) for 1.5 units. Of the remaining 4.5 units, 3.0 units must be LWC-tagged courses, such as those in the 583 series or those approved by the Graduate Committee, and 1.5 units may be from a department other than English, to be chosen in consultation with the LWC Area Committee Chair and with approval of the Graduate Adviser. ENGL 502 (Teaching Literature and Composition) may not be taken as one of the required courses; however, students are encouraged to take it as an extra course.

Thesis

The thesis should be between 18,000 and 27,000 words, excluding notes and bibliography. For students in the CSPT concentration, the thesis must be on an approved topic within the fields of both English and CSPT, and at least two members of the supervisory committee must be drawn from the participating faculty of the CSPT program. For students in the LWC concentration, the thesis must be in the LWC area.

Other Requirements

Students must demonstrate a reading knowledge of one appropriate language other than English. The language requirement is usually fulfilled by French, German or Italian, but any other language may be substituted, after consultation with the English Graduate Adviser.

Students in the LWC concentration may use a West Coast aboriginal language to fulfill this requirement, if a qualified examiner can be found. Students also have the option of completing this requirement with at least a "B" in LING 401 (Salish) or LING 403 (Dene—Athabaskan).

Language tests are held in mid-December, mid-March, and mid-July. Students who have a second language at third-year university level on their transcript, with a minimum grade of "B" (or a "Pass," if the course is evaluated on a "Pass" or "Fail" basis), may apply to the Department Graduate Adviser for a waiver of the language test.

Students can satisfy the language requirement in French, German, or Italian by passing FRAN 300, GMST 405 (formerly GER 390) or ITAL 300 respectively (if offered). The minimum passing grade in these courses is "B" (or a "Pass," if the course is evaluated on a "Pass" or "Fail" basis). Students who wish to prepare for the language requirement by taking online courses offered at other institutions are still required to write the language test.

Oral Examination

At the final two-hour oral examination, the student gives a 15-20 minute presentation about the thesis, and then answers questions from the Examining Committee and from the general audience.

Program Length

With a good Honours BA or a strong Major in English, a full-time student could finish the thesis MA program in 12 months; however, most students take at least 16 months.
Completing this requirement with at least a “B” in LING 401 (Salish) or LING 403 (Dene-Athabaskan).

Students in the MEMS concentration will normally fulfill the language requirement by a language (Latin, French, Spanish, Italian, etc.) appropriate to both the concentration and the student’s particular interest. The language should be chosen in consultation with the Graduate Adviser or with the student’s Supervisor.

Language tests are held in mid-December, mid-March, and mid-July. Students who have a second language at third-year university level on their transcript, with a minimum grade of “B” (or a “Pass,” if the course is evaluated on a “Pass” or “Fail” basis), may apply to the Department Graduate Adviser for a waiver of the language test.

Students can satisfy the language requirement in French, German, or Italian by passing FRAN 300, GMST 405 (formerly GER 390), or ITAL 300 respectively (if offered). The minimum passing grade in these courses is “B” (or a “Pass,” if the course is evaluated on a “Pass” or “Fail” basis). Students who wish to prepare for the language requirement by taking online courses offered at other institutions are still required to write the language test.

Program Length

With a good Honours BA or a strong Major in English, a full-time student could finish the course-only MA program in 12 months; however, most students take at least 16 months.

Project-based Master’s

Course Requirements for MA

Students are required to complete 10.5 units of English graduate courses, 1.5 units of which will be ENGL 500 (Textual Studies and Methods of Research), ENGL 502 (Teaching Literature and Composition) may be taken as 1.5 units of the required courses.

Concentration in LWC

Of the 10.5 units of English graduate courses, students doing a concentration in LWC are required to complete ENGL 582 (Core Seminar in Literatures of the West Coast) for 1.5 units, and 3.0 units of LWC-tagged courses, such as those in the 583 series or those approved by the Graduate Committee; 1.5 units may be from a department other than English, to be chosen in consultation with the LWC Area Committee Chair and with approval from the Graduate Adviser.

Concentration in MEMS

Of the 10.5 units of English graduate courses, students doing a concentration in MEMS are required to complete a minimum of 4.5 units of courses in the medieval and/or early modern areas (choosing from ENGL 510, 515, 516, 520, 521, 530, and 531; if necessary, and if the usual conditions are met, students can also obtain concentration credit through Directed Studies or by taking interdisciplinary courses in the Medieval Studies Program).

Concentration in NCS

Of the 10.5 units of English graduate courses, students doing a concentration in NCS are required to complete a minimum of 4.5 units of courses in the Nineteenth Century Studies areas, such as ENGL 550 and 551, and those approved by the Graduate Committee. Depending on course availability, the project-based NCS concentration can take more than 12 months to complete.

</table>

Final Project

Students will complete a 4.5-unit Master’s Essay or Project, not to exceed 10,000 words (or the equivalent in digital, editorial, or bibliographical components), plus notes and bibliography. The essay or project will normally be a revised and extended version of an essay or project prepared for one of the student’s courses. It must present an original and cogent argument, and demonstrate the student’s research and writing abilities. For students doing a concentration in LWC, MEMS, or NCS, the topic must be in the relevant concentration areas, as determined by the Graduate Adviser.

Other Requirements

Students must demonstrate a reading knowledge of one appropriate language other than English. The language requirement is usually fulfilled by French, German, or Italian, but any other language may be substituted after consultation with the English Graduate Adviser.

Students in the LWC concentration may use a West Coast aboriginal language to fulfill this requirement, if a qualified examiner can be found. Students also have the option of completing this requirement with at least a “B” in LING 401 (Salish) or LING 403 (Dene-Athabaskan).

Students in the MEMS concentration will normally fulfill the language requirement by a language (Latin, French, Spanish, Italian, etc.) appropriate to both the concentration and the student’s particular interest. The language should be chosen in consultation with the Graduate Adviser or with the student’s Supervisor.

Language tests are held in mid-December, mid-March, and mid-July. Students who have a second language at third-year university level on their transcript, with a minimum grade of “B” (or a “Pass,” if the course is evaluated on a “Pass” or “Fail” basis), may apply to the Department Graduate Adviser for a waiver of the language test.

Students can satisfy the language requirement in French, German, or Italian by passing FRAN 300, GMST 405 (formerly GER 390), or ITAL 300 respectively (if offered). The minimum passing grade in these courses is “B” (or a “Pass,” if the course is evaluated on a
“Pass” or “Fail” basis). Students who wish to prepare for the 
language requirement by taking online courses offered at other 
institutions are still required to write the language test.

**Oral Examination**

At the final one and a half-hour oral examination, the student 
gives a brief 15-minute presentation on the Master’s Essay, and 
then answers questions from the Examining Committee and from 
the general audience.

**Program Length**

With a good Honours BA or a strong Major in English, a full-time 
student could finish the project-based MA program in 12 months; 
however, some students take at least 16 months.

**PhD Program**

**Course Requirements**

Students are required to complete 6.0 units of English graduate 
courses beyond those taken as part of an MA program. 1.5 of 
these units will be ENGL 500 (Textual Studies and Methods of 
Research), unless a student has already taken it or its equivalent. 
Students may be required to take courses in areas in which they 
are deficient. PhD students are not permitted to take ENGL 502 
(Teaching Literature and Composition) as one of their required 
courses; however, they are encouraged to take it as an extra 
course.

Students accepted into the CSPT concentration must take 3.0 
units of CSPT designated courses (with 1.5 units being CSPT 601) 
plus 3.0 units of English graduate courses (non-CSPT designated), 
including ENGL 500.

**Summary of Course Requirements:**

<table>
<thead>
<tr>

</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>30.0</strong>*</td>
</tr>
</tbody>
</table>

*Minimum number of units

**Candidacy**

Within twenty four months of registration as a doctoral candidate 
and at least six months before the final oral examination, a 
student must pass a “candidacy examination”. This examination 
consists of two sections:

1. a Major Field Examination on the area of the student’s 
specialization, based on a reading list set by the department 
and reviewed annually; in consultation with the Chair of their 
Examining Committee and with the approval of the 
department’s Graduate Committee, candidates may 
designate texts of particular interest and thereby minimally 
tailor the exam to their expertise.

2. a Focused Field Examination on a sub-field directly related to 
the candidate’s anticipated dissertation research, based on a 
reading list established in consultation with the Chair of the 
student’s Examining Committee and approved by the 
department’s Graduate Committee.

Each examination has two components: a written paper and an 
oral examination. Students must pass both the written and oral 
components in order to pass a candidacy examination.

Students who have been accepted into the CSPT concentration 
must write either the Major Field or Focused Field Examination in 
the CSPT area, and at least two of the committee members for this 
examination must participate in the CSPT concentration. CSPT will 
set the exam format and reading list.

Students must pass the Candidacy Examination before advancing 
to the Dissertation Prospectus and before registering in the 
Dissertation (ENGL 699).

**Dissertation Prospectus**

The Dissertation Prospectus will normally be completed in the 
first term of the third year of registration as a doctoral candidate. 
The Prospectus must be written in consultation with the student’s 
Supervisor and Supervisory Committee, and must be approved 
by all members of the Supervisory Committee before further work 
on the Dissertation begins.

The Dissertation Prospectus and approval process consists of two 
parts, one written and one oral:

1. a substantial essay and bibliography setting forth the nature 
of the dissertation project and its anticipated arguments and 
value.

2. an oral Prospectus Conference with the student’s Supervisory 
Committee to identify key strengths and weaknesses of, and 
gain final approval of, the proposed dissertation research 
as outlined in the Dissertation Prospectus. The student must 
provide a written summary of this Conference to the 
members of the Supervisory Committee, for their 
endorsement, prior to commencing the Dissertation.

**Other Requirements**

**Language Requirement** - Students must demonstrate a reading 
knowledge of two appropriate languages other than English. The 
language requirement is usually fulfilled by French or German, 
but any other language may be substituted, after consultation 
with the English Graduate Adviser, if it is appropriate to the 
student’s dissertation topic. Students who are judged by the 
Graduate Adviser to have advanced competence in one language 
may have one of the second language requirements waived.
Language tests are held in mid-December, mid-March, and mid-July. Students who have a second language at third-year university level on their transcript, with a minimum grade of “B” (or a “Pass,” if the course is evaluated on a “Pass” or “Fail” basis), may apply to the Department Graduate Adviser for a waiver of the language test.

Students can satisfy the language requirement in French or in German by passing FRAN 300 or GMST 405 (formerly GER 390) respectively (if offered). Students who have received permission from the Graduate Adviser to use Italian as one of their second languages can satisfy the language requirement in Italian by passing ITAL 300. The minimum passing grade in these courses is “B” (or a “Pass,” if the course is evaluated on a “Pass” or “Fail” basis). Students who wish to prepare for the language requirement by taking online courses offered at other institutions are still required to write the language test.

**Instructional Experience** - As an integral part of their program, PhD students are usually expected to undertake teaching duties within the department.

**Dissertation**

The dissertation is expected to be a sophisticated work of the highest possible caliber, and potentially publishable, and should be between 60,000-120,000 words (excluding notes and bibliography).

For students in the CSPT concentration, the dissertation must be on an approved topic within the fields of both English and CSPT, and at least two members of the supervisory committee must be drawn from the participating faculty of the CSPT program.

**Oral Examination**

At the final three-hour oral examination, the student gives a 20-minute presentation about the dissertation, and then answers questions from the Examining Committee and from the general audience.

**Program Length**

Although the University allows students a seven-year period within which to complete their PhD degree, students who wish to be competitive in the job market and in postdoctoral and other grant applications should aim at completing their doctoral program in four to five years.

**Graduate Certificate in Digital Humanities**

The Faculty of Humanities, in partnership with the Digital Humanities Summer Institute and its network, offers a Graduate Certificate in Digital Humanities. Bringing together computational methods and theories with humanities research and pedagogy, this program offers post-graduates, graduate students, academics, librarians and those in extra-academic sectors expertise in the digital dimensions of humanities research in text-, image-, and sound-based media toward proficiency in areas such as computing and information management, multimedia communication, social computing, game design, analysis and data visualization, digital remediation and curation, prototyping, encoding and data processing, and beyond.

Digital Humanities is fundamentally interdisciplinary, engaging fields such as literature, language, history, social justice and the arts. In this context, digital tools are developed, tested and used to support innovative analysis and new conventions for representation, documentation, narration, and expression.

**Certificate Requirements**

DHUM 501, 502, 503, 504, 505 .......................................................... 7.5

DHUM 590 may be substituted for 1.5 units, with permission of the department.

**CO-OPERATIVE EDUCATION**

Participation in the Co-operative Education program - which enables students to acquire knowledge, practical skills for employment, and workplace experience - is optional for Master’s and PhD students. Master’s students complete two work terms, and PhD students complete three (a work term consists of four months of full-time, paid employment), and students undertake study and work terms in alternating sessions. Interested students should contact the Humanities, Fine Arts, and Professional Writing Co-op office early in the term in which they are applying. Students are also referred to “General Regulations: Graduate Co-op”, page 56.

**Environmental Studies**

**GENERAL INFORMATION**

The School of Environmental Studies has three core interdisciplinary research areas in Ecological Restoration, Ethnoecology and Political Ecology. We embrace a full range of learning opportunities spanning natural and social sciences, humanities and traditional ecological knowledge.

Additional information can be found on the web at <web.uvic.ca/enweb/>.

**Contact Information**

School of Environmental Studies
Location: David Turpin Building, Room B243

Mailing Address:
PO Box 1700 STN CSC
Victoria, BC V8W 3R4
Canada

Courier Address:
David Turpin Building,
Room B243
3800 Finnerty Road
Victoria, BC V8P 5C2
Canada
Faculty Members and Areas of Research

Natalie Ban, PhD (UBC)
Ethnoecology, conservation biology, marine conservation planning, marine and coastal protected areas, GIS, social-ecological systems, marine global change

Eric Higgs, PhD (Waterloo)
Ecological restoration; landscape change; parks and protected areas; culture-nature relationships; technology and culture change

Trevor Lantz, PhD (UBC)
Ethnoecology; ethnobotany; global change, disturbance ecology; Arctic ecology and landscape change

Darcy Mathews, PhD (UVic)
Ethnoecology, archaeology, ethnobotany, collaborative research methods, indigenous resource management, spatial analysis, ritual and the environment

Ana Maria Peredo, PhD (U of Calgary)
Entrepreneurship, sustainable development, non-profit sector

James Rowe, PhD (U of California)
Political ecology, critical theory, social movement politics, social/solidarity economies, mindfulness and social change

Valentin Schaefer, PhD (SFU)
Ecological restoration; biodiversity; urban ecology; Restoration of Natural Systems Faculty Coordinator

Sybil Seitzinger, PhD (U Rhode Island)
Nutrient biogeochemistry in coastal marine and freshwater ecosystems

Karena Shaw, PhD (Johns Hopkins)
Political ecology; local/global environmental governance; political theory; indigenous politics; sustainable energy systems

Brian Starzomski, PhD (UBC)
Community ecology and conservation biology; climate change and biodiversity; dispersal and spatial ecology; ecological restoration; food webs

Duncan Taylor, PhD (California-Santa Cruz)
Political ecology; history, politics and philosophy of North American conservation and environmental movements; community forestry and ecoforestry; integral systems theory

John Volpe, PhD (UVic)
Ecological restoration; systems ecology; marine conservation and restoration; marine-based food production systems

Visiting, Adjunct and Cross-Listed Appointments

Pamela Asquith, PhD (Oxford)
Anthropology of modern Japan; Japanese views of nature; science, technology and society

E. Richard Atleo, PhD (UBC)
Ethnoecology; Indigenous knowledge; Nuu-chah-nulth worldview; sustainable forestry practices

Brenda Beckwith, PhD (UVic)
Ethnoecology; cultural landscapes; Garry Oak ecosystems; ecological restoration

Jonaki Bhattacharyya, PhD (U Waterloo)
Ethnoecology; resource management; land use planning; applied research for Indigenous communities and nations

Jeremy Caradonna, PhD (John Hopkins)
History of sustainability and deforestation, and conceptions of environmental consciousness.

Rod Davis, PhD (UVic)
Evaluating conservation policy alternatives and adaptive social governance mechanisms to address wildlife resiliency, changing land use, and climate change in the Columbia Mountain region of British Columbia

Wade Davis, PhD (Harvard)
Language loss and the erosion of cultural diversity, protection of the Sacred Headwaters, the Great War and the dream of Everest, the botanical wonder of the world, literary nonfiction and creative writing, photography and ethnographic filmmaking, the role of the storyteller in the modern world
Jessica Dempsey, PhD (UBC)

Political ecology: socioecological injustices, biodiversity loss, drought, poverty, ongoing disposessions, gendered and racialized violence, climate change

Douglas Deur, PhD (Louisiana State)

Ethnoecology; traditional plant use and cultivation on the Northwest Coast

Alan Drengson, PhD (University of Oregon)

Environmental philosophy, philosophy of technology, and philosophy of religion

Donald Eastman, PhD (UBC)

Ecological restoration; wildlife ecology and conservation; biodiversity conservation

Jason Fisher, PhD (UVic)

Mammal and wildlife ecology; landscape ecology and landscape change; spatial dynamics of terrestrial and marine mammals; biodiversity conservation; species restoration

Alejandro Frid, PhD (Simon Fraser University)

Conservation ecology – conflicts between industrial development and terrestrial wildlife; marine multi-species interactions; climate change science

Robert Gifford, PhD (UBC)

Environmental psychology; social psychology; personality psychology; design of built environments

Emily Gonzales, PhD (UBC)

Ecological restoration; conservation biology; invasive species; Garry oak ecosystems; plant community ecology; deer

Purnima Govindarajulu, PhD (UBC)

Ecological restoration; conservation ecology; invasive species

Robert Hancock, PhD (UVic)

Political ecology / ethnoecology; Indigenous-state relations (land, resources, animals); megaproject developments; Indigenous methodologies

Richard Hebda, PhD (UBC)

Botanical research on fossil plant remains and the information they provide on evolution and the history of the landscape and climate

Leif-Matthias Herborg, PhD (U. of Newcastle upon Tyne UK)

Aquatic invasive species distribution modelling, impacts, prevention, outreach and management

Thomas Heyd, PhD (Western Ontario)

Environmental philosophy and ethics; environmental aesthetics

Richard Hobbs, PhD (Aberdeen)

Vegetation dynamics and management, fragmentation, invasive species, ecosystem rehabilitation and restoration, conservation biology, and landscape ecology

Morgan Hocking, PhD (UVic)

Community ecology; salmon ecosystem interactions; ecosystem-based management; First Nations resource management

Leslie King, PhD (London School of Economics, London University)

Protected areas and poverty reduction, environmental governance, climate change adaptation and mitigation, Arctic environmental resilience and sustainability.

Steve Kokelj, PhD (Carleton)

Permafrost degradation and impacts on geomorphology and terrestrial and aquatic ecosystems; Monitoring of cumulative impacts in the north; Community-based monitoring

Nancy Mackin, PhD (UBC)

Ethnoecology; architecture; environments and culture; traditional ecological knowledge

Tomas Okey, PhD (UBC)

Marine systems; climate change and fisheries impact

Briony Penn, PhD (Edinburgh U)

Protection of endangered species and sensitive ecosystems in British Columbia; natural and cultural history of the Salish Sea

Peter Ross, PhD (Utrecht)

Environmental toxicology; endangered marine animals; collaboration with First Nations communities

Trudi Smith, PhD (UVic)

Visual culture/theory, visual anthropology, anthropology of art and media, ethnographic methods, visual art, photography, social art, parks and protected areas, media practices in conservation

Rachel Standish, PhD (Massey University)

Plant ecology within the field of restoration ecology, persistence times of novel ecosystems, novel ecosystems management

Angeline Tillmanns, PhD (U Ottawa)

Community ecology, freshwater ecology and conservation, integrated watershed management, social-ecological systems, ecological communication

Lewis Williams, PhD (Massey University)

Social well-being and health information such as social epidemiology, with phenomenological data, forms of
participatory action research and narrative and arts-based inquiry

Johanna Wolf, PhD (University of East Anglia)

Study of the social responses to climate change, environmental risk perception, environmental policy and environmental citizenship

Sandy Wyllie-Echieveria, PhD (Brigham Young)

Ethnoecology; marine systems conservation and restoration; seagrass ecology and conservation

Degrees and Specializations Offered
MA, MSc and PhD in Environmental Studies.

Facilities
The school is located in the David Turpin building, where we have meeting and collaborative space, labs, and offices. Through cooperative arrangements across campus and with various organizations and agencies, graduate students can gain access to a wide array of facilities. Located on southern Vancouver Island there is easy access to marine, freshwater wetlands, marine, riparian, upland Garry Oak, temperate rainforest and alpine ecosystems. Graduate students also have the opportunity for collaboration with many First Nations, government agencies, environmental and other non-governmental organizations and corporations.

Financial Support
We endeavour to provide significant financial support to all graduate students. This funding comprises several sources. (1) National or Provinical awards are available to those with a first-class grade point average (minimum 7.0 (A-) but in practice much higher). Eligibility criteria vary with each agency. National fellowship holders may receive an additional award from the university. (2) A limited number of University of Victoria Graduate Fellowships are available to applicants with a GPA over 7.0 (A-). (3) There are a limited number of awards specifically for Environmental Studies graduate students outlined in the awards section of the Calendar. Application and/or nomination for University of Victoria awards and fellowships may only be done once the student has been admitted to the School. (4) Students can also obtain some financial support for their studies as a Graduate Teaching Assistant. These appointments are made by the School of Environmental Studies for qualified students to work as a Teaching Assistant (generally to a maximum of approximately $4,000 per Fall and Spring terms; there are typically fewer Teaching Assistant resources available during Summer Session). (5) Students may also be appointed as a research assistant by their faculty supervisor, and availability will vary significantly among faculty members and from year to year.

ADMISSION REQUIREMENTS

General
Initial inquiries should be made to individual faculty or the school's graduate adviser. There are two primary criteria in determining admission: prior academic achievement, and fit with prospective supervisors and the school in general. We encourage applicants to contact us at least a year in advance of program start to discuss research prospects, admissions, and financial support. Links to the application forms can be found on the school's website.

Applicants whose native language is not English must write the TOEFL (Test of English as a Foreign Language) and submit the scores to the Graduate Admissions and Records Office (see "English Language Proficiency", page 30) together with their application forms. Even with passing TOEFL scores, students may be required to take English language courses as well as their other course work.

The minimum GPA required for a master's entry is B+ (6.5 on the University of Victoria 9-point scale) in the last two years of undergraduate study. In practice a higher GPA is typically required for admission. The minimum GPA required for a PhD entry is A- (7.0). Some exceptions may be made, in extenuating circumstances, such as with mature applicants who have achieved significant work experience, who have shown evidence of ability to complete major projects in a competent and timely manner, and who have demonstrated the knowledge, skills and abilities expected of highly accomplished undergraduate students.

In addition to the documentation required by the Faculty of Graduate Studies (see "Faculty Admissions", page 29), the School of Environmental Studies also requires transcripts, a statement of research interest (1-2 pages), a brief essay telling us about yourself and highlighting your past accomplishments, evidence of creativity and research potential (1-2 pages) and a CV.

Admission To Master’s Programs
Admission requires a bachelor's degree, preferably in an area of study related to your proposed graduate program, with a minimum overall average of B+ (6.5 on the University of Victoria 9-point scale). In practice a higher GPA is typically required to ensure entry.

Students will apply to enter either the MA or MSc program. The decision about which program is more appropriate will be made by the School's Graduate Programs Committee, and will be based on several criteria: the student's academic background; the nature of the proposed project; proposed courses; specialties of the proposed supervisor.

Typically, students entering the program with a Bachelor of Arts degree will continue with a MA degree, whereas students with a Bachelor of Science will enter the MSc program.

Students may complete the program as a full-time or part-time student.
Admission to PhD Program

Admission requires a master’s degree, preferably in an area of study related to your proposed graduate program, with a minimum overall average of A-, 7.0 on the University of Victoria 9-point scale. In practice a higher GPA may be required for admission.

All applications will be reviewed by the School’s Graduate Program Committee and students will only be accepted into the program if there is at least one faculty member able, interested, and available to supervise the proposed topic of research.

Deadlines

January 15 for admission in September of the same calendar year.

PROGRAM REQUIREMENTS

MA/MSc

The MA and MSc degree programs are similar in overall program requirements but will vary in the type of elective courses and thesis research.

The graduate program is primarily research based and the final outcome of the program is the presentation and defense of a thesis.

All students are required to attend a 3-day field camp at the beginning of their program (early September) as part of ES 500.

There is no formal residency requirement. However, in practice all students should be in residence in their first term of study, and residency during the first year is encouraged.

Course Requirements

A student’s program will include the following core courses:

<table>
<thead>
<tr>
<th>Core Courses:</th>
</tr>
</thead>
<tbody>
<tr>
<td>ES 500 (1.5) Perspectives on Environmental Theories, Methods and Skills I</td>
</tr>
<tr>
<td>ES 501 (1.5) Perspectives on Environmental Theories, Methods and Skills II</td>
</tr>
<tr>
<td>ES 503 (3.0) MA/MSc Research Colloquium</td>
</tr>
<tr>
<td>ES 593 (1.5) Thesis Proposal Preparation</td>
</tr>
</tbody>
</table>

and at least 3.0 elective units to be taken from within or outside the School with the permission of the student’s supervisor. Up to 1.5 units may be taken at the 400-level.

Core and elective courses contribute 10.5 units toward the 18-unit minimum degree requirement.

Thesis

The thesis proposal and thesis are prepared under the direction of the supervisory committee. The committee normally consists of two members: a supervisor and an academic member.

All committee members must be members of the Faculty of Graduate Studies.

The thesis carries 7.5 units of credit.

Oral Examination

Once the thesis is judged ready to defend by the supervisory committee, then an application is made for an oral defense. There are deadlines set by the Faculty of Graduate Studies for the timing of this defense. The supervisor will recommend an appropriate external examiner. This member of the examining committee comes from another department or institution, normally has no input in the creation of the thesis, and is an arms-length knowledgeable member. The oral examination is chaired by a neutral faculty member from a separate department, appointed directly by the Faculty of Graduate Studies.

Program Length

Most full-time students require 2 years to complete the program; part-time students will require 3-4 years to complete the program.

PhD

The PhD degree program is primarily research based and the final outcome of the program is the presentation and defense of a dissertation.

All students are required to attend a 3-day field camp at the beginning of their program (late August-early September) as part of ES 600.

There is no formal residency requirement. However, residency during the first year is encouraged.

Course Requirements

A student’s program will include the following core courses:

<table>
<thead>
<tr>
<th>Core Courses:</th>
</tr>
</thead>
<tbody>
<tr>
<td>ES 600 (1.5) Perspectives on Environmental Theories, Methods and Skills I</td>
</tr>
<tr>
<td>ES 601 (1.5) Perspectives on Environmental Theories, Methods and Skills II</td>
</tr>
<tr>
<td>ES 603 (3.0) PhD Research Colloquium</td>
</tr>
<tr>
<td>ES 693 (3.0) Candidacy Examination</td>
</tr>
</tbody>
</table>

Elective courses may be taken at the discretion of the student and committee.

Core courses contribute 9.0 units toward the 30 unit minimum degree requirement.

Candidacy

To advance to candidacy, students, in consultation with their supervisory committee, will normally prepare a comprehensive reading list, a dissertation proposal, and two major papers (on topics relevant to the PhD research field and decided on by the committee with a focus on topics explored in the reading list). They will then sit for an oral examination related to the proposal and major papers. These requirements will normally be completed by the end of the second year of full-time study.
**Dissertation**

Students are required to prepare, submit and defend a dissertation worth 21 units. The dissertation is the culmination of intensive, independent and original research. Each student will have a supervisory committee, comprising three faculty members (to a maximum of four) including the supervisor and co-supervisor (where appropriate). At least one member of the committee (beyond the primary supervisor) will come from outside the School of Environmental Studies, as per the Faculty of Graduate Studies requirements. Supervisory committees will be formed no later than the end of the second term of the student’s program.

All committee members must be members of the Faculty of Graduate Studies.

The dissertation carries 21 units of credit.

**Oral Examination**

Once the dissertation is judged ready to defend by the supervisory committee, then an application is made for an oral defense. There are deadlines set by the Faculty of Graduate Studies for the timing of this defense. The supervisor will recommend an appropriate external examiner. This member of the examining committee comes from another department or institution, normally has no input in the creation of the dissertation, and is an arms-length knowledgeable member. The oral examination is chaired by a neutral faculty member from a separate department, appointed directly by the Faculty of Graduate Studies.

**Program Length**

Most full-time students require 4 years to complete the program; part-time students will require 5-6 years to complete the program.

**Concentration in Cultural, Social and Political Thought (CSPT)**

This concentration is available to selected graduate students in English, Environmental Studies, History, Political Science, and Sociology. Students applying for an MA or PhD Program in Environmental Studies may also opt for a concentration in Cultural, Social and Political Thought (CSPT). Students must apply online, choosing the Concentration in Cultural, Social, and Political Thought option for Environmental Studies. If approved by the School, the application will be reviewed by the CSPT Admissions Committee. For full information about the program see www.uvic.ca/interdisciplinary/cspt/. Students must meet the core graduating requirements of the individual departments as well as specific requirements of the CSPT Program. See also the entry for "Concentration in Cultural, Social and Political Thought (CSPT)", page 3.

An approved Environmental Studies MA program with a CSPT concentration will include:
- 1.5 units of CSPT 501
- at least 1.5 units of CSPT 500
- 3.0 units of ES 500 and ES 501
- 3.0 units of ES 503
- 1.5 units of ES 593
- a thesis worth from 7.5 units, on an approved topic within the field of cultural, social and political thought, under the direction of a supervisory committee including at least two participating CSPT faculty members to a total of 18 units for the program as a whole including the thesis and CSPT course requirements.

An approved Environmental Studies PhD program with a CSPT Concentration will include:
- 1.5 units CSPT 601
- at least 1.5 units of CSPT 600
- 3.0 units of ES 600 and ES 601
- 3.0 units of ES 603
- 3.0 units of ES 693
- Successful completion of candidacy examinations with one of the two major papers in the field of CSPT.
- A dissertation worth 21 units on an approved topic within the field of cultural, social and political thought, under the direction of a supervisory committee including at least two participating CSPT faculty members.

**Co-operative Education**

Participation in the Co-operative Education program – which enables students to acquire knowledge, practical skills for employment, and workplace experience – is optional for Master’s and PhD students. Master’s students complete two work terms, and PhD students complete three (a work term consists of four months of full-time, paid employment). Students require permission from their academic adviser and graduate adviser, as well as the Co-op co-ordinator, to participate in the Co-op program. Interested students should contact the Environmental Studies Co-op office early in their first term. Students are also referred to “General Regulations: Graduate Co-op”, page 56.

**Exercise Science, Physical and Health Education**

**General Information**

The School of Exercise Science, Physical and Health Education is an academic department within the Faculty of Education at the University of Victoria. Our mission is to transform and enrich the lives of individuals and communities by creating and sharing knowledge in the areas of exercise science, physical and health education. Prospective graduate students can find further information about our School and our programs on our website: <www.uvic.ca/education/exercise>.

Faculty Members and Areas of Research
Catherine A. Gaul, PhD (Victoria)
Exercise physiology, pediatric sport performance, women and exercise, health benefits of exercise as medicine, occupational physiology, fitness testing and exercise prescription.

Sandra L. Gibbons, PhD (Oregon)
Team building through physical education, gender equity in physical education, affective domain in physical education, teaching effectiveness, classroom assessment in physical education.

Timothy F. Hopper, PhD (Alberta)
School integrated teaching education, teacher games for understanding and electronic portfolios. Action research and qualitative research genres. Social constructivism and complexity theories.

Sandra R. Hundza, PhD (Victoria)
Neural control of human movement; motor rehabilitation after injury (e.g. neurotrauma) and with disease and aging. Neural control of balance during walking and coordination of limbs and trunk during rhythmic movement (e.g., walking or cycling); assistive devices and technologies related to mobility.

Marc Klimstra, PhD (Victoria)
Biomechanics and motor control of human movement in sport, exercise and rehabilitation.

Olav E. Krigolson, PhD (Victoria)
Neuroeconomics, learning, decision-making, motor learning and control.

Lara Lauzon, PhD (Victoria)
Teacher wellness, college and university student health and wellness, organizational and workplace wellness, leadership, active health, and media and body image.

John Meldrum, PhD (Waterloo)
Sport and recreation administration, leadership and coaching, serious leisure and leisure behaviour.

Patti-Jean Naylor, PhD (Victoria)
Socio-ecological and setting-based approaches to health promotion, obesity and chronic disease prevention, dissemination, knowledge translation/exchange, implementation and organizational capacity.

Douglas R. Nichols, PhD (Oregon)
Outdoor recreation and leisure for special populations, recreation administration, environmental interpretation.

Ryan Rhodes, PhD (Alberta)
Behavioural medicine, psychology of physical activity and sedentary behaviour, social cognitive and personality theories of health behaviour, research methods, and psychometrics.

Lynneth A. Stuart-Hill, PhD (British Columbia)
Exercise hematology and immunology, occupational physiology, development of pre-employment physical abilities tests, children and exercise, exercise prescription.

Vivienne A. Temple, PhD (Royal Melbourne Institute of Technology)
Physical activity for people with disabilities and disadvantaged groups; inclusive pedagogy, movement skills of children.

S. Joan Wharf Higgins, PhD (British Columbia)
Health literacy; community-based research; health promotion policy and practice; qualitative research design and methodology; social marketing; determinants of population health.
Paul Whitinui, EdD (Auckland)

Indigenous physical activity, health and wellbeing; Indigenous issues in sport; Indigenous educational leadership; cultural responsive pedagogies; Indigenous ethics and research; Indigenous auto-ethnography; Indigenous treaty-based rights

E. Paul Zehr, PhD (Alberta)

Neural control of human movement; neural mechanisms of arm and leg coordination during rhythmic movement; neuromuscular plasticity associated with training and rehabilitation.

Degrees and Specializations Offered

The School of Exercise Science, Physical and Health Education offers master’s programs leading to the following degrees:

- MA Physical Education
- MA Leisure Service Administration
- MA Kinesiology
- MEd Coaching Studies (Cooperative Education)
- MSc Kinesiology
- PhD Kinesiology

Facilities

McKinnon Building: classrooms, undergraduate anatomy and physiology teaching labs, human physiology research lab, gymnasiums, pool, dance studio, Institute of Applied Physical Activity, Motion & Mobility Rehab and Movement Knowledge Labs.

MacLaurin Building: rehabilitation neuroscience lab, behavioural medicine lab.

Financial Support

All eligible graduate students are encouraged to apply for funding from provincial, federal and external sources. The School of Exercise Science, Physical and Health Education cannot guarantee funding although it is our intention that all graduate students in the first two years of their programs could receive some financial support. This may come in several ways.

UVic Graduate Award

Students who have a 6.5 on the UVic grading scale may be nominated by the School for a UVic Graduate Award.

Sessional Lecturers/Laboratory Instructors/Academic Assistants

These unionized positions are advertised on the notice board near the Exercise Science, Physical and Health Education General Office and listed on the Exercise Science, Physical and Health Education website at: <www.uvic.ca/education/exercise/graduate/graduate/specialist>.

Research Assistants

Individual faculty members with external research grants may employ graduate students as research assistants. The details about these appointments (salary, hours, etc.) are worked out between the individual graduate student and the faculty member.

Admission Requirements

General

Potential applicants may contact the Graduate Adviser of the School of Exercise Science, Physical and Health Education for application information. However, to pursue formal admission, the student must complete the application provided on the Graduate Admissions and Records Office website <uvic.ca/garo>.

Admission To Master’s Programs

In addition to the requirements required by the Faculty of Graduate Studies, admission to the master’s graduate programs in the School of Exercise Science, Physical and Health Education requires an undergraduate degree in Exercise Science, Physical and Health Education or related field. Applicants to all MA and MSc programs should include a Letter of Intent, which states their specific area of research interest, include a brief statement of academic and career goals, and identify a faculty member as a possible supervisor. MEd Coaching Studies applicants should include a résumé of their coaching experience and certification levels. Copies of certificates are required as proof of certification.

Admission to the Doctoral Program

In addition to the requirements of the Faculty of Graduate Studies, admission to the doctoral program in the School of Exercise Science, Physical and Health Education includes a master’s degree in kinesiology or related field, a letter describing the proposed research topic, two academic referees and a current curriculum vitae.

Deadlines

MSc, MA Programs

Although applications may be received at any time prior to the start of the entry point desired (September, January, or May), it is recommended that students enter in September when the required courses commence. The recommended deadline is May 31st for domestic applications to enter in the September entry point. For international applicants see the recommended international application deadlines below.

MEd Coaching Studies Program

Summer Session (May-August) is the only entry point for this program. The recommended application deadline for domestic applications is March 31st to enter in the May entry point of the same year. For international applicants the recommended deadline is October 15th for entry in the summer of the following year.
PhD Kinesiology Program

Applications may be received at any time prior to the start of the entry point desired.

Note to all applicants: Applicants who hold any post-secondary documents from academic institutions outside of Canada should follow the international applicant deadlines.

Recommended International Application Deadlines

Primarily for VISA applicants and permanent residents whose most recent transcripts are coming from overseas institutions:

Apply by December 15th for September entry point
Apply by April 15th for January entry point
Apply by October 15th for May entry point

Note to all applicants: To be eligible for consideration to be nominated by the School of Exercise Science, Physical and Health Education for a UVic Graduate Award, applicants must have accepted an offer to commence their program by July 31st.

PROGRAM REQUIREMENTS

Master of Science in Kinesiology (MSc) – Thesis Option

This program is predicated on the “Inquiry Approach,” allowing students to examine issues and questions related to the specific subdiscipline areas. The design of the program allows for considerable flexibility permitting students to pursue their area of interest under the guidance and advice of their supervisor. A thesis, subject to oral examination, is required.

Program Requirements: Total = 18 units

- EPHE 573 ........................................................................................................ 3.0
- Two of: EPHE 580, 581, 582, 583 or 584 ......................................................... 3.0
- Seminar (EPHE 500) .................................................................................. 0.0
- Either ED-D 560 or EPHE 585 ..................................................................... 1.5
- Electives ........................................................................................................ 1.5-3.0
- Thesis (EPHE 599) .................................................................................... 7.5-9.0

Program Length

Usually two to three years.

Master of Arts in Physical Education (MA) – Thesis Option

This degree provides students with the opportunity to develop a program with a specific focus on curriculum development or instructional strategies. Course work provides the knowledge and skills to complete a required thesis, which is subject to an oral examination.

Program requirements: Total = 18 units

- Seminar (EPHE 500) .................................................................................. 0.0
- EPHE 573 ..................................................................................................... 3.0
- Two of: EPHE 580, 581, 582, 583 or 584 ......................................................... 3.0
- Complementary course(s) in research techniques .................................... 1.5-3.0
- Electives ........................................................................................................ 3.0-6.0
- Thesis (EPHE 599) .................................................................................... 4.5-6.0

Program Length

Usually two to three years.

Master of Education in Coaching Studies (MEd) - Project-based Option

This degree provides students with a program of studies with a particular focus on coaching science. This is a summer-based program and is largely course-based. Twelve units of required courses are completed during July/August over two consecutive summers. An additional three units of elective courses must be completed and may be taken off campus. Students also complete two four-month cooperative work terms, a comprehensive exam and a project.

Program Requirements: Total = 19.5 units + 2 work terms (6 units)

- EPHE 570, 572, 574, 575, 576, 577, 578, 579 ............................................... 12.0
- Electives (to be determined) ........................................................................ 3.0
- Comprehensive Examination (EPHE 597) .................................................. 1.5
- Project (EPHE 598) .................................................................................. 3.0
- Cooperative Work Term (EPHE 801) ......................................................... 3.0
- Cooperative Work Term (EPHE 802) ......................................................... 3.0

Two of: EPHE 580, 581, 582, 583, 584 ................................................................. 3.0
- Either ED-D 560 or EPHE 585 (or equivalent) ........................................... 1.5
- Electives ........................................................................................................ 1.5-7.5
- Thesis* (EPHE 599) .................................................................................. 7.5-9.0
- Project* (EPHE 598) ................................................................................ 3.0-4.5

Program Length

Usually two to three years.

Note: *Students complete either a thesis or a project.
**Program Length**

Usually two years inclusive of two four-month cooperative education work terms.

**Master of Arts in Leisure Service Administration (MALSA) - Thesis or Project-based Options**

This degree is a program of study focusing on administration and management of recreation and leisure service organizations. A major project and comprehensive examination OR a thesis subject to oral examination, are required.

**Program requirements: Total = 19.5 units**

- ED-D 560 ................................................................. 1.5
- EPHE 561, 562, 563, 573, & 574 ............................. 7.5
- EPHE 590 (topics to be determined) ....................... 4.5-6.0
- EPHE 597 and EPHE 598 ........................................ 4.5
- or:
- EPHE 599 ................................................................. 6.0

**Oral Examination**

Only with thesis (EPHE 599) option.

**Program Length**

Usually two years.

**Doctor of Philosophy in Kinesiology (PhD) – Dissertation**

The PhD program in Kinesiology is a research-orientated program designed for students who wish to obtain positions at colleges and universities, work in provincial and federal ministries and other public and private organizations.

**Program requirements: Total = 30 units**

- EPHE 673 ................................................................. 3.0
- Electives (to be determined) ................................... 6.0
- EPHE 693 (Candidacy Exam) .................................. 3.0
- EPHE 699 (Dissertation) ......................................... 18.0

1. Electives will normally be at the graduate level and will be identified with the approval of the supervisor and in consultation with the supervisory committee. Up to 3.0 units of upper level, undergraduate course work may be used toward the degree with the approval of the supervisor in consultation with the supervisory committee.

2. The candidacy exam will be comprised of two parts: (i) a written part that will include three scholarly papers that are submitted to the supervisory committee. The topics for the papers will be determined in consultation with the supervisor and supervisory committee. (ii) an oral part in which the candidate will present and defend the three written papers to the supervisory committee.

**Program Length**

At least two years.

---

**Co-operative Education**

Participation in the Co-operative Education program - which is a process of education that integrates students’ academic studies with knowledge, practical skills for employment, and workplace experience - is a mandatory component of the MEd Coaching Studies program. Co-operative education is optional for Master’s and PhD students in other graduate programs in Exercise Science, Physical and Health Education.

Master’s students complete two work terms and PhD students complete three (a work term consists of four months of full-time, paid employment), and students undertake study and work terms in alternating sessions. In the optional programs, students require permission from their academic adviser and graduate adviser, as well as the Co-op coordinator, to participate in the Co-op program. Interested students should contact the Exercise Science, Physical and Health Education Co-op office early in the term in which they are applying. Students are also referred to “General Regulations: Graduate Co-op” on page 56.

---

**French**

**General Information**

Faculty members in the Department of French have wide-ranging research and teaching interests in French, Quebec, French-Canadian, African and Caribbean literatures, culture and cinema, as well as in linguistics and applied linguistics.

For more information, please consult our website at <www.uvic.ca/humanities/french>.

Faculty Members and Areas of Research

Catherine Caws, PhD (British Columbia)  
Second language teaching, computer-assisted language learning, lexicology

Hélène Cazes, Doctorat ès lettres (Paris), Graduate Adviser 
French Medieval and Renaissance literatures and cultures, Humanism, Cultural Legacies

Emile Fromet de Rosnay, PhD (Queen’s)  
19th to 20th Century French and comparative literature, Romanticism, modernist poetics

Emmanuel Hérique, D de IIIe cycle (Nancy)  
French linguistics, translation, phonetics

Marc Lapprand, PhD (Toronto)  
Literary theory, aesthetics, modernism and avant-gardes in French literature

Catherine Léger, PhD (UQAM)  
Syntax, semantics, contact linguistics, French in North America

Sada Niang, PhD (York)  
African and Caribbean literatures, African cinema

Marie Vautier, PhD (Toronto)  
Québécois literature, comparative Canadian/Québécois literature, literary theory, cultural studies

Degrees and Specializations Offered

The Department of French offers a program leading to the degree of Master of Arts in French Literature, Language and Culture.

Facilities

UVic’s McPherson Library constitutes a solid resource for graduate research in all areas of French Studies. It has 1,900,000 volumes, 1,900,000 items in microfiche, over 50,000 records, tapes, compact discs; 32,000 scores and 6,500 films, videos and DVDs. There are 12,000 current periodical subscriptions including over 2,600 e-journals. There are 137 on staff, including 26 librarians, among whom one librarian for the French collection. A highly efficient interlibrary loan service offers access to any materials not available locally. The department provides office space and computer facilities to its graduate students, and has a Reading Room containing reference materials and a computer.

Financial Support

Consideration for financial aid is automatic upon receipt of applications by February 15. Funding is available through the competitive University Fellowship up to a value of $15,000 and may be held for one year, subject to academic performance and full-time enrolment. All eligible applicants are encouraged to and assisted in applying for funding to provincial, federal, and external sources. Please, see the information provided by the Faculty of Graduate Studies at <www.uvic.ca/grad>. Competitive funding is also available for research and teaching assistantships through the department for incoming and continuing students. The amounts may vary from year to year and students are encouraged to apply early.

ADMISSION REQUIREMENTS

General

Candidates must meet all the general requirements of the University of Victoria Faculty of Graduate Studies <uvic.ca/grad> as well as the specific requirements of the Department of French. There are three possible entry points – September, January and May – although students entering the program after September may have fewer opportunities for financial aid. FRAN 500, the compulsory course for the French MA degree program, is generally offered in the fall semester.

MA in French Literature, Language & Culture

Admission to either the thesis or the project-based program requires a BA degree in French, or equivalent, with a minimum overall average GPA of 6.5 in third- and fourth-year French courses. This qualification should consist of a minimum of 15 units of senior undergraduate course work in French which would normally include a methodology course and an advanced language course (equivalent to FRAN 390 and FRAN 402 at UVic).

Students with background deficiencies may be required to make up courses before being admitted to the MA program and will then normally require two years for the completion of the degree.

Deadlines

Applications are considered year round. However, to be considered for a UVic Fellowship for September, applications must normally be received by February 15.

PROGRAM REQUIREMENTS

The department offers one MA program in French Literature, Language & Culture, comprising a minimum of 16 units of graduate credit:

- project-based option, designed to be completed in one calendar year
- thesis option, designed to be completed in two years

Project-based Option

1. FRAN 500 (1.5 units)
2. FRAN 501 (1.0 unit)
3. 10.5 units of course work, up to 3.0 units of which may be taken outside the department, but no more than 1.5 units at the senior undergraduate level

4. FRAN 598 (3.0 units): Reading List compiled in consultation with advisers; critical paper and oral examination.

5. A reading knowledge of English and of another appropriate language, in addition to French and English.

The Reading List will normally consist of 30 titles covering a period (e.g., a century), a genre (e.g., drama), a movement (e.g., Surrealism), or a specific topic. Originating in one or more of each student’s courses, the list will offer the student the possibility of specialization in a chosen field and preparation for further study. Evaluation will be by oral examination. The examiners will assess the student’s ability to express himself or herself in a literate and critical way, and to synthesize an extensive amount of reading. The critical paper will be the focus of the oral examination.

**Thesis Option**

The thesis option is normally by invitation of the departmental Graduate Committee:

1. FRAN 500 (1.5 units)
2. FRAN 501 (1.0 unit)
3. 7.5 units of course work, up to 3.0 units of which may be taken outside the department, but no more than 1.5 units at the senior undergraduate level.
4. FRAN 599 (6.0 units): thesis (25,000 word maximum) and an oral defense. The thesis topic selected by the candidate must have the approval of both the Supervisory Committee and the Graduate Committee. This regulation also applies to any substantial change from the approved topic which the candidate may wish to make in the course of his or her research.

5. A reading knowledge of English and of another appropriate language, in addition to French and English.

**Co-operative Education**

Participation in the Co-operative Education program - which enables students to acquire knowledge, practical skills for employment, and workplace experience - is optional for Master’s students. Master’s students complete two work terms (a work term consists of four months of full-time, paid employment), and students undertake study and work terms in alternating sessions. Interested students should contact the Humanities, Fine Arts, and Professional Writing Co-op office early in the term in which they are applying. Students are also referred to “General Regulations: Graduate Co-op” on page 56.

**Faculty Members and Areas of Research**

**David Atkinson, PhD (Ottawa)**
Analysis of weather data, Investigating high-latitude storm and storm track dynamics

**Rosaline Canessa, PhD (Victoria)**
Coastal zone management, marine protected areas, GIS decision making

**Denise Cloutier, PhD (Guelph)**
Health and aging, palliative care, population health, impacts of restructuring

**Maycira Costa, PhD (Victoria)**
Primary productivity, carbon budget, remote sensing, wetlands, coastal, Brazil
Stephen F. Cross, PhD (Stirling)
Environmental impacts and management of coastal aquaculture, marine ecology and coastal oceanography

Christopher Darimont, PhD (Victoria)
Ecological and evolutionary processes, natural and human caused, biological diversity

Philip Dearden, PhD (Victoria)
Resources, marine protected areas, conservation, Thailand

David Duffus, PhD (Victoria)
Biogeography, wildlife, marine

Mark S. Flaherty, PhD (McMaster)
Coastal zone management, mariculture, Thailand

Johannes Feddema, PhD (Delaware)
Human actions and decision-making in earth system models

Jutta Gutberlet, PhD (Tübingen)
Development and Resources: social and environmental assessment, public policies, urban and rural development; participatory approaches, Brazil

Michael Hayes, PhD (McMaster)
Social geographies of health, health inequities and urban structure

Dennis Jelinski, PhD (Simon Fraser)
Landscape ecology, biogeography, conservation of biodiversity

Michele-Lee Moore, PhD (Wilfrid Laurier)
Global, national and provincial water policy networks, resilience of social-ecological systems, social innovation, environmental security

K. Olaf Niemann, PhD (Alberta)
Remote sensing, geomorphology

Ian J. O’Connell, PhD (Victoria)
GIS, cartography, surveying

Aleck Ostry, PhD (British Columbia)
Health research in rural and northern communities, nutritional health issues

Daniel Peters, PhD (Trent)
Assessment of climate variability/change, land-use change and flow regulation impacts on hydrological systems in Canada.

Terry Prowse, PhD (Canterbury)
Climate impacts on hydrology and aquatic ecosystems

Reuben Rose-Redwood, PhD (Pennsylvania)
Urban geography, cultural landscape studies, history of geographical thought

Randall Scharien, PhD (Calgary)
Microwave remote sensing, Arctic and Antarctic

Dan J. Smith, PhD (Alberta)
Geomorphology, dendrochronology

Simon Springer, PhD (British Columbia)
Political and development geographies

Frederick J. Wrona, PhD (Calgary)
Aquatic ecology and eco-toxicology, biostatistics and quantitative ecology

Adjuncts and Cross-Listed Appointments

René I. Alfaro, PhD (SFU)
Quantifying pest damage to forests of BC; genetic resistance to pests

Bernard O. Bauer, PhD (Johns Hopkins)
Process geomorphology, hydrology, sediment transport

S. Jean Birks, PhD (Waterloo)
Development and application of isotope tracer techniques to understand the hydrological cycle

Barry R. Bonsal, PhD (Saskatchewan)
Climatology, Western Canada

Max. L. Bothwell, PhD (Wisconsin-Madison)
Effects of ultraviolet radiation on freshwater ecosystems

Charles Burnett, PhD (Turku)
Spatial modelling, remote sensing, GIS

Habib Chaudhury, PhD (Wisconsin)
Gerontology, research on personhood in dementia

John Clague, PhD (British Columbia)
Earth sciences, quaternary science

Robert Crabtree, PhD (Idaho)
Ecological forecasting; ecosystem and population ecology; predator-prey relations and behavioral ecology

Michael Demuth, BSc (Calgary)
Impact of climate change on the Cryosphere; glacier water resources, snow-glacier mass balance

Yonas Dibike, PhD (Delft)
Hydro-climatology, hydrology and water resources related environmental studies
Bruce Downie, PhD (UVic)
Conservation, protected areas, tourism, sustainable livelihoods, eastern and southern Africa

Frank Duerden, MA (Manitoba)
Urban geography, resource management, First Nations land allocation, planning and economic development, geography of Northern Canada

Thomas Edwards, PhD (Waterloo)
Isotope hydrology

Cosmin Filippescu, PhD (Guelph)
Ecotoxicology and aquatic food web ecology

Hugh French, PhD (Southampton)
Fluvial and periglacial geomorphology

James S. Gardner, PhD (McGill)
Geomorphology, natural hazards and resource management in mountain areas

John Gibson, PhD (Waterloo)
Isotope hydrology

Jim Gower, PhD (Cambridge)
Remote sensing

John R. Harper, PhD (Louisiana State)
Coastal habitat mapping and characterization, to oil spill impacts on shorelines and to marine biophysical classification systems

Ellen Hines, PhD (Victoria)
Environmental impacts and management of coastal resources

Sophia C. Johannessen, PhD (Dalhousie)
Ocean optics, carbon cycle, climate change

Leslie A. King, PhD (London School of Economics)
Natural resources and environmental studies

Olav Lian, PhD (Western Ontario)
Quaternary environments, sedimentology, stratigraphy, geomorphology

Douglas G. Maynard, PhD (Saskatchewan)
Forestry, soil sustainability

Christiana Miewald, PhD (Kentucky)
Food security among vulnerable populations; rural and urban health issues; gender and economic restructuring

Grant Murray, PhD (Michigan)
Coastal communities, marine protected areas

Nathaniel K. Newlands, PhD (British Columbia)
Mathematical modeling of environmental phenomena; spatially explicit crop yield prediction methods

O’Hara, Patrick, PhD (SFU)
Seabird foraging ecology, marine conservation, maritime anthropogenic disturbances

Paul Paquet, PhD (Alberta)
Interdisciplinary conservation

Christopher M. Pearce, PhD (Laval)
Coastal ecosystems and resources

Michael Phillips, PhD (West of England)
Coastal processes; coastal tourism; impacts of climate change

Clifford Robinson, PhD (British Columbia)
Marine protected areas, coastal ecosystems, ecosystem modelling

Rick Rollins, PhD (Washington)
Parks and protected areas, tourism and recreational behaviour, research methods

Mark Seemann, PhD (Victoria)
Disaster and emergency management; risk mitigation

Janis Shandro, PhD (British Columbia)
International extractive sector; health impact assessment; environmental and social corporate performance; extractive impacts on Indigenous Peoples

Tara E. Sharma, PhD (British Columbia)
Parks and protected areas, land-use/land-cover changes, scenario modeling, remote sensing, GIS

Pamela Shaw, PhD (Victoria)
Community-based research, geographic communication

Kevin Telmer, PhD (Ottawa)
Aqueous geochemistry

Nancy Turner, PhD (British Columbia)
Ethnobotany; traditional land management systems and traditional ecological knowledge of British Columbia First Nations

Stephen Tyler, PhD (Berkeley)
Climate change and adaptation, urbanization and development, Institutional and socio-economic issues

G. Cornelis van Kooten, PhD (Oregon State)
Environmental studies and climate, energy, forest, agriculture economics
Degrees and Specializations Offered
The Department of Geography offers courses of study and research leading to Master of Arts, Master of Science and Doctor of Philosophy degrees.

Financial Support
Students wishing to be considered for a University of Victoria Fellowship must submit their application by January 15 for admission in September, May or January of the same academic year. No separate application is necessary. An extensive list of awards is available at the Faculty of Graduate Studies website: <web.uvic.ca/gradstudies/fund/funding.html>. The department employs a number of teaching assistants, and graduate students are given priority in the assignment of these positions. Assistantships of one, two or three laboratories per week (2, 4 and 6 contact hours) are available. The department may be able to award a limited number of graduate awards to teaching assistants and research assistants subject to availability. Individual faculty members may also have research assistantships available for graduate students. Students are encouraged to apply for grants and fellowships from external agencies, including the Social Sciences and Humanities Research Council (SSHRC), the Natural Sciences and Engineering Research Council (NSERC), Canadian Institute of Health Research, and Commonwealth Scholarships. Information on the above is available from the Faculty of Graduate Studies.

ADMISSION REQUIREMENTS

General
Admission to the departmental graduate program is normally granted only to students having Honours or Major degrees with first or second class standing in geography (at least a B+ average; 6.00 GPA). Students from the British Isles, for example, are expected to have obtained at least an upper second class Honours degree. A promising student lacking such qualifications may be allowed to make up this deficiency, being required to register as an unclassified student.

As part of the application requirements for graduate programs in Geography, all applicants must submit a brief letter of intent outlining their study background and areas of research interest.

Inquiries concerning the graduate program should be addressed to the Graduate Studies Adviser, Department of Geography via email at: <gradadvisor@geog.uvic.ca>. Further information about the department is available through the department’s website: <www.geog.uvic.ca>.

Application forms for admission, which include the indication of need for financial assistance, can be obtained directly from Graduate Admissions and Records website: <www.uvic.ca/garo>.

Deadlines
There are three possible admission dates to the Geography Graduate program: September, January and May, but completed applications must arrive three months before the expected entry date for Canadian applications. Because of visa requirements international students should complete the application process at least six months in advance. If a student is completing an undergraduate program, a letter of degree completion will be required. Applications received thereafter may be considered, providing space is available, or will be considered for admission on a following admission date.

If a student has successfully completed a core course, or one similar in topic, as part of an earlier degree requirement, that course must be replaced by another of equal unit value. The choice of course must be made in consultation with the supervisory committee. Approval for course replacement is requested via a memo from the Supervisor to the Graduate Adviser stating justification for the request, which must be approved by the Graduate Adviser.

PROGRAM REQUIREMENTS

The graduate program is primarily research based and the final outcome of the program is the presentation and defense of a thesis or dissertation. The graduate program does require attendance at formal courses.

If a student has successfully completed a core course topic as part of an earlier degree requirement, that course must be replaced by another of equal unit value, the choice being made in consultation with the supervisory committee and approved by the Graduate Adviser.

Thesis-based Master’s Program

Course Requirements
The Masters program requires a total of 19 units as follows:

1. a minimum of 7.5 units of coursework including:
   a) GEOG 500A (1.5) and GEOG 500B (1.5)
   b) one of GEOG 518, 523, 524 (1.5) or another ‘methods’ based course on recommendation of the supervisory committee as approved by the Graduate Adviser.
   c) One of GEOG 536, 537, 538, 539 (1.5)
d) One of GEOG 591, 590 (1.5) or another special topics course on recommendation of the supervisory committee as approved by the Graduate Adviser.

Additional courses may be recommended on advice of the supervisory committee.

2. GEOG 599 (11.5) Thesis

Program Length

The term of residency for Master's students is normally two years.

PhD Program

Course Requirements

The Doctoral program requires a total of 31.5 units as follows:

1. a minimum of 7.5 units of coursework including:
   a) GEOG 500A (1.5) and GEOG 500B (1.5)
   b) one of GEOG 536, 537, 538, 539 (1.5) or another advanced course on recommendation of the supervisory committee and as approved by the Graduate Adviser.

Additional courses may be recommended on advice of the supervisory committee.

2. GEOG 693 (3.0) (Candidacy Examination) during terms in which students are preparing for and writing their PhD Candidacy Examinations. PhD students in Geography must sit their Candidacy Exams by 18 months after entry into the program and no sooner than 6 months prior to the final oral examination.

3. GEOG 699 (24.0) Dissertation

Program Length

The term of residency for PhD students is normally three years.

Co-operative Education

Participation in the Co-operative Education program – which enables students to acquire knowledge, practical skills for employment, and workplace experience – is optional for Master’s and PhD students. Research undertaken during the work term is intended to relate to the student's research interest area. Master’s students complete two work terms and PhD students complete three (a work term consists of four months of full-time, paid employment). Students require permission from their academic adviser and graduate adviser, as well as the Co-op coordinator, to participate in the Co-op program. Interested students should contact the Geography Co-op office early in their first term. Students are also referred to “General Regulations: Graduate Co-op” on page 56.

Germanic and Slavic Studies

General Information

The Department of Germanic and Slavic Studies offers an MA program with specialization in either Germanic or Slavic studies. Students apply for one of these two streams, which share some required foundation courses. The program offers a broad chronological and thematic coverage of Germanic and Slavic cultures with the areas of special strength in second-language acquisition, film studies, modern literatures, the Holocaust, and Ukrainian studies.

For further information or any updates please visit the department website.

Contact Information

Department of Germanic and Slavic Studies

Faculty Members and Areas of Research

Peter Götz, PhD (Queen’s)

Literary theory; contemporary literature; CALL; film; vampires

Elena Pnevmonidou, PhD (McG)

Classicism and romanticism; literature of the Weimar period and expressionist film; literary theory and gender studies
Charlotte Schallié, PhD (Brit Col)
20th and 21st century German, Swiss and Austrian literature and culture; memory studies; diasporic writing; the Shoah in literature and film; ecocriticism

Ulf Schuetze, PhD (Brit Col)
Second language acquisition and pedagogy; intercultural communication; CALL; applied linguistics

Megan Swift, PhD (Toronto)
Russian modernism and postmodernism; Petersburg texts; narrative and genre theory; literature of emigration and exile

Helga Thorson, PhD (Minnesota)
Late 19th and early 20th century literature; German colonialism; women’s literature; holocaust studies; foreign language pedagogy; CALL

Serhy Yekelchyk, PhD (Alberta)
Culture and identities in Russia and Eastern Europe; Stalinism; 20th century Ukraine

Associate Members
John Dingley, PhD (UCLA)
Russian language, Finnish language, Slavic linguistics, Nordo-Slavic contacts

Matthew Pollard, PhD (McG)
Heinrich von Kleist; cultural and film studies; expressionism; Leni Riefenstahl

Olga Pressitch, PHD (Shevchenko Inst. of Lit., Ukraine)
Eastern European cinema, second-language pedagogy, Ukrainian literature in postwar Canada,

Julia Rochtchina, PhD (Moscow)
Language pedagogy; information technology; e-learning

Degrees and Specializations Offered
Thesis-based MA in Germanic and Slavic Studies, either a Germanic Studies stream or a Slavic Studies stream.

Facilities
The University’s library holdings are good and provide a solid basis for graduate research. A highly effective interlibrary loan service created by a special agreement among Western Universities offers easy access to any materials not available locally.

The department provides its graduate students with office space and computer facilities. In addition, there is a reading room well equipped with reference materials.

Financial Support
University of Victoria Fellowships ($10,000-$15,000) may be awarded annually to students of high academic standing registered full-time in the Faculty of Graduate Studies as candidates for the degree of MA.

Teaching or Research Assistantships may be obtained from the University through employment in the department.

The University of Victoria Tuition Assistance Bursary Fund offers assistance to qualified students in serious financial difficulty.

Various other Scholarships, Awards, Bursaries and Prizes are administered by the Faculty of Graduate Studies.

Detailed information on awards and application procedures and deadlines is available at the Faculty of Graduate Studies’ website: <www.uvic.ca/graduatestudies>.

ADMISSION REQUIREMENTS

Admission to the Master’s Program
All candidates for the degree of MA in Germanic and Slavic Studies must meet all general requirements of the Faculty of Graduate Studies, as well as the specific requirements of the Department of Germanic and Slavic Studies.

Students may enter the program in September only. All application materials, including a Letter of Intent offering comment on the applicant’s intended course of studies, must be submitted to the Graduate Admissions and Records Office.

Admission to the program normally requires a Bachelor’s Degree (Major in Germanic or Slavic Studies) with a minimum overall average of B+ (6.0 GPA), or a Bachelor’s Degree (Major in Germanic or Slavic Studies) with a minimum average of A- (7.0 GPA) in the final year’s work.

PROGRAM REQUIREMENTS
Thesis-based Master’s
The MA program in Germanic and Slavic Studies consists of a minimum of 15 units of graduate credit:

1. at least 9 units of course work, 3 of which may be drawn from courses in Germanic Studies at the senior undergraduate level;

2. a thesis (minimum of 70 pages) worth 6 units of credit; there will be a final oral examination of the thesis.

3. In exceptional circumstances, a candidate may be allowed to take 6 units of course work, 1.5 of which may be drawn from courses in Germanic or Slavic Studies at the senior undergraduate level, and write a thesis (minimum of 100 pages) worth 9 units. For this, the permission of both the Graduate Adviser and the Chair must be obtained.

Work as a research or teaching assistant is considered beneficial for all graduate students who wish to complete the program successfully.

All courses, except GMST 501/SLST 501 (Introduction to the Disciplines of Germanic and Slavic Studies) and GMST 502/SLST 502 (Theory and Practice) are variable in content and may be taken more than once, with departmental permission. At the end
of GMST 501/SLST 501, students are expected to submit a Thesis Proposal that will allow them to start work on their Thesis (GMST 599/SLST 599).

**Program Length**
The program will normally take two years to complete.

**Co-operative Education**
Participation in the Co-operative Education program - which enables students to acquire knowledge, practical skills for employment, and workplace experience - is optional for Master’s students. Master’s students complete two work terms (a work term consists of four months of full-time, paid employment), and students undertake study and work terms in alternating sessions. Interested students should contact the Humanities, Fine Arts, and Professional Writing Co-op office early in the term in which they are applying. Students are also referred to "General Regulations: Graduate Co-op" on page 56.

---

**Greek and Roman Studies**

**General Information**
The Department of Greek and Roman Studies offers programs of graduate study leading to the degrees of Master of Arts and Doctor of Philosophy. Both degrees offer specialization in Classical Languages and Literature, Ancient History, or Classical Archaeology. The two-year MA program consists of course work and the composition of a thesis. The MA thesis may be written in the areas of classical archaeology, ancient history, and Greek or Latin literature. The PhD program consists of course work in a series of reading, seminar, and topical field courses and the composition of a dissertation. The dissertation may be written in the same areas as the MA. Additionally, the PhD program offers core focus in the following thematic areas: interconnectivity in the Mediterranean; technology in the ancient world; social and economic history; gender and identity studies. Prospective students can find further information on the department website: [web.uvic.ca/grs](http://web.uvic.ca/grs).

**Faculty Members and Areas of Research**

- **Laurel M. Bowman, PhD (University of California, Los Angeles)**
  Greek tragedy, Hellenistic poetry, ancient religion
- **Brendan Burke, PhD (University of California, Los Angeles)**
  Aegean prehistory, Greek art and architecture, Anatolian archaeology
- **Ingrid E. Holmberg, PhD (Yale)**
  Homer and early Greek poetry, critical theory, especially feminist
- **Geoffrey Kron, B.Sc, MA, PhD (Toronto)**
  Greek democracy, Greek and Roman economy, agriculture and technology
- **Cedric A. J. Littlewood, DPhil (Oxford)**
  Imperial Latin poetry, ancient literary criticism
- **Mark Nugent, PhD (University of Washington)**
  Imperial Greek prose, constructions of gender and sexuality
- **Gregory D. Rowe, DPhil (Oxford)**
  Roman history, Greek and Latin epigraphy, Roman public and private law
- **Alejandro Sinner, BA, MA, PhD (Barcelona)**
  Roman Archaeology and Numismatics with special reference to Spain and the Western Provinces, Cultural Change and Identity Formation, Archaeological Method and Theory
Emeritus Faculty

David A. Campbell, MA (Glasgow), MA (Oxford)
  Greek lyric poetry
John G. Fitch, PhD (Cornell)
  Greek and Roman drama, esp. Seneca; Didactic poetry
John P. Oleson, PhD (Harvard), FRSC
  Ancient technology, maritime archaeology, Near Eastern archaeology
Gordon S. Shrimpton, BA, MA (British Columbia), PhD (Stanford)
  Greek history and historical writing

Degrees and Specializations Offered

MA and PhD in Greek and Roman Studies, with specialization in archaeology, history, or languages and literature.

Facilities

The University’s library has much material on ancient Greek and Roman culture; the department also has its own Reading Room with an excellent selection of primary and secondary texts. The department provides computing assistance to graduate students, which supplements the computing facilities available from the University. The department will frequently offer opportunities for students to participate in archaeological excavations in the Near East or Mediterranean, and the department also has a superb slide collection.

Financial Support

Consideration for financial aid is automatic upon receipt of applications for admission by February 1. Financial aid is available through the competitive University Fellowship, subject to satisfactory performance and full-time enrolment. All eligible applicants are encouraged to and assisted in applying for funding from provincial, federal and external sources; see the information provided by the Faculty of Graduate Studies <www.uvic.ca/grad>. Financial assistance for research assistants and teaching assistants is subject to department funding.

Admission Requirements

Admission to the Master’s Program

The basic admission requirement is a four-year bachelor degree with at least a B+ (6.0) GPA in one of the several areas of ancient Greek and Roman Studies. All MA applicants must be able to demonstrate a well-rounded, comprehensive knowledge of the ancient Greek and Roman worlds. MA applicants should ideally have balanced strength in Greek and Latin, or substantial experience in one language and at least basic competence in the other. Competency in reading French, German or Italian upon admission is advantageous; students will be required to demonstrate reading knowledge of one of these modern languages before completion of the MA degree. In addition to the documentation required by the Faculty of Graduate Studies (see "Faculty Admissions", page 29), the Department of Greek and Roman Studies also requires a statement of intent from each prospective MA student outlining the student’s research interests.

Admission to the PhD Program

Applicants to the PhD program are normally required to hold a BA and MA degree in one of the several areas of ancient Greek and Roman Studies. They will be expected to have focused experience in the area relevant to their intended topic of research and appropriate command of the ancient languages of Greek and Latin. Competency in reading German and either French or Italian upon admission is advantageous; students will be required to demonstrate reading knowledge of German and either French or Italian before completion of the PhD degree. Applicants to the PhD program are normally expected to have achieved a minimum GPA of 7.0 (or equivalent) in their Master’s program, to have strong letters of reference, to present a clear statement of research interests, and to submit an example of scholarly work.

September is the normal entry point; we do not normally accept students at any other time of year. Courses at the graduate level, with the exception of the MA thesis and the PhD candidacy examination and dissertation, are not normally offered in the summer.

Deadlines

The application deadline for consideration for financial aid, particularly for University of Victoria Fellowships, is February 1. MA applications received after February 1 will be considered, but applicants will not usually be eligible for funding. The application deadline is April 1 for September admission.

Program Requirements

Thesis-based Master’s

Course Requirements

The Department offers a 18-unit thesis-based program leading to the MA degree. In the first year, candidates will take a full load of course work for a total of 10.5 units. They will choose three from the following six fields of study: Greek Literature (GRS 501, 3.0 units); Greek History (GRS 502, 3.0 units); Latin Literature (GRS 503, 3.0 units); Roman History (GRS 504, 3.0 units); Ancient Art and Archaeology (GRS 505, 3.0 units); and Ancient Philosophy (GRS 506, 3.0 units). Candidates are also required to complete the Pro-seminar in Research Methods and Practices (GRS 500, 1.5 units).

Candidates will be examined in their three fields at the end of the year, and achievement of a minimum grade of B+ in all three fields will be expected.

Other Requirements

Before graduation, students must demonstrate a reading knowledge of French, German or Italian. The level of proficiency will be equivalent to a B or better in the reading courses (such as GMST 405 or FRAN 300) offered by the respective language departments. Students may also fulfil the language requirement by passing the department’s written translation examination.
Examinations will normally be of two hours duration and may be written with the aid of a dictionary.

**Thesis**

In the second year, candidates will write a thesis (GRS 599), choosing their subject of research from one of the three fields they have studied in the first year. The unit value of the thesis may range from 6 to 9 units but will normally be 7.5 units. The length of the thesis can vary considerably, but it is generally approximately 100 pages. A final oral examination of the thesis will be required.

**Examination**

The examination will be a combination of written and oral.

**Program Length**

The expected completion time for the master’s degree is two years. Part-time status may extend this completion time; funding, however, will normally not be available after the second year.

**PhD Program**

1. All PhD students are required to take GRS 500, a requirement which can be satisfied either at the MA or the PhD level.
2. Students must complete 9 units of courses numbered 600 and above. Students are required to declare Classical Languages and Literature, Ancient History, or Classical Archaeology as their primary area of focus, and to complete the Reading Course or Courses which apply to that area of specialization: GRS 601A and 601B in literature for 1.5 units each (Greek and Latin literature respectively); 602A and 602B in history for 1.5 units each (Greek and Latin readings respectively); and 603 (readings in Greek and/or Latin) for archaeology for 1.5 units. Archaeologists will take 605, a methods and theory course, in place of a second semester of reading, for 1.5 units. Students then proceed to the seminar courses, in which they normally follow the curriculum for the areas of specialization for 3 units: 611 for literature; 612 for history; and 613 for archaeology. Finally, students take a topical field course in their area of focus for 3 units: 621 for literature; 622 for history; and 623 for archaeology.
3. Students will complete a candidacy examination (GRS 693) for 3 units. As part of the candidacy examination, a dissertation prospectus must be approved by the student’s supervisory committee. Students will be required to display competence in German and either French or Italian through written exams.
4. Students write a dissertation of 18 units which they defend in an oral examination (GRS 699).

**Co-operative Education**

Participation in the Co-operative Education program - which enables students to acquire knowledge, practical skills for employment, and workplace experience - is optional for Master’s and PhD students. Master’s students complete two work terms, and PhD students complete three (a work term consists of four months of full-time, paid employment), and students undertake study and work terms in alternating sessions. Interested students should contact the Humanities, Fine Arts, and Professional Writing Co-op office early in the term in which they are applying. Students are also referred to “General Regulations: Graduate Co-op” on page 56.

---

**Health Information Science**

**General Information**

Since 1981, the School of Health Information Science has led the way in health informatics education and research in Canada, and is considered by many a world leader in this field. The research and teaching strengths of the School include the planning, design, implementation, use and evaluation of health information systems in different healthcare settings.

For further information or any updates, please visit the School website: <uvic.ca/hsd/hinf>.

Brandon Wagar, BA (Waterloo), PhD (Waterloo), Adjunct Assistant Professor
Jens Weber, PhD (Paderborn), Adjunct Associate Professor
Erdem Yazganoglu, MSc (Toronto), MSc (Leeds), MD (Ege University, Turkey), Adjunct Assistant Professor
Jennifer Zelmer, BSc (Victoria), BA (McMaster), PhD (McMaster), Adjunct Assistant Professor
Bruno Zuberbuhler, MD (Zurich), FEBO (Paris), PhD (London), Adjunct Assistant Professor

**Degrees and Specializations Offered**

The School of Health Information Science offers courses of study leading to the degree of MSc and PhD, and, with the School of Nursing, a double-degree MN + MSc:

- On-campus Stream, MSc
- Distributed Stream (online), MSc
- Master of Nursing and Master of Science in Health Informatics (distributed), MN + MSc
- PhD in Health Informatics

**Facilities**

The School has excellent computer equipment, laboratories and technical support that enable faculty and students to engage in all aspects of health informatics research. The University library holdings in various subject areas of health informatics are comprehensive and up to date. In addition, the School has well established linkages to healthcare organizations within and outside of the province that allow faculty and students to conduct research in a variety of health related field settings.

**Financial Support**

Limited financial support is available to incoming students on a competitive basis. No separate application is necessary; the application for admission is also used for fellowship considerations. To be eligible, students must maintain continuous full-time registration during the tenure of award, and must have an outstanding academic record (usually a minimum GPA of 7.0 on a 9-point scale). Students may not hold another major award (e.g., CIHR) in conjunction with a UVic fellowship.

Students may apply for work as research assistants within the University by approaching faculty members directly. While there is no guarantee, additional funding may be available through teaching assistantships. All eligible students are encouraged to apply for funding from provincial, federal and external sources.

**Professional Conduct**

All students in the School of Health Information Science must follow the Faculty of Human and Social Development’s (HSD) Guidelines for Professional Conduct. The faculty supports models for professional conduct based on the following guidelines from the HSD website: [www.uvic.ca/hsd/assets/docs/pdf/policies/hsd_professional_conduct.pdf](http://www.uvic.ca/hsd/assets/docs/pdf/policies/hsd_professional_conduct.pdf).

**Admission Requirements**

The admission selection process is competitive, and enrolment may be restricted in any given year. Candidates should apply directly via the Graduate Admissions and Records website at [www.uvic.ca/graduatestudies/admissions/](http://www.uvic.ca/graduatestudies/admissions/). All applications are first reviewed by the Graduate Admissions and Records Office and then by the School Graduate Committee. Only applicants who satisfy the entrance requirements of the Faculty of Graduate Studies and the School will be considered. Not all applicants who meet the minimum requirements can be admitted. There are two entry points for the distributed (online) MSc stream and on-campus MSc stream each year: in January and September. For the Double Degree Master of Nursing and Master of Science in Health Informatics program (distributed) there is one entry point: in September of each academic year. The PhD in Health Informatics has one entry point in September of each academic year.

**Admission to Master’s Programs**

Provide two Assessment Reports from academic referees. To strengthen your application, we recommend that your referees
attach a Letter of Reference in addition to the Assessment Report. If it has been more than five years since you last attended a post-secondary institution, we recommend that you include two Assessment Reports from current or former employers in place of academic referees.

A personal résumé should include your education background, employment history, professional/academic affiliations and other achievements such as publications or awards.

A letter of intended study describing why you should be considered for enrolment, how you will use the knowledge learned in your workplace or academic career, and in what ways will the program improve/change your personal career.

If you are accepted into the distributed MSc stream, you will NOT be able to switch into other streams or programs. In fact, you will need to first withdraw from your program and reapply to UVic if you want to switch streams or programs.

Students in the On-Campus MSc stream may switch to the distributed MSc stream; however tuition and fees will be assessed at the distributed MSc stream rate for all courses in the MSc program including those already completed prior to switching streams.

For international students
You should plan to stay in Victoria only for the scheduled workshops; the 2-week workshop is in the summer term. We expect you to return to your country after this workshop to continue working for your current employer and not to remain in Canada.

On-Campus MSc Stream
Bachelor’s degree standing from an accredited institution in BC, other Canadian provinces and abroad will be eligible to apply for admission into the program. Those with a non-health or non-IT related bachelor’s degree will be considered, provided they have passed the 100 and 200 level undergraduate Health Information Science (HiNF) courses or their equivalents, as well as have preferably completed one Co-op education work term. Those with relevant health IT work experience may have some of the undergraduate course requirements waived.

Distributed MSc Stream
This is a distance learning, online education program. It typically requires at least two years of relevant work experience as well as a bachelor’s degree standing from an accredited institution in BC, other Canadian provinces and abroad will be eligible to apply for admission into the program. Those with a non-health or non-IT background, or with less than 2 years of work experience, may be considered on a case-by-case basis.

Double Degree MN and MSc Health Informatics
This is a distance learning, online education program. It typically requires at least two years of relevant work experience as well as a bachelor’s degree standing from an accredited institution in BC, other Canadian provinces and abroad to be eligible to apply for admission into the program. Applicants to the Double Degree option in Nursing and Health Informatics must meet admission criteria for both programs. Application guidelines and links to the Faculty of Graduate Studies application form are available on the School of Nursing and School of Health Information websites.

Admission to the PhD program
Admission will be limited to students already holding a Master’s degree in health informatics or related field. Normally applicants are expected to have successfully completed a graduate level statistics course prior to application. Students will be expected to enter the program as a cohort in September. Doctoral students recruited will have research interests that link closely with the faculty’s areas of specialization. The program requires full-time enrolment.

In addition to the Faculty of Graduate Studies’ application requirements, the School also requires the following:

- Three letters of reference, at least two of which are from academics who can assess the applicant’s capacity to conduct independent scholarly work
- CV that summarizes education, work experience, research, publications, awards and distinctions
- Sample publications or conference proceedings (if available)
  - For each publication or proceeding, please include the full citation, indicate the percentage (% contribution, your role, and an electronic copy (preferably PDF).
- Thesis (if available)
- Statement letter summarizing why the applicant is interested in earning the PhD in Health Informatics; research interests; expectations of program; and if contact has been made with any faculty member regarding possible supervisory commitment.

Deadlines
For the distributed (online) and on-campus MSc programs, the deadlines for applications are April 1 for January entry and December 1 for September entry. For the PhD in Health Informatics, the deadline is December 1 for September entry.

Program Requirements
The MSc program requires completion of coursework and a research project. All course requirements must be completed prior to proceeding to the final oral examination. Exceptional students with supervisor and Director approval may work on a thesis rather than a research project.

On-Campus MSc Stream
The MSc degree in Health Informatics requires a minimum of 16.5 units of course work, including a research project or thesis. The program of study will include graduate level health informatics courses from within the School, and may include graduate elective courses from other departments within UVic.
Most graduate courses are offered online via distance education technologies, with no on-site class meetings scheduled. The program of study will include the following requirements:

**MSc - Research Project Option:**
- HINF 503 (1.5) Research Methods in Health Informatics
- HINF 572 (1.5) Health Informatics: An Overview
- HINF 573 (1.5) Applied Biostatistics
- HINF 580 (1.5) Health Informatics Graduate Seminar
- HINF 598 (3.0) Research Project
- Information Structure Course (choose at least 1 of the following):
  - HINF 501 (1.5) Database Design
  - HINF 511 (1.5) Clinical Decision Support and Information Systems
  - HINF 550 (1.5) Health Information Systems Design
- A minimum of 6 units from the list of HINF electives.

**MSc - Thesis option:**
- HINF 503 (1.5) Research Methods in Health Informatics
- HINF 572 (1.5) Health Informatics: An Overview
- HINF 573 (1.5) Applied Biostatistics
- HINF 580 (1.5) Health Informatics Graduate Seminar
- HINF 599 (6.0) Thesis Option
- Information Structure Course (choose at least 1 of the following):
  - HINF 501 (1.5) Database Design
  - HINF 511 (1.5) Clinical Decision Support and Information Systems
  - HINF 550 (1.5) Health Information Systems Design
- A minimum of 3 units from the list of HINF electives.

**Distributed MSc Stream**
The MSc degree in Health Informatics requires a minimum of 16.5 units of course work, including a research project or thesis. Distributed stream students are also required to attend a two week on-campus workshop in year one. The program of study will include the following requirements:

**MSc - Research Project Option:**
- HINF 503 (1.5) Research Methods in Health Informatics
- HINF 572 (1.5) Health Informatics: An Overview
- HINF 598 (3.0) Research Project
- Data Analysis Course (choose at least 1 of the following):
  - HINF 552 (1.5) Evaluation of e-Health
  - HINF 570 (1.5) Epidemiology in Health Services Management
  - HINF 571 (1.5) Health Systems Data Analysis
  - HINF 574 (1.5) Modelling and Simulation in Healthcare
- Information Structure Course (choose at least 1 of the following):
  - HINF 501 (1.5) Database Design
  - HINF 511 (1.5) Clinical Decision Support and Information Systems
- HINF Electives:
  - Electives offered vary from year to year. Students should consult with the School for details. With permission of the course instructor and the School of Health Information Science, electives may include graduate level courses relevant to your program from other UVic departments
  - HINF 501 (1.5) Database Design
  - HINF 510 (1.5) Information Management and Technology
  - HINF 511 (1.5) Clinical Decision Support and Information Systems
  - HINF 516 (1.5) Telehealth, m-Health and Pervasive Health Technology
  - HINF 520 (1.5) Public Health Informatics
  - HINF 530 (1.5) Evidence-Based Health Informatics
  - HINF 531 (1.5) Healthcare Information Security and Privacy
  - HINF 535 (1.5) Health Information Standards
  - HINF 536 (1.5) Controlled Terminology Standards
  - HINF 537 (1.5) Health Information Exchange Standards
  - HINF 550 (1.5) Health Information System Design
  - HINF 551 (1.5) Electronic Health Record
  - HINF 552 (1.5) Evaluation of e-Health
  - HINF 560 (1.5) Patient Safety and Quality in Health Informatics
  - HINF 561 (1.5) Project Management in Health Informatics
  - HINF 562 (1.5) Procurement in Health Informatics
  - HINF 570 (1.5) Epidemiology in Health Services Management
  - HINF 571 (1.5) Health Systems Data Analysis
  - HINF 573 (1.5) Applied Biostatistics
  - HINF 574 (1.5) Modelling and Simulation in Healthcare
  - HINF 575 (1.5) Human Factors in Healthcare

**MSc - Research Project Option:**
- HINF 550 (1.5) Health Information Systems Design
- A minimum of 7.5 units from the list of HINF electives.

**MSc - Thesis Option:**
- HINF 503 (1.5) Research Methods in Health Informatics
- HINF 572 (1.5) Health Informatics: An Overview
- HINF 599 (6.0) Thesis Option
- Data Analysis Course (choose at least 1 of the following):
  - HINF 552 (1.5) Evaluation of e-Health
  - HINF 570 (1.5) Epidemiology in Health Services Management
  - HINF 571 (1.5) Health Systems Data Analysis
  - HINF 574 (1.5) Modelling and Simulation in Healthcare
- Information Structure Course (choose at least 1 of the following):
  - HINF 501 (1.5) Database Design
  - HINF 511 (1.5) Clinical Decision Support and Information Systems
  - HINF 550 (1.5) Health Information Systems Design
- A minimum of 4.5 units from the list of HINF electives.
GRADUATE PROGRAMS

HINF 580 (1.5) Health Informatics Graduate Seminar
HINF 590 (1.5) Directed Studies in Health Informatics (may be taken more than once)
HINF 591 (1.5) Topics in Health Informatics (may be taken more than once)
HINF 597 (1.5) Field Project in Health Informatics

1. Only students in the Distributed Stream program may take HINF 573 and/or 580 as elective courses. For students in the On-Campus program, HINF 573 and 580 are required courses and therefore not eligible for elective credit.

Oral Examination
An oral examination is required for both the thesis and project options.

Program Length
The MSc in Health Informatics has a maximum 5 year time limit. Enrolment beyond two years will result in re-registration fees.

Master of Nursing and Master of Science in Health Informatics: Double Degree Option
The Double Degree option permits nurses who are interested in health information technology to develop graduate level competencies in both Nursing and Health Informatics. The option is intended to prepare nursing leaders with a background essential for working in the rapidly expanding field of nursing and health informatics. Graduates will be prepared to take leadership roles in informatics, telehealth, implementation of electronic health care records and other areas of emerging health technology.

Course Requirements
Students are required to complete 31.5 program units including an onsite program orientation prior to program commencement. In addition to completing 25.5 units of course work students will complete a 6 unit thesis. An oral examination of the thesis proposal as well as the completed thesis will be required. There are also two required cooperative learning experiences in this option. Cooperative learning experiences must usually be undertaken outside of a student's current employment setting.

The requirements for the double degree program are normally met through nine terms of full-time study. Students who have not completed the program within this time will be required to pay reregistration fees.

Required core APN courses (6.0 units)
NURS 506 (1.5) Philosophical Knowledge and Advanced Practice Nursing
NURS 507 (1.5) Theoretical Knowledge and Advanced Practice Nursing
NURS 508 (1.5) Methodological Knowledge and Advanced Practice Nursing
NURS 565 (0.5) Trends and Issues in Advanced Practice Nursing (one)

Required core HINF courses (6.0 units)
HINF 501 (1.5) Database Design
HINF 503 (1.5) Research Methods in Health Informatics
HINF 550 (1.5) Health Information Systems Design
HINF 572 (1.5) Health Informatics: An Overview
HINF Electives (3.0)

Electives are chosen in consultation with the supervisors. HINF electives include, but are not limited to
HINF 510 (1.5) Information Management and Technology
HINF 511 (1.5) Clinical Decision Support Systems
HINF 531 (1.5) Ethical and Legal Aspects of Health Informatics
HINF 551 (1.5) Electronic Health Record
HINF 560 (1.5) Health Care Quality Improvement
HINF 561 (1.5) Project Management in Health Informatics
HINF 562 (1.5) Procurement in Health Informatics
HINF 573 (1.5) Applied biostatistics
HINF 575 (1.5) Human Factors in Healthcare

Required Co-operative experience (6.0 units)
COOP (NURS) Co-operative Experience Requirement (3.0)
COOP (HINF) (3.0) Co-operative Experience Requirement

Required Thesis (7.5 units)
NURS 593 (1.5) Thesis Seminar
or
HINF 580 (1.5) Thesis Seminar
NUHI 599 (6.0) Thesis

PhD Program
Graduates of the program will be trained to plan and execute high quality research publishable in major academic journals; results of their research will advance both the theory and practice of international Health/Medical Informatics. PhD students develop research competencies by completing course requirements and by working closely with faculty advisors on research projects. In addition to research, the PhD program will prepare students for senior and high-level careers in industry.

Program flexibility and the block teaching delivery method of the 600-level courses allow industry professionals to continue to hold professional positions while providing an on-campus experience to connect with fellow graduate students, the School, and
University community. Students will be required to travel to the UVic campus to attend in-class course components.

The goal of the PhD in Health Information is to prepare scholars who will discover and extend scientific knowledge that advances the science and practice in health informatics. Graduates of the PhD program are prepared to:

1. assume leadership roles in informatics and health care
2. generate new knowledge through research and testing of theory contribute to solutions that advance health care in a culturally diverse society
3. translate research findings into practice and policy at multiple levels
4. reflect an interdisciplinary perspective in research and scholarly endeavours

The PhD program requires the completion of a minimum of 39 units. This includes coursework, candidacy exam, and dissertation. The program of study will include the following requirements:

- HINF 500-level elective (1.5)
- HINF 602* (1.5) Theories in Health Informatics
- HINF 603* (1.5) Methods in Health Informatics
- HINF 680 (1.5) Health Informatics PhD Seminar
- HINF 693 (3.0) Candidacy Exam
- HINF 699 (30.0) PhD Dissertation

Students may take, as an elective, the Learning and Teaching in Higher Education Certificate Program (6.0 units).

*Students will be required to travel to Victoria to complete HINF 602 and HINF 603, as these will be delivered with a one week intensive in-class component; additional course requirements are completed in the following weeks.

PhD students must complete all course requirements before proceeding to the candidacy exam.

**Candidacy Exam Requirements:**

Students must demonstrate essential in-depth knowledge in health informatics. Assessment of a student’s research ability will be determined by the successful completion of HINF 693 Candidacy Exam. As part of the candidacy exam, students will be required to submit a Major Area Paper with the topic to be determined by the supervisory committee. The major area paper should exhibit an in-depth knowledge of the topic area. The supervisory committee will assess the major area paper and oral presentation of the major area paper.

In the event that a faculty member is unable to attend in person or virtually, the member is expected to provide questions for the examination and is responsible for finding a proxy to attend the examination and ask the questions of the student. The proxy must be a member of the Faculty of Graduate Studies. It is advisable that the proxy have some substantive knowledge of the area or be knowledgeable in the research methodology. The proxy is expected to assess the student’s responses, however the proxy does not vote on the outcome of the examination. The proxy does not replace the absent member, but merely represents the absent member at the examination.

The purpose of the candidacy examination is to confirm that the student:

- Understands the research problem;
- Is aware of the advanced literature in Health Informatics in the area of his or her specific research topics;
- Has demonstrated capability to conduct the research;
- Has a realistic research plan and schedule;
- Is of PhD calibre.

Students will be evaluated and assigned a Pass/Fail for HINF 693 and will have two opportunities to pass each component of the candidacy exam (major area paper and oral exam). The second attempt to pass the Candidacy Exam must be made within three months of the first attempt. Students who fail to successfully complete the candidacy requirement after the second attempt will be required to leave the program.

**Dissertation Proposal Defense:**

After successfully passing their candidacy examinations, students are required to write and orally defend a dissertation proposal to their supervisory committee. As soon as the supervisory committee and student are satisfied that the dissertation proposal and oral defense meets the standards of the Faculty of Graduate Studies and the School of Health Information Science, the student will apply for ethics approval or ethics waiver and begin dissertation research.

**Oral Examination**

Students will defend the completed dissertation in an oral examination in accordance with the regulations of the Faculty of Graduate Studies.

**Co-operative Education**

Participation in the Co-operative Education program - which enables students to acquire knowledge, practical skills for employment, and workplace experience - is optional for Master’s and PhD students. Master’s students complete two work terms, and PhD students complete three (a work term consists of four months of full-time, paid employment), and students undertake study and work terms in alternating sessions. Students require permission from their academic adviser and graduate adviser, as well as the Co-op coordinator, to participate in the Co-op program. Interested students should contact the Health Information Science Co-op office early in the term in which they are applying. Students are also referred to “General Regulations: Graduate Co-op” on page 56.

Master’s students in the double degree option must complete two work terms (a work term consists of four months of full-time, paid employment), and students undertake study and work terms in alternating sessions.
Hispanic and Italian Studies

**General Information**

The Department of Hispanic and Italian Studies offers a Master of Arts program with two streams: a “Hispanic Studies” stream and one in “Hispanic and Italian Studies.”

The “Hispanic Studies” stream reflects the interdisciplinary nature of the department, which comprises studies in Peninsular Spanish and Latin American Studies.

The “Hispanic and Italian Studies” stream reflects the above, but also includes the Italian component of the department, particularly in the area of Medieval to Renaissance Italian Literature, which strongly influenced Peninsular Spanish Literature both of the Middle Ages and the Golden Age.

Research and teaching strengths include the Italian Middle Ages, the Spanish Middle Ages, the Spanish Golden Age, Colonial and 19th Century Latin American Literature, and 20th Century Latin American Literature to the present.

**Contact Information**

Website: <www.uvic.ca/humanities/hispanicitalian>
Chair and Graduate Adviser: Dr. Beatriz de Alba-Koch
Email: hispchair@uvic.ca
Phone:...............................................................250-721-7413

**Faculty Members and Areas of Research**

**Gregory Peter Andrachuk, PhD (Toronto)**

Medieval literature, especially sentimental romance and Cancionero poetry, religion and literature, especially Auto Sacramental

**Maria Bettaglio, PhD (SUNY-Buffalo)**

Twentieth-century Spanish and Italian literature, women’s studies, gender studies, critical theory, translation theory

**Silvia Colás Cardona, PhD (Calgary)**

Contemporary Cuban literature and culture, urban studies

**Beatriz de Alba-Koch, PhD (Princeton)**

Colonial and nineteenth-century Spanish American literature, especially Mexico

**Joseph Grossi, PhD (Ohio State)**

Regional identity in medieval literature of England and Italy

**Pablo Restrepo-Gautier, PhD (British Columbia)**

Golden Age Spanish drama and literature, modern Peninsular Spanish narrative, modern Colombian narrative, humour studies, gender studies, travel literature

**Dan Russek, PhD (Chicago)**

Modern and contemporary Latin American literature, literature and visual arts, film, the city in literature, aesthetics

**Emeritus Faculty**

**Lloyd H. Howard, PhD (Johns Hopkins)**

Italian literature of the 13th and 14th centuries, especially Dante

**Degrees and Specializations Offered**

The Department of Hispanic and Italian Studies offers programs leading to the degrees of Master of Arts in Hispanic Studies and Master of Arts in Hispanic and Italian Studies, both in a thesis and project-based option.

**Facilities**

Department Research Library.

**Financial Support**

Each year, subject to available funding, entering students are eligible for University graduate funding up to $15,000 per year, tenable for two years. Qualified students entering the program may be hired as teaching assistants with funds available for up to two courses annually to be taught by graduate students at a value of approximately $5,000 per course. Eligible students are expected to apply for funding from provincial, federal and external sources, specifically SSHRC.

**Admission Requirements**

**General**

All candidates for these degrees must meet all the general requirements of the Faculty of Graduate Studies as well as the specific requirements of the Department of Hispanic and Italian Studies.

Students may be admitted commencing September only of each year. Graduate course offerings in the summer period are limited.

In addition to the documentation required by the Faculty of Graduate Studies (“Faculty Admissions”, page 29), the Department
of Hispanic and Italian Studies also requires a statement of research intent.

**Admission To Master’s Programs**

Admission to the thesis or project-based programs requires a bachelor’s degree (Major in Hispanic Studies or Hispanic and Italian Studies or equivalent) with a minimum overall average of B+ (6.0 GPA) or a bachelor’s degree (Major in Hispanic Studies or Hispanic and Italian Studies) with a minimum average of A- (7.0 GPA) in the final year’s work. Students with background deficiencies in Hispanic Studies or, if relevant, Italian Studies will be required to make up courses before being admitted to the MA program.

**Deadlines**

Applications must be received in the Graduate Admissions and Records Office by February 15. International applicants are advised to apply earlier.

**Program Requirements**

The department offers two options towards the MA in both Hispanic Studies and Hispanic and Italian Studies, each composed of 15 units of graduate credit.

The following core courses are required of all students: SPAN 500, Introduction to Bibliography and Methods of Research; SPAN 502, Core Reading List Course I; SPAN 503 or ITAL 503, Core Reading List Course II.

SPAN 502 will cover works taken from the general Hispanic Literature reading list; SPAN 503 or ITAL 503 will reflect the specialized area of the student’s degree program and will be tailored to the specialty: Peninsular Studies; Latin American Studies; or Hispanic and Italian Studies. The other courses are variable in content and may be taken more than once, depending on the topic.

**Thesis-based Master’s**

The thesis option is by invitation of the departmental Graduate Committee.

**Course Requirements**

9 units of credit to include: SPAN 500, 502 and 503 (or ITAL 503 for the MA in Hispanic and Italian Studies), 3 units of graduate-level courses within the department, and a further 1.5 unit graduate-level course from within the department or from outside (with the approval of the department)

**Thesis**

SPAN 599 (6 units): Master’s Thesis and Oral Examination

**Program Length**

1.5 to 2 years.

**Project-based Master’s**

**Course Requirements**

12 units of credit to include: SPAN 500, 502 and 503 (or ITAL 503 for the MA in Hispanic and Italian Studies), 6 units of graduate-level courses within the department, and a further 1.5 unit graduate-level course from within the department or from outside (with the approval of the department)

**Final Project**

SPAN 598 (3 units): Master’s Essay and Oral Examination

**Program Length**

1.5 to 2 years.

**Co-operative Education**

Participation in the Co-operative Education program - which enables students to acquire knowledge, practical skills for employment, and workplace experience - is optional for Master’s students. Master’s students complete two work terms (a work term consists of four months of full-time, paid employment), and students undertake study and work terms in alternating sessions. Interested students should contact the Humanities, Fine Arts, and Professional Writing Co-op office early in the term in which they are applying. Students are also referred to “General Regulations: Graduate Co-op” on page 56.

**History**

**General Information**

The Department of History offers programs of graduate study leading to the degrees of Master of Arts in two streams (Master of Arts in History and Master of Arts in Public History) and Doctor of Philosophy in a wide range of specialized areas. Programs require formal course work as set out in detail below. Course work is selected in consultation with the Graduate Adviser and the student’s supervisor. Attention is paid to both the specific research interests of the student and the need for exposure to diverse subjects and methodologies. Students in the MA in History (Thesis-based Option) and in the PhD complete and defend a thesis or dissertation; students in the MA in History (Project-based Option) complete an extended research paper; students in the MA in Public History complete a practicum and a major project.

Faculty Members and Areas of Research

Robert S. Alexander, PhD (Cambridge)
  Modern France; 19th century Europe; political history
Sara Beam, PhD (Berkeley)
  Francophone Europe 1450 - 1700; cultural and legal history
A. Perry Biddiscombe, PhD (London School of Economics)
  Modern Europe; nationalism
Neilesh Bose, PhD (Tufts)
  Modern South Asia, global history, cultural and intellectual history
Paul Bramadat, PhD (McMaster)
  Religion in Canada, religion and public policy
Penny Bryden, PhD (York)
  Post-confederation Canada, political and constitutional history
Martin Bunton, DPhil (Oxford)
  World history; modern Middle East studies
Zhongping Chen, PhD (Hawaii)
  Late Imperial China, modern China, Chinese diaspora and Sino-Canadian relations
Rachel Cleves, PhD (Berkeley)
  Revolutionary and early national United States; cultural history
Jason M. Colby, PhD (Cornell)
  Post-1865 U.S. history; American foreign relations; race and empire
Peter Cook, PhD (McGill)
  Indigenous-settler relations in the early modern Atlantic world
Simon Devereaux, PhD (Toronto)
  18th and 19th century British criminal justice, political and cultural history
M.L. (Mariel) Grant, DPhil (Oxford)
  20th century Britain
Timothy S. Haskett, PhD (Toronto)
  Medieval social and legal history, medieval England
Mitchell Lewis Hammond, PhD (Virginia)
  Early modern Europe; history of medicine; urban history
John Lutz, PhD (Ottawa)
  Pacific Northwest; Aboriginal-non-Aboriginal relations, European colonialism in the Pacific; Race and Digital History
Lynne S. Marks, PhD (York)
  Canadian women's and gender history, social history of religion, second wave feminism
Andrea McKenzie, PhD (Toronto)
  17th and 18th century English social, cultural and legal history
Christine O'Bonsawin, PhD (Western Ontario)
  Indigenous Studies; sport history
John Price, PhD (British Columbia)
  Modern Japanese; Asian history
Richard Rajala, PhD (York)
  British Columbia, environmental, labour
Thomas J. Saunders, PhD (Toronto)
  Modern Germany; 20th century European culture
Oliver Schmidtke, PhD (European University Institute)
  Modern Germany; immigration
Jordan Stanger-Ross, PhD (Pennsylvania)
  Canadian/American urban history; immigration, race/ethnicity; poverty and economic inequality in Canada
Elizabeth Vibert, DPhil (Oxford)
British colonial history; gender, race, and poverty; South Africa

Jill Walshaw, PhD (Centre for 18th Century Studies, York, U.K.)
17th and 18th century France; European and comparative peasant society; Cultural history; French Revolution

Paul Wood, PhD (Leeds)
Early modern science; The Enlightenment in Europe

Guoguang Wu, PhD (Princeton)
Political and diplomatic history of modern China, Hong Kong, and Taiwan

Serhy Yekelchyk, PhD (Alberta)
Russian and Soviet history and culture; Modern Ukraine

David Zimmerman, PhD (New Brunswick)
Military and naval history; science and technology

Degrees and Specializations Offered
MA in two streams: MA in History; MA in Public History. PhD.

Facilities
Facilities are available for graduate work in Canadian, European, British, American, Middle Eastern, Japanese and Chinese history, and on a wide range of themes, among them political history, aboriginal history, military history, gender history, social history, cultural history, diplomatic history, intellectual history, comparative/world history, labour history, history of science and historical demographics. Depending on geographic concentration, the department covers periods ranging from the medieval to the modern. Other areas and themes may be available; prospective students should consult the Graduate Adviser or a potential supervisor. The University’s McPherson Library has holdings in excess of one million volumes, and graduate students may also be granted access to the Provincial Library and Archives, which include notable manuscript collections relating to western Canada and the northwestern United States.

Financial Support
History students are eligible for University of Victoria Fellowships on a competitive basis. In addition, the department offers several scholarships of varying amounts. Teaching and research assistantships are also available on a competitive basis. Entering and continuing students are automatically considered for scholarships. Students must apply for assistantships. Because funds are limited and assistantships generally do not cover tuition costs, prospective students are encouraged to apply for external funding, most notably SSHRC (CGS) scholarships.

Admission Requirements
In addition to reference letters and transcripts required by the Faculty of Graduate Studies, students must send a letter to the Graduate Adviser in the History department outlining their particular area of interest within the field of History and their proposed thesis topic if they plan to do a PhD or a thesis MA. This letter need not be more than a page long. It will assist the department in determining whether or not it can provide appropriate supervision.

A minimum TOEFL (TWE included) score of 600 on the paper-based is required of all international students whose first language is not English.

Admission to the Master’s Program
Subject to the admission requirements of the Faculty of Graduate Studies, admission to both streams in the MA program normally requires a bachelor’s degree with a minimum overall average of B+ (6.0 GPA), or a bachelor’s degree with a minimum average of A- (7.0 GPA) in the final year’s work. Many more students apply each year than can be accommodated in the program. A candidate with background deficiencies in History may be required to register for a year as a non-degree undergraduate student before being admitted to the MA program.

Admission to the MA in Public History Stream
Admission requirements are the same as for the MA in History Stream, however a candidate with significant experience in community-based or professional historical engagement may be considered for admission without meeting the full requirements indicated above.

Admission to the PhD Program
Admission to the PhD program normally requires a master’s degree with a minimum average of A- in graduate courses.

Deadlines
Normally, students are admitted in September although in certain cases, it may be possible to enter the program in January. Most courses run from September to December and from January to April. It is not possible to do a graduate degree in History through Summer Sessions.

Students who wish to be considered for scholarships must submit their applications by February 1st. Other students should conform to the deadlines set by the Faculty of Graduate Studies. Late applications may be considered if space is available.

Admission is on a competitive basis. Not all students who meet the requirements will be admitted. The History department normally admits a total of 15-20 MA and PhD students each year.

Program Requirements
All programs must be approved by the Graduate Adviser to insure balance and focus in the program of each student.

With the written permission of the Graduate Adviser, students may take a graduate course in another department if this is appropriate for their program.

All candidates for the MA in History and PhD degrees must demonstrate a reading knowledge of a second language.
acceptable to the department in order to qualify for graduation. This will normally be a language relevant to the student’s research interests. The level of proficiency expected will be a passing grade in an approved reading course offered by the respective language departments. Students may also fulfill the language requirement by passing the department’s written translation examination.

Note: Students will not be permitted to defend their theses until they have satisfied this language requirement.

Candidates for the MA in Public History are not normally required to demonstrate a reading knowledge of a second language.

Not all of the History graduate courses listed in the calendar will be offered in a particular year. All courses are variable content. Not all of the History graduate courses listed in the calendar will be offered in any given year.

MA Program

MA in History Stream

The History department offers both Thesis-based MA and Project-based Options in the MA in History. In both options, students must take HSTR 500 (Historiography) and 4.5 units of graduate History courses including at least 1.5 units in a topical field (usually HSTR 510 to 526) and 1.5 units in a geographical field (usually HSTR 501A to 509A). Some courses may be counted as either geographical or topical fields. Please see uvic.ca/history for details or contact the Graduate Adviser. In both programs, at least one course must be outside the area of specialization.

Students who obtain a 5.0 grade point average but who obtain less than B standing in HSTR 500 must repeat HSTR 500. They may repeat HSTR 500 once only.

Part-time study is permitted, but the degree must be completed within five years of the initial registration.

Although there are no formal residence requirements, residence is recommended.

Thesis-based Option

Students in the thesis option will also take HSTR 599 (thesis).

Other Requirements

At the end of the first month of their fourth term of registration, students must submit a short historiographical report on their thesis topic to their supervisor. This must include an explanation of how they plan to complete their research. If this report is not completed by the first month of the fifth term of registration, the student will be required to meet with his or her supervisor and the Graduate Adviser. If the report is not submitted within a week following this meeting, the student will normally be required to withdraw from the program by the end of the fifth term.

Thesis

The thesis length must be between 70 and 120 typed pages.

Program Length

The thesis MA is designed to be completed in two years.

Project-based Option

Students in the project-based option will also complete an additional 1.5 units of course work, normally in a geographical field, plus HSTR 550 and HSTR 598 (Extended Research Paper).

</tbody>
</table>

At least 1.5 units must treat a geographical area outside that covered in the major research paper.

Final Project

Students will also complete a major research paper. This paper will normally be based on primary research and may emerge from a paper written for a graduate course other than HSTR 550. The major research paper must be 40-45 typed pages and will be written in the form of a journal article. It will be graded by the supervisor and an additional faculty member. This second reader will be approved by the Dean of Graduate Studies. This paper will not be subject to oral defense.

Program Length

The project-based Option is designed to be completed in one year.

MA in Public History Stream

Students are required to take HSTR 500 (Historiography), HSTR 515A (Public History), 3.0 units of graduate History courses, CH 560 (Cultural Heritage Stewardship and Sustainability) and 1.5 units of Cultural Heritage Studies courses (chosen from CH 561 or CH 562). The 3.0 units of graduate History courses may include a 1.5 unit Field School course (HSTR 528, HSTR 470/591, or GMST 489/GER 591).

PhD Program
pages on a public history topic, normally based on primary
Students will complete a written major research paper of 40-50
Final Project
experience. A website, an exhibit, or other public history project,
Work Experience
Students will be required to complete a work experience for
course credit, normally over the summer, with a museum,
archives, or other public history site (HISTR 801). This could either
be a paid full-time co-op position or work experience position, a
paid internship or a full or part-time unpaid practicum. Students
who are currently working professionals in the field, or have
extensive volunteer experience in the field, may be able to have
the work experience requirement waived, at the discretion of the
Department of History’s Graduate Advisor.

Program Length
The MA in Public History is designed to be completed in 16
months for full-time students.

PhD Program
The Doctoral degree requires credit in 7.5 units of graduate
courses, including the historiographical/historical methods
course (HSTR 500), comprehensive exams in one major and two
minor fields, and completion of a dissertation. (Students who
have completed HSTR 500 or its equivalent at the MA level will
automatically be assigned credit for the course.)

PhD students are required to take 600 level (enriched versions) of
three 500 level graduate courses, each worth 1.5 units of course-
work, plus a 1.5 unit dissertation-related historiographical course
(HSTR 600, Historiography for Dissertation) which will usually be
organized by the student’s supervisor. The 600 level courses (601
and above) involve the same course work as the 500 level version
of the course plus additional assignments including an expanded
list of readings, additional written assignments and the creation of
an undergraduate syllabus in the field. These courses will be the
basis for the “fields” in which they write comprehensive exams.
Students choose three courses from the list of 600 level
geographical and topical field courses and are strongly
encouraged to choose from both. Geographical field courses are
defined by territorial or regional boundaries. Topical field courses
examine significant themes that cut across geographical or
temporal boundaries, such as social, military, intellectual/cultural,
family, women’s, indigenous, gender, religious, colonial, world or
maritime history. With the approval of the graduate adviser,
students may also take an enriched 1.5 unit graduate course in
another department.

Major and minor fields may be defined either topically or
geographically. Normally students will choose a course from the
list (HSTR 601 and above) and complement it with HSTR 600,
Historiography for Dissertation to constitute their major field; the
other two courses selected from the same list will provide the
basis for two minor fields of study. Students may also combine
two linked 600 level courses (ie. Pre and Post 1900 Canadian
History, 603A and B) into a major field and use HSTR 600,
Historiography for Dissertation as a minor field.

Doctoral students are expected to take the three 600 level
courses in successive terms during the first fall, spring and second
fall terms of their enrolment in the program and complete the
written comprehensive exam following the conclusion of each
course. HSTR 600 will normally be taken during the same term as
the course serving as the basis for a student’s major field and be
examined as part of that field. If HSTR 600 is taken as a minor field
it will be examined separately, but in that case the two courses
that compose the major field (eg HSTR 603A and 603B) will be
examined together, with a single exam following completion of
the second of the two courses. In special cases, PhD students may
be allowed, with the approval of the graduate adviser, to take two
600 level courses in the same term, and write one of the
comprehensive exams the following term. Students must pass all
three comprehensive exams. A student failing only one
comprehensive exam will be allowed to rewrite that exam a
single time. Students will remain registered in HSTR 693
(comprehensive examinations) until they have successfully
passed all three comprehensive examinations.

After completing the written comprehensive exams, a doctoral
student will make a presentation of his/her dissertation proposal
to their supervisory committee at a meeting chaired by the
graduate adviser. This process will normally occur during the
spring term of a student’s second year in the program. The
proposal is graded on a pass/fail basis; that outcome is entered as
the student’s grade for HSTR 695. Students are allowed a second
attempt should they fail the process on the first try. Highly
motivated students who satisfy normal program requirements
will be allowed to present their dissertation proposal before the
spring of their second year, with permission of the graduate
adviser.
During at least the first two years of the PhD program, students are expected to attend the Graduate Student Workshop series of presentations and departmental lectures on a regular basis.

**Concentration in Cultural, Social and Political Thought (CSPT)**

Students applying to the Cultural, Social, and Political Thought (CSPT) concentration-an interdisciplinary graduate concentration open to selected MA and PhD students in English, Environmental Studies, History, Political Science, and Sociology-must meet the admission requirements for the MA or PhD program. Applicants must apply online, choosing the Concentration in Cultural, Social and Political Thought (CSPT) option for History. If approved by the department, the application will be reviewed by the CSPT Admissions Committee. For full information about the program see http://www.uvic.ca/interdisciplinary/csp/. Students must meet the core graduating requirements of History as well as specific requirements of the CSPT Program. See also the entry for “Concentration in Cultural, Social and Political Thought (CSPT)”, page 3. The Graduate Adviser in History should be consulted for details.

**Graduate Professional Certificate in Cultural Heritage Studies**

For Master's students interested in careers in museum work, public history or historical preservation, our program will be partnering with the Division of Continuing Studies and Faculty of Fine Arts in support of the Graduate Professional Certificate in Cultural Heritage Studies. Students will get MA course credit for one of five Certificate courses that they can take in pursuit of a professional certificate in cultural heritage. One of the four remaining courses may be taken as an internship to build professional experience. For more information please consult the Graduate Adviser.

**Co-operative Education**

Participation in the Co-operative Education program - which enables students to acquire knowledge, practical skills for employment, and workplace experience - is optional for Master's and PhD students. Master's students complete two work terms, and PhD students complete three (a work term consists of four months of full-time, paid employment), and students undertake study and work terms in alternating sessions. Interested students should contact the Humanities, Fine Arts, and Professional Writing Co-op office early in the term in which they are applying.

Students are also referred to “General Regulations: Graduate Co-op” on page 56.

Peter Jacobs, PhD (UBC)

Degrees and Specializations Offered

Indigenous Education in partnership with the Department of Linguistics offers programs leading to:
- Graduate Certificate in Indigenous Language Revitalization
- Master of Arts in Indigenous Language Revitalization
- Master of Education in Indigenous Language Revitalization.

Facilities

Multi-media laboratories and a curriculum library are housed within the MacLaurin Building. The Department of Linguistics is fully equipped for audio and video recording, editing, and analysis, and has facilities and personnel to support computer-based language learning and teaching. The First Peoples House located in the heart of the campus includes a student social gathering space, a reading room, a lunch room, and an Elders’ Lounge. Indigenous Education and the Department of Linguistics are affiliated with a number of research centres at UVIC, including the Centre for Youth and Society, the Centre for Early Childhood Research and Policy, and the provincial Indigenous Child Welfare Research Network.

Financial Support

All eligible graduate students are encouraged to apply for funding from provincial, federal and external sources. Please contact Indigenous Student Adviser for more information.

ADMISSION REQUIREMENTS

Admission to Master's Programs

For applicants to all the Indigenous Education graduate programs the admission requirements are:
- A baccalaureate degree (or equivalent degree from another country) from an accredited and recognized institution
- A grade point average of 5.0 (B) in the work of the last two years (30 units) leading to this baccalaureate degree
- Or, mature student category -- 4 years professional experience since graduating with a baccalaureate degree
- Or, mature student admission with modified academic requirement as per the Exceptional Entry guidelines below

Applicants must submit two letters of reference (the same two letters required for admission to Faculty of Graduate Studies), provided by two referees who can be a professional colleague, professor or other academic authority, or an Indigenous Language Authority.

Applicants must submit a statement of intent describing their interest in the program and how they plan to use the program to promote community development in Indigenous language and culture revitalization.

First priority will go to applicants who are proficient/literate or semi-proficient/literate in any Indigenous language.

Admission to the Graduate Certificate

For a limited time an exceptional entry is available to applicants to the graduate programs who have extensive expertise in the language and culture of their respective communities and have shown significant leadership in language and culture revitalization projects but do not hold a baccalaureate degree.

Exceptional entry applications must provide a profile or CV and portfolio indicating previous education (certificates and diplomas), related professional experience, and training, an additional letter of reference attesting to the applicant’s level of fluency from an Indigenous Language Authority, as well as the regular application requirements to Graduate Studies. The evidence provided in the form of a profile and portfolio will be holistically considered, weighing the sum total of all previous education and experience for preparedness and suitability for the program. Guidelines for profile and portfolio will be included in the application materials as well as posted on the Indigenous Education website. For further assistance with this requirement please contact the Indigenous Student Adviser. Applicants in this category are encouraged to begin preparation of the portfolio well in advance of the application and documentation deadlines in order to receive feedback and assistance from Indigenous Education in its preparation and submission for consideration by the Program Admissions Committee.

Students who have successfully completed the coursework for the certificate program may apply to transfer the coursework to the Master's program.
Students who choose to transfer to the degree program will not receive the certificate designation. Students who do not complete the Master’s program may apply to receive the certificate as an exit credential provided they have successfully completed the first two terms of the Master’s program.

It is expected that this condition will be applied for the first 5 years of the program only, from the year the program began.

**Deadlines**

Please note the following application deadlines for entry in Summer Term:

- January 15: Application Deadline
- January 31: Document Deadline

Applications and documentation received after the deadline may be accepted by the Graduate Admissions and Records Office, but there is no guarantee that the application will be processed and evaluated in time for a decision for the desired entry point. Applicants who submit application forms or documentation after the deadlines do so at their own risk. Application Fees will not be refunded.

**PROGRAM REQUIREMENTS**

The Graduate programs in Indigenous Language Revitalization are full-time programs delivered in a flexible format. Courses are offered variously as summer institute programs, and blended formats combining face-to-face course delivery and distance learning, minimizing the on-campus requirements. As these are cohort-based programs, all candidates for the Indigenous Language Revitalization programs must move together through the sets of courses.

**Graduate Certificate in Indigenous Language Revitalization**

The certificate is based on 6.0 units of course work and includes a small-scale community-based project as part of a community-based research course (LING/IED 531).

**Program Unit Total: 6.0**

Marian Nicolson, Dzawada’enuxw Tribe of the Kwakwaka’wakw First Nations
Sioliya (June Quipp), Cheam First Nation
Temosen (Charles Elliott), Tsartlip First Nation

Degrees and Specializations Offered

Master of Arts in Indigenous Governance.

Financial Support

Well-qualified applicants are eligible for a University Fellowship. Several teaching or research assistantships may also be available, usually ranging from $3,600 to $4,200 for eight months work. Additional TA-ships may be available for the summer term. There are also several awards that provide small numbers of exceptional or financially needy students with additional funds. Please contact the Graduate Adviser of the department for additional details.

ADMISSION REQUIREMENTS

General

Indigenous Governance is committed to teaching and research that respects both western and Indigenous traditions, methods and forms of knowledge. Through these programs, students will gain an understanding of the philosophical, administrative, and political dimensions involved in governing Indigenous communities, as well as a background in the theory, methods and tools appropriate for and useful to research among Indigenous people.

The Master of Arts in Indigenous Governance is an interdisciplinary program that provides students with a strong foundation of basic and applied scholarly research and a path to
understanding government and politics among Indigenous peoples, with a special emphasis on the nature and context of Indigenous governments in Canada.

**Admission To Master’s Programs**

Faculty of Human and Social Development offers a full-time program of studies leading to the degree of Master of Arts in Indigenous Governance. The Program aspires to educate students who are grounded in a diverse body of knowledge to assume leadership and policy making roles, or to continue their academic careers in a variety of fields including social science and history, law or native studies.

Candidates will have a baccalaureate degree from a recognized university, or equivalent qualifications with an academic standing acceptable to Indigenous Governance and the Faculty of Graduate Studies. Admission generally requires at minimum a very high second class standing (B+) in the two final years of the undergraduate degree.

**Deadlines**

Please note that the application and documentation deadline for September admission is January 15.

All applications received by the application deadline that meet the minimum GPA requirements will automatically be considered for Fellowship funding.

Applications and documentation received after the deadline may be accepted by the Graduate Admissions and Records Office, but there is no guarantee that the application will be processed and evaluated in time for a decision for the desired entry point.

Applicants who submit application forms or documentation after the deadlines do so at their own risk. Application Fees will not be refunded.

**PROGRAM REQUIREMENTS**

The Master’s is a full time program delivered in a flexible format. Courses are offered variously as standard academic year graduate seminars, summer institute programs and in more intensive formats. All candidates for the MA degree must commit to a 3.0 unit Mentorship with an academic supervisor and complete a Community Governance Project including an internship, a written report, and an oral defense.

**Students in the program must complete the following requirements:**

<table>
<thead>
<tr>
<th>Requirement</th>

</tr>
<tr>
<td>IGOV 550</td>
<td>Indigenous Peoples and Self-Determination</td>
</tr>
</tbody>
</table>

**One-year Mentorship Course Credits**

- IGOV 575 (3.0) Mentorship

All students must register in a year-long Mentorship that will include weekly meetings with a faculty member to help guide the student’s research and support professional development.

**IGOV Elective Courses (1.5 units required)**

- IGOV 560 (1.5) Indigenous Peoples and Globalization
- IGOV 570 (1.5) Indigenous Women and Resistance

Students must take an additional graduate level course selected from among IGOV electives or approved courses in related fields of study with permission on a case-by-case basis, of the relevant Faculty, the student’s supervisor and the Graduate Adviser.

**Community Governance Project (4.5 or 6.0 units*)**

Projects are geared toward providing a practical learning experience and opportunity for students to face the real world challenges of governance in an Indigenous context. They also serve a crucial function for affiliated communities in providing access to the University’s resources and expertise through the students' participation in projects to enhance the community’s governance capacity.

Community governance project interns will work on a designated research or policy development project in an Indigenous organization, under the direction of a project management team that includes community leaders and IGOV faculty. Internship placements must be approved by the Director, and will typically involve one hundred hours of work in the community and the completion of a comprehensive report based on the internship experience. Before registering in the Community Governance Project, a student must have completed all core courses (IGOV 520, 530, 540, and 550) as well as Mentorship (IGOV 575) and their elective.

*Note: Only Students who have entered the Master's program prior to September 2009 need to register in the 4.5 unit section of IGOV 598 (requires permission of the department). Students who start their MA program on or after September 2009 need to register in the 6.0 unit section of IGOV 598.*

**Oral Examination**

An oral examination is required upon completion of the internship and should encompass content from coursework, research papers, and the Community Governance Project.

**Program Length**

The Master’s is normally completed in 18-24 months although it is possible to complete in one calendar year.

Faculty Members and Areas of Research

All regular members of the Faculty of Graduate Studies are eligible to supervise Interdisciplinary Graduate Students.

An interdisciplinary graduate program integrates knowledge, skills, data, ideas and insights from different domains of knowledge to examine a phenomenon that lies beyond the purview of a single area of knowledge and/or specific discipline(s). Interdisciplinary research may also involve integrating research approaches from different domains or disciplines. The form of interdisciplinary graduate studies varies. Some programs focus on bringing two or more discrete disciplines together to address a research question. Other programs may focus on an interdisciplinary phenomenon or area of research that requires interdisciplinary knowledge development. The questions raised and explored by interdisciplinary research may lead to expanded knowledge about a phenomenon as well as new perspectives and/or areas of investigation for the disciplines themselves.

Degrees and Specializations Offered

MA, MSc, PhD

Interdisciplinary Graduate Programs are offered through a variety of options:

1. Students may undertake interdisciplinary studies as part of a regular existing program that is interdisciplinary in nature. These programs include Dispute Resolution; Indigenous Governance; Neuroscience; Social Dimensions of Health Research; interdisciplinary graduate programs in Cultural, Social, and Political Thought (refer to calendar entry for English, Environmental Studies, History, Political Science or Sociology).

2. Students may enrol in a program within a regular disciplinary academic unit and engage in interdisciplinary research supervised by a faculty member associated with an interdisciplinary research centre. Research centres at the University of Victoria include: British Columbia Institute for Co-operative Studies; Centre for Addiction Research of British Columbia; Centre for Advanced Materials and Related Technology; Centre for Asia-Pacific Initiatives; Centre for Biomedical Research; Centre for Earth and Ocean Research; Centre for Global Studies; Centre for Forest Biology; Centre for Health Promotion; Centre for Studies in Religion and Society; Centre for Youth and Society; Centre on Aging.

3. A student may undertake an individual interdisciplinary studies (INTD) program to pursue interdisciplinary research in an area that has not been formally approved as a regular graduate degree program by the University of Victoria Senate. The Individual INTD degree must be supported through a combination of two academic units (the home or primary unit and the co-supervising or secondary unit). Individual interdisciplinary degrees are generally offered at doctoral and master’s levels; however, one of the units must have an established graduate degree program at the same
level as the proposed interdisciplinary degree program. It is the applicant’s responsibility to arrange the details of the program under the guidance of her proposed supervisory committee. The academic units and the Faculty of Graduate Studies are under no obligation to arrange or approve interdisciplinary programs.

**Individual Interdisciplinary Studies Programs (INTD)**

Individual interdisciplinary programs are subject to all of the usual Faculty of Graduate Studies regulations. Interested students are required to contact the interdisciplinary Graduate Advisor for an information session before proceeding to the application process. The program proposal must be formulated by the applicant under the guidance of the prospective supervisors. Each application is evaluated by the Interdisciplinary Committee of the Faculty of Graduate Studies. Approval is not guaranteed. Courses should not be started without formal approval of the program by the Faculty of Graduate Studies.

**Admission Requirements**

Applicants for interdisciplinary degree programs must follow the admission procedures and meet the minimum entrance criteria set out in the Faculty of Graduate Studies regulations in the University of Victoria Graduate Calendar. In addition to the completion of a recognized four-year undergraduate university degree, students will normally be required to have a minimum Grade Point Average of 7.00 (A-).

Potential applicants must develop a degree program and assemble a supervisory committee before making a formal application.

The student’s official record will indicate the program as Interdisciplinary (INTD); comprehensive examinations, thesis, and/or dissertation will carry the prefix INTD.

**Application Procedures**

Students should consult the INTD Application Instructions found under ‘Program information’ on the Graduate Studies website. <uvic.ca/graduatestudies>

INTD applications consist of several sections assembled in this order: Resume, Research Proposal, Program Proposal, and Letters of Support. Students should note the strict limitations on number of pages, typeface, font size, etc. Each of these sections is submitted independently via the online INTD application process, available at <uvic.ca/garo>.

Interested students are advised to initiate the application process two to four months in advance of their intended submission date to allow sufficient time for the proposal to be formulated in collaboration with their prospective supervisors and for permission to be obtained from the chairs of the academic units concerned. All the steps outlined on the Graduate Studies INTD website must be completed by the official application deadline.

**Application Deadlines**

- May 15 for September entry
- September 30 for January entry
- January 31 for May entry

Notifications are sent out between 4 and 6 weeks after the deadline. Students who wish early notification may apply one or two terms in advance of their intended entry date.

The Faculty of Graduate Studies may limit the number of Individuals enrolled in Interdisciplinary Graduate degree programs.

**Program Requirements**

**Proposal Approval for Individual Interdisciplinary Degrees**

Before an offer of admission can be made, applicants must have an interdisciplinary degree program approved by the Faculty of Graduate Studies. This proposal is jointly developed by the applicant and the projected supervisor and includes a completed Individual Interdisciplinary Graduate Program for Approval form (including signatures of proposed supervisory committee) and a rationale for the program. The program must be genuinely interdisciplinary, and the rationale must indicate the reasons it is necessary to create an individual interdisciplinary degree rather than have the student apply to an existing program.

**Academic Supervisor for Individual Interdisciplinary Degrees**

Supervisory committee members from two academic units must be designated as academic co-supervisors. It is important to ascertain the specific roles of each supervisor. One of the co-supervisors will take the administrative lead. The academic unit of this administrative co-supervisor normally serves as the administrative home for the student’s program.

**Degree Program and Supervisory Committee for Individual Interdisciplinary Degrees (Master’s and PhD)**

The degree program may be negotiated by the members of the supervisory committee, but it must conform to all regulations of the Faculty of Graduate Studies. For both PhD and Master’s programs, there must be a supervisory committee member from two departments which are designated as academic co-supervisors. In addition to the co-supervisors, the supervisory committee normally will include at least one other member from a relevant field of study.

Any changes to a degree program or supervisory committee must be made in writing and approved by the Dean of Graduate Studies.

**Program and Course Designation**

The student’s official record will indicate the program as “Interdisciplinary.” The degree program can consist of appropriate
INTD courses as listed below as well as regular courses from other academic units.

- INTD 580\(^1\) (1.5-3.0): Directed Studies
- INTD 599\(^2\) (4.5-12.0): Thesis
- INTD 680\(^1\) (1.5-3.0): Directed Studies
- INTD 693\(^2\) (3.0): Candidacy Examination
- INTD 699\(^2\) (15.0-30.0): Dissertation

1. May be taken more than once for credit provided courses content differs.
2. Grading is INP, COM, N, F.

**Candidacy Exams**

The candidacy exam is intended to demonstrate a student's knowledge of his or her field of study, the viability of the proposed dissertation topic and the student's ability to undertake the research. All students registered in the Interdisciplinary PhD program are required to successfully complete a candidacy examination. The candidacy exam includes both a written and oral component. The format of the examination may vary based on the specific circumstances. The written component is intended to provide a foundation for the future research project. To that end, the format of the written component will include two or more papers outlining the scholarly context and relevant research methodology or a plan outlining the proposed research for the PhD dissertation that includes a summary of relevant existing research and literature and a bibliography. Alternative models for the written component of the exam, if deemed necessary, will normally be decided upon during the first semester of the student's registration. The papers and oral component will be evaluated on a pass/fail basis by the PhD supervisory committee. In the event the student does not pass one or both of the components the student is afforded one additional opportunity to successfully pass both components within three of months of the original oral exam date.

The co-supervisors, along with the student, will determine if INTD 693 (Candidacy Examination) will be a pre- or co-requisite to INTD 699 (Dissertation). As well, the time limit for completion of candidacy will be determined at the beginning of the program. If the time limit is other than the Faculty of Graduate Studies policy of 36 months, it will be the responsibility of the home academic unit to keep track of this time limit.

**Program Length**

Master's degrees could be completed in two years, doctoral degrees within 3 to 5 years. Normally, a student proceeding toward a master's degree will be required to complete all the requirements for the degree within five years (60 consecutive months) from the date of the first registration in the master's degree. In no case will a degree be awarded in less than 12 consecutive months from the time of first registration.

Normally, a student proceeding toward a doctoral degree will be required to complete all the requirements within seven years (84 consecutive months) from the date of first registration in the program. If a student transfers to a doctoral program after an initial period in a master's program, completion is required within seven years of the date of the first registration in the master's program. A doctoral degree will not be awarded in less than 24 consecutive months from the time of first registration.

Students must obtain approval for a program extension prior to the time limit expiry date. If a program extension is not approved prior to the program expiry date, the student will normally not be permitted to continue in or return to that program.

**Concentration in Cultural, Social and Political Thought (CSPT)**

Location: Cornett Building, Room B138
Mailing Address:
Cultural, Social and Political Thought
University of Victoria
PO Box 3050 STN CSC
Victoria, BC V8W 3P5
Canada
Courier Address:
3800 Finnerty Road
Cornett Building B138
Victoria, BC V8P 5C2
Telephone Number: .............................................. 250-472-5185
Website: <www.uvic.ca/interdisciplinary/cspt/>
Director: Dr. Peyman Vahabzadeh
Email: csptdi@uvic.ca
Phone: ................................................................. 250-721-6353
CSPT Program Assistant:
Email: csptsec@uvic.ca
Phone: ................................................................. 250-472-5185

This concentration is available to selected graduate students in English, Environmental Studies, History, Political Science, and Sociology. Interested students should consult the relevant departmental entries.

Students applying for an Individual Interdisciplinary MA or PhD Program may also opt for a concentration in Cultural, Social and Political Thought (CSPT). To be eligible for this concentration, students must receive approval from both the department and the CSPT Admissions Committee.

An approved Individual Interdisciplinary MA program with a CSPT concentration will include:
- CSPT 501
- at least 1.5 units of CSPT 500
- a thesis worth from 6 to 9 units, on an approved topic within the field of cultural, social and political thought, under the direction of a supervisory committee including at least two participating CSPT faculty members.
- 3 to 6 units of other courses at the graduate level approved by the CSPT Program Director and the Interdisciplinary Special Arrangements Admissions Committee, to a total of 15 units for the program as a whole including the thesis and CSPT course requirements.

An approved Individual Interdisciplinary PhD program with a CSPT Concentration will include:
- CSPT 601
- at least 1.5 units of CSPT 600
- a candidacy examination within the field of cultural, social and political thought.
- At least 4.5 units of other courses at the doctoral level, approved by the CSPT Program Director and the Interdisciplinary Special Arrangements Admissions Committee.
- A second candidacy examination in a field approved by the CSPT Program Director and the Interdisciplinary Special Arrangements Admissions Committee.
- A dissertation worth 30 units on an approved topic within the field of cultural, social and political thought, under the direction of a supervisory committee including at least two participating CSPT faculty members.

Faculty Members and Areas of Research

Elizabeth Adjin-Tettey, DJur (Osgoode)
Associate Dean, Administration and Research. Torts; remedies; insurance; race, ethnicity, and the law; feminist analysis of law

John Borrows, FRSC, PhD (Osgoode)
Canada Research Chair in Indigenous Law. Indigenous legal traditions, Canadian aboriginal law, comparative indigenous rights, Canadian constitutional law, and comparative constitutional law

Gillian Calder, LLM (Osgoode)
Constitutional law, feminist legal theory, social benefits law, family law, performance and law

Kathryn Chan, LLM, DPhil (Oxford)
Law of the voluntary sector, the law of gift, administrative law and regulation, religious freedom, comparative law, and human rights and legal pluralism

Patricia Cochran, PhD (UBC)
Constitutional law, evidence law, political and legal theory, theories of judgment.

Deborah L. Curran, LLM (California, at Berkley)
Hakai Professor in Environmental Law and Sustainability. Water law, growth management and land use law, food systems, and the common ownership of property, real estate and shared-decision making

Maneesha Deckha, LLM (Columbia)
Feminist and postcolonial legal theory, critical animal studies, animal law, health law, bioethics, elder law, law and culture, law and society

Gerard A. Ferguson, LLM (New York)
University of Victoria Distinguished Professor. Criminal law, criminal procedure, sentencing, mental health law
J. Donald C. Galloway, LLM (Harvard)
   Torts, immigration and refugee law, jurisprudence, citizenship law

Mark R. Gillen, LLM (Toronto)
   Securities regulation, business associations, trusts, taxation law, competition law

Donna Greschner, BCL (Oxon)
   Constitutional law, comparative constitutional law, equality rights, health-care law, legal theory

Robert G. Howell, LLM (Illinois)
   Intellectual property, managing intellectual property, telecommunications, private international law (conflicts of law)

Rebecca Johnson, SJD (Michigan)
   Law and society, legal discourse, culture and the humanities, law and popular culture, law and literature, feminist legal theory, statutory interpretation, criminal law, equality law

Freya Kodar, LLM (Osgoode)
   Pensions (public and private), debt and credit regulation, income security, care work, feminist political economy and disability and the law

Michelle S. Lawrence, PhD (Simon Fraser)
   Constitutional law, feminist legal theory, equality rights

Carol Liao, PhD Candidate (UBC/Toronto)
   Corporate law, business ethics, law and economics, contracts, securities regulation, commercial and consumer law, corporate social responsibility, responsible investment and impact investment, social enterprise law.

Colin Macleod, PhD (Cornell)
   Moral, political, and legal philosophy; jurisprudence (especially the relation between law and morality); children's rights

Theodore L. McDorman, LLM (Dalhousie)
   Public international law, international ocean law

M. Jerry McHale, QC, LLB (Alberta)
   Mediation and dispute resolution, access to justice and justice reform, family law, procedural law, policy development and the legislative process

John McLaren, LLB (Calgary) - Professor Emeritus
   Canadian and colonial legal history, law and religion, law and discrimination, the rule of law

R. Michael M’Gonigle, JSD (Yale)
   Eco Research Professor in Environmental Law and Policy. Environmental and resource management, political ecology and green legal theory, international environmental law, urban sustainability, community-based governance

Val Napoleon, PhD (UVic)
   Law Foundation Professor of Aboriginal Justice and Governance. Indigenous legal traditions, indigenous legal theory, indigenous feminism, citizenship, self-determination, and governance

Andrew Newcombe, LLM (Toronto)
   International investment law, international arbitration, international trade law, commercial law

Martha O’Brien, LLM (Université Libre de Bruxelles)
   Taxation, European Union law

Pooja Parmar, PhD (UBC)
   Legal pluralism, human rights law, indigenous rights, international law, legal history, property, law and development, intersections of law and colonialism, law & society, qualitative research methods, India, South Asia

Victor Ramraj, PhD (Toronto)
   Director, Graduate Program in Law (Spring) and Law Chair, Centre for Asia-Pacific Initiatives (CAPI). Comparative constitutional law, legal history of state and company, theoretical and practical implications of transnational law and legal pluralism, domestic constitutional law of transnational corporations and global regulation.

Supriya Routh, PhD (UVic)
   Labour and employment law, theoretical conceptualizations of work, workers’ organization initiatives, international labour law, atypical and informal workers and law in the global South, human rights and human development.

Chris Tollefson, LLM (Osgoode)
   Hakai Chair in Environmental Law and Sustainability. Environmental law and policy, environment and international trade, environmental/resource management and Aboriginal rights, forest law and policy, coastal zone management, clinical legal education

Jim Tully, PhD (Cambridge) - Professor Emeritus
   Distinguished Professor of Political Science, Law, Indigenous Governance, and Philosophy. Contemporary legal theory, history of legal theory, Canadian constitutional theory, Aboriginal rights

Jeremy Webber, LLM (Osgoode)
   Dean of Law. Law and society, cultural diversity, constitutional law and theory, Aboriginal rights
Degrees and Specializations Offered

The Faculty of Law offers programs of study leading to the degrees of Master of Laws in Law and Society and Doctor of Philosophy in Law and Society. The programs provide an opportunity for advanced research at the intersection of “Law and Society” and are rigorously interdisciplinary both in their coursework and research components. In many cases, students will be expected to have two supervisors, one from the Faculty of Law and one from another faculty.

Both programs require full-time registration. The program is especially appropriate for students interested in any of the following areas of concentration:

- Aboriginal Law and Indigenous Rights
- Constitutional Law
- Environmental Law and Policy
- Legal Theory, especially Feminist and Critical Legal Theory
- Legal History
- Market Regulation (for example, Employment and Labour Law, International Private and Public Law, and Commercial Law)

Students in other areas may also be admitted if supervisory resources exist. In each area of research, students are required to relate understanding of the law to another body or other bodies of knowledge and practice.

The course requirements for the program consist of:

   a) two core graduate seminars designed to introduce students to fundamental research questions and methodologies;
   b) a set of graduate courses that permit advanced studies in Law organized around students’ individual interests or special opportunities provided by visitors to the Faculty;
   c) graduate courses offered by our strong partner faculties; and
   d) upper-level Law undergraduate seminars across a wide range of subjects.

Full information on Law courses can be found on the Faculty’s website: <www.uvic.ca/law>.

In addition, seminars, colloquia, lectures, and conferences provide many special opportunities for collegiality among graduate students and between graduate students and faculty. These include the Victoria Colloquium on Political, Social, and Legal Theory which involves the interaction of theorists with international reputations and students from a variety of disciplines.

Facilities

Students in the Graduate Program in Law and Society have access to a well developed and serviced Priestley Law Library and the University’s McPherson Library, which has holdings in excess of 1.9 million volumes. The Faculty of Law also has close links with the Centre for Asia-Pacific Initiatives, the Institute for Dispute Resolution, and the Centre for Studies in Religion and Society.

Financial Support

Please see the Law Graduate Program website for more information.

http://www.uvic.ca/law/graduate/tuitionandfunding/index.php

Admission Requirements

The normal minimum for admission to the LLM degree program will be a Bachelor of Laws (LLB), Juris Doctor (JD) or equivalent civil law degree with an average of B+ (6.0 G.P.A.) in the final two years of that law degree program. The normal minimum for admission to the PhD degree will be an average of A- (7.0 G.P.A.) in graduate courses.

For international students whose first language is not English a TOEFL minimum score of 600 (paper based) or 100 (internet based) is required.

Admission to the Master’s Program

Applicants for the LLM program are required to submit a curriculum vitae and an LLM Statement of Intent (one page maximum) indicating areas of research interest. This will assist in the assessment of the application and ensure that the student’s areas of interest can be accommodated by the program.

Admission to the PhD Program

Applicants for the PhD program are required to submit a curriculum vitae and a full dissertation proposal (five-page maximum) for assessment in the admissions process, although this proposal may be revised during the student’s candidacy in the program. Also required is a sample of the applicant’s research writing, e.g. a completed segment of a master’s thesis or published article.

Deadlines

The application deadline for September entry is January 31. For applicants who hold any post-secondary documents from academic institutions outside of Canada, however, the deadline is January 7. Applications are reviewed by the Graduate Admissions and Records Office and then by the Law Graduate Studies Committee. The admission selection process is competitive. Not all students who meet the minimum requirements can be admitted.

Program Requirements

LLM Program

The LLM in Law and Society is primarily a thesis-based degree. There is a small coursework and major research paper component that requires additional coursework. Both options are rigorously interdisciplinary and require full-time registration in the program for a minimum of three terms (twelve months). Please note that,
in the admission process, preference is given to applications for the thesis LLM over the coursework LLM.

All students are required to enrol in the core Graduate Seminar in Law and Society (Law 501) and the Graduate Seminar in Applied Legal Methodology (Law 502). Students are also required to take at least one graduate course in a non-Law discipline germane to their research. The balance of their course requirements will be made up from Law graduate, non-Law graduate, and upper-level Law undergraduate courses (students will not, however, be permitted to take for graduate credit a course which they have already taken—either here or at another university—for undergraduate credit).

**LLM – Thesis Option**

**Course Requirements**

**Thesis Option**

Graduate Seminar in Law and Society (Law 501) ......................................................... 1.5
Graduate Seminar in Applied Legal Methodology (Law 502) ........................................... 1.5
Graduate (non-Law) seminar .......................................................... 1.5
Other (Law courses and/or other non-Law courses) .......................................................... 1.5
Thesis (Law 599) ........................................................................................................ 9.0

**Total: .................................................................................................................. 15.0**

**Other Requirements**

The minimum residency period for the LLM program is three terms (twelve consecutive months).

**Thesis**

Students’ theses will be supervised by one Law and one non-Law faculty member (subject to appropriate supervisory resources being available).

The length of the LLM thesis is generally 80–120 pages, excluding the Abstract, notes, bibliography, and appendices.

**Oral Examination**

There is no oral examination. The LLM thesis is evaluated by an external examiner.

**LLM - Coursework Option**

**Course Requirements**

**Coursework Option**

Graduate Seminar in Law and Society (Law 501) ......................................................... 1.5
Graduate Seminar in Applied Legal Methodology (Law 502) ........................................... 1.5
Graduate (non-Law) seminar .......................................................... 1.5
Other (Law courses and/or other non-Law courses, with no more than 3 units at the Undergraduate level) .......................................................... 4.5

**Total .................................................................................................................. 15.0**

**Other Requirements**

The minimum residency period for the LLM program is three terms (twelve consecutive months).

**Major Research Paper**

Students’ major research papers will be supervised by one Law and one non-Law Faculty member (subject to appropriate supervisory resources being available).

**PhD Program**

The PhD in Law and Society follows the general pattern at the University of Victoria. Students who do not already have an LLM (or equivalent) are initially admitted to the LLM. They may then apply to transfer to the PhD. If successful, they may elect to obtain the LLM before proceeding to the PhD or proceed directly to the PhD without obtaining the LLM. If they choose the latter, they will nevertheless be expected to complete the LLM coursework (at the thesis level) before proceeding to the doctoral dissertation.

Students who already possess an LLM may be admitted directly to the PhD. They are required to complete the two core Graduate Seminars and such other courses (if any) as the Director of Graduate Legal Studies determines, taking into account their academic preparation.

The PhD program requires a minimum of five terms (20 months) of full-time registration.

PhD students will be required to undergo a candidacy exam (essentially a structured defence of their research program and any completed segments of their dissertation) within two years of entering the PhD program. Students must be enrolled in LAW 693 (PhD Candidacy Examination) until they pass the Candidacy Examination and are then permitted to enroll in LAW 699 (PhD Dissertation). PhD students’ dissertations must meet the University’s standards for doctoral dissertations.

Students’ dissertations will be supervised by one Law and, frequently, one non-Law supervisor with a supervisory committee of three (the co-supervisors, if applicable, and one or two other faculty members).

**Course Requirements**

**With an LLM (or equivalent)**

Graduate Seminar in Law and Society (Law 501) ......................................................... 1.5
Graduate Seminar in Applied Legal Methodology (Law 502) ........................................... 1.5
2 courses (as determined by the Director of Graduate Legal Studies) (1.5 each) .................................................. 3.0
PhD Candidacy Examination (Law 693) .................................................. 3.0
Dissertation ........................................................................................................ 21.0*

**Total .................................................................................................................. 30.0**
Other Requirements
The minimum residency requirement for the PhD program is three terms (12 consecutive months).

Dissertation
The dissertation is expected to be of the highest possible calibre, potentially publishable, and should be 250–350 pages (excluding the Abstract, notes, bibliography, and appendices).

Oral Examination
The PhD dissertation must be defended in an oral examination.

Linguistics

GENERAL INFORMATION
Members of the Department of Linguistics teach and conduct research on topics in phonology, morphology and syntax; indigenous languages of North America and the Pacific Rim; applied linguistics; articulatory and acoustic phonetics; and sociolinguistics. Further information can be found on our website at: <web.uvic.ca/ling>.

Faculty Members and Areas of Research
John Archibald, PhD (Toronto)
    Second language acquisition; phonological acquisition; phonological theory
Sonya Bird, PhD (Arizona)
    Phonetics and phonology interface; Salish languages; Athabaskan languages
Ewa Czaykowska-Higgins, PhD (MIT)
    Theoretical phonology and morphology; Salish languages; language revitalization; Slavic languages
Alexandra D’Arcy, PhD (Toronto)
    Language variation and change; sociolinguistic theory; historical sociolinguistics; grammaticalization
Li-Shih Huang, PhD (Toronto)
    Applied linguistics; second language acquisition; English for academic purposes; language learning and use strategies; sociocultural theory
Peter Jacobs, PhD (UBC)
    Skwxwú7mesh language; Kwak’wala; Indigenous language revitalization; lexical aspect
Hua Lin, PhD (Victoria)
    Second language phonetics and phonology; phonology; Chinese linguistics
Martha McGinnis-Archibald, PhD (MIT)
    Syntactic theory; comparative linguistics; syntactic interfaces with morphology and semantics
Hossein Nassaji, PhD (Toronto)
    Applied linguistics; second language acquisition; discourse analysis; second language literacy
Leslie Saxon, PhD (California, San Diego)
    Syntax; morphology; comparative and historical linguistics; Athabaskan/Dene languages; language revitalization
Suzanne Urbanczyk, PhD (Massachusetts, Amherst)
   Theoretical morphology and phonology; Coast Salish languages; language revitalization

Emeritus
John H. Esling, PhD (Edinburgh), FRSC
   Articulatory and auditory phonetics; sociophonetics; second language acquisition
Thomas E. Hukari, PhD (Washington)
   Grammatical theory; syntax; morphology; Salish languages
Joseph F. Kess, PhD (Hawaii), FRSC
   Psycholinguistics; sociolinguistics; Asian and Pacific languages
Lorna Williams, PhD (Tennessee)
   First Nations ancestry; Indigenous education; languages, cultures, and traditions

Degrees and Specializations Offered
The Department of Linguistics offers programs of study and research leading to the degrees of Doctor of Philosophy and Master of Arts, especially as this applies to syntactic theory, morphological theory, phonological theory, experimental phonetics and sociolinguistics. The department has notable strengths in languages of the Pacific Rim and Indigenous languages of Western North America, including issues of language endangerment.

The department also offers a program of study and research leading to the degree of Master of Arts in Applied Linguistics in the areas of second language acquisition (SLA) and second language teaching methodologies.

Facilities
The department has an extensive phonetics laboratory as well as rooms with work stations for students and research assistants, and technical support for projects.

Financial Support
Linguistics students are eligible for University of Victoria Fellowships. In addition, the department offers several scholarships of varying amounts, as well as teaching and research assistantships. Both entering and continuing students in the program are automatically considered for scholarships. Students must apply for teaching and research assistantships.

Admission Requirements
General
Applicants whose native language is not English must consult the Faculty of Graduate Studies regulations concerning the Test of English as a Foreign Language (TOEFL) under "English Language Proficiency", page 30. The department requires minimum scores as follows for applicants for whom the test is required. For the MA in Applied Linguistics, the department requires 600 on the paper-based test or 100 on the internet-based test. Otherwise, the department requires 580 on the paper-based test or 92 on the internet-based test. For all programs, a minimum acceptable IELTS score is 7.0.

Although it is possible to enter the program at any entry point listed under "Entry Points", page 29, September entry is advised, as many of the courses listed for the Spring term have prerequisite courses given only in the Fall. Graduate courses are seldom offered in the Summer Session.

The admissions selection process is competitive. Not all students who meet the minimum requirements will be admitted. Typically, between eight and twelve students are admitted to the program each year.

Admission to the MA in Applied Linguistics
Admission to the program requires a bachelor’s degree, preferably in Linguistics or Applied Linguistics, or a bachelor’s degree with a Diploma in Applied Linguistics, or equivalent, with a minimum overall average of B+ (6.00 GPA) in the final year's work.

Admission to the MA Program
Admission to the program requires a bachelor’s degree, preferably in Linguistics, with a minimum overall average of B+ (6.0 GPA) in the final year’s work. Students without the necessary background in Linguistics may be considered for admission upon completion of LING 311 and/or LING 312 or equivalent with First Class standing.

Admission to the PhD Program
Applicants for admission to the PhD program will normally hold a master’s degree in Linguistics with an A- average (7.0 GPA) on master’s level course work. Applicants should submit one representative piece of written work, often the MA thesis or part of it. See also "Faculty Academic Regulations", page 47.

Deadlines
All domestic applications must be complete by January 15 for admission the following September. International applications must be complete by December 15, one month earlier. Applications submitted by these deadlines are considered for the Graduate Fellowships, which are awarded to incoming students each year by the University, and for other sources of funding within the department.

Program Requirements
Requirements Common to All Graduate Degrees in Linguistics
The programs of all graduate students in linguistics include course requirements, a language requirement, a requirement to present an aspect of their work at a conference or colloquium, the completion of a thesis or dissertation, and a final oral examination. In addition, all programs require that students make a major research paper/thesis/dissertation proposal to the supervisory
committee and in the case of a thesis or dissertation, present it to the University in its final form.

**MA in Applied Linguistics Program Requirements**

The department offers two 15-unit programs, one with thesis and the other without, leading to the MA in Applied Linguistics degree. The programs are designed to provide advanced graduate training in theories and research in the areas of second language acquisition (SLA) and the practice of second language teaching methodology.

Course Requirements in both the thesis and the project-based option include the following:

**Two core courses in applied linguistics (3.0):**
LING 574 and LING 575

**Two of three core courses in linguistics (3.0):**
Syntax (one of LING 503, 508)
Morphology (LING 504)
Phonology (one of LING 505, 510)

**Three units of electives in the thesis option and six in the project-based option, drawn from the following courses:**
LING 500, 509, 531, 570, 572, 573, 576, 577, 586, 592, 595, 596 and/or from the following not already selected: 503, 504, 505, 508, 510.

Project-based MA students may include 1.5 units from relevant courses in other departments determined in consultation with the student’s supervisor.

Project-based MA students complete LING 598 (3.0 units) Major Research Paper and thesis students complete LING 599 (6.0 units) MA Thesis.

**Language Requirement**

MA in Applied Linguistics students must satisfy the language requirement for PhD students (described below) for one language. For master’s students going on to the PhD at the University of Victoria, satisfaction of the master’s requirement will count towards the PhD requirement.

**Thesis**

Students will present and defend a thesis proposal. The thesis work in LING 599 is normally awarded 6.0 units of credit. Students must defend their thesis orally as part of program requirements.

**Program Length**

Students are expected to complete the program in two years.

**PhD Program**

**Course Requirements**

The PhD program requires at least 9 units of course work, plus the dissertation, for a total of 30 units. Courses on current issues in syntax and phonology, LING 601 and LING 602, (1.5 units each) are required; other courses are determined jointly by a student and the supervisor.

Students without the equivalents of LING 503 or LING 505 in their previous program will have these courses added to their requirements.

**Candidacy Exam (LING 693)**

The candidacy requirement must be satisfied within three years of registration in the doctoral program (see *Faculty Academic Regulations*, page 47). The candidacy examination consists of two substantial, original research papers, one in the area of phonological or syntactic theory, understood broadly, and the other in an area agreed to by the student and the supervisor.

**Language Requirement**

The departmental language requirement for PhD students is intended to prepare students for their research program by ensuring that they have the ability to read linguistic literature in, or have sound knowledge of, two languages other than English. Ideally, students must choose languages relevant for their research, in consultation with their supervisor, to satisfy this requirement.

The requirement for each language is considered satisfied when the student:

1. demonstrates reading proficiency in the language (assessed by a 2-page translation);
2. speaks the language natively;
3. has been educated in the language selected;
4. has an undergraduate major in the language;
5. has successfully completed a minimum of the equivalent of 4.5 units of university level courses in the language, with a least a second class (B-) average; or
6. has passed the equivalent of a 3-unit upper-division reading course in the language.

Other mechanisms for assessing the language requirements for special cases may be established. In such cases, however, the student is responsible for submitting a proposal to the Graduate Adviser prior to fulfilling the requirement. The graduate committee is then responsible for accepting or refusing the proposal, by considering the relevance of the language chosen to the student’s research and the pertinence (and practicality) of the evaluating process suggested.

**Dissertation**

After attaining candidacy, students will present and defend a dissertation proposal typically developed in LING 699. The dissertation is normally awarded 18 units of credit. Students must defend their dissertation orally as part of program requirements (see "Faculty Academic Regulations", page 47).

**Program Length**

Normally, students are expected to complete the program in three to five years.

**Co-operative Education**

Participation in the Co-operative Education program - which enables students to acquire knowledge, practical skills for employment, and workplace experience - is optional for Master’s and PhD students. Master’s students complete two work terms, and PhD students complete three (a work term consists of four months of full-time, paid employment), and students undertake study and work terms in alternating sessions. Interested students should contact the Humanities, Fine Arts, and Professional Writing Co-op office early in the term in which they are applying. Students are also referred to "General Regulations: Graduate Co-op" on page 56.

---

**Faculty Members and Areas of Research**

*Martial Agueh, PhD (Georgia Tech)*
Mass transport theory, partial differential equations, geometric inequalities, mathematical physics

*Christopher J. Bose, PhD (Toronto)*
Dynamical systems, ergodic theory

*Richard Brewster, PhD (Simon Fraser)*
Graph theory, discrete mathematics, theoretical computer science

*Ryan Budney, PhD (Cornell)*
Homotopy theory, knot theory

*Laura Cowen, PhD (Simon Fraser)*
Statistical ecology and capture-recapture models

*James Currie, PhD (Calgary)*
Combinatorics on words

*Florin N. Diacu, PhD (Heidelberg)*
Celestial mechanics, chaos, dynamical systems, mathematical physics, history and philosophy of mathematics

*Peter Dukes, PhD (Caltech)*
Combinatorics

*Roderick Edwards, PhD (Victoria)*
Ordinary differential equations, mathematical biology, neural and gene networks
Heath Emerson, PhD (Penn State)
   Operator algebras, index theory, hyperbolic groups

Jing Huang, PhD (Simon Fraser)
   Graph theory, algorithms and complexity

Slim Ibrahim, PhD (Tunis El-Manar)
   Applied mathematics, analysis of partial differential equations, fluid dynamics and geophysical flows

Reinhard Illner, PhD (Bonn)
   Mathematical physics, partial differential equations, applied mathematics

Boualem Khouider, PhD (Montréal)
   Numerical analysis, partial differential equations, climate modelling

Marcelo Laca, PhD (Calif, Berkeley)
   Operator algebras, noncommutative geometry

Mary L. Lesperance, PhD (Waterloo)
   Statistical inference, biostatistics, industrial statistics

Junling Ma, PhD (Princeton)
   Modelling

Gary MacGillivray, PhD (Simon Fraser)
   Graph theory, discrete mathematics, theoretical computer science, math education, mathematics in sports

Robert V. Moody, PhD (Toronto)
   Algebra

Christina Mynhardt, PhD (Rand)
   Graph theory

Farouk Nathoo, PhD (Simon Fraser)
   Neuroimaging statistics, bayesian methods; statistical computing, high-dimensional data, spatial statistics

Ortrud Oellermann, PhD (WMichigan)
   Graph theory

John Phillips, PhD (Oregon)
   Operator algebras, noncommutative geometry

Ian F. Putnam, PhD (Calif, Berkeley)
   Operator algebras, topological dynamics

Anthony N. Quas, PhD (Warwick)
   Ergodic theory and dynamical systems

William J. Reed, PhD (British Columbia)
   Stochastic modelling and statistics, especially in biology, economics and resource management

Jedrzej Sniatycki, PhD (Warsaw)
   Mathematical physics, differential geometry

Ahmed R. Sourour, PhD (Illinois)
   Functional analysis, operator theory, linear algebra

Hari M. Srivastava, PhD (Jodhpur)
   Special Functions

Mak Trifkovic, PhD (Harvard)
   Number theory, elliptic curves

Min Tsao, PhD (Simon Fraser)
   Statistics

Pauline van den Driessche, PhD (Wales)
   Mathematical models in biology, combinatorial matrix analysis

Zheng, Wu PhD (Western)
   Demography; Family; Immigration; Social Gerontology; Population Health; Sociology of Mental Health; Race and Ethnicity; Survey Methodology; Statistics

Jane (Juan-Juan) Ye, PhD (Dalhousie)
   Optimization and optimal control via nonsmooth analysis

Julie Zhou, PhD (Alberta)
   Statistics

**Degrees and Specializations Offered**

The Department of Mathematics and Statistics offers graduate programs leading to the degrees of Master of Arts, Master of Science and Doctor of Philosophy.

The department participates in graduate Co-operative Education, which integrates periods of full-time employment with the academic program. Approval to participate in graduate Co-op is at the discretion of the department. Work opportunities are negotiated through the Mathematics and Computer Science Co-operative Education co-coordinator.

All graduate students are governed by the departmental regulations in force at the time of the student’s initial graduate registration. Students are responsible for becoming familiar with other regulations of the University and by the Faculty of Graduate Studies regulations as outlined in the Calendar.

The Department of Mathematics and Statistics emphasizes the following areas (in alphabetical order):

- Applied Mathematics, Mathematical Physics, Differential Equations
- Climate Modelling, Geophysical Fluid Dynamics, Mathematical Biology
- Combinatorics and Graph Theory
- Number Theory
• Operator Algebras, Operator Theory, Functional Analysis, Dynamical Systems, Topology
• Statistics

The Department also offers opportunities to study Mathematics Education, possibly as an interdisciplinary program.

Facilities

Located in the David Turpin building, the Department of Mathematics and Statistics offers graduate students shared office space with every student allocated their own desk. Students have access to the department’s computing facility, which includes workstations with a wide array of mathematics and statistics related software, and the McPherson Library houses a vast collection of reference material, mathematical and otherwise. Each and every student gets an account on the departmental computer system and access to the department printers and FAX machine, a PIN for the photocopier, and a mailbox with full mail privileges.

Financial Support

Every graduate student admitted to the department is considered for University and department fellowships. Financial assistance is also available from the following sources:

Natural Sciences and Engineering Research Council of Canada Postgraduate Fellowships
These are available to Canadian Citizens or Permanent Residents only.

Details can be found on NSERC’s website: <www.nserc.ca>. Students can apply through the University in September (or directly to NSERC by December) of the year preceding the tenure of the fellowship.

University of Victoria Fellowships

Their value is up to a maximum of $15,000 per annum (master’s) or $18,000 per annum (PhD). Students applying for admission can also apply for a fellowship on the last page of the admission application; continuing students can obtain details from the graduate adviser.

A grade point average of at least 7.0 (A-) is necessary.

Department Fellowships

Individual faculty may support graduate students from their own research grants.

Teaching Assistant Positions

Depending on budgetary considerations, there may be a limited number of marking and/or instructing positions available. These positions may not be available on a continuing basis and therefore should not be counted upon for long-term support. The number of hours and the amount of pay are regulated by the CUPE 4163 Components I and II Collective Agreement.

ADMISSION REQUIREMENTS

General

Students are normally admitted in September or January. Summer session courses are not generally offered.

Foreign applicants are strongly encouraged to submit the scores of the Graduate Record Examination General Test (GRE) and its Subject Test in Mathematics.

Admission To Master’s Programs

Students admitted to a master’s program (MSc or MA) will normally have a bachelor’s degree in Mathematics or Statistics. A student without the necessary background may be considered for a pre-entry program as outlined in the section “Upgrading for Admission to Graduate Studies”, page 32 or “1. Enhanced Program” on page 32.

For a master’s program, students whose first language is not English must achieve a score on the Test of English as a Foreign Language (TOEFL) of at least 575 on the paper-based test or an overall score of 90 on the Internet Based test, with the following minimum section requirements: Listening 20; Speaking 20; Reading 20; Writing 20.

Admission to the PhD Program

Admission into the PhD program will normally require a master’s degree in Mathematics or Statistics and excellent research potential, documented by the quality of the master’s thesis or letters of recommendation. In exceptional cases, students showing outstanding promise may be permitted to enrol directly in the PhD program with only a Bachelor’s degree.

All PhD students are admitted to the Faculty of Graduate Studies as provisional candidates until they have passed their candidacy examinations, at which time they are automatically classified as candidates for Doctor of Philosophy.

For a PhD program, students whose first language is not English must achieve a score on the Test of English as a Foreign Language (TOEFL) of at least 575 on the paper-based test, 233 on the computer-based test or an overall score of 90 on the Internet Based test, with the following minimum section requirements: Listening 20; Speaking 20; Reading 20; Writing 20.

Application Deadlines

North American Applicants:
• September Entry: May 31
• January Entry: October 31

International Applicants:
• September Entry: December 15
• January Entry: April 15

Applicants wishing to be considered for funding must apply at earlier dates:
North American Applicants:
- September Entry: February 15
- January Entry: February 15

International Applicants:
- September Entry: December 15
- January Entry: December 15 (13 months ahead)

Program Requirements

Master’s Program in Mathematics

Course Requirements
Each master’s student must complete a minimum of 15 units, with the following requirements:
- MATH 585 (Graduate Seminar) ................................. 1.5
- MATH 599 (Thesis) ................................................... 6.0
- MATH or STAT courses at 500 level ......................... 4.5
- MATH or STAT courses at 400 level or above ............ 3.0

The Department of Mathematics and Statistics may accept appropriate courses from other departments for credit towards a master’s degree in Mathematics. Such courses should be selected in consultation with the student’s supervisory committee.

Thesis
Thesis (6 units) must be defended in a final oral examination.

Other Requirements
Each master’s student is under the direction of a Supervisory Committee of at least two members, including the student’s academic supervisor, who also acts as chairperson of the committee.

Oral Examination
The Examining Committee examines the thesis and conducts a final oral examination of the candidate on the thesis. This oral examination is chaired by the Dean of Graduate Studies or the Dean’s nominee.

Program Length
One to two years (generally two years); a minimum of five full fee installments is required.

Master’s Program in Statistics – Thesis Option

Course Requirements
Each master’s student must complete a minimum of 15 units, with the following requirements:
- MATH 585 (Graduate Seminar) ................................. 1.5
- STAT 599 (Thesis) ................................................... 6.0
- MATH or STAT courses at 500 level ......................... 4.5
- MATH or STAT courses at 400 level or above ............ 3.0

The Department of Mathematics and Statistics may accept appropriate courses from other departments for credit towards a master’s degree in Statistics. Such courses should be selected in consultation with the student’s supervisory committee.

Thesis
Thesis (6 units) must be defended in a final oral examination.

Other Requirements
Each master’s student is under the direction of a Supervisory Committee chaired by the student’s academic supervisor and having at least one other member.

Oral Examination
The Examining Committee examines the project and conducts a final oral examination of the candidate on the project.

Program Length
One to two years (generally two years); a minimum of five full fee installments is required.

Course Requirements
Each master’s student must complete a minimum of 15 units, with the following requirements:
- MATH 585 (Graduate Seminar) ................................. 1.5
- STAT 598 (Project) ................................................. 3.0
- MATH or STAT courses at 500 level ......................... 7.5
- MATH or STAT courses at 400 level or above ............ 3.0

The Department of Mathematics and Statistics may accept appropriate courses from other departments for credit towards a master’s degree in Statistics. Such courses should be selected in consultation with the student’s supervisory committee.

Final Project
Final project (3 units) must be defended in a final oral examination.

Other Requirements
Each master’s student is under the direction of a Supervisory Committee chaired by the student’s academic supervisor and having at least one other member.

Oral Examination
The Examining Committee examines the project and conducts a final oral examination of the candidate on the project.

Program Length
One to two years (generally two years); a minimum of five full fee installments is required.
PhD Program

Course Requirements

Students admitted into the PhD program are required to complete a minimum of four graduate courses, at most one of which may be a seminar course, totaling 6 units, and one of MATH 693 or STAT 693 (Candidacy Examination) worth 3 units. Students entering the program without a master’s degree must complete a minimum of eight graduate courses, at most one of which may be a seminar course, and one of MATH 693 or STAT 693 (Candidacy Examination) worth 3 units. MATH 693 is a co-requisite for MATH 699, and STAT 693 is a co-requisite for STAT 699.

Candidacy

Within the first two years of study, all students are required to pass a multi-part candidacy examination. The format of this examination is decided in the first eight months, in consultation with the supervisory committee and graduate adviser. Students must register for one of MATH 693 or STAT 693 (Candidacy Examination) in the first term in which they are preparing or sitting the candidacy examination, and must remain registered in this course continuously until they have passed, or until they leave the program.

Other Requirements

A PhD student’s Supervisory Committee may require the student to demonstrate a reading knowledge of one foreign language (French, German or Russian). For each PhD student there shall be a Supervisory Committee of at least three members, chaired by the student’s academic supervisor, with at least one committee member from outside the Department of Mathematics and Statistics. The committee members must be approved by the Dean of Graduate Studies and are normally members of the Faculty of Graduate Studies.

Dissertation

A dissertation of original, publishable research, normally worth 21 units (30 units for students without a master’s degree) is required. Students must register for MATH 699 or STAT 699 while they are working on their dissertations. All registrations in MATH/STAT 699 must be accompanied by registration in MATH/STAT 693 until MATH/STAT 693 has been passed.

Oral Examination

The Examining Committee examines the dissertation and conducts a final oral examination of the candidate on the dissertation. This oral examination is chaired by the Dean of Graduate Studies or the Dean’s nominee.

Program Length

Three to four years.

Co-operative Education

The department participates in graduate Co-operative Education, which integrates periods of full-time employment with the academic program. For program details please refer to the "Co-operative Education" Program entry for the Department of Computer Science, page 5.

Mechanical Engineering

General Information

The Department of Mechanical Engineering offers graduate programs leading to the degrees of Master of Engineering (MEng), Master of Applied Science (MASc) and Doctor of Philosophy (PhD). Research areas include advanced materials and manufacturing, computational and continuum mechanics, computer aided design and manufacturing, integrated energy systems, optics, robotics, mechanisms and mechatronics, thermofluids and transport phenomena.

Further information about the Department of Mechanical Engineering, Adjunct and Limited Term faculty and their research interests can be found on the department’s web page at <www.uvic.ca/engineering/mechanical>.

All students should note that they are responsible for making themselves familiar with the general Calendar regulations of the Faculty of Graduate Studies. If unsure about any aspect of the Faculty regulations, students should contact the Graduate Admissions and Records Office. Students are also responsible for ensuring the completeness and accuracy of their registration.

Degrees and Specializations Offered
MEng, MASc and PhD in Mechanical Engineering.

Facilities
The department of Mechanical Engineering together with the associated Institute for Integrated Energy Systems (IESVic) and the Centre for Advanced Materials Technology (CAMTEC) has excellent research facilities. These include extensive computational hardware and a wide range of computer modeling, analysis and simulation tools, advanced manufacturing facilities with nano, micro and full-size multi-axis CNC machine tools, comprehensive robotics and vision technology equipment, versatile material testing machine, crystal growth and characterization facilities, world’s best Scanning Transmission Electron Holography Microscope, variety of biomedical research facilities, ocean energy and engineering research facilities, water channel with laser Doppler velocimetry, cryofuels laboratory, adaptive optics laboratory, fuel cell systems laboratory, and Green Vehicle Research Testing and Training Centre.

Financial Support
Normally MASc and PhD students are provided with financial support from faculty research funds for the first year. Subject to satisfactory performance and the availability of funding, financial support may be renewed. Graduate support can also be provided through various sources such as teaching assistantships, University of Victoria Fellowships and NSERC Postgraduate Scholarships (PGS). Refer to the Faculty of Graduate Studies website at <www.uvic.ca/graduatestudies/finances> for additional funding information. All eligible students are encouraged to apply for funding from provincial, federal and external sources.

Admission Requirements

General
Applicants for admission whose first language is not English must meet the English Competency Requirement as specified by the Faculty of Graduate Studies. The minimum acceptable TOEFL (Test of English as a Foreign Language) score for the Department of Mechanical Engineering is 575 on the paper-based test or 90 on the Internet-based test (the minimum score for each section is Writing: 20; Speaking: 20; Reading: 20; Listening: 20). A minimum acceptable IELTS score is 6.5. Even with passing TOEFL/IELTS scores, students may be required to take English language courses in addition to their other course work.

The admissions selection process is competitive. Not all students who meet the minimum requirements will be admitted. Typically, between 14 and 20 students are admitted to the program each year.

Online applications may be submitted by following the links from <www.uvic.ca/graduatestudies/admissions>. If an applicant is unable to successfully submit an application online, they should contact the Graduate Admissions and Records Office. The Graduate Admissions and Records Office is the official depository for all applicant documentation.

Additional information about graduate studies in the Department of Mechanical Engineering is available at: <www.uvic.ca/engineering/mechanical>.

Admission To Master’s Programs
Applicants will normally hold an undergraduate degree in Mechanical Engineering. The minimum requirement for admission to the MEng is B and for the MASc is B (grade point average of 5.0 on the University of Victoria scale of 9.0) for the last two years of university work.

Admission To the PhD Program
The minimum requirement for admission to the doctoral program is a master’s degree in science or engineering. In exceptional cases, a student registered for a master’s degree in the Department of Mechanical Engineering may be allowed to transfer to the doctoral program without completing the master’s program.

Deadlines
Entry points to the department are September, January and May. International applications received after the University’s deadlines may be accepted by the department, but it may not be possible to process them in time for the desired entry point or to obtain a student visa.

Program Requirements
The supervisory committee, in consultation with the student, determines the program of study for each student. The supervisory committee may decide that additional course work is required. The program may also include senior undergraduate courses after assessment of the background strengths and deficiencies of the student.

Master of Engineering – Project-based Option
The MEng program is designed to provide students with an opportunity to strengthen and extend the knowledge they have gained at the undergraduate level. All MEng students will be under the supervision of a member of the department’s graduate faculty.

Course Requirements
The program consists of a minimum of 16.0 units, normally with not less than 12 units of graduate course work, a 1.0 unit seminar and a MEng Project Report (MECH 598).

Required course work is subject to the approval of the department.

Other Requirements
The program of study is determined by the supervisory committee in consultation with the student.
The program allows for a maximum of two Directed Studies courses (MECH 590), of which only one may be directly related to the work project, and two 400-level undergraduate courses.

All MEng students are required to register in the seminar (MECH 594), normally until program completion. The seminar has a unit value of 1.0. Students must attend a minimum of 6 of the seminars per term, for a total of 36 seminars over 2 years.

**Final Project**
The project (MECH 598) for the MEng program is normally not greater than 3.0 units. The topic of the project is subject to the approval of the department.

The work leading to the project must be performed under the direction of an academic supervisor who is a member of the department’s graduate faculty. A detailed description of the project will be presented in a formal report written by the student.

Each student’s program is subject to the approval of the department.

**Oral Examination**
MEng students will be required to defend their completed project in a final oral examination which is open to the public.

**Program Length**
The program length for MEng is guided by time limits established by the Faculty of Graduate Studies. Typically, the Department of Mechanical Engineering MEng students are expected to complete program requirements within 24 months.

**Master of Applied Science – Thesis Option**
The work leading to the degree of MASc provides an opportunity for the student to pursue advanced studies and to carry out research or undertake creative design in a field of mechanical engineering under the supervision of a member of the department’s graduate faculty.

**Course Requirements**
The program consists of a minimum of 18.0 units, normally with not less than 7.5 units of graduate course work, a 1.5 unit seminar, and a thesis (MECH 599).

Required course work is subject to the approval of the department.

**Other Requirements**
The program of study is determined by the supervisory committee in consultation with the student. The supervisory committee may decide that additional course work is required.

The program allows for a maximum of one Directed Studies courses (MECH 590), not directly related to the thesis topic, and one 400-level undergraduate courses.

All MASc students are required to give a seminar (MECH 595) on their thesis research during the second year of the program. Normally, students will register in MECH 595 until program completion. The seminar has a unit value of 1.5. Students must attend a minimum of 6 of the seminars per term, for a total of 36 seminars over 2 years.

**Thesis**
The thesis (MECH 599) for the MASc program is typically equivalent to 9 units. The topic of the thesis is subject to the approval of the department.

**Oral Examination**
MASc students will be required to defend their completed thesis in a final oral examination which is open to the public.

**Program Length**
The program length is determined by the Faculty of Graduate Studies. Typically, the Department of Mechanical Engineering MASc students are expected to complete program requirements within 24 months. Normally, financial support will not be continued beyond this time limit.

**Doctor of Philosophy**
The objective of the PhD program is the accomplishment of independent and original research work leading to significant advancement of knowledge in the field of mechanical engineering. All PhD students will be under the supervision of a member of the department’s graduate faculty.

**Course Requirements**
The program for a student with a master’s degree is a minimum of 37.5 units, normally with not less than 6.0 units of approved course work, a 1.5 unit seminar, a 3.0 unit candidacy examination, and a dissertation (MECH 699). The approved course work must include MECH 601 (1.5 units) which must be taken before the candidacy exam.

A student transferring from a master’s program to the doctoral program is required to complete a program of at least 49.5 units. This program includes a minimum of 18 units of approved courses, (including MECH 601), a 1.5 unit seminar, a 3.0 unit candidacy examination, and a dissertation (MECH 699). For those students transferring from a master’s program, credit will normally be given for courses already completed.

Required course work is subject to the approval of the department.

**Comprehensive Exams**
Department of Mechanical Engineering does not normally require comprehensive examinations.

**Candidacy**
Within 18 months of registration and successful completion of MECH 601, a PhD student must submit a written dissertation research proposal, defining the research topic, the goals of the research and the methodology to be used. The PhD student is required to pass an oral candidacy exam before their supervisory committee. The PhD student must register in MECH 693 (3.0 units) from the beginning of the PhD program until the candidacy
examination is successfully completed. MECH 693 is a prerequisite for MECH 699. During the candidacy examination, the supervisory committee will question the candidate to determine whether the candidate has the appropriate background knowledge and skills to undertake the proposed dissertation project, and whether the project is likely to lead to results suitable for a PhD dissertation.

Other Requirements
The program of study including all course selections is determined by the supervisory committee in consultation with the student. The supervisory committee may decide that additional course work is required.

The program allows for a maximum of one Directed Studies course (MECH 590) and one 400-level undergraduate course.

All PhD students are required to give two seminars (MECH 695) on their thesis research within 16 months and 34 months of registration. Normally, students will register in MECH 695 until program completion. The seminars have a total unit value of 1.5. Students must attend a minimum of 6 of the seminars per term, for a total of 54 seminars over 3 years.

Dissertation
The dissertation (MECH 699) for the PhD program is typically equivalent to 27 units. The topic of the dissertation is subject to the approval of the department.

Oral Examination
PhD candidates will be required to defend their completed dissertation in a final oral examination which is open to the public.

Program Length
The program length is determined by the Faculty of Graduate Studies. Typically, the Department of Mechanical Engineering PhD students are expected to complete program requirements within 36 months. Normally, financial support will not be continued beyond this time limit.

Co-operative Education
Participation in the Co-operative Education program, which enables students to acquire knowledge, practical skills and workplace experience, is optional for full-time Master's students.

A PhD student may participate in the co-operative graduate program under exceptional circumstances when it is quite evident that the industrial work periods form an essential and integral part of a student’s dissertation project. A PhD student’s work term employer must agree to the publication of the student’s research findings in the open literature.

Graduation with a co-operative education designation requires master’s students to complete two work terms and PhD students to complete three (a work term consists of four months of full time, paid employment).

Students require permission from their academic supervisor and the Co-op coordinator to participate in the Co-op program.

Permission may be granted for additional work terms typically to a maximum of four. Interested students should contact the Engineering and Computer Science/Math Co-op office during their first year. Students should also consult "Co-operative Education" on page 55.

As an integral part of the graduate program, students are normally required to undertake teaching or research assistantships within the department.

School of Music

Patrick Boyle, DMA (Toronto)
   Jazz Studies
Benjamin Butterfield, Lic. Music (McGill)
   Voice
Degrees and Specializations Offered

The School of Music of the University of Victoria offers programs leading to the degrees of Master of Music in Performance, in Composition and in Music Technology, Master of Arts in Musicology and in Musicology (with Performance), and Doctor of Philosophy in Musicology.

Facilities

The School of Music is housed in its own building, completed in 1978. It contains 40 practice rooms plus larger rehearsal rooms and teaching studios furnished exclusively with Steinway pianos. It also contains the Phillip T. Young Recital Hall with superb acoustics, where all solo and chamber music performances are held. The School's large ensembles (Orchestra, Chorus, Wind Symphony) rehearse in the 1300-seat Farquhar Auditorium at the University Centre. Both halls have fully professional digital recording facilities. Students are encouraged to participate in School of Music performance groups, such as the University Chorus, Chamber Singers, Sonic Lab, Orchestra, Wind Symphony, and chamber ensembles. String chamber ensembles are coached by members of the Lafayette String Quartet, in residence at the School of Music.

The McPherson Library has one of the major music collections in Canada. It covers a broad spectrum of areas, from the medieval period to the twentieth century, including world music and jazz. Currently there are over 70,000 volumes of scores and books and over 300 serial subscriptions, both electronic and in print. There are also over 40,000 sound recordings in the collection, spanning the recording age from 78's to compact discs. Special areas of interest include Beethoven (books, scores, facsimiles), British music, and twentieth-century American music, with a large collection of jazz on 78's.
In 2008 the music and audio collection moved into the new Bessie Brooks Winspear Media Commons. This centre houses the media collections (compact discs, microforms and videos), the music reference collection, and scores. This facility also includes state-of-the-art listening and media production rooms, as well as areas for study and research.

Three digital music studios are housed in the School of Music building, providing state-of-the-art workspaces for students and faculty to investigate, create, and study music and music technology. The three studios have been designed to integrate completely, allowing projects to move from studio to studio depending upon the specific needs of the project.

The main Recording Studio is attached to the Phillip T. Young Recital Hall. It provides archival, audition, and production recording services for students, faculty, and the community. Twenty-eight microphone lines are available between the stage and recording booth. A Yamaha 01V96kHz console, Apogee “Big Ben” master clock, Millenia Media microphone pre-amps, a Digidesign 002 and Tascam DVRA-1000 are used for recording. Monitoring is provided by Dynaudio speakers and Bryston power amplification.

Studio Two is a post-production and editing suite that also houses the School’s remote recording unit. Two editing systems, Merging Technologies Pyramix and Digidesign Pro-Tools, allow for maximum flexibility and integration with the other studios.

The Computer Music Studio has extensive facilities for digital audio exploration and creation, providing both the latest in software and computer-based digital resources and rare and iconic musical instruments and controllers. A Buchla series 200 analog synthesizer, Korg Wave-drum, and a permanently installed Max Matthews Radio Drum controller form the basic collection that is continually being added to. Pro Tools, Max/MSP, Ableton Live, Kontakt, Sibelius, and other music software are installed on the main computer, a 24" G5 iMac. At the centre of the Studio is a Yamaha 01V96kHz, with monitoring provided by Mackie HR824 self-powered speakers.

In addition to the studios within the School, the Laboratory for Extended Media (LEM), which is open to all students enrolled in Fine Arts courses, provides audio-processing resources, digital video and image processing facilities.

Financial Support

The University of Victoria offers a limited number of Graduate Fellowships of up to $10,000 or $12,000 for 12 months (for Master’s and PhD students of high academic standing, respectively). Teaching Assistantships of $2,000-$6,000 are available to full-time students in exchange for help with aspects of the academic curriculum in the School, such as keyboard harmony labs, chamber music coaching, recording, directing the listening tutorials of the introductory music history courses, or otherwise assisting with music history and theory courses.

Admission Requirements

General

The School of Music gives priority in admissions considerations to students intending to register on a full-time basis.

Applicants to the master’s programs must hold a BMus or BA in music from a recognized university, with at least a B+ or 6.0 average in the work performed in the last two years (or last 30 units) of undergraduate study.

All applicants should submit a one to two-page statement outlining their background, their goals as a musician and/or scholar, and their reasons for wishing to pursue their graduate degree at the University of Victoria.

Admission To Master’s Programs

MA in Musicology

In addition to the standard admission forms, applicants to the Musicology programs should submit two examples of their work in the field of music history, including an honours paper or senior thesis if available, as well as a personal statement of research interests and professional goals that must demonstrate the suitability of our program to those goals.

All Musicology students are required to demonstrate a good reading knowledge of German or French. Reading knowledge of an alternate foreign language may be substituted if necessary to the candidate’s intended field of specialization. The applicant’s present level of ability in this language should be indicated in the admission statement. Those who do not submit such evidence will be required to pass language examinations before work on the thesis begins.

MA in Musicology (with Performance)

This program is intended for Musicology students who are proficient performers and who wish to continue serious study of their instrument while pursuing musicological research. Applicants for this program are required to submit two written examples of their work in the field of music history as well as the additional statement as described under the MA in Musicology, and either arrange for an audition or submit a tape as described under the admissions process for the MMus in Performance.

The language requirements are identical to those for the MA in Musicology.

MMus in Composition

Applicants for admission to the MMus in Composition program should submit, in addition to the regular admission forms, copies of scores and CDs or DVDs of their recent work in composition.

MMus in Performance

Acceptance to the MMus in Performance requires specialization at an advanced level in a specific performance medium (e.g., violin, piano, voice). Applicants are encouraged to audition in person. The audition repertoire should reflect a level of difficulty and variety appropriate for a graduate program, and be of at least
thirty minutes in duration. Interested students are strongly encouraged to contact the School of Music Graduate Adviser or individual instructor by January 15 to discuss appropriate audition repertoire and to book an audition.

If live audition is not possible, applicants may submit a high-quality, unedited CD recording of at least thirty minutes duration, with repertoire selected as specified for live audition; in addition, these applicants are also encouraged to send a video-tape or DVD as well. Please note however that some instructors may require live audition for acceptance to their class; for additional information please contact the instructor or the Graduate Adviser. Internal candidates may either audition in person or use their BMus graduating recital as their audition, provided that the recital takes place before March 1.

MMUS in Performance — Emphasis in String Quartet
The School of Music offers an opportunity for outstanding string quartets to pursue graduate studies together within a two-year residency program. Members of the Lafayette String Quartet, Artists-in-Residence at the University of Victoria, will mentor students in the program. A quartet wishing to audition for the program should arrange for an audition through the Graduate Adviser or members of the Lafayette String Quartet. Each of the students comprising the quartet would audition both separately and as a quartet.

MMus in Music Technology
All applicants for admission to the MMus in Music Technology will be required to provide, in addition to the regular admission forms, a full curriculum vitae describing former studies and relevant work experience. Additionally, applicants are asked to provide examples of work that illustrate their preparedness for a graduate program in Music Technology.

Admission to the PhD Program
Applicants to the PhD Program in Musicology must hold the master's degree in musicology, music history or music theory, or its equivalent, from a recognized university. They must also demonstrate potential for a career in musicology or music scholarship, and have a primary research interest compatible with the areas of specialization of the university’s regular faculty.

A good reading knowledge of German, and French or Italian, is required of all applicants to this program. In addition, a reading knowledge of another foreign language may be required, if necessary to the candidate’s intended field of specialization. Applicants should submit documentation of their ability in these languages with their applications (e.g., an official memo stating that language examinations were successfully completed). Those who do not submit such evidence will be required to pass language examinations before work on the dissertation prospectus begins.

Applicants are requested to submit two examples of written work, including the master’s thesis or the equivalent if available, as well as a personal statement of research interests and professional goals that must demonstrate the suitability of our program to those goals.

Deadlines
Applications with supporting materials should be received by January 15 for domestic applicants or by December 15 for international applicants. Later applications will be considered if space is available; however, this is highly unlikely for applications received after March 15. Those applying after February 15 cannot be considered for a University fellowship.

Program Requirements
Students admitted to a Master’s program, and holding a Bachelor’s degree from a university other than the University of Victoria, will be required to write a theory placement examination, involving the analysis of compositions from various style periods. The examination will be administered early in September, before classes begin. While the results of the examination will not affect the student’s admission into the program, they will determine whether the student must take undergraduate theory courses. Theory courses numbered below 300 cannot be counted toward the course requirements of a Master’s degree.

The student’s work is guided by the Supervisory Committee (see the Faculty of Graduate Studies Guidelines). The supervisor chairs the committee. For Composition or Performance candidates, the supervisor is the student’s major teacher; for candidates in Musicology, the academic supervisor is the person responsible for the guidance of the thesis or dissertation. The function of the supervisory committee is to assist the graduate student in all facets of the program whenever necessary; to supervise the preparation of the thesis or dissertation, composition or recital; to act as the core for the examining committee; and, generally, to supervise the student’s progress in the program.

Transfer credits for courses taken at other universities will be accepted only in exceptional circumstances. Transfer students should note that the Faculty of Graduate Studies will require them to pay the same number of fee installments for the degree as other students. A student registered in the master’s program may take up to 3.0 units of undergraduate courses at the 300 level or above; undergraduate credits must be approved by the academic supervisor and relevant to the student’s program of study.

The Graduate Adviser administers the graduate program and is the faculty member responsible to the School of Music Director for the administration of graduate studies in the School of Music.

In addition to the requirements listed below, graduate students are encouraged to take an active part in the performing groups and musical life of the University, and to participate in the Graduate Colloquium.

MA in Musicology – Thesis Option
The MA in Musicology is an integrated program involving music criticism, analysis, and applied theory as well as cultural and
proposed field topics for the comprehensive examinations, a writing portfolio containing two samples of graduate work, By May 15 of the first year of study, candidates will submit a be completed by Sept. 15 of the second year in the program. The language exam should be taken during the spring semester of the student’s first year. The thesis proposal is completed in the context of MUS 534 (Advanced Research Forum in Musicology). The selected topics are expected to represent a variety of historical periods and genres or issues that have not been addressed in his/her coursework and research experience.

Preparation for the Oral Comprehensives involves critical reading, listening and repertoire building, and evaluation of current research in each area; the student is expected to:

1. prepare a select formal bibliography of the most important "classic" and recent scholarship on each topic: this bibliography represents the student’s reading list for each area
2. prepare a repertoire list consisting of a select representative sampling of musical literature related to each area, including (where relevant) editions consulted and/or performances selected: this list represents the student’s required listening for each area
3. write a 2-3-page summary of the present state of research in each area
4. submit this material to the student’s academic supervisor one month before the scheduled Oral Comprehensive Examination.

On the basis of the above, the musicology faculty will prepare a question related to each topic, which will be presented to the student two weeks before the oral examination. The Oral Comprehensive Examination will be adjudicated by the members of the musicology faculty, with the student’s academic supervisor as chair, and will normally last about 60 minutes. The student will be requested to speak on the three pre-selected questions for about 30 minutes. The remaining time will be devoted to discussion of issues elicited by the research summaries, as well as additional questions related to them. The thesis proposal will also be formally presented to the supervisory committee in the course of the meeting. Unsuccessful exams may be repeated, once, no later than three months after the first test.

**Four Musicology Seminars (6.0 units) to be selected from any of the following:**

- Topics in Musicology Before 1750 (MUS 530) ........................................ 1.5
- Topics in Musicology After 1750 (MUS 531) ........................................ 1.5
- Comparative Topics in Musicology (MUS 532) ...................................... 1.5

and a minimum of 3.0 units of electives, chosen in conjunction with the academic supervisor from the following*:

- MUS 500, 501, 502, 504, 506, 507, 530, 531, 532, 561, 580, 581, 590 (or approved undergraduate credit) ........................................ 3.0
- Total: ........................................................................................................... 18.0

* Student may also select courses in other disciplines appropriate to the student’s research interests. Students are encouraged to select these electives to create a secondary area of concentration in music theory, performance, composition, ethnomusicology, or an area outside music relevant to their thesis work.

**Thesis**

A substantial thesis is required of all students in the MA in Musicology (MUS 599, MA Thesis), followed by an oral examination. The thesis proposal is completed in the context of MUS 534 (Advanced Research Forum in Musicology).

**Other Requirements**

These include the language requirement, the first-year review, and the oral comprehensive examination. In addition, students are expected to participate in Musicological Explorations, the graduate student journal in musicology and theory.

**Language Requirement**

Candidates are required to pass an exam in German, or another foreign language relevant to their intended field of specialization. Courses taken to prepare for this requirement are remedial. Students should discuss the administration and scheduling of this exam with their academic supervisor. The language exam should be completed by Sept. 15 of the second year in the program.

**First-year Review**

By May 15 of the first year of study, candidates will submit a writing portfolio containing two samples of graduate work, proposed field topics for the comprehensive examinations, a
MA in Musicology (with Performance) – Thesis Option

This program is intended for musicology students who are proficient performers and who wish to continue serious study of their instrument. The program is modeled on the MA in Musicology, but reduces the seminar requirement in order to accommodate performance activities.

Students who already hold the MMus in Performance or the MA in Musicology are not eligible for this degree.

Course Requirements

Individual Tuition, taken each year
(MUS 540) .............................................................. 1.0

Bibliography (MUS 503) ................................................. 1.5

Graduate Forum in Musicology
(MUS 533) .................................................................... 1.5

Selected Problems in Theory and Analysis (MUS 500) ................................. 1.5

OR an additional 1.5 units of MUS 530, 531, or 532 .................................. 1.5

Performance Practices (MUS 504) .................................... 1.5

*Ensembles, taken each year (MUS 580) .................................... 1.0

OR

*Chamber Music, taken each year (MUS 581) ..................... 1.0

Lecture-Recital (MUS 596) ................................................ 1.5

Advanced Research Forum in Musicology (MUS 534) ............. 1.5

Thesis (MUS 599) .......................................................... 3.0

1.5 units of the following:

Topics in Musicology Before 1750 (MUS 530) ..................... 1.5
Topics in Musicology After 1750 (MUS 531) ......................... 1.5
Comparative Topics in Musicology (MUS 532) ...................... 1.5

and a minimum of 1.5 units of electives selected from the following:

MUS 500, 501, 502, 506, 507, 530, 531, 532, 561, 562A, 590 (or approved undergraduate credit) ................................................ 1.5

Total: .................................................................................. 19.0

*Depending upon the student’s instrument and upon the needs of the School, the student will be assigned to either MUS 580 or 581 in any given year.

Other Requirements

The Language Requirement, First-Year Review, Oral Comprehensive Examination, and Thesis requirements are identical to those of the M.A. in Musicology (see above).

Additional requirements are:

• First-year Jury: A jury examination in performance must be taken in April of the first year of study. Results will be considered in First-Year Review.

• Lecture-Recital (MUS 596): Students are required to give a lecture-recital, which usually forms a basis for the written thesis and for the oral defense.

Program Length

All master’s programs require a minimum attendance of five terms, including two Winter Sessions, and at least 18 (or 19) units of course credit. All requirements must be completed within five years (60 months) of the date of first registration

MMus in Composition – Project-based Option

The program includes private instruction in composition, and courses in musicology and theory. Opportunities are available to work in the School’s electronic music studio and to take part in solo and ensemble performance.

Course Requirements

Seminar in Composition, taken each year (MUS 561) ..................... 1.5

Individual Instruction, taken in first year (MUS 555) ....................... 3.0

Graduating Composition(s), taken in second year (MUS 598B) ............. 3.0

Selected Problems in Theory and Analysis, taken each year (MUS 500) .. 1.5

Bibliography, taken in first year (MUS 503) .................................. 1.5

1.5 units of the following:

Topics in Musicology Before 1750 (MUS 530) ..................... 1.5
Topics in Musicology After 1750 (MUS 531) ......................... 1.5
Comparative Topics in Musicology (MUS 532) ...................... 1.5

and a minimum of 3.0 units of electives selected from the following:

MUS 501, 502, 504, 506, 507, 530, 531, 532, 533, 562B, 580, 581, 590,
or approved undergraduate credit ................................................ 3.0

Total: .................................................................................. 18.0

Final Project

Candidates for the degree are required to complete one or more extensive original compositions (MUS 598B). These works will normally be performed during the final year of graduate study.

The candidate will also submit an analysis paper in addition to the graduating composition. The candidate’s academic supervisor will approve the topic of the analysis paper and the graduating composition.

Final Examination

An oral examination will be administered by the supervisory committee a short time after the performance of the candidate’s
graduating composition(s). The student is required to demonstrate knowledge of the repertoire and major trends of contemporary music composition. Procedures and guidelines are available from the Graduate Adviser.

Program Length

All master’s programs require a minimum attendance of five terms, including two Winter Sessions, and at least 18 units of course credit. All requirements must be completed within five years (60 months) of the date of first registration.

MMus in Performance – Project-based Option

The candidate’s individual program is designed to further growth as a soloist and ensemble participant; in addition to performance-related courses, the program includes study in related areas, such as conducting, performance practices, and music history.

* Note that one of the electives will normally be MUS 504 (Performance Practices)

** Addition to program, on recommendation of the supervisor

Final Project

All candidates will perform a final graduating recital (MUS 598A), followed by an oral examination.

Other Requirements

All graduate performance majors are expected to participate in ensembles where appropriate to their instrument, as determined by the Head of Performance and the student’s academic supervisor, in each year of their residency. Placement in large and small ensembles will be made according to the student’s needs and the needs of the School. In cases where the student’s instrument may not be appropriate to a certain ensemble type, as determined and approved by the supervisor, one ensemble yearly may be waived and the missing unit replaced by approved elective credit.

In order to qualify for MUS 545 (Individual Tuition, 4 units), the performance major must be registered as a full-time student, taking a minimum of 9 units of course work within an eight-month period.

Final Examination

An oral examination approximately one hour in duration will be administered by the student’s supervisory committee approximately a week after the student’s graduating recital and will constitute part of the graduating requirements. The student is expected to demonstrate knowledge of solo and chamber music repertoire for his/her instrument or voice. Procedures and guidelines are available from the Graduate Adviser.

Program Length

All master’s programs require a minimum attendance of five terms, including two Winter Sessions, and at least 18 units of course credit. All requirements must be completed within five years (60 months) of the date of first registration.

MMUS in Performance — Emphasis in String Quartet — Project-based option

This program is designed to develop growth in members of a quartet both as individuals and as an ensemble, and to develop quartet repertoire in preparation for a career in chamber music. During the two-year program the quartet will also hone their skills through various outreach programs and ensembles in the community.

</tbody>
</table>

* Solo recital of the student’s principal instrument.

** Students in the MMus in Performance — Emphasis in String Quartet program must complete a total of 3 recitals in their two-year residency to fulfill this requirement.

Final Project

The first two recitals are completed in conjunction with MUS 545Q; these recitals will be graded internally by the members of the Lafayette String Quartet and one additional faculty member. The third is the Degree Recital MUS 598Q, which is followed by an oral examination.
Final Examination
The oral examination will be adjudicated by the student’s supervisory committee, which consists of members of the LSQ and a minimum of two non-string faculty members. The oral examination is approximately one hour in duration and takes place approximately one week after the final degree recital. Each member of the quartet will be expected to demonstrate knowledge of both the solo and chamber music literature for his/her instrument and to speak knowledgeably about the program choices over the course of study. The members of the quartet will be questioned individually and as a group. Procedures and guidelines are available from the graduate adviser.

Program Length
All master’s programs require a minimum attendance of five terms, including two Winter Sessions and at least 18 units of course credit. All requirements must be completed within five years (60 months) of the date of first registration.

Program Withdrawal and Student Progression
In the event that one or more member(s) of the quartet withdraws from the program, the first priority would be to assist the remaining quartet members in finding a replacement. Another option would be to transfer the remaining members of the quartet directly into the regular MMus in Performance program. In such cases, credit in MUS 545Q would substitute for MUS 545 and the Chamber Music requirement (MUS 581) would be waived for the period that the student was registered in MUS 545Q.

MMus in Music Technology - Project-based Option
The MMus in Music Technology program aims to give students integrative training in music technology. It is directed at students who come from diverse musical backgrounds, who will be at the forefront of the creation and creative use of music technology in the 21st century. Students’ research is supported by close mentorship by the program’s faculty, the School’s three digital music studios, and the Fine Arts Studio for Integrated Media (SIM). There is ample opportunity for collaboration with musicians, artists and researchers from other disciplines, in addition to performance opportunities at the School.

7.5 units to be selected from any of the following:
MUS 506A, 506B, 507, 562A and 562B, 531 or 532, 590, CSC 510, 511, 561, 565, 575, ELEC 484, TS 300, TS 320, TS 400

Total: 18.0

1. Chosen in consultation with the academic supervisor, and, where appropriate, with permission from the instructor.
2. Required for students wishing to create an original electroacoustic composition or performance presentation with electronics as a final project.
3. ELEC484 only offered in the summer term.

Final Project
Student projects (MUS 598C) will be evaluated during a formal presentation to the student’s supervisory committee. Because of the anticipated range of project types, the project presentation will either be scheduled at the time of the student’s oral comprehensive examination or as a separate 60-minute presentation (30-minute presentation/demonstration, 30-minute discussion/question period). Students will also submit a detailed project report at the time of their presentation. The project presentation will be scheduled in consultation with the student’s academic supervisor.

Oral Examination
Full-time students will be required to pass a comprehensive oral examination in the context of MUS 598C (Project) during the fall or summer term of their second year. In consultation with their academic supervisor, candidates will develop a total of three topics of inquiry that address a range of approaches or applications of music technology. The selection of these research areas will take place in the student’s first year, in the context of MUS 512 (Music Technology Colloquium). The selected topics will be expected to represent directions and applications of music technology that will not have been addressed in his/her coursework and research experience. Procedures and guidelines are available from the Graduate Adviser.

Program Length
All master’s programs require a minimum attendance of five terms, including two Winter Sessions and at least 18 units of course credit. All requirements must be completed within five years (60 months) of the date of first registration.

PhD in Musicology
The PhD program in Musicology is small and selective, offering advanced students the opportunity for intensive directed research in the areas of expertise of its faculty. It emphasizes professional training in research and scholarship. Given the current character of the discipline, the program encourages interdisciplinary work linking scholarship in music with related humanistic fields relevant to the student’s area of research.

Course Requirements
The School normally requires a minimum of 12 units of course work, usually taken during the first three semesters of study, successful completion of the candidacy examinations and language requirement, approval of the dissertation proposal, and the writing and defense of the dissertation. Courses will be chosen in consultation with the student’s academic supervisor and the supervisory committee.
Normally, the course work consists of 3.0 units of the following:

- Graduate Forum in Musicology (MUS 533) ......................................................... 1.5
- Advanced Research Forum in Musicology (MUS 534) ........................................ 1.5

3.0 units drawn from the following:

- Topics in Musicology Before 1750 (MUS 530) ................................................. 1.5
- Topics in Musicology After 1750 (MUS 531) .................................................. 1.5
- Comparative Topics in Musicology (MUS 532) ............................................. 1.5

and an additional 6.0 units of electives in music and other areas relevant to the student’s research as determined in consultation with the student’s supervisory committee. These may include a maximum of 3.0 units of undergraduate courses at the 300 level or above in a department outside the School of Music, if relevant to the student’s area of specialization. With the exception of MUS 421 (Special Topics in Musicology), no credit will be given for undergraduate courses taken in the School of Music.

In addition, students will register for MUS 689 Dissertation Proposal (1.5) in the semester in which the dissertation prospectus is developed. The Dissertation is prepared in conjunction with MUS 699 (PhD Dissertation) on successful completion of the PhD Candidacy Examinations (MUS 693) described below.

**Candidacy Examinations**

Students will register for MUS 693 PhD Candidacy Examinations (3.0) for the duration of their preparation for their candidacy examinations. This begins at the time a student first enrolls in the PhD program and continues until candidacy requirements have been completed.

The candidacy examinations are normally taken before the end of the second year (but in exceptional cases no later than 36 months of first enrolment in the program), and before registration in MUS 699 (PhD Dissertation). They consist of written and oral components.

The examinations deal with ten topics selected in consultation with the academic supervisor and the supervisory committee according to the student’s specific needs. Up to five of the topics may be related to his/her research area, and should represent a diversity of disciplinary approaches. The purpose of these topics is to ensure that the student has the knowledge base necessary for completion of the dissertation. The remaining field topics in music should lie outside the area of research concentration, and should represent contrasting historical periods, genres, or approaches to the field. The purpose of these topics is to ensure that the student has the disciplinary breadth essential to careers in the field. The student will submit the ten proposed topics to the musicology faculty in the first-year review portfolio.

After approval of the topics, the student will:

1. prepare a select formal bibliography of the most important “classic” and recent scholarship on each topic; this bibliography represents the student’s reading list for each area
2. prepare a list of a representative sampling of musical repertoire related to each area
3. develop a mature grasp of the major musical issues, a critical perspective on the major research related to each topic, and an understanding of the cultural and intellectual context of each topic
4. formulate a question related to each topic
5. submit the bibliographies, repertoire lists, and proposed questions to the academic supervisor no less than four weeks before the scheduled oral examination

Members of the student’s supervisory committee will select three of the questions, emending them as deemed appropriate, and the candidate will have two weeks to write an essay of at least 2000 words in length on each of them.

The oral examination is taken in the presence of the student’s supervisory committee, and is open to all School of Music teaching faculty. The examination will consist of a discussion of the three essays and the musical repertoire related to them; additional questions related to the remaining field topics and repertoire will follow. The duration of the examination is approximately two hours.

In case of failure in one portion of the candidacy examinations, the candidate may retake that portion. The requirements must be fulfilled within the calendar year and no sooner than six weeks after the original examination.

**Candidacy**

The student progresses to candidacy on completion of the candidacy examinations and demonstration of competency in the required languages. Two foreign languages related to the student’s research are required, normally as part of the admissions process (see “Admission to the PhD Program”, page 220). Those who do not submit such evidence will be required to pass language examinations before work on the dissertation begins.

**Other Requirements**

By May 15 of the first year of study, students will submit a portfolio in order to demonstrate satisfactory progress toward the degree and in preparation for the comprehensive examinations. This portfolio should contain two samples of work completed in the course of the first-year graduate seminars, a listing of the proposed area of research concentration and the ten proposed field topics for the candidacy examinations.

The portfolio should also include a list of the proposed supervisory committee for the dissertation work and a statement regarding progress toward completion of the language requirement. Preparation of the first-year portfolio is completed in
conjunction with the Graduate Forum in Musicology (MUS 533) in the spring semester of the first year. The musicology faculty will review the portfolio and provide comment on the candidate's progress in the program, supervisory committee, and the proposed comprehensive topics by May 31.

**Dissertation**

The student must register for MUS 689 Dissertation Proposal (1.5) in the semester in which the dissertation prospectus is developed. The prospectus is to be at least 20 pages in length, and should include:

1. a detailed summary of the topic and thesis
2. a description of the state of research in the chosen field of study, including specific references to existing published studies, their scope and limitations
3. a statement of the research problem(s) upon which the dissertation is to focus, and a summary of the proposed plan of study
4. a description of the state of the primary source materials and their immediate availability
5. a select but comprehensive bibliography of directly relevant scholarship

The prospectus is submitted for approval to all members of the student's advisory committee.

The PhD dissertation must be an original contribution to knowledge. Between 20 and 30 units of credit are awarded for the dissertation.

**Oral Examination**

The dissertation is subject to an oral defense conducted by the supervisory committee and additional examiners, and open to the School of Music community.

**Program Length**

The PhD requires a minimum of three years of study, a minimum of 30 units beyond the master's degree, and the successful completion of the Course Requirements. All requirements must be completed within seven years (84 months) from the time of first registration in the doctoral program.

**Co-operative Education**

Participation in the Co-operative Education program - which enables students to acquire knowledge, practical skills for employment, and workplace experience - is optional for Master's and PhD students. Master's students complete two work terms, and PhD students complete three (a work term consists of four months of full-time, paid employment), and students undertake study and work terms in alternating sessions. Interested students should contact the Humanities, Fine Arts, and Professional Writing Co-op office early in the term in which they are applying. Students are also referred to "General Regulations: Graduate Co-op" on page 56.

---

**Neuroscience**

**GENERAL INFORMATION**

The Graduate Program in Neuroscience is an interdisciplinary program that features faculty from a number of departments including Biology, Biochemistry and Microbiology, Psychology, The School of Exercise Science, Physical and Health Education and the Division of Medical Sciences. It is hosted by the Division of Medical Sciences and offers specialized training in Neuroscience to students from a variety of backgrounds.

**Contact Information**

**Faculty Members and Areas of Research**

**DIVISION OF MEDICAL SCIENCES**

Craig Brown, PhD (Calgary)
- Stroke neuroanatomy, fluorescence imaging

Brian Christie, PhD (Otago)
- Learning and memory, synaptic plasticity, neurogenesis, traumatic brain injury, Fragile X Syndrome, Fetal Alcohol spectrum Disorders, animal behavior, concussions, athletic performance

Patrick Nahirney, PhD (UBC)
- Neuroanatomy, synaptic ultrastructure electron microscopy, live cell imaging
Leigh Anne Swayne, PhD (Calgary)
Neurogenesis and the bioelectric control of new neurons in healthy and injured/diseased brain, ion channels as therapeutic targets for brain repair

Stephanie Willerth, PhD (Washington)
Tissue engineered scaffolds for promoting stem cell differentiation, novel drug delivery systems, and analysis of stem cell differentiation using next generation sequencing

**DEPARTMENT OF BIOLOGY**

Gautam Awatramani, PhD (State University New York)
Synaptic physiology, multi-photon imaging, retina, optogenetics

Robert Burke, PhD (Alberta)
Cellular signaling and neural specification, developmental biology

Robert Chow, PhD (New York University)
Neuronal cell type diversity, retinal development

Kerry Delaney, PhD (Princeton)
Synaptic transmission and plasticity, neurodevelopmental disease

Raad Nashmi, PhD (Toronto)
Neurotransmission molecular mechanism of addiction

Louise Page, PhD (Univ. of Victoria)
Evolutionary developmental biology of gastropod molluscs, functional morphology of marine invertebrates

Nancy Sherwood PhD (California-Berkeley)
Neuropeptides in the control of reproduction and growth; evolution of neuropeptides, mainly in fish

John Taylor, PhD (Simon Fraser Univ.)
Comparative genomics, gene and gene duplication

**DEPARTMENT OF PSYCHOLOGY**

C.A. Elizabeth Brimacombe PhD (Iowa State)
Eyewitness testimony, social cognition

Daniel Bub, PhD (Rochester)
Cognitive neuropsychology, brain injury

Mauricio A. Garcia-Barrera PhD, (Univ. of Georgia)
Clinical neuropsychology

Jodie R. Gawryluk, PhD (Dalhousie University)
Clinical neuropsychology, neuroimaging, functional magnetic resonance imaging, changes in brain structure/function in disorder and recovery

Clay Holroyd, PhD (Illinois)
Neurobiological mechanisms of cognitive control

Kimberly A. Kerns, PhD (Chicago Medical School)
Pediatric neuropsychology, clinical psychology, attention and memory disorders

Adam Krawitz, PhD (Michigan)
Computational cognitive neuroscience of working memory, executive controls, decision making

D. Stephen Lindsay, PhD (Princeton)
Memory and cognition, eyewitness memory, children’s memory

Stuart MacDonald PhD (Univ. of Victoria)
Life-span development

Michael Masson, PhD (Colorado)
Memory and cognition, cognitive skill development, computational modeling

Catherine A. Mateer, PhD (Univ. of Western Ontario)
Clinical neuropsychology, neuropsychological and cognitive rehabilitation, traumatic brain injury

Ulrich Mueller, PhD (Temple)
Development of self-regulation, executive function, social development in infancy and early childhood

Jim Tanaka, PhD (Oregon)
Visual object and face recognition

**SCHOOL OF EXERCISE SCIENCE, PHYSICAL HEALTH & EDUCATION**

Olav Krigolson, PhD (University of Victoria)
Neural basis of decision making and reinforcement learning in humans using EEG, fMRI, and computational modeling.

E. Paul Zehr, PhD (Alberta)
Neuromuscular plasticity and motor recovery after injury

**Degrees and Specializations Offered**

MSc and PhD in Neuroscience

**Financial Support**

All students accepted into the program are guaranteed a minimum stipend which can be comprised of a combination of scholarship, fellowship, Teaching Assistantship and support payments from individual research grants. For this reason students must be accepted into individual laboratories as well as by the Program. Students admitted to the program will have the department or school in which their thesis supervisor has their primary appointment listed as their home department. Students
will be eligible for fellowships and Teaching Assistantships administered by their supervisor's home department.

All graduate students are financially supported to undertake full-time graduate studies. MSc students deemed to be making satisfactory progress towards their degree requirements are guaranteed at least $20,000 per annum for two years and PhD students $20,000 per annum for four years from the sources listed above. Funding may still be available in additional years of the program but the minimum is no longer guaranteed.

**ADMISSION REQUIREMENTS**

**General Application Process**

1. Initial inquiries should be made directly to a prospective research supervisor to see if a position is available, or by using the Prospective Graduate Student Form: www.uvic.ca/medsci/students/apply/form/index.php

2. If a Neuroscience faculty member agrees to supervise you, formally apply to the Neuroscience Graduate Program using the UVic Faculty of Graduate Studies website. www.uvic.ca/graduatestudies/admissions/admissions/apply/index.php

   Please note: acceptance by a research supervisor is a requirement for entry into the program.

3. Ensure all of your application materials have been received by Graduate Admissions, particularly your formal letters of reference.

4. In addition to the documentation required by the Faculty of Graduate Studies (see "General and Academic Requirements and Procedures for All Graduate Students", page 29) students will need to supply:
   - Two letters of reference
   - Letter outlining your research interests and identifying your confirmed research supervisor(s).

5. Applicants whose native language is not English must write the TOEFL (Test of English as a Foreign Language) and submit scores to the Graduate Admissions and Records Office. A score of at least 630 on the paper-based version of the test or 267 on the computer-based test or an overall score of 90 on the internet-based TOEFL is required.

**Admission to the MSc Program**

Admission requires a bachelor's degree with course-work appropriate to the proposed thesis research concentration. Students who have achieved the minimum grade point average (GPA) of the home department during the last two years of study will be considered for direct admission to the Program. Students meeting the Faculty of Graduate Studies minimum will be conditionally considered for admission on a case-by-case basis.

Students must have a Neuroscience faculty member agree to supervise them and agree to provide financial support in advance of applying to the program.

**Admission to the PhD Program**

Students can enter the PhD program having previously achieved a MSc degree, by transferring from the MSc program at the end of their first year, and upon recommendation of the supervisory committee or, in rare cases, directly with a BSc Honours Degree. Students with a bachelor's degree with course-work appropriate to the proposed thesis research concentration and a first class GPA (over 7.0 on the UVic 9.0 scale or around 80%) in their last two years of study will be considered for direct entry to the PhD program. Evidence of research experience including summer research, honours thesis work or peer-reviewed publications will support application to the PhD program in the absence of a MSc degree. Admission based on a MSc qualification will normally require a graduate GPA of over 7.0 on the UVic scale. Applicants to this program will require the following to complete their application package:

- Official Transcript
- Acceptance from a faculty member willing to act as the student’s supervisor and guarantee minimum financial support requirement will be met
- Acceptance by the Neuroscience Admissions Committee
- Two letters of reference
- CV

**Deadlines**

To be eligible to be considered for a University of Victoria Fellowship applicants should normally submit their application package by February 15 for admission in September of the same calendar year. Admission is possible for September 1 or January 1 with a recommendation that applications be received a minimum of 3 months prior to the proposed entry date for Canadian applicants. Because of visa requirements international students should complete the application process at least six months in advance.

**PROGRAM REQUIREMENTS**

**MSc – Thesis Option**

The MSc is a full-time research degree with the requirement for a thesis and some additional coursework

**Course Requirements**

| Course Code | Description | Credits
|-------------|-------------|---------|
| NRSC 500    | Fundamentals of Neuroscience | 3.0
| NRSC 501A or 501B (first year) | Core Curriculum | 1.5
| NRSC 502A or 502B (subsequent years) | Core Curriculum | 1.5
| NRSC 595 | Research Methods | 1.5
| NRSC 599 | Electives | 9.0–15.0
| Electives | | 1.5

All students must complete NRSC 500 Fundamentals of Neuroscience covering core concepts in cellular, systems and cognitive neuroscience. All students will be expected to enroll in a seminar and research presentation course in either Cellular (NRSC
501A) or Cognitive (NRSC 501B) Neuroscience for the duration of their enrolment in the program. In consultation with their supervisory committee students will complete an elective from courses offered by the Program or cross-listed with other departments. The thesis is expected to comprise a body of original experimental work which is of publishable quality defended in an oral examination in front of the supervisory committee and an external examiner from outside the candidate’s home department.

Program Length
The MSc is primarily a program of full-time independent research. Students can expect to take approximately two years to complete the program.

PhD Program
The PhD program is a full-time program of independent and original research leading to a dissertation which is defended in an oral examination. Normally, students must complete a candidacy examination within 21 months of entering the NRSC program, this includes students that initially entered in the M.Sc. program. In addition to the courses listed below students may be required to take supplemental courses to address specific gaps in their preparation for their dissertation work at the advice of their supervisory committee. Students must enroll in the seminar and presentation course appropriate to their area of study for the duration of their enrolment in the program.

Course Requirements
NRSC600 ......................................................................................................... 3.0
NRSC 601 A or 601B (first year) ......................................................... 1.5
NRSC 602A or 602B (subsequent years) ..................................... 1.5
NRSC 693 ................................................................. 3.0
................................................................. 21.0–
NRSC 699 ....................................................................................................... 39.0
Electives .......................................................................................................... 3.0

Dissertation
The topic and scope of the dissertation research is determined by the supervisory committee and the candidate. The written dissertation must comprise an original work of research of a quality suitable for publication as at least one peer reviewed journal article.

Oral Examination
The dissertation must be defended in an oral examination in front of the supervisory committee and an external examiner from outside the university to ensure that the research and dissertation meet the required standard.

Program Length
The PhD is a full-time research degree that normally takes approximately four years to complete.

Nursing
GENERAL INFORMATION
The UVic School of Nursing is dedicated to excellence in accessible and innovative undergraduate and graduate nursing education, research initiatives, and professional activities. The School is committed to generating knowledge, advancing the nursing profession and discipline, and enhancing nursing practice to improve health for individuals, families, community, and society. Through collaborative partnerships among educators, students, health practitioners, researchers, and policy developers, we strive to support health and social change.

The School of Nursing Graduate Education Programs are based in a philosophical model that attends to coherence among and between ontological, epistemological, ethical, and practice dimensions. This model is fostered by values of openness, diversity, scholarship, and service related to human health.

Our School’s faculty are widely recognized for their contributions to the advancement of nursing as a scientific discipline and practice profession through research, leadership, practice, teaching, publications and presentations. A comprehensive listing of nursing faculty is located at <www.nursing.uvic.ca>.

All teaching faculty, as well as students, have the benefit of working with a skilled group of professional and support staff.

Faculty Members and Areas of Research

Elizabeth Banister, PhD (Victoria)
Adolescent sexual health education; adolescent relational aggression; mentoring; knowledge translation; ethnography

Anne Bruce, PhD (British Columbia)
End of life care; contemplative practices in health and healing; mindfulness meditation; volunteerism in hospice care; interpretive inquiry

Laurie Barnhardt, BScN, MSN, NP(F) (Ontario)
Simulation in nursing education, advanced nursing practice, primary health care, specialized nurse practitioner implementation

Katherine Bertoni, BScN, MN, NP (F) (Alberta)
Primary health care, diabetes management

Gweneth A. Doane, PhD (Victoria)
Family and women's health; ethics, learning and teaching; interdisciplinary education and practice

Noreen Frisch, PhD (Southern Illinois)
Holistic nursing practice; nursing language and classification; and student development

Marcia Hills, PhD (Victoria)
Health promotion; curriculum development; family health; participatory action research; international health

Marjorie MacDonald, PhD (British Columbia)
Health promotion; community/public health; adolescent health; social and health policy; health program evaluation; advanced nursing practice; primary health care; qualitative research

Karen MacKinnon, PhD (Calgary)
Rural maternity care and perinatal nursing; interprofessional practice and education; the social organization of women's childbearing experiences and Institutional Ethnography

Anastasia Mallidou, PhD (Alberta)
Health services research; organizational context (structures and processes) and its impact on patient/resident, healthcare provider, and system outcomes; quantitative research methods; structural equation modeling (SEM); systematic reviews; knowledge translation in the healthcare sector; leadership and health policy; healthcare systems; long-term care facilities (nursing homes); interdisciplinary education and collaboration.

Lenora Marcellus, PhD (Alberta)
Neonatal nursing; transition of the high risk newborn to the community; creating supportive environments for neonatal development; perinatal substance use; women's health; leadership; quality improvement

Carol McDonald, PhD (Calgary)
The socio-political context of women's health, in particular the experiences of underserved groups such as older women and lesbian women; feminist hermeneutics and interpretive inquiry

Marjorie McIntyre, PhD (Colorado)
Philosophical/historical issues in nursing; feminist critique of women's healthcare practices; hermeneutics

Bernie Pauly, PhD (Victoria)
Nursing ethics; health policy ethics; harm reduction; health inequities; access to health care; homelessness; addiction; HIV/AIDS

Mary Ellen Purkis, PhD (Edinburgh)
Social accomplishment of nursing practice; effects of contemporary health care discourses (health promotion and self-care) on nurses' practices; ethnography and discourse analysis

Esther Sangster-Gormley, PhD (c) (Dalhousie University)
Primary health care: the role and function of the nurse practitioner in the delivery of primary health care. The acceptance role of the nurse practitioner by patients, physicians and health care administrators, and integration of the role into the health system

Debra Sheets, PhD (South California)
Gerontology; health promotion; humanities; arts and aging; family caregivers; guided autobiography; geriatric nursing education; evaluation research; end-of-life care

Laurene Shields, PhD (Oregon)
Community; health promotion; empowerment; community nursing practice; life threatening illness and events; connectedness; people's experiences of health, illness and healing; narrative inquiry; feminist research; story as a metaphor of healing; spirituality

Kelli Stajduhar, PhD (British Columbia)
Palliative and end-of-life care; family caregiving; home care; HIV/AIDS; oncology; vulnerable and marginalized populations; gerontology; health services research; qualitative and quantitative research methods; mixed method study design; collaborative, participatory research

Rosalie Starzomski, PhD (British Columbia)
Health care and nursing ethics; nephrology nursing; transplantation/organ donation; ethical issues related to
biotechnology (e.g. genetic testing for polycystic kidney disease); health and social policy (e.g. consumer involvement in health care decision making); interdisciplinary collaboration; leadership and advanced nursing practice.

Deborah Thoun, PhD (Texas)

Nursing theory based research; research methodologies congruent with human science perspective; exploration of lived experience such as time passing, suffering, facing the unknown.

Lynne Young, PhD (British Columbia)

Family influence on individual response to heart-health initiatives; critical qualitative methodology conducted with research programs that include quantitative approaches.

Degrees and Specializations Offered

The School of Nursing offers a number of graduate education opportunities. Students may enrol in one of four options through the School of Nursing directly and may apply for double master’s degrees in Nursing and Health Information Science:

- The PhD in Nursing by Distributed Learning (even-numbered years)
- The Master of Nursing, Advanced Practice Nursing: Advanced Practice Leadership option (APL) by Distributed Learning
- The Master of Nursing, Advanced Practice Nursing: Nurse Practitioner option (NP) by Distributed Learning
- The Master of Nursing, Advanced Practice Nursing: Nurse Educator option (NUED) by Distributed Learning.
- The Master of Nursing and the Master of Science in Health Informatics option by Distributed Learning.

Applicants to interdisciplinary graduate programs identifying nursing as one of their disciplinary areas are welcomed and encouraged to contact the Associate Director of Graduate Programs in the School of Nursing as well as the Faculty of Graduate Studies.

Facilities

The University of Victoria School of Nursing is uniquely situated in the Faculty of Human and Social Development. This faculty consists of the Schools of Social Work, Child and Youth Care, Public Administration, Public Health and Social Policy and Health Information Sciences, as well as the Indigenous Governance Program and the Studies in Policy and Practice Graduate Program. Additionally, the School of Nursing provides the opportunity to pursue scholarly links with the University of Victoria Centre on Aging, the Centre for Youth and Society and the Centre for Studies in Religion and Society.

Off campus, we are linked with research centres at the University of British Columbia, including the Institute for Health Promotion Research, the Human Early Learning Partnership, the W. Maurice Young Centre for Applied Ethics, and the BC Centre of Excellence for Women’s Health. We also have strong research and practice linkages with the Vancouver Island Health Authority, the Vancouver Coastal Health Authority, the Fraser Health Authority, the Interior Health Authority, the Provincial Health Services Authority and the Ministries of Health Planning and Health Services.

Financial Support

The UVic School of Nursing administers a number of awards to students enrolled in nursing graduate programs at the University of Victoria. Detailed information on these awards and application procedures is available from the UVic School of Nursing website: <nursing.uvic.ca>. All eligible students are encouraged to apply for funding from provincial, federal and external sources.

Faculty support will be available to students in the preparation of applications to major funding agencies. Students are not required to have funding in place when they apply to graduate programs in nursing; however, financial support may facilitate program completion.

Eligibility for nomination for scholarships administered by the School of Nursing will be determined on the basis of individual scholarship criteria, full-time registered status and Grade Point Average (GPA). The nomination for scholarship process is competitive. Nominations are reviewed by professional staff and faculty in the School on an annual basis.

Research assistantships in the School of Nursing are limited and will be publicized to all registered students should they come available.

Nursing Practice Requirements

Nursing practice experiences are essential components of the nursing program. Students must be prepared to travel outside their home community for practica when necessary. If a student is completing hours outside the province/territory/state where they are currently registered, the student must acquire active practicing registration in the jurisdiction where these practicum hours take place. Arrangements and associated costs related to nursing practice experiences are the responsibility of the individual student.

Note: Nurse Practitioner students must have access to a vehicle to attend practicum experiences during the program. NP students must be willing and able to travel to any health authority in BC to work with a primary care preceptor. Students are responsible for finding accommodation with a high speed internet connection. This will allow individuals to participate easily in online synchronous and asynchronous learning sessions.

Code of Ethics and Standards of Practice

All students must adhere to the Canadian Nurses Association (CNA) Code of Ethics and to the Standards of Practice (or equivalent) of the registered nurses’ licensing organization in the jurisdiction in which they are undertaking their practice experience. Students who fail to adhere to these may be required to withdraw from the program. Please refer to “Professional Conduct and Student Progression”, below.
Criminal Record Reviews

While not a requirement for admissions, UVic students employed in cooperative work terms, placed in practica or enrolled as students in professional organizations may be required to undergo criminal records reviews by legislation (e.g., BC Criminal Records Review Act), or because of the risk management policies of the organization with which the student will be associated. Students are responsible for providing authorization for the review to the employer, practice agency or professional organization upon request and/or cooperating in the conduct of the review as needed. Without this authorization or cooperation, an organization may revoke its offer of employment or placement. Usually, the student must pay for the review, although some employers will absorb the costs. Some units on campus, where students are frequently placed in situations requiring a review, may have standard information or practices regarding the procedure. However, the University has no responsibility to involve itself in this process. Students should check the administrative office in their own unit for any discipline-specific information.

Applicants or students with criminal convictions are advised to contact the appropriate registered nurses’ association with regard to specific questions involving criminal convictions and ability to register as a nurse in the jurisdiction in which they are undertaking their practice experience. Students undertaking practice experiences in a jurisdiction outside BC are responsible to ensure they have a Criminal Record Review or equivalent if required by their practice experience agency.

Immunizations

Agencies require students to provide the School of Nursing with proof of current immunizations and TB status. An annual flu shot is required by health authorities, or students may be asked to wear a mask during contact with patients. All costs and responsibilities are the responsibility of the individual student and must be provided to the agency and the School of Nursing upon request.

Current Basic Life Support Certificate

All MN students must provide evidence of successful completion of basic life support level-C or higher six weeks prior to a practicum or Co-op experience or provide a waiver of this requirement signed by the agency contact. Current CPR level-C certification, or a waiver for each practicum site, must be on file in the School of Nursing to remain registered in the program.

Confidentiality Acknowledgement

Agencies require students to read a confidentiality policy and sign a confidentiality acknowledgement. Print the form from the student practice orientation webpage for the agency, sign the form and submit the acknowledgement to the agency (keeping a copy for your records).

Regulations Related to Active Practicing Registration

In addition to the above requirements, all students must have active practicing registration as a Registered Nurse or the equivalent registration for the jurisdiction in which they are undertaking their practice experience. Students’ active registration status will be checked prior to practice experience. Please note that students studying outside of BC are required to submit verification of active practising registration to the School of Nursing annually. Students studying in the US must also provide proof of current malpractice insurance, annually, for the duration of the program.

Electronic Log Fee – Nurse Practitioner Program

Nurse Practitioner students may be required to use an electronic log system and are responsible for paying fees associated with the purchase and maintenance of this log.

Professional Conduct and Student Progression

Within the University of Victoria School of Nursing, we are committed to open, transparent processes of evaluation. This means that we encourage students to be proactive in approaching their instructors about past progress and challenges.
as each new course starts. Faculty and staff at the School of Nursing work as a team to maximize learning opportunities and enhance the quality of instruction. Evaluative feedback about current and past student progress is shared by course instructors with other faculty or staff in the School of Nursing as needed in order to promote student success.

**Professional Conduct**

All students in the School of Nursing must follow the Faculty of Human and Social Development’s (HSD) Guidelines for Professional Conduct. The faculty supports models for professional conduct based on the following guidelines:

- submission of oneself to a professional code of ethics
- exercise of personal discipline, accountability and judgement
- acceptance of personal responsibility for continued competency and learning
- willingness to serve the public, client or patient and place them before oneself
- ability to recognize the dignity and worth of all persons in any level of society
- willingness to assist others in learning
- ability to recognize one’s own limitations
- maintenance of confidentiality of information (including all electronic communication) appropriate to the purposes and trust given when that information was acquired
- acceptance that one’s professional abilities, personal integrity and the attitudes one demonstrates in relationships with other persons are the measure of professional conduct

**Unprofessional Conduct**

Students in the Faculty of Human and Social Development are subject to the provisions of the code of ethics of their respective professions, and may be required to withdraw from their School for violating these provisions. Students may also be required to withdraw from their School, when ethical, medical or other reasons interfere with satisfactory practice in their respective disciplines.

All students in the School of Nursing are subject to the provisions of the Canadian Nurses Association Code of Ethics for Registered Nurses, and the College of Registered Nurses of British Columbia (CRNBC) Professional or Practice Standards (or the provincial/territorial or state equivalent where the student’s practicum is located). In addition, the following School of Nursing practice regulations apply:

i. Where a student is enrolled in a nursing practice or Co-op course and there are reasonable grounds to believe that the conduct or lack of competence of a student enrolled in a nursing practice course has adversely affected, or may adversely affect, those associated with the practice placement including:

- clients and/or their families

- student peers, or
- health care professionals or others in health related fields liaising with the UVic School of Nursing

OR

The student has breached the Regulations Concerning Practica, the Canadian Nurses Association Code of Ethics for Registered Nurses or the CRNBC Professional or Practice Standards (or the provincial/territorial or state equivalent where the student’s practicum is located), the course instructor may then:

a) restrict activities of the student in the course in such manner as the instructor deems appropriate and/or
b) suspend the student’s continued participation in the course prior to the course end date, and/or
c) assign a failing grade (grade F or N) to the student’s performance in the course and report the failure to the Associate Director, Graduate Education and the Coordinator, Student Affairs.

ii. The School of Nursing Graduate Education Academic Review Committee will review a student’s enrolment in a nursing practice course (including review of practice appraisals) and/or the nursing degree program where:

a) a failing grade (grade of F or N) has been assigned to the student’s performance in a course,
b) a report has been received that a student has breached the HSD Faculty Guidelines for Professional Conduct or Regulations Concerning Practica, the Canadian Nurses Association Code of Ethics for Registered Nurses or the CRNBC Professional or Practice Standards (or the provincial/territorial or state equivalent where the student’s practicum is located).

After receiving a written request from the student, and giving the student an opportunity to be heard by telephone conference call, or in person, the Graduate Education Academic Review Committee (includes supervisor, interim supervisor or supervisory committee as applicable) may recommend to the Faculty of Graduate Studies that a student be permitted to retake a course in which a student has been assigned a failing grade (with or without additional requirements/conditions), OR require the student to withdraw from the graduate program in which the student is enrolled.

**Fitness to Practice**

Students enrolled in the School of Nursing graduate programs at the University of Victoria are required to meet the standards for fitness to practice as defined by the College of Registered Nurses of British Columbia (or the provincial/territorial or state equivalent where the student’s practicum is located) document, "Fitness to Practice: The Challenge to Maintain Physical, Mental and Emotional Health".

Students must notify their instructor(s) and practice preceptor of any absence from a scheduled practice experience and and complete the missed practice hours within the official scheduled course dates.
ADMISSION REQUIREMENTS

General

Initial enquiries regarding graduate programs should be addressed to the Graduate Adviser, School of Nursing. Application materials may be obtained from the Graduate Admissions and Records Office website <uvic.ca/garo> and the School of Nursing website: <nursing.uvic.ca>.

Applicants for the degree of MN or PhD in Nursing must meet all general requirements of the Faculty of Graduate Studies, as well as the specific requirements of the School of Nursing. The equivalent of a minimum of two years’ full-time recent nursing practice as a registered nurse, preferably in the chosen area of concentration, is strongly recommended.

Applicants to the double degree option in Nursing and Health Informatics must meet admission criteria for both programs. Application guidelines are available online at <nursing.uvic.ca>.

Completed applications and supporting documents must be available for consideration by the School and faculty on, or prior to, the published deadline dates.

Admission is highly competitive. Not all students who meet the minimum requirements will be admitted. These programs are offered as resources permit.

Admission to the PhD Program

All interested applicants are required to contact the PhD Program Coordinator in the School of Nursing before beginning the application process and to notify the Graduate Adviser in the School of Nursing of their intention to apply to the program.

Applicants will usually hold a baccalaureate and master’s degree in Nursing. Master’s degrees in other disciplines will be considered but students may be required to take additional courses to acquire the necessary grounding in nursing knowledge development.

Applicants will be expected to have achieved a minimum Grade Point Average (GPA) of 7.0 (A-) (or equivalent) on the UVic scale of 9.0 in their master’s program although students who have achieved a GPA of less than 7.0 and have appropriate work experience and additional credentials may be considered. In keeping with the current regulations of the Faculty of Graduate Studies, there will be no residency requirement per se.

Nonetheless, students will be expected to maintain continuous registration throughout the program, which is structured to support them in moving through the requirements within specified time limits.

Applicants are strongly encouraged to apply for external funding and should indicate on their applications where they have applied for such funding.

All short-listed candidates will be interviewed by a faculty admissions committee.

Direct Admission from UVic MN to PhD

The option of admitting directly from the MN program at UVic to the PhD program is intended for exceptional students who bring capacities and aptitude to be successful in doctoral studies and meet the recommended criteria. Please visit the website at <www.nursing.uvic.ca> or contact the PhD Program Coordinator for complete criteria and guidelines for applying for admission.

Application Requirements

Application information may be downloaded from the School of Nursing website <nursing.uvic.ca/graduate>. All applicants will be required to satisfy normal admissions requirements for the Faculty of Graduate Studies. In addition, the School of Nursing requires the following:

• Two academic references (individuals who hold an academic position at a recognized post-secondary educational institute)
• An employer reference (a person in a supervisory position, not a co-worker or a colleague).
• Evidence of your facility at scholarly writing for example, a published article, a chapter from your Master’s thesis or a major paper submitted in a graduate course.
• Curriculum Vitae
• Personal Statement
• Short-listed applicants may be invited to participate in a face-to-face or telephone interview.

Please also check the School of Nursing website for ongoing program updates, <nursing.uvic.ca>.

Admission To Master’s Programs

Applicants for admission must have completed a Baccalaureate in Nursing (equivalent to the degree offered by the University of Victoria) with at least a B+ (77%) average for the last two years of university work. Please note that practica, non-graded (pass/fail) courses, credit granted on the basis of life or work experience, or credit earned at institutions not recognized by the University will not be used in determining an applicant’s admission grade point average or units completed. Any courses used in the calculation of the entering average cannot be used toward a graduate degree program. The Faculty of Graduate Studies may, therefore, be required to take nursing diploma or post-secondary grades outside of the Bachelor of Science in Nursing degree into account when calculating application grade point averages in order to calculate on 30 units.

The Master of Nursing program admits students on an annual basis for September entry, with limited enrolment.

All applicants to the School of Nursing Masters of Nursing Graduate Programs must have completed an upper level (300 or 400) undergraduate statistics course at a recognized post-secondary educational institute with a final grade of B or above prior to admission. This course must have been completed within five years of application.
Applicants for admission to the Nurse Practitioner program must reside in British Columbia and maintain active practicing registration with the College of Registered Nurses of British Columbia (CRNBC) for the duration of the MN-NP program.

All students admitted to MN distance programs are required to attend an onsite orientation to their program in August, prior to program commencement in September. For Nurse Practitioner students, this onsite orientation is in addition to the required onsite components that occur in term two to six in the NP program.

Students must provide official verification of active practising registration as a Registered Nurse (or the equivalent in the jurisdiction[s] in which the student is taking the program). Active practising registration must be maintained for the duration of the program.

The UVic School of Nursing holds the view that nursing is an academic discipline and a practice profession. The Canadian Association of Schools of Nursing (CASN) sets the standard for programs of nursing education in Canada. In order to ensure that applicants have the preparation to be successful at the graduate level prior to consideration for full admission, graduates from programs not accredited by the Canadian Association of Schools of Nursing (CASN) may be required to take a limited number of graduate level nursing courses as unclassified non-degree students, achieving a grade of B or above in each. These courses may be accepted for transfer credit in the MN program if the student is subsequently accepted.

Applicants must meet all of the admission requirements of the Faculty of Graduate Studies. In addition, applicants must submit a professional curriculum vitae with complete work, education, and training; academic and employer references; and, a letter of intent related to the program. Students whose first language is not English require an acceptable score on an approved English language competency test (see “English Language Proficiency”, page 30). Nurse Practitioner applicants will be shortlisted and contacted for a face-to-face or telephone interview.

Applicants admitted to the MN program must provide evidence of successful completion of a basic life support level C course completed no more than 12 months prior to admission. A valid CPR level C certificate must be maintained for the duration of the program.

Applicants admitted to all MN programs must complete an HSPnet form for use and disclosure of student information for practicum purposes.

All students entering a graduate program in Nursing must have access to the Internet, email and Microsoft Office (i.e. Word and PowerPoint) as well as Adobe Reader or Adobe Acrobat for the duration of the program.

Synchronous learning sessions (booked online classes in real time) may be required for all MN program options. Students enrolled in the MN Nurse Practitioner option are required to be available for weekly online synchronous learning opportunities.

**UVic Email Address**

All program information will be provided by email. All School of Nursing students are required to use their UVic email address as their primary email contact in the student records system while enrolled in programs. This is to ensure continuity and consistency of information received. The School of Nursing is not responsible for providing missed information if students do not use the UVic email address.

**Deadlines**

The deadline for submitting an application is December 1 of each year for APL, NUED, and NUHI. For Nurse Practitioner applicants the application deadline is November 1 of each year. Completed applications and supporting documents must be available for consideration by the School of Nursing on, or prior to, these deadlines noted above.

Please note that the School accepts students for a September entry only. Completed applications submitted by these deadlines are automatically considered for University of Victoria funding opportunities. The School accepts MN students annually and will accept PhD students every other year, with the next intake in 2016.

**Non-Degree**

Applicants approved by the Faculty of Graduate Studies to take courses as non-degree graduate students may seek permission to register in graduate level courses in the Faculty of Human and Social Development, including the School of Nursing (up to two courses). The School of Nursing limits enrollment to one course prior to application to a graduate program. The course must be specified on the application for non-degree graduate studies, which must be submitted to the Graduate Admissions and Records Office. Permission to register is not guaranteed and is considered on a case-by-case basis as resources permit, pending instructor approval. Permission to take courses as a non-degree graduate student in the Faculty of Human and Social Development is not an offer of admission to any School of Nursing or Faculty of Human and Social Development graduate program, nor does it facilitate admission or unduly advantage applicants.

**Program Requirements**

All students in the School of Nursing must adhere to the Faculty of Human and Social Development’s Guidelines for Professional Conduct, and will be expected to function within the terms of the code of conduct of an appropriate professional association. All travel, accommodation, meals, textbook, course reading and other expenses related to attending course sessions are in addition to the program tuition costs, and are the responsibility of the student.

Students are required to have access to a computer (PC or Macintosh). Please note that in order to participate easily in online
high definition synchronous and asynchronous learning sessions a high speed internet connection is necessary.

Students enrolled in the APL, NUED and NUHI program options must achieve a GPA of at least 5.0 (B) for every session in which they are registered. Students with a sessional or cumulative average below 5.0 will not be allowed to register in the next session until their academic performance has been reviewed by the Graduate Education Academic Review Committee in Nursing and continuation in the Faculty is approved by the Dean of Graduate Studies. In the case of the Double Degree, the academic review will involve representatives from both Nursing and Health Information Science.

Usually, all students registered in any nursing practice course must pass each course before proceeding further through the program. Students may, with permission of the Graduate Education committee, repeat a failed nursing practice course and will be placed on academic probation for the remainder of the program. The privilege to repeat a failed nursing practice course is allowed only once in the program. (See also "Professional Conduct and Student Progression", page 232).

Nurse Practitioner students are required to achieve a minimum GPA of 6.0 (B+) in all NP option (NUNP) required courses. NP students with a sessional or cumulative GPA below 6.0 will not be permitted to register in the next semester until their academic performance has been reviewed by the Graduate Education Academic Review Committee and continuation in the program is approved by the Dean, Faculty of Graduate Studies.

Usually, all students registered in any nursing practice course must pass each course before proceeding further through the program. Students may, with permission of the Graduate Education Academic Review Committee, repeat a failed nursing practice course and will be placed on academic probation for the remainder of the program. The privilege to repeat a failed nursing practice course is allowed only once in the program. (See also "Professional Conduct and Student Progression", page 232).

All students admitted to MN distance programs are required to attend an onsite orientation to their program in August, prior to program commencement in September. Failure to attend orientation could compromise admission to the MN program. Students unable to commit to the required onsite should consider applying at a later time. For Nurse Practitioner students, this onsite orientation is in addition to the required onsite components that occur in terms two to six in the NP program.

The full-time Nurse Practitioner option offers courses in a set sequence. A leave of absence up to one year is permitted. Before re-enrolment is authorized, students must demonstrate competencies at a level commensurate with their competency level prior to their leave of absence from the program. NP students withdrawn for more than one year must re-apply in competition with other applicants.

Program core course enrolment is guaranteed for students who follow the program course sequence as identified online at <nursing.uvic.ca>. Students who fall "out of sequence" for any reason should contact the Graduate Adviser to discuss course planning in further detail. Please be advised that MN core and option specific required courses are only offered once a year. Enrollment for out of sequence students is based upon course space, instructor, and practice placement availability.

**Master of Nursing, Advanced Practice Nursing: Advanced Practice Leadership by Distributed Learning (Course-Based Masters)**

The Master of Nursing, Advanced Practice Nursing, Advanced Practice Leadership (APL), offered by the University of Victoria School of Nursing, is a practice oriented and theory-based degree intended to prepare nurses for a wide variety of advanced practice roles.

Graduates of the program will be leaders in four spheres of influence: the interprofessional/intersectoral health spheres, the patient/client sphere, the nurses/nursing sphere, and the health systems/organization sphere. They will practice as Advanced Practice Nurses in a wide range of settings, including acute care, community, long-term care and primary health care.

**Course Requirements**

Students are required to complete 16.5 units of study of which 12 units are at the 500 level. Students consult with the Graduate Adviser in the School of Nursing to select courses aimed at meeting the students’ particular academic needs.

**Advanced Practice Leadership Course-Based Option (16.5 units):**

**Required Core APL courses (4.5 units):**

- NURS 501 (1.5) Philosophical and Theoretical Knowledge for Advanced Practice Nursing
- NURS 502A (1.5) Conceptualizing Research for Advanced Practice Nursing
- NURS 502B (1.5) Developing Empirical Research Knowledge and Skills

**Required APL concentration courses (12.0 units):**

- NURA 516 (1.5) Nursing Leadership I (Client and Nursing Spheres)
- NURA 517 (1.5) APL Praxis I
- NURA 518 (1.5) APL Praxis II
- NURA 519 (1.5) Nursing Leadership II (Health Systems and Policy Spheres)
- NURS 500 (1.5) Scholarly Writing for Advanced Practice Nursing
- NURS 509 (1.5) Evaluation of Health Care
- NURS 594 (1.5) Scholarly Inquiry: Integrating Knowledge and Practice
- NURA 596 (1.5) Nursing Scholarship: Integration and Dissemination
Master of Nursing Thesis Option for Advanced Practice Nursing: Nurse Educator Option (22.5 units)

The MN student must demonstrate an advanced ability to integrate theory related to advanced practice and nursing. Advanced practice can be conceptualized in relation to education (NUED) or leadership (APL).

Criteria for MN Thesis Option:
- Confirmation of Thesis Supervisor
- Student-MN Supervisor consultation
- Recommendation of MN Supervisor
- Completion of and/or registration in all required courses prior to enrollment in NURS 599 (6.0 Units), which replaces NURS 596 (1.5 units)
- Completion of and/or enrollment in a minimum of one additional approved research course for a total of 22.5 units
- Normally, an A (85%) average in all required courses

Students achieving less than this identified percentage would not be considered eligible to pursue a thesis option.

Master of Nursing, Advanced Practice Nursing: Nurse Educator Option - by Distributed Learning (Course-Based Option):

The Master of Nursing degree in the Advanced Practice Nursing, Nurse Educator (NUED) option, offered by the University of Victoria, School of Nursing, is a practice oriented; theory-based degree intended to prepare nurses for advanced nurse educator roles in multisectoral settings.

Graduates of the program will have enriched capacity to work across the health care delivery sector and academic settings with the skills to influence nursing practice at the health facility level and the nursing education level.

Course Requirements

Students are required to complete 16.5 units of study including an onsite program orientation prior to program commencement. In addition to completing ten 1.5 unit courses, described below, students complete a 1.5 unit Capstone requirement.

Nurse Educator Course-Based Option (16.5 units):

Required Core APN courses (4.5 units)
- NURS 501 (1.5) Philosophical and Theoretical Knowledge for Advanced Practice Nursing
- NURS 502A (1.5) Conceptualizing Research for Advanced Practice Nursing
- NURS 502B (1.5) Developing Empirical Research Knowledge and Skills

Required NUED concentration courses (12.0 units)
- NUED 570 (1.5) Engaging with Pedagogy: Teaching and Learning in Nursing Education
- NUED 571 (1.5) Critical Pedagogy in Nursing Education and Evaluation
- NUED 572 (1.5) Intersectoral Course and Curriculum Design in Nursing Education
- NUED 573 (1.5) Nurse Educator Practice I
- NUED 574 (1.5) Nurse Educator Practice II
- NURS 500 (1.5) Scholarly Writing for Advanced Practice Nursing
- NURS 594 (1.5) Scholarly Inquiry: Integrating Knowledge and Practice
- NURS 596 (1.5) Nursing Scholarship: Integration and Dissemination

Master of Nursing Thesis Option for Advanced Practice Nursing: Nurse Practitioner Option (22.5 units)

The MN student must demonstrate an advanced ability to integrate theory related to advanced practice and nursing. Advanced practice can be conceptualized in relation to education (NUED) or leadership (APL).

Criteria for MN Thesis Option:
- Confirmation of Thesis Supervisor
- Student-MN Supervisor consultation
- Recommendation of MN Supervisor
- Completion of and/or registration in all required courses prior to enrollment in NURS 599 (6.0 Units), which replaces NURS 596 (1.5 units)
- Completion of and/or enrollment in a minimum of one additional approved research course for a total of 22.5 units
- Normally, an A (85%) average in all required courses

Students achieving less than this identified percentage would not be considered eligible to pursue a thesis option.

Master of Nursing, Advanced Practice Nursing: Nurse Practitioner Option – by Distributed Learning (Course-only Option)

The Master of Nursing degree in Advanced Practice Nursing, Nurse Practitioner (NP) option, offered by the University of Victoria School of Nursing, is a course-based, practice oriented, theory-based professional degree that prepares nurses to qualify as family Nurse Practitioners in British Columbia, thus practice experiences are completed within BC.

Course Requirements

Students are expected to complete 24 units of study, including an onsite program orientation prior to program commencement in September (usually three to four days in length) and additional condensed on-site components as scheduled in every subsequent term. Students must achieve at least a "B+" in required courses and maintain a minimum sessional and
cumulative GPA of 6.0 (B+) on the UVic scale of 9.0. This minimum grade is what the School of Nursing deems necessary for students to clearly demonstrate their capacity to continue in the Master of Nursing Advanced Practice Nursing- Nurse Practitioner (NP) program. An academic review will be initiated for NP students who achieve less than a B+ in any NP option required course. Students who obtain a sessional and/or cumulative grade point average of 6.0 but who obtain less than "B+" standing in more than one required MN-NP course may be immediately withdrawn from the program.

**Required Core APN courses (4.5 units)**
- NURS 501 (1.5) Philosophical and Theoretical Knowledge for Advanced Practice Nursing
- NURS 502A (1.5) Conceptualizing Research for Advanced Practice Nursing
- NURS 502B (1.5) Developing Empirical Research Knowledge and Skills

**Required NP courses (19.5 units)**
- NUNP 531 (1.5) Applied Pathophysiology
- NUNP 532 (1.5) Pharmacological Interventions in Health and Illness
- NUNP 540 (1.5) Advanced Assessment and Diagnostic Reasoning Theory (must be taken concurrently with NUNP 541)
- NUNP 541 (1.5) Advanced Assessment and Diagnostic Reasoning Practice (must be taken concurrently with NUNP 540)
- NUNP 543 (1.5) Integrated Primary Health Care and Advanced Practice Nursing I (Theory) (Adult 1) (must be taken concurrently with NUNP 544)
- NUNP 544 (1.5) Integrated Primary Health Care and Advanced Practice Nursing I (Practice) (Adult 1) (must be taken concurrently with NUNP 543).
- NUNP 545 (1.5) Integrated Primary Health Care and Advanced Practice Nursing II (Theory) (Childbearing/ rearing Families and Children) (must be taken concurrently with NUNP 546).
- NUNP 546 (1.5) Integrated Primary Health Care and Advanced Practice Nursing II (Practice) (Childbearing/rearing Families and Children) (must be taken concurrently with NUNP 545).
- NUNP 547 (1.5) Integrated Primary Health Care and Advanced Practice Nursing III (Theory) (Adult II) (must be taken concurrently with NUNP 548)
- NUNP 548 (1.5) Integrated Primary Health Care and Advanced Practice Nursing III (Practice) (Adult II) must be taken concurrently with NUNP 547)
- NUNP 537 (1.5) Family Nurse Practitioner Internship
- NUNS 568 (1.5) Trends and Issues in Advanced Practice Nursing
- NUNS 593 (1.5) Evaluation Synthesis

**Master of Nursing and Master of Science in Health Informatics by Distributed Learning (Double Degree Option)**

The Master of Nursing and Master of Science in Health Informatics (Double Degree) option offered by the University of Victoria, School of Nursing, and School of Health Information Science is a practice-oriented, theory-based degree intended to prepare nurses who are interested in health information technology to develop graduate level competencies in both Nursing and Health Informatics. The option is intended to prepare nursing leaders with a background essential for working in the rapidly expanding field of nursing and health informatics. Graduates will be prepared to take leadership roles in informatics, telehealth, implementation of electronic health care records and other areas of emerging health technology.

**Course Requirements**

Students are required to complete 31.5 program units including an onsite program orientation prior to program commencement. In addition to completing 25.5 units of course work students will complete a 6 unit thesis. An oral examination of the thesis proposal as well as the completed thesis will be required. There are also two required cooperative learning experiences in this option. Cooperative learning experiences must usually be undertaken outside of a student’s current employment setting.

**Required core APN courses (6.0 units)**
- NURS 501 (1.5) Philosophical and Theoretical Knowledge for Advanced Practice Nursing
- NURS 502A (1.5) Conceptualizing Research for Advanced Practice Nursing
- NURS 502B (1.5) Developing Empirical Research Knowledge and Skills

**Required core HINF courses (6.0 units)**
- HINF 501 (1.5) Database Design
- HINF 503 (1.5) Research Methods in Health Informatics
- HINF 550 (1.5) Health Information Systems Design
- HINF 572 (1.5) Health Informatics: An Overview

**Electives are chosen in consultation with the program supervisors.**

**Required core HINF courses (6.0 units)**
- HINF 501 (1.5) Database Design
- HINF 503 (1.5) Research Methods in Health Informatics
- HINF 550 (1.5) Health Information Systems Design
- HINF 572 (1.5) Health Informatics: An Overview

**Electives are chosen in consultation with the supervisors. HINF electives include, but are not limited to:**
- HINF 510 (1.5) Information Management and Technology
- HINF 511 (1.5) Clinical Decision Support Systems
- HINF 531 (1.5) Ethical and Legal Aspects of Health Informatics
- HINF 551 (1.5) Electronic Health Record
- HINF 560 (1.5) Health Care Quality Improvement
- HINF 561 (1.5) Project Management in Health Informatics
PhD in Nursing by Distributed Learning

The PhD in Nursing Program will be delivered in a distributed – distance learning format, supplemented with two or three mandatory on-campus intensives. Generally, students will need to travel to UVic approximately once per year; however, additional visits may be required as appropriate for the student’s progress and supervision. Students will take distance courses through synchronous and asynchronous approaches. The program will require full-time enrolment.

Please contact the School of Nursing for further details.

The goal of the Doctoral Program in Nursing is to prepare nurse scholars to contribute to disciplinary knowledge, to demonstrate a critical understanding of works of scholars in the field, and to conduct original research. Programmatic study involves engagement with a variety of philosophical and theoretical perspectives and methodological modes of inquiry with a view to human health. Graduates will be prepared to launch a program of research that addresses professional nursing practice, policy, or education as a way of enacting their chosen career paths.

PhD in Nursing by Distributed Learning

The PhD program requires satisfactory completion of at least 13.5 units of coursework (including a mandatory NURS 693 Candidacy Examination preparation course and Dissertation Seminars), candidacy exams, a 30-unit Dissertation, and a final oral examination for a total program requirement of a minimum 43.5 units. Students who are not enrolled in the PhD in Nursing program may take only one course in the program with the permission of the instructor in the course.

It is strongly recommended that students take a graduate level statistics course. This course is chosen in consultation with the student’s supervisor based on the student’s background and research area, and is distinct from all other required PhD courses.

The courses listed below reflect the minimum requirements for program completion, however it is generally expected that students take additional courses (including but not limited to a statistics course, NURS 620, NURS 690 and additional units of NURS 680) in order to strengthen their knowledge base for a successful dissertation.

Required courses

Nursing Science

NURS 601 (1.5) Philosophy in Nursing
NURS 602 (1.5) Epistemological Discourses in the Study of Nursing

Research

NURS 604a (1.5) Research Methodology for Nursing and Health Care: Qualitative
NURS 604b (1.5) Research Methodology for Nursing and Health Care: Quantitative
NURS 693 (3.0) Candidacy Examination

Seminars

Doctoral seminars provide students with the opportunity to critique proposed, ongoing and completed research in both qualitative and quantitative research. Students will be expected to alternately lead and participate in these seminars. The seminars will be ungraded resulting in a "complete" or "incomplete" on the student’s academic record.

NURS 621 (1.5) Doctoral Seminar in Nursing Scholarship
NURS 622 (1.5) Dissertation Seminar
NURS 679 (1.5-4.5) Doctoral Research Seminar

Candidacy

Candidacy will be held following satisfactory completion of required coursework and within three years of first registering as a doctoral student in the program. Candidacy exams will include both a written and oral component. Students will either: a) write two papers approximately 25-30 pages in length, one focused on the substantive area of interest and the other on a research methodology, or b) sit for two, timed 3-hour open-book examinations, one focusing on the substantive and the other on a
chosen research methodology. Following submission of the written candidacy papers, candidates will engage in an oral defense of their written papers.

**Dissertation (30 units)**

All doctoral students must write and publicly defend a research proposal and have it approved by their supervisory committee before continuing the research process. All doctoral students are required to prepare a dissertation upon which a public examination and defense is conducted. The dissertation must qualify as a significant and original contribution to disciplinary knowledge.

**Elective Courses, Topical Seminars and Internships**

In consultation with academic advisers and/or dissertation supervisors, students may seek or be required to enrol in additional, elective course work. The number and nature of courses beyond those identified as required will vary according to the student’s academic background, research and practice experience, and career goals. Electives in the student’s substantive area and research method can be taken from the existing graduate program in the School of Nursing, courses developed by the School, in other departments or Faculties (in acknowledgement of the interdisciplinary nature of much nursing related research), by directed studies, or offered at other institutions (perhaps under the Western Dean’s Agreement). Opportunities to engage in research and teaching internships will be available. You will need to discuss the appropriateness of elective courses with a graduate academic adviser or your supervisor. The following courses may be of interest to students seeking to deepen their appreciation of research within the discipline (NURS 503, 504, NURS 620, 630, 680, 690).

**Elective course options for all nursing graduate programs**

The following courses may be applied by fourth year BSN (with permission), MN and PhD in Nursing students to respective BSN, MN or PhD program requirements. Students outside of the program option may choose from:

- Advanced Practice Leadership: NURS 503, 504, 509, 514
- Health Information Science: HINF 572, and one of 550, or 450. HINF 450 requires permission from department.
- Nurse Educator: NUED 570
- Nurse Practitioner: NUNP 531, 532, 540/541 (with permission from department); NURS 568

**Co-operative Education**

Participation in the Co-operative Education program – which enables students to acquire knowledge, practical skills for employment, and workplace experience – is available only in the double degree option Nursing and Health Informatics, and is required. Master’s students in the double degree option complete two work terms (a work term consists of four months of full-time, paid employment), and students undertake study and work terms in alternating sessions. Students should contact the Health Information Science Co-op office early in the term in which they are applying. Students are also referred to “General Regulations: Graduate Co-op”, page 56. Please note that co-op terms are treated as separate courses and are assessed a separate tuition fee.

---

**Pacific and Asian Studies**

**GENERAL INFORMATION**

The Department of Pacific and Asian Studies offers graduate programs leading to a Master of Arts degree in one of two streams: Regional Studies or Literary and Textual Studies. The MA includes course work and the writing of a Long or Short Thesis. The department is multidisciplinary and covers China, Japan, Oceania and Southeast Asia. Particular research strengths include gender, national and ethnic identities; contemporary Asian fiction, cinema, popular culture; Chinese and Japanese linguistics; contemporary theatre (Indonesia, Japan); local societies, trade, globalization; Asian-Canadian studies; Oceania studies.

For further information, see the Pacific and Asian Studies departmental website: [web.uvic.ca/pacificasia](http://web.uvic.ca/pacificasia)

Faculty Members and Areas of Research

Martin Adam, PhD (McGill)
- Buddhism ethics; Early Indian Buddhism; Buddhist philosophy; Socially engaged Buddhism; Philosophy of religion

Michael H. Bodden, PhD (Wisconsin, Madison)
- Indonesian-Malay language; Southeast Asian culture & literature; Indonesian, theatre & literature; Southeast Asian cinema; Graphic narratives from and about Asia and Asians; Human rights & the arts in Asia

Katsuhiko Endo, PhD (New York)
- World history on the Pacific & Asia; Japanese history; Philosophy of the Kyoto School; Critical theory

Timothy Iles, PhD (Toronto)
- Cinema: Asian and Japanese, live-action and animated; Technology and its implications; Science fiction cinema; Horror as a response to social and urban change; Humanism and identity issues in Japan; Popular culture: traditional, modern, postmodern

Richard King, PhD (British Columbia)
- Modern and contemporary Chinese literature; Socialist literary and cultural theory; Propaganda posters and other Chinese visual arts; Asian popular culture; Twentieth-Century Chinese intellectual, social, and cultural history

Tsung-Cheng Lin, PhD (British Columbia)
- Premodern Chinese literature and culture; Narrative tradition of Classical Chinese poetry; Poetry of Late Imperial China; Knight-errantry in Classical Chinese poetry; Poetic transition from 18th Century to early Republican China; Taiwanese literature & culture; Narrative theory

Andrew M. Marton, PhD (British Columbia)
- Urban and regional development in China; Asian cities and urban regions; Creative industries in China; Reform and internationalization of Chinese education

R. Christopher Morgan, PhD (Australian National)
- World systems analysis of Asia and the Pacific; Indigenous Peoples of Australasia; Pre-modern economies, exchange theory; Political systems of Oceania; Ethnography and world system history

Hiroko Noro, PhD (Toronto)
- Japanese language pedagogy; Japanese sociolinguistic issues; Intercultural education; Experiential learning; Arts-based language teaching

M. Cody Poulton, PhD (Toronto)
- Japanese theatre & fiction; Religious practice and pilgrimage in Japan; The limits of the Human in Asian cultures; Culture and technology in Japan

Jun Tian, PhD (Victoria)
- Chinese learning and teaching pedagogy; Classroom-based research; Second language writing; Chinese linguistics; Pre-modern and contemporary China; Translation studies Chinese-English

Adjunct Faculty Member and Areas of Research

Jordan Paper, PhD (Wisconsin, Madison)
- East Asian Studies, Chinese religious traditions

Degrees and Specializations Offered

MA

Students may define their program of study by choosing to concentrate on (1) the Regional Studies Stream (the social, cultural, historical, political and economic aspects of China, Japan, Oceania, or Southeast Asia); or (2) the Literary and Textual Studies Stream (the literary, artistic and cultural forms of China, Japan or Southeast Asia). Both streams emphasize the contemporary period and take an interdisciplinary approach to learning and research.

Facilities

The University of Victoria is building, within the University’s McPherson Library, a suitable collection of materials on the Asia-Pacific region. The department also makes every effort to provide students who require it modest funding for a research visit to the more extensive Asia-Pacific collections available in the University of British Columbia libraries in Vancouver. The University of Victoria is the home of the Centre for Asia-Pacific Initiatives and the Centre for the Study of Religion and Society, which offer Fellowships and other programs and assistance to Pacific and Asian Studies graduate students with research plans corresponding to these Centres’ respective mandates.

The University’s Humanities Computing and Media Centre and its CALL (Computer Assisted Language Learning) Facility are also excellent resources for students delving into studies and research in Pacific and Asian languages, linguistics, and computer assisted learning.

Financial Support

Pacific and Asian Studies students are eligible for University of Victoria Fellowships and or Graduate Awards on a competitive basis. In addition, the department offers several top-up scholarships of varying amounts. Teaching and research assistantships are also available on a competitive basis. Eligibility for funding is based upon GPA in the last two years of undergraduate studies, suitability for teaching assignments, and continued good progress in the student’s graduate program.

Students receive priority for funding during the first two years of the MA program. Prospective students are also encouraged to apply for external funding, such as SSHRC scholarships.
ADMISSION REQUIREMENTS

Admission to Master’s Programs

Candidates for admission to the MA program should have a minimum B+ (6.0) average in their last two years of undergraduate study and preferably have obtained their undergraduate degree in Asian Studies or a disciplinary field with significant Asia/Pacific-related course work. International students whose native language is not English must provide proof of English language proficiency. Results from a TOEFL, IELTS or MELAB test are acceptable. For details please refer to “English Language Proficiency”, page 30.

Deadlines

Applicants from outside Canada must submit their application and all necessary materials by December 15. The deadline for domestic applicants is January 15. Students wishing to be considered for a University of Victoria Fellowship must apply by these deadlines.

PROGRAM REQUIREMENTS

The Department of Pacific and Asian Studies offers graduate programs leading to the degree of Master of Arts. The MA includes course work and the writing of a thesis or major research paper.

Students may choose either a Long Thesis option or a Short Thesis option. Both options require 15 units of work.

Master’s – Long Thesis Option

This program requires 6 units of course work and a 9-unit thesis.

Program Requirements

Normally students must complete the following four 1.5 unit courses for the Regional Studies Stream:

- PAAS 500 Theories of the Pacific Region
- PAAS 550 Research Methodologies
- PAAS 590 Directed Studies

Normally, students must complete the following four 1.5 unit courses for the Literary and Textual Studies Stream:

- PAAS 501 Cultural, Literary and Linguistic Theories in Asia-Pacific Studies
- PAAS 521 Special Topics in Asia-Pacific Literature, Linguistics and Culture
- PAAS 550 Research Methodologies
- PAAS 590 Directed Studies

Other Requirements

In the case of students whose research topic requires them to use original language materials, supervisors may require additional language courses or a period of study overseas either before admission or during the course of the program.

Thesis

In this program, students write a thesis (PAAS 599) of 90-120 pages.

Oral Examination

There will be a final oral examination of the thesis, ideally occurring towards the end of the second year of the student’s program.

Program Length

The MA degree generally takes two years to complete, including the thesis, and normally requires the first year of study on campus as a full-time student.

No later than January 31 of the first year of study, the student will have formed her/his supervisory committee in consultation with the student’s supervisor.

The student may submit her/his thesis proposal to all members of the supervisory committee once the student has completed his/her mock proposal review no earlier than April 1st and no later than June 30th of the first year of study.

Master’s – Short Thesis Option

This program requires 9 units of course work and a 6-unit thesis.

Course Requirements

Normally students must complete the following 1.5 unit courses for the Regional Studies Stream: PAAS 500, 520, 550 and 590. Normally, students must complete the following 1.5 unit courses for the Literary and Textual Studies Stream: PAAS 501, 521, 550 and 590. Students may also select from among the following electives: PAAS 580 or PAAS 590 (taught by faculty member other than supervisor). Students may also take one undergraduate course numbered 300 or higher for graduate credit (subject to approval by the Graduate Adviser). Additional courses may be taken from other departments, up to a maximum of 3 units, selected in consultation with the Graduate Adviser and the student’s supervisor, and with permission of the other departments.

Other Requirements

In the case of students whose research topic requires them to use original language materials, supervisors may require additional language courses or a period of study overseas either before admission or during the course of the program.

Thesis

In this program, students write a thesis (PAAS 599) of 70-90 pages.

Oral Examination

There will be a final oral examination of the thesis, ideally occurring towards the end of the second year of the student’s program.
Program Length

The MA degree generally takes two years to complete, including the thesis, and normally requires the first year of study on campus as a full-time student.

No later than January 31 of the first year of study, the student will have formed her/his supervisory committee in consultation with the student’s supervisor.

The student may submit her/his thesis proposal to all members of the supervisory committee once the student has completed his/her mock proposal review no earlier than April 1st and no later than June 30th of the first year of study.

Co-operative Education

Participation in the Co-operative Education program - which enables students to acquire knowledge, practical skills for employment, and workplace experience - is optional for Master’s students. Master’s students complete two work terms (a work term consists of four months of full-time, paid employment), and students undertake study and work terms in alternating sessions. Interested students should contact the Humanities, Fine Arts, and Professional Writing Co-op office early in the term in which they are applying. Students are also referred to "General Regulations: Graduate Co-op", page 56.

Faculty Members and Areas of Research

Margaret Cameron, PhD (Toronto)
   Medieval Latin philosophy, ancient philosophy, philosophy of language, logic
Cindy L. Holder, PhD (Arizona)
   Social and political philosophy, philosophy of law, feminist philosophy
Eike-Henner W. Kluge, PhD (Michigan)
   Medical ethics, medieval philosophy, information ethics
Colin Macleod, PhD (Cornell)
   Contemporary political philosophy, ethics, and philosophy of law
Michael J. Raven, PhD (New York University)
   Metaphysics, philosophy of language, epistemology, philosophy of mind
Patrick Rysiew, PhD (Arizona)
   Epistemology, early modern philosophy, philosophy of language and philosophy of mind/cognitive science
David Scott, PhD (Reading)
   Early modern philosophy, history of philosophy
Scott Woodcock, PhD (Toronto)
   Ethics, philosophy of biology
Audrey Yap, PhD (Stanford)
   Logic, philosophy of mathematics, history of mathematics and logic, feminist epistemology
James O. Young, PhD (Boston)
   Philosophy of language, aesthetics and metaphysics

Degrees and Specializations Offered

The Department of Philosophy offers programs of study leading to the degrees of Master of Arts and Doctor of Philosophy.

This program has particular strengths in Aesthetics, Applied Ethics, Ethics, Epistemology, Feminist Philosophy, History of Philosophy, Logic, Metaphysics, Political Philosophy, and Philosophy of Language. Applications are particularly welcomed from students interested in these areas. Normally, applicants will have a strong undergraduate degree in Philosophy.
Facilities
The University library holds around 25,000 Philosophy volumes. Currently we have 79 active journal subscriptions, including print and online subscriptions.

Financial Support
Entering students receive competitive financial packages tenable for one year. Students must apply by February 1st to be considered for a University Graduate Fellowship. Financial assistance may also be available in the form of RAs, TAs and departmental scholarships. All eligible students should apply for funding from external sources including Social Sciences and Humanities Research Council (SSHRC).

ADMISSION REQUIREMENTS

Admission to the Master’s Program
The Department of Philosophy normally accepts students for September entry only.

Admission to MA study in philosophy is normally restricted to students with a strong undergraduate degree in philosophy. Students must have a minimum B+ (6.0) average of the final 30 units of credit (or equivalent) of their Bachelor’s degree. The Department requires a minimum score of 580 on the standard TOEFL test for applicants whose native language is not English. A short sample of written work (about 10 pages) must be submitted with the application. For further information, visit <web.uvic.ca/philosophy/grad>.

Admission to the PhD Program
Admission to the PhD program in philosophy is restricted to students who hold an MA in philosophy or an equivalent degree. University regulations permit unusually promising MA candidates to move directly into a doctoral program. For further information, visit <web.uvic.ca/philosophy/grad>.

Deadlines
To be given full consideration for admission and funding, all applicants are asked to apply by February 1.

PROGRAM REQUIREMENTS

Master’s Program

Course Requirements
Students must fulfill three requirements:
1. Take 9 units of course work. With the permission of the Graduate Adviser, up to 1.5 units of this course work may be taken in departments other than the Department of Philosophy. The Research Methods Seminar (PHIL 591) must be taken in partial satisfaction of this requirement.
2. Students must register for and complete the Professional Development Practicum (PHIL 592) for 1.5 units.
3. Write a major research project of 4.5 units (PHIL 598).

PhD Program

Course Requirements
Students must fulfill three requirements:
1. Take 9 units of courses numbered 500 and above (except PHIL 598). With the permission of the Graduate Adviser, up to 3 units of this course work may be taken in departments other than the Department of Philosophy.
2. Complete a candidacy examination (PHIL 693). In fulfillment of this requirement, all students must satisfy a logic requirement and be examined on an area of philosophical specialization and an area of philosophical competence. A dissertation proposal must be approved by a student supervisory committee.
3. Write a dissertation of 18 units (PHIL 699).

Oral Examination
Required.

Program Length
One year.

Co-operative Education
Participation in the Co-operative Education program - which enables students to acquire knowledge, practical skills for employment, and workplace experience - is optional for Master’s and PhD students. Master’s students complete two work terms, and PhD students complete three (a work term consists of four months of full-time, paid employment), and students undertake study and work terms in alternating sessions. Interested students should contact the Humanities, Fine Arts, and Professional Writing Co-op office early in the term in which they are applying. Students are also referred to "General Regulations: Graduate Co-op", page 56.

Condensed Matter Physics: Condensed Matter Physics is the study of materials and their properties. The main focus at the University of Victoria is on nanoscale physics, in which the physical properties of magnetic, semiconductor and superconducting materials are studied on the nanometer range, that is, a bit larger than the size of individual atoms. Nanoscale physics is a new and rapidly developing field that encompasses both fundamental studies and applications. Current research activities include ultrafast magnetic imaging using modern femtosecond laser techniques, in-situ studies of magnetic properties of both thin film and nanostructured magnetic materials, computational magnetic microscopy, semiconductor spintronics and quantum information, dynamics of superconducting materials on nanometer length scales, and time-resolved and spin-polarized scanning tunneling microscopy.

Experimental Particle Physics: The particle physics group is engaged in research at facilities around the world and, as one of the designers and builders of the TRIUMF facility in Vancouver, it benefits from interactions with TRIUMF physicists and access to TRIUMF facilities. The current activities of the group include the operation of the BABAR detector at SLAC and analysis of the data collected with it; detector construction and physics studies for the ATLAS experiment at CERN; detector research and development projects associated with the T2K long-baseline neutrino experiment and future e+e linear colliders; and development and deployment of grid computing.

Medical Physics: Application of radiation (photons and electrons) to the treatment and diagnosis of disease. Project areas include the development and application of Monte Carlo based dose calculations, 3D radiation dosimetry, intensity modulated radiation therapy, portal imaging, radionuclide therapy, and the application of spectroscopic techniques for treatment monitoring. Work is carried out in conjunction with the Vancouver Island Cancer Centre of the BC Cancer Agency in Victoria and the life science program at TRIUMF in Vancouver.

Ocean Physics and Geophysics: Research is conducted in the department and also in association with the School of Earth and Ocean Sciences at UVic and at the nearby Institute of Ocean Sciences, the Pacific Geoscience Centre, and the Canadian Centre for Climate Modelling and Analysis. Current ocean physics activities include observational and theoretical studies of ocean mixing, air-sea interaction, estuarine circulation, breaking waves and bubble clouds, and the investigation of many topics related to the analysis and modelling of interannual variability of the earth’s climate. The program includes applications to programs of societal concern as well as basic research.

Degrees and Specializations Offered

The Department of Physics and Astronomy offers programs of study and research leading to the degrees of Master of Science (MSc) and Doctor of Philosophy (PhD). The Department also offers a coursework program leading to a Graduate Certificate in Medical Physics (GCMP).

All MSc and PhD degrees are awarded with a major in Physics, while the department offers research specialization in the areas of study listed below. Note that the program requirements differ for research with a specific concentration in Astronomy, Medical Physics, or Ocean Physics.

Areas of Study and Facilities

Astronomy and Astrophysics: Faculty research interests include galaxy formation and evolution, clusters of galaxies, large-scale structure, computational astrophysics, galactic structure, stellar structure and evolution, gravitational lensing and stellar chemistry. The Astronomy Group benefits from close relations with the nearby Herzberg Institute of Astrophysics, its staff, telescopes (1.2m and 1.8m), and instrumentation. Faculty and students also have access to Canadian facilities such as the Canada-France-Hawaii 3.6m Telescope, the James Clerk Maxwell mm/submm Telescope, the Atacama Large Millimetre Array and the Gemini twin 8m telescopes.

Condensed Matter Physics: Condensed Matter Physics is the study of materials and their properties. The main focus at the University of Victoria is on nanoscale physics, in which the physical properties of magnetic, semiconductor and superconducting materials are studied on the nanometer range, that is, a bit larger than the size of individual atoms. Nanoscale physics is a new and rapidly developing field that encompasses both fundamental studies and applications. Current research activities include ultrafast magnetic imaging using modern femtosecond laser techniques, in-situ studies of magnetic properties of both thin film and nanostructured magnetic materials, computational magnetic microscopy, semiconductor spintronics and quantum information, dynamics of superconducting materials on nanometer length scales, and time-resolved and spin-polarized scanning tunneling microscopy.

Experimental Particle Physics: The particle physics group is engaged in research at facilities around the world and, as one of the designers and builders of the TRIUMF facility in Vancouver, it benefits from interactions with TRIUMF physicists and access to TRIUMF facilities. The current activities of the group include the operation of the BABAR detector at SLAC and analysis of the data collected with it; detector construction and physics studies for the ATLAS experiment at CERN; detector research and development projects associated with the T2K long-baseline neutrino experiment and future e+e linear colliders; and development and deployment of grid computing.

Medical Physics: Application of radiation (photons and electrons) to the treatment and diagnosis of disease. Project areas include the development and application of Monte Carlo based dose calculations, 3D radiation dosimetry, intensity modulated radiation therapy, portal imaging, radionuclide therapy, and the application of spectroscopic techniques for treatment monitoring. Work is carried out in conjunction with the Vancouver Island Cancer Centre of the BC Cancer Agency in Victoria and the life science program at TRIUMF in Vancouver.

Ocean Physics and Geophysics: Research is conducted in the department and also in association with the School of Earth and Ocean Sciences at UVic and at the nearby Institute of Ocean Sciences, the Pacific Geoscience Centre, and the Canadian Centre for Climate Modelling and Analysis. Current ocean physics activities include observational and theoretical studies of ocean mixing, air-sea interaction, estuarine circulation, breaking waves and bubble clouds, and the investigation of many topics related to the analysis and modelling of interannual variability of the earth’s climate. The program includes applications to programs of societal concern as well as basic research.
**Theoretical Physics:** Current areas of research focus on questions in particle and astroparticle physics: the physics of the electroweak scale, the nature of dark matter, and the role of particle physics in the early universe. Further research areas include more formal study of strongly interacting regimes of quantum field theory and fluid dynamics, using various techniques e.g. from string theory. The group has links with TRIUMF, and the Perimeter Institute.

**Financial Support**
See <www.phys.uvic.ca>.

Students admitted to the MSc and PhD program in Physics and Astronomy have access to a funding package that may include: University of Victoria Awards, Research Assistantships (RAs), Teaching Assistantships (TAs) and various Donor Awards. Students eligible for external funding (e.g. from NSERC) are encouraged to apply. The Department operates under a set of financial support rules which provide guaranteed funding for all students, based on satisfactory performance and progress, for up to 2 years for an MSc and up to 5 years beyond the BSc level for those in the PhD program.

Please contact the graduate adviser of the department for additional details.

**Admission Requirements**
See <www.phys.uvic.ca>.

**Admission To MSc Programs**
The normal prerequisite for all programs is a (UVic equivalent) Honours degree in Physics, Astronomy or related subjects. Students admitted to the MSc program, but with backgrounds judged to be less than that of a UVic Honours degree (e.g. a Major degree), are normally required to take additional undergraduate courses in Physics, Astronomy and Mathematics to satisfy the stated prerequisite.

**Admission To PhD Programs**
The normal prerequisite for all programs is a (UVic equivalent) MSc degree in Physics, Astronomy or related subjects. Students already registered in the UVic MSc program may have the opportunity to enter the PhD program directly via the MSc-to-PhD transfer process. See <www.phys.uvic.ca> for further details and requirements.

**Admission to the GCMP Program**
The normal prerequisite is a PhD in Physics (or related areas) from a recognized post-secondary institution. The CAMPEP accredited Graduate Certificate in Medical Physics is a two-term program of study for students with a PhD in Physics wishing to transition to a clinical career in Medical Physics. Students completing this program will be qualified to enter CAMPEP-accredited residency programs.

**International applicants**
Applicants for MSc programs who completed their undergraduate degree at a non-Canadian university are normally expected to take the Graduate Record Examination (GRE), General and Subject exams, and submit the results to the Graduate Admissions and Records Office. Applicants for MSc, PhD or GCMP programs whose native language is not English must also satisfy the English Competency Requirement for the Faculty of Graduate Studies (see "Faculty Admissions", page 29, for details). Students with this qualification may still be required to complete English language courses along with their program-related course work.

**Program Requirements**
See <www.phys.uvic.ca>.

Students registered in the graduate program are expected to make satisfactory progress in the program of research and coursework agreed to with their supervisor and supervisory committee. Students may also apply for Teaching Assistantships (TAs) as part of their financial package.

**Grades**
Graduate students must maintain a cumulative GPA of at least 5.0 (B) for all required courses (namely those specified by the student’s supervisory committee as part of the program). Individual course grades of B- or below are considered unsatisfactory and trigger a notification of Faculty of Graduate Studies grade requirements, with a subsequent review and recommendation for action by the supervisory committee.

**Candidacy Exam**
The candidacy exam (PHYS 693) is required of all PhD students and is normally taken within the first 18 months of, and no later than two years after, a student’s first registration in (or transfer to) the PhD program.

**Thesis**
The thesis requirement for MSc and PhD degrees (PHYS 599 or PHYS 699) applies to all students, independent of program concentration. All registrations in PHYS 699 must be accompanied by registration in PHYS 693 until 693 has been passed.

**MSc in Physics**

Program Requirements
PHYS 500A and 502A plus an additional 3.0 units chosen from the PHYS graduate course list ........................................ 6.0
Additional courses as required ........................................ 3.0
Colloquium PHYS 560 .................................................. 0.0
Thesis (normally 6.0 units) PHYS 599 .......................... 6.0
Final oral examination
Total (minimum) .................................................... 15.0
MSc in Physics — Concentration in Astronomy

Program Requirements

ASTR 561 ................................................................. 1.5
A minimum of 4.5 units chosen from Physics and/or Astronomy graduate courses .................. 4.5
A minimum 3 additional units, as required ......................... 3.0
Colloquium ASTR 560 .................................................. 0.0
Thesis (normally 6.0 units) PHYS 599 .......................... 6.0
Final oral examination
Total (minimum) ......................................................... 15.0

MSc in Physics — Concentration in Ocean Physics

Program Requirements

Normally a minimum of 6 graduate course units including PHYS 500A and 502A .................. 6.0
Additional undergraduate or graduate courses as required (minimum) ................................ 3.0
(Students lacking the appropriate background in fluid dynamics or electromagnetic theory may be required to complete further undergraduate courses as part of or in addition to the above requirement.)
Colloquium PHYS 560 .................................................. 0.0
Thesis (normally 6.0 units) PHYS 599 .......................... 6.0
Final oral examination
Total (minimum) ......................................................... 15.0

MSc in Physics — Concentration in Medical Physics

Program Requirements

PHYS 534, 539, 540, 544, 545, 546 ................................. 7.0
Additional courses, normally at the graduate level ........ 3.0
Colloquium PHYS 560 .................................................. 0.0
Thesis (normally 6.0 units) PHYS 599 .......................... 6.0
Final oral examination
Total (minimum) ......................................................... 16.0

PhD in Physics — Concentration in Astronomy

Program Requirements

1. Such other courses as required by the supervisory committee, with the total number of course units beyond the BSc level being normally at least 10.5 (of which at least 7.5 must be graduate).
2. Colloquium ASTR 560 (0.0 units).
3. ASTR 661 (1.5).
4. Satisfactory completion of a candidacy examination, PHYS 693 (3.0 units).
5. Dissertation (normally 30 units) PHYS 699.
6. Final oral examination.

PhD in Physics — Concentration in Ocean Physics

Program Requirements

1. Such other courses as required by the supervisory committee to bring the total of graduate course units beyond the BSc level to at least 12, of which at least 9 units must be graduate and including the core courses (PHYS 500A, 502A), or their equivalent.
2. Colloquium PHYS 560 (0.0 units).
3. Satisfactory completion of the Candidacy examination, PHYS 693 (3.0 units).
5. Final oral examination.

PhD in Physics — Concentration in Medical Physics

Program Requirements

1. Such other courses as required by the supervisory committee with the total number of course units beyond the BSc level being normally at least 13 and including PHYS 500A and 502A or their equivalent.
2. Colloquium PHYS 560 (0.0 units).
3. Satisfactory completion of a candidacy examination, PHYS 693 (3.0 units).
5. Final oral examination.

Graduate Certificate in Medical Physics

Program Requirements

1. PHYS 534, 535, 539, 540, 544 and 545 (8.0 units).
2. Graduation requires completion of all required courses with a minimum grade of B.

Co-operative Education

Participation in the Co-operative Education program – which enables students to acquire knowledge, practical skills for employment, and workplace experience – is optional for Master’s
and PhD students. Master’s students complete two work terms and PhD students complete three (a work term consists of four months of full-time, paid employment). Students require permission from their academic adviser and graduate adviser, as well as the Co-op coordinator, to participate in the Co-op program. Interested students should contact the Physics and Astronomy Co-op office early in their first term. Students are also referred to "General Regulations: Graduate Co-op", page 56.

**Faculty Members and Areas of Research**

*Colin J. Bennett, PhD (Illinois)*

Comparative politics and public policy (advanced industrial countries); American government and politics; information and communications policy

*Michele Bonner, PhD (Toronto)*

Comparative politics; Latin American politics; democratization; human rights; social movements; police violence and reform; gender and politics

*Marlea Clarke, PhD (York)*

African Politics (South and Southern Africa focus), political economy of development, labour and social movements, employment and labour market restructuring, globalisation and democratisation in Africa, gender and politics

*A. Claire Cutler, PhD (UBC)*

International relations theory; international law and organization; private international trade law; international political economy; dispute resolution

*Rita Kaur Dhamoon, PhD (UBC)*

Identity/difference politics and power, including multicultural policies and theories, culture and politics, nation-building, gender politics and feminism, intersectionality, critical race theory, post-colonial and anti-colonial politics, solidarity politics, citizenship and democratic politics, with specialized focus on Canada

*Avigail Eisenberg, PhD (Queen’s)*

Democratic theory including pluralism, feminism and minority rights; Canadian politics including constitutional law and politics, minority groups, human rights and civil liberties

*Simon Glezos, PhD (John Hopkins)*

Contemporary Political Theory; IR Theory; Speed and Technology; Theories of the State; Theories of Political Violence; Globalization; Contemporary Information Technologies; Capitalism and Resistance

*Matt James, PhD (UBC)*

Canadian constitutionalism and citizenship, Canadian politics, social movements, prestige, political theory

*Arthur Kroker, PhD (McMaster)*

Technology, culture and theory; contemporary French and German political theory; Canadian political and social thought; ethics and biotechnology

*James (Jamie) Lawson, PhD (York)*

Canadian Politics and Public Policy; natural resource policy and politics; environmental policy and politics; forest policy and politics; Canadian political economy; indigenous/newcomer relations; historical and geographical approaches to politics; philosophy of history

*Oliver Schmidtke, PhD (European Univ. Inst., Florence)*

Citizenship and Immigration; identity politics; comparative politics; xenophobia and racism; European integration

*Heidi Kiiwetinepinesiik Stark, PhD (Minnesota)*

Comparative Indigenous Politics, Aboriginal and Treaty Rights, Federal Indian Policy, and Indigenous Law
Reeta Tremblay, PhD (Chicago)

Comparative Politics and Comparative Federalism, South Asian Political Economy, Nation-State and Secessionist Movements in India and Indian Popular Cinema

Amy C. Verdun, PhD (European University Institute, Florence)

European integration studies; monetary integration; European integration theory; European comparative politics; international political economy; international relations

R. B. J. (Rob) Walker, PhD (Queen’s)

Contemporary social and political thought; theories of discourse, ideology and culture; philosophy of social science; international political theory; concepts of space and time in political thought; modernity/postmodernity

Scott Watson PhD (UBC)

International relations theory; international security; migration and refugee policy; securitization theory

Michael C. Webb, PhD (Stanford)

International political economy; globalization and governance; Canadian foreign policy

Andrew Wender, PhD (UVic)

Middle East politics; interconnections among religion, politics, society, and culture within the Middle East and globally; political thought within historical contexts; comparative political thought; politics in relation to world history

Guoguang Wu, PhD (Princeton)

Comparative politics (developing, authoritarian, and communist countries), liberalization and democratization, East Asian politics, China, Hong Kong, Taiwan, Asia-Pacific international relations, Chinese political thought

Feng Xu, PhD (York)

Chinese politics, comparative politics (East Asia); gender politics (especially East Asia); migration and citizenship; national and diaspora identities; policy ideas, translation theory and global hegemony

**Degrees and Specializations Offered**

The Department of Political Science offers a program of study leading to the degrees of Master of Arts and Doctor of Philosophy in Political Science.

The MA program provides an opportunity for advanced research in most areas of Political Science. The PhD program is especially appropriate for students interested in any of the six areas of concentration:

a) Contemporary Political Theory

b) International and Transnational Politics

c) Democratic Constitutionalism

d) Comparative Public Policy and Governance

e) Cultural, Social and Political Thought

f) Politics of the Global South

Full information on supervisory resources and Political Science courses can be found on the department’s website: <web.uvic.ca/polisci/~graduate>.

**Facilities, Research Centres and Internships**

In addition to the range of courses and faculty expertise within the department, the program has many interdisciplinary resources and opportunities. Students are encouraged to take at least one course outside of the department. There is an extensive expertise on political issues in other departments, including Indigenous Governance, Law, Philosophy, Gender Studies, History, Environmental Studies and Public Administration. In addition, all six areas of concentration in the PhD program are deeply embedded in interdisciplinary perspectives. For example, Democratic Constitutionalism involves collaboration among the Departments of Philosophy, Political Science and Law; Cultural, Social and Political Thought combines perspectives from Anthropology, English, History, Political Science and Sociology; Comparative Public Policy and Governance draws on resources from Political Science and Public Administration.

A full slate of seminars, colloquia, lectures and conferences provide many excellent opportunities for collegial interaction among graduate students and between graduate students and faculty. These include the Victoria Colloquium on Political, Social and Legal Theory which students may take for course credit. This colloquium involves the interaction of theorists with international reputations and students from a variety of disciplines.

The department also has strong ties with various research centres on campus, including the Centre for Pacific and Asian Initiatives, the Centre for Global Studies, the Centre for European Studies and the Centre for Studies in Religion and Society.

The department also collaborates in the administration of British Columbia’s Legislative Internship Program. Interns may receive a two-course (3 unit) credit for a research report related to their work (POLI 580) which they are required to submit to a two-member examination committee of the department. This program is open only to selected graduates of British Columbia universities, who must apply to the program and are chosen on a competitive basis. Further information is available at: <www.leg.bc.ca/content-peo/Pages/Legislative-Internship-Program.aspx>.

**Financial Support**

Political Science students are eligible for University of Victoria Fellowships. In addition, the department offers several scholarships of varying amounts. Students are automatically considered for internal scholarships and they are awarded on a competitive basis. The department also offers teaching and research assistantships, which are also awarded on a competitive basis, with priority given to incoming students. All candidates
applying to our master’s program by the January 15th deadline are automatically considered for a teaching assistantship. All other students must apply. All eligible students are also strongly encouraged to apply for funding from external sources such as SSHRC.

ADMISSION REQUIREMENTS

General
Admission into the department is determined on a competitive basis. Applications are first reviewed by the Graduate Admissions and Records Office and then by the Political Science Admissions and Awards Committee. In addition to the materials required by the Graduate Admissions and Records Office (two letters from academic referees, application form and official transcripts), the department asks all master’s applicants to submit a one-to-two page statement of research interests. It requires that PhD applicants submit a two-to-five page statement of intent and a sample of their scholarly work, normally an academic paper. Not all students who meet the minimum requirements can be admitted. Typically, eight to ten MA students and two to five PhD students are admitted into the program each year.

Applicants for admission whose first language is not English, who are not holding a recognized degree from a country where English is an official language, or who have resided in Canada or other English-speaking countries for less than three consecutive years immediately prior to the session applied for, must take the Test of English as a Foreign Language (TOEFL) and achieve a minimum score of 600 (paper test).

Admission to the Master’s Program
The normal minimum for admission to the MA program is a Bachelor of Arts (BA) preferably in Political Science, with an average of B+ (6.0 GPA) in the final two full years of study leading to this degree. Students without a strong background in Political Science may be considered for admission upon completing a non-degree undergraduate unclassified year of course work in upper-level political science courses and attaining first-class standing.

Admission to the PhD Program
The normal minimum for admission to the PhD program is an MA in Political Science with an average of A- in all Political Science graduate courses. The department will only consider applicants who are interested in one of the six areas of concentration: Contemporary Political Theory; International and Transnational Politics; Democratic Constitutionalism; Comparative Public Policy and Governance; Cultural, Social and Political Thought; Politics of the Global South.

Concentration in Cultural, Social and Political Thought (CSPT)
This interdisciplinary program is open to selected MA and PhD students in English, Environmental Studies, History, Political Science and Sociology. Students must apply online, choosing the Concentration in Cultural, Social and Political Thought option for Political Science. If approved by the department, the application will be reviewed by the CSPT Admissions Committee. Only students already accepted into an MA or PhD program in English, Environmental Studies, History, Political Science or Sociology may be admitted to CSPT. For full information about the program see <www.uvic.ca/socialsciences/politicalscience/graduate/cspt/index.php>.

Students must meet the core graduating requirements of the individual departments as well as specific requirements of the CSPT program.

See also the entry for Concentration in "Concentration in Cultural, Social and Political Thought (CSPT)", page 3.

Deadlines and Entry Points
To be given full consideration for admission and funding, all domestic applicants are asked to apply by January 15 for September admission. International applicants must apply by December 15. The admissions process closes on May 15. Both the MA and PhD programs have September entry points.

PROGRAM REQUIREMENTS

All programs must be approved by the graduate adviser to ensure balance and focus in each student’s program.

Master’s Program
The Political Science department offers only a thesis option MA program, which includes 6 units of course work and a thesis worth 9 units. The Master’s program is designed to be completed in 12 months. Part-time study is permitted, but the degree must be completed within five years of the initial registration.

Course Requirements
All MA students are required to complete four 1.5 unit courses. At least two of these courses (3 units) must be taken from the following list of field seminars: POLI 507, 508, 509, 516, 540. Students may take one course (1.5 units) that is either a senior undergraduate course (300 or 400 level), a directed readings course (POLI 590) or a graduate course offered by another department. Students may take the remaining course (1.5 units) from other graduate courses offered in the department.

Master’s Thesis
All MA students are required to write a Master’s thesis (POLI 599) worth 9 units which is no longer than 100 pages and which they defend through an oral examination conducted by their supervisory committee and an examiner chosen from outside the Political Science department. Full-time students are required to have a thesis proposal approved by their supervisory committee by May 15 of the academic year in which they entered the program.

Summary of Requirements
Field Seminars (POLI 507, 508, 509, 516, 540) ...................... 3.0
Elective courses ........................................................................... 3.0

---

**Summary of Requirements**

Field Seminars (POLI 507, 508, 509, 516, 540) ...................... 3.0
Elective courses ........................................................................... 3.0
Summary of Requirements

Thesis proposal complete Thesis (POLI 599) .............................. 9.0
Total ................................................................................... 15.0

MA Program with CSPT

CSPT Master’s students must complete 7.5 units of course work. Students must complete POLI 509 (1.5 units), a field seminar drawn from the following list: POLI 507, 508, 516, 540 (1.5 units); one additional graduate seminar in Political Science (1.5 units); and two CSPT graduate seminars (3.0 units). Students must also complete a MA thesis worth 9 units. The topic must be within the field of CSPT. At least two members of the examining committee must be drawn from the faculty members affiliated with the CSPT program.

PhD Program

PhD candidates are required to complete 42.0 units in accordance with the following program:

Course Requirements

All PhD students are required to complete six 1.5 unit graduate courses beyond the MA degree, including POLI 600 (Professional Development Seminar). Students must choose two field seminars (3 units) (POLI 607, 608, 609, 616, 640, CSPT 601), one in each of the areas in which they will be taking a candidacy examination. Students electing to take the candidacy examination in Comparative Policy and Governance (jointly administered with the School of Public Administration) must take Poli 607, Poli 610 and one other field seminar. Students must also complete POLI 693 (Candidacy Examination—3.0 units). Students may be required to complete an additional course in methodology at the request of their supervisory committee. The remaining elective courses may be taken from PhD seminars offered by the department. Students may also choose to take one graduate course (1.5 units) (and no more than two graduate courses) from outside the Political Science department. Students must pass all course work with at least a B+ average before proceeding to the field examinations.

Professional Development Seminar

POLI 600 is a compulsory seminar worth 1.5 units for PhD students in Political Science that runs from September until April. Students are introduced to the professional aspects of the discipline including: how to write grant applications, how to teach effectively, how to design a syllabus and a CV, how to contribute to the administrative and intellectual community in their department and in political science more broadly.

Candidacy Examinations

Field seminars will help prepare students for candidacy written and oral examinations. Readings for the candidacy exams will be broader than the course work and will be determined according to reading lists drawn up by the faculty in the field being examined and in consultation with the student. Students must successfully complete candidacy examinations in two of the following fields: Canadian Politics, Comparative Politics, International Relations, Political Theory. Students may substitute one of these examinations for an interdisciplinary examination in Comparative Public Policy and Governance or Cultural, Social and Political Thought.

Dissertation

Within three to six months after passing the candidacy examinations, students are required to write and orally defend a dissertation proposal before their supervisory committee. The proposal and oral defense must be considered satisfactory before the student may proceed to the dissertation. All students are required to submit and orally defend a dissertation worth 30 units of credit.

Summary of Requirements

3.0 units of field seminars (POLI 607, 608, 609, 616, 640; CSPT 601) ......................................................... 3.0
Elective courses ................................................................. 4.5
Professional Development Seminar (POLI 600) ................................................................. 1.5
POLI 693 ................................................................................. 3.0
Completion of two Candidacy Examinations
Dissertation Proposal
Dissertation (POLI 699) .......................................................... 30.0
Total ................................................................................... 42.0

PhD Program with CSPT

CSPT doctoral students must meet the core requirements of their own department as well as the specific requirements of the CSPT program. A CSPT PhD student must complete 9.0 units of course work including POLI 600 (Professional Development Seminar). Students must complete POLI 609 (1.5 units), CSPT 601 (1.5 units); two other graduate courses in Political Science (3.0 units), and one other CSPT course or a related subject approved by the CSPT program director.

Students must write a dissertation that meets the requirements of both the Department of Political Science and the CSPT program. The topic must be within the field of CSPT. At least two members of the examining committee must be affiliated with the CSPT program.

Students enrolled in the CSPT program must successfully complete a candidacy examination in CSPT.

Summary of Requirements

POLI 609 ................................................................................... 1.5
CSPT 601 ................................................................................... 1.5
Other POLI Graduate Seminars ............................................. 3.0
CSPT Graduate Seminar ....................................................... 1.5
Professional Development Seminar (POLI 600) ..................... 1.5
POLI 693 ................................................................................... 3.0

UVIC GRADUATE CALENDAR JANUARY 2017

GRADUATE PROGRAMS
CO-OPERATIVE EDUCATION

Participation in the Co-operative Education program – which enables students to acquire knowledge, practical skills for employment, and workplace experience – is optional for full-time Master's and PhD students. Master's students complete two work terms and PhD students complete three (a work term consists of four months of full-time, paid employment). Students require permission from their academic adviser and graduate adviser, as well as the Co-op co-ordinator, to participate in the Co-op program. Interested students should contact the Political Science Co-op office before the second week of their first term. Students are also referred to "General Regulations: Graduate Co-op", page 56.

Psychology

GENERAL INFORMATION

The Department of Psychology offers programs leading to the degrees of Master of Science and Doctor of Philosophy. We offer training to the PhD degree in five areas of specialization: Clinical Psychology (with specialization in Neuropsychology or Lifespan Development), Cognition and Brain Science, Experimental Neuropsychology, Lifespan Development, and Social Psychology. In addition, individual areas of study leading to the MSc or PhD degree may be designed according to the interests of individual students and faculty members. The clinical psychology training program is fully accredited by the Canadian Psychological Association. (Prior to Dec. 31, 2014, the program had also been accredited by APA, which no longer accredits Canadian programs).

The programs are designed to provide students with:

- knowledge and training in their area of specialization
- the skills necessary to conduct and communicate the results of new research and to work co-operatively with others in a research environment; and
- opportunities to gain practical experiences in various aspects of professional psychology.

The PhD involves at least two years of study beyond the master’s degree, of which at least one entire Winter Session must be as a full-time student.

For more information, please see our website.

Faculty Members and Areas of Research

C. A. Elizabeth Brimacombe, PhD (Iowa State)
Eyewitness testimony, social psychology, social cognition

Daniel N. Bub, PhD (Rochester)
Normal object identification, category-specific agnosia, semantic memory, face recognition

Catherine L. Costigan, PhD (Michigan)
Clinical psychology, children and adolescents, families, immigration, culture/ethnicity, children with disabilities

Marion F. Ehrenberg, PhD (Simon Fraser)
Clinical psychology, parenting and adjustment in divorcing families, professional issues in child custody and access

Mauricio A. Garcia-Barrera, PhD (U of Georgia)
Executive functions, prefrontal cortex development, neuropsychological assessment, ADHD
Jody Gawryluk, PhD (Dalhousie)
Clinical neuropsychology, neuroimaging, functional magnetic resonance imaging, changes in brain structure/ function in disorder and recovery

Robert Gifford, PhD (Simon Fraser)
Environmental, social-personality

Frederick M.E. Grouzet, PhD (UQAM)
Social psychology, positive psychology, human motivation and self-regulation, life goals and social values, self-determination theory, psychological well-being and happiness, pro-social and pro-environmental behaviours, cultural and life transition, posttraumatic growth.

Scott M. Hofer, PhD (U of Southern California)
Cognitive aging, developmental methodology, longitudinal studies, lifespan development

Clay B. Holroyd, PhD (U of Illinois at Urbana-Champaign)
Neurobiological mechanisms of cognitive control, error detection and correction

Adam Krawitz, PhD (Michigan, Ann Arbor)
Cognitive neuroscience, working memory, executive control, decision-making, functional magnetic resonance imaging, computational modelling

Christopher E. Lalonde, PhD (British Columbia)
Social-cognitive development in childhood, children's theories of mind, identity development, cultural influences on development

Bonnie J. Leadbeater, PhD (Columbia)
Developmental psychopathology, depression, teen parenting, problem behaviours, victimization and injury prevention

D. Stephen Lindsay, PhD (Princeton)
Memory and cognition, subjective phenomenology of cognition, eyewitness memory

Stuart W.S. MacDonald, PhD (UVic)
Cognitive aging, life-span development, predictors of cognitive decline, analysis of change

Michael E. J. Masson, PhD (Colorado)
Cognitive psychology, memory, language comprehension, object identification, skill acquisition and computational models

Catherine A. Mateer, PhD (Western Ontario)
Clinical neuropsychology, cognitive rehabilitation, memory, attention and executive function, brain injury

Sarah Macoun, PhD (UVic)
Clinical neuropsychology, attention and executive function; intervention and rehabilitation of cognitive processes

Ulrich Mueller, PhD (Temple)
Development of executive function, social-communicative development, role of language in social-cognitive development, history of developmental psychology

Andrea M. Piccinin, PhD (USC)
Statistical methods for longitudinal data, cognitive development, aging

Marsha G. Runtz, PhD (Manitoba)
Clinical psychology, child maltreatment, family violence, women's health

John Sakaluk, PhD (University of Kansas)
Social Psychology, close relationships and sexuality, methodology and advanced statistics

Colette Smart, PhD (Loyola, Chicago)
Clinical neuropsychology, cognitive rehabilitation, mindfulness, attention and emotion regulation, older adults, acquired brain injury

Danu A. Stinson, PhD (Waterloo)
Self-esteem, relationships, health

Timothy Stockwell, PhD (London, UK)
Prevention of alcohol and other drug-related harm, alcohol and other drug policy, measurement of alcohol consumption and related harms

James W. Tanaka, PhD (Oregon, Eugene)
Face recognition, expert object recognition, human electrophysiology, autism

Holly Tuokko, PhD (UVic)
Clinical neuropsychology, clinical aging, cognitive decline, competence, mental health

Brianna Turner, PhD (Simon Fraser)
Clinical psychology, self-injury, suicide, self-destructive behaviours, dialectical behaviour therapy

Erica Woodin, PhD (Stony Brook)
Clinical psychology, domestic violence, substance abuse, prevention

Degrees and Specializations Offered
• Master of Science in Clinical Psychology
• Master of Science in Psychology
• Doctor of Philosophy in Clinical Psychology
• Doctor of Philosophy in Psychology
Facilities

Our department has the following facilities for training and research.

- Psychology Clinic
- The Brain and Cognition Laboratory
- The Human Interaction Lab

Financial Support

All applicants are considered for University fellowships, but there are many more qualified applicants than there are awards. A limited number of teaching assistantships are available from the department during the Winter and Summer sessions. Some faculty members employ students as research assistants. All eligible students are encouraged to apply for funding from other sources such as NSERC, SSHRC, or CIHR, Alzheimer’s Society of Canada.

The Psychology department strives hard to provide at least some financial assistance to all graduate students in the programs. These are typically in the form of teaching and research assistantships. University of Victoria Fellowships and awards are available on a competitive basis. For a summary of various sources of support available to graduate students in Psychology, please see Appendix B in the Graduate Program Regulations document at: http://www.uvic.ca/socialsciences/psychology/assets/docs/current/gradRegs.pdf. Specific programs (e.g., Cognition and Brain Science) have financial “packages” for graduate students. For the most up-to-date information, please see our website. All eligible graduate students are expected to apply for funding from provincial, federal and other external sources during their tenure in the graduate program.

ADMISSION REQUIREMENTS

General

An undergraduate degree in psychology or its equivalent with at least a B+ (6.0 GPA) average in the last two years leading to the degree is recommended. Applicants should have taken at least one course in applied statistics and courses in major areas of psychology such as learning/cognition, physiological/neuropsychology, and social/personality/abnormal psychology. Students whose first language is not English must take the Test of English as a Foreign Language and receive a score of at least 600 on the paper-based test.

Graduate Record Examination

Under typical circumstances, applicants must provide scores from the General Test (verbal, quantitative, and analytical writing sections) of the Graduate Record Examination (GRE) unless an exemption is sought and approved by the department Graduate Executive committee. No specific cut-off scores are used to determine acceptability.

Personal Letter

Applicant must also provide a personal letter that:

1. identifies the primary area of specialization desired
2. describes areas of research interest
3. names at least two faculty members with whom the applicant wishes to work
4. gives details of current activity (e.g., courses in progress)
5. indicates whether financial support will be required

Admission requires that a faculty supervisor is available.

Clinical Psychology Applicants

Applicants intending to pursue clinical training with specialization in neuropsychology or lifespan development must declare their intent at the time of application under Field of Study. Such applicants will then be reviewed by the admissions committee for the clinical program based on:

1. background, interest and experience
2. competitiveness of transcripts with other applicants for clinical training
3. a personal interview focusing on interests and suitability for clinical training

The academic progress and clinical aptitude of students admitted to clinical training will be reviewed annually.

Students providing psychological services to children and other vulnerable individuals at the Psychology Clinic and at practicum settings in the community will be required to complete a Criminal Record Check.

Deadline

Applications are due at the Graduate Admissions and Records Office by December 1st. Students should keep in mind that substantial lead time is required to register for and take the GRE (and, if required, the TOEFL) in time for results to be received within the deadline. For students applying to the Clinical Psychology program, all documents, including GRE scores, MUST be received by the deadline. For students not applying to the Clinical Psychology program, application documents (e.g., GRE scores) received after the application deadline MAY be considered, but this is not guaranteed.

The Department of Psychology makes every effort to communicate offers of admission by April 1st.

PROGRAM REQUIREMENTS

All degrees require that students satisfy the Psychology department’s breadth requirement, called Undergraduate Competence Requirement (UCR). Students will be asked to demonstrate competence in the areas listed above (under “Admission Requirements” “General”) by the end of the first year of graduate studies. Competence may be demonstrated in various ways such as by passing or successfully challenging undergraduate courses or by passing graduate courses.
**Master of Science in Clinical Psychology**

**Course Requirements**

PSYC 502: Research Apprenticeship (3.0 units)

Methods and Statistics Requirements (3.0 units):

Lifespan Development Emphasis:
Two of: PSYC 518, 532, 533, 560

**Neuropsychology Emphasis - Either:**

Two of PSYC 518, 532, 533; or

One of PSYC 518, 532, 533; and one of: PSYC 504 (topic must be statistics/methods related), 541, 574A, or 574B

**Clinical Courses**

PSYC 581, 582, 583, 584, 585, 589; 597 (in each of first two winter sessions in residence)

**Required Courses for the Neuropsychology Emphasis**

PSYC 506B, 540, 543, 545

**Required Courses for the Lifespan Development Emphasis**

PSYC 561

**Thesis**

A thesis (PSYC 599) is required for all master’s degree programs. The thesis should be based on original research in an established research area (typically in their supervisor’s field). Prior to conducting the research, students are expected to orally present a proposal of their thesis to their supervisory committee. The supervisory committee must approve this proposal before the student can begin the proposed thesis study.

**Oral Examination**

An oral exam of the completed thesis must be satisfactorily passed.

**Program Length**

Students should expect to complete all degree requirements in two, but not more than three, years of full-time study.

---

**Required Courses for the Cognition and Brain Science Track**

Two of* PSYC 576A, B, C, D or E

Minimum of 1.5 units of PSYC 504

PSYC 577 each winter session in residence

**Required Courses for the Experimental Neuropsychology Track**

PSYC 540*, PSYC 550*

Minimum of 1.5 units of electives (e.g., PSYC 551, 575, 576A, B, C, or D)

**Required Courses for the Lifespan Development Track**

PSYC 560*, PSYC 561*

One of PSYC 562, PSYC 563, PSYC 568

* If offered during the first or second year of student’s master’s training.

**Required Courses for the Social Psychology Track**

PSYC 520* (1.5 units); PSYC 527* (1.5 units); 1.5 units of electives (e.g., PSYC 507, 518, 521, 522, 523, 526, 531)

* If offered during the first or second year of student’s master’s training.

**Thesis**

A thesis (PSYC 599) is required for all master’s degree programs. The thesis should be based on original research in an established research area (typically in their supervisor’s field). Prior to conducting the research, students are expected to orally present a proposal of their thesis to their supervisory committee.

**Oral Examination**

An oral exam of the completed thesis must be satisfactorily passed.

**Program Length**

Students should expect to complete all degree requirements in two years of full-time study.

---

**Doctor of Philosophy in Clinical Psychology**

**Course Requirements**

Methods and Statistics Requirements (3.0 units):

**Lifespan Development Emphasis**

Two of* PSYC 518, 532, 533, 560

**Neuropsychology Emphasis - Either:**

Two of* PSYC 518, 532, 533; or

One of* PSYC 518, 532, 533 and one of* PSYC 504 (topic must be statistics/methods related), 541, 574A, or 574B

* must be different from those taken to fulfill the MSc Methods and Statistics requirements.
Clinical Courses
All clinical students:
PSYC 506A (Therapy), PSYC 586A
PSYC 597 (in each of first two winter sessions in residence)
One of PSYC 588, 593, 594, 595, 596
Clinical Practica & Internship
PSYC 503, 505, 603, 606
Required Courses for the Neuropsychology Emphasis
PSYC 506A (Advanced Assessment), 546A, 546B
One of PSYC 547, 549
Required Courses for the Lifespan Development Emphasis
PSYC 540*, 586B
Two of PSYC 562, 563, 565, 566, 567, 568
One more of PSYC 588, 593, 594, 595 (must be PSYC 588, 593 or 594 ‘Couples Therapy’ if one of these not already taken)
*if not already taken for the MSc

Candidacy Examinations
Clinical Candidacy Exams and, depending on emphasis, either a Neuropsychology Specialty and/or Lifespan Development Specialty Candidacy Exams are required.

Dissertation
A dissertation is required for all doctoral degree programs. A dissertation must be based on original research and should be of publishable quality. Prior to conducting the research; students are expected to orally present a proposal of their dissertation to their supervisory committee. The supervisory committee must approve this proposal before the student can begin the proposed thesis study. The completed dissertation must be satisfactorily defended at an oral exam.

Program Length
Students should expect to complete all degree requirements in five to six years beyond the MSc, and one year longer for students who completed their master’s training at another institution.

Manual for the Graduate Program in Clinical Psychology
Students will be issued a Manual for the Graduate Program in Clinical Psychology at the beginning of their PhD programs. This manual details program requirements, rules, and procedures, relevant to the clinical psychology graduate student.

Doctor of Philosophy in Psychology
Course Requirements
Graduate-level statistics or methods (3.0 units chosen from listing in departmental Graduate Program Regulations): must be different from those taken to fulfill the MSc Methods and Statistics requirements.

Required Courses for the Cognition and Brain Science Track
At least one of PSYC 576A, B, C, D or E*
Minimum of 1.5 units of PSYC 602; a minimum of 1.5 units of PSYC 604
PSYC 577 each Winter session in residence.
Electives approved by the student’s supervisory committee.
*two courses required if only one taken for MSc

Required Courses for the Experimental Neuropsychology Track
PSYC 543*
At least one of* PSYC 518, 541, 574A, 574B, 574C, STAT 563
Electives approved by the student’s supervisory committee (may include PSYC 602).
*if offered in first two years of program and not already taken for MSc

Required Courses for the Lifespan Development Track
PSYC 564 (1.5 units); two of PSYC 562 (1.5 units), PYSC 563 (1.5 units), PSYC 568 (1.5 units)
Electives approved by student’s supervisory committee.

Required Courses for the Social Psychology Track
PSYC 527* (1.5 units) and one of PSYC 519* (1.5 units), PSYC 520* (1.5 units)
Electives approved by the student’s supervisory committee.
* If offered in first three years in program and not taken in Master’s.

Candidacy Examinations
Major and Minor Exams
Students have 36 months from the time of first registration in the doctoral program to complete the exams. Students registered in PSYC 699 must also be registered in 693 concurrently until 693 is complete.

Dissertation
A dissertation is required for all doctoral degree programs. A dissertation must be based on original research and should be of publishable quality. Prior to conducting the research, students are expected to orally present a proposal of their dissertation to their supervisory committee. The completed dissertation must be satisfactorily defended at an oral exam.

Program Length
Students should expect to complete all degree requirements in two to three years of full-time study beyond the MSc.

Co-operative Education
Participation in the Co-operative Education program – which enables students to acquire knowledge, practical skills for employment, and workplace experience – is optional for full-time
Master’s and PhD students. Master’s students complete two work terms and PhD students complete three (a work term consists of four months of full-time, paid employment). Students require permission from their academic adviser and graduate adviser, as well as the Co-op co-ordinator, to participate in the Co-op program. Interested students should contact the Psychology Co-op office before the second week of their first term. Students are also referred to “General Regulations: Graduate Co-op”, page 56.

Public Administration

GENERAL INFORMATION
Since 1974, the School of Public Administration has been offering innovative and diverse programs for current and prospective practitioners in the public and non-profit sectors. We aspire to be a leading community of students, practitioners, alumni, faculty and staff developing knowledge through teaching, research and professional development.

Faculty Members and Areas of Research
Lindsay Tedds, PhD (McMaster), Interim Director of the School of Public Administration, Associate Professor
    Underground economy; tax non-compliance; economics of taxation; public economics; time use; timing of stock option awards; applied econometrics
Herman Bakvis, PhD (UBC), Professor
    Intergovernmental relations, government structure and organization, political parties and interest groups
Emmanuel Brunet-Jailly, PhD (U Western Ontario), Professor
    Local government and politics, cross-border regions, comparative urban politics.
J. Barton Cunningham, PhD (Southern California), Professor
    Quality of working life, organizational theory, decision making, stress and motivation, human research management.
Lynda Gagné, PhD (UBC), Assistant Professor
    Child care policy, children outcomes, social programs, applied econometrics and microeconomics
Budd Hall, PhD (UCLA), Professor
    International community development, community-university engagement, social movements
Evert A. Lindquist, PhD (California, Berkeley), Professor
    Machinery of government and policy-making, policy communities and networks, the role of think tanks
James N. MacGregor, PhD (Victoria), Professor
    Organizational behaviour, human information processing
Richard T. Marcy, PhD (Oklahoma), Assistant Professor
    Public sector leadership, leadership development, adaptation and cognition in organizations, management of meaning in organizations
James C. McDavid, PhD (Indiana), Professor
    Program evaluation, performance management, local government service delivery
Tara L. Ney, PhD (Southampton), Associate Professor
    Conflict-related impact of policy, discourse theory and conflict, war-affected children, family law policy, health care policy processes, restorative justice
Lynne Siemens, PhD (Hertfordshire), Associate Professor
    Community development; entrepreneurship and small business; rural economic development; government and business relations; organizational behaviour; academic team development
Kimberly Speers, PhD (Alberta), Assistant Teaching Professor
Policy analysis and public policy; government relations and management consulting; performance measurement and planning
Thea Vakil, PhD (Victoria), Associate Director of the School of Public Administration and Associate Professor
Design and maintenance of organizations; structure and functioning of government and the non-profit sector; principles and values in public administration
Rebecca N. Warburton, PhD (London), Associate Professor
Health economics, economic evaluation, evidence-based management

Emeritus, Visiting, and Adjunct Appointments
Robert L. Bish, PhD (IN), Professor Emeritus
James Cutt, MA (Edinburgh), MA, PhD (UofI), Professor Emeritus
A. Rodney Dobell, BA, MA (UBC), PhD (MIT), Professor Emeritus
John J. Jackson, MSc (Ottawa), PhD (UofA), Professor Emeritus
John Langford, BA (Carleton), MA (Oxford), PhD (McGill), Professor Emeritus
Hartmut J. Will, Dipl-Kfm (FU, Berlin), PhD (III), Professor Emeritus
Oliver Brandes, LLB (UVic), Adjunct Professor
Leslie Brown, BSW (Regina), MPA, PhD (UVic), Adjunct Professor
John L. Fryer, BSc (London), MA (Pitt), Adjunct Professor
David Good, PhD (California, Berkeley), Adjunct Professor
Laurie Jackson, BSc, MEd (UofA), PhD (UVic), Adjunct Professor
Harvey Lazar, BSc (McGill), MA (UBC), PhD (LSE), Adjunct Professor
Michelle LeBaron, MA (SFU), LLB (UBC), Adjunct Professor
Catherine Morris, JD (UofA), LLM (UBC), Adjunct Professor
Victor Murray, BA (Manitoba), MA (Minn), PhD (Cornell), Adjunct Professor
Gordon Smith, PhD (MIT), Adjunct Professor
Ryan Compton, PhD (Washington U, St. Louis), Adjunct Associate Professor
Evelyn (Lyn) Davis, PhD (Florida State), Adjunct Associate Professor
Dale Wall, BA (SFU), MPA (UVic), Adjunct Associate Professor
Michelle Brady, BA (Honours) (Murdoch), PhD (UofA), Adjunct Assistant Professor
Tracy Byrne, PhD (Glasgow), Adjunct Assistant Professor
Peter R. Elson, PhD (UofT), Adjunct Assistant Professor
Allison M. Habkirk, BA (UVic), MA (UBC), MPA (UVic), Adjunct Assistant Professor
Yvonne Harrison, PhD (UVic), Adjunct Assistant Professor
Sabine Lehr, BA (Open University), MBA (London), PhD (UVic), Adjunct Assistant Professor
Gordon McIntosh, PhD (UVic) Adjunct Assistant Professor
Brant Popp, MPA (UVic), Adjunct Assistant Professor
Carol-Anne Rolf, MA (UofA), MPP (California, Berkeley), Adjunct Assistant Professor
Rajesh Tandon, Ph.D. (Western Reserve U.), Adjunct Assistant Professor
Sam Weller, CA, MBA, Adjunct Assistant Professor
Sarah Marie Wiebe, Ph.D. (UofO), Adjunct Assistant Professor
Veda Weselake, BA (UofM), MA (UofM), Adjunct Assistant Professor

Degrees and Specializations Offered
The School of Public Administration offers the following graduate programs:

Master of Public Administration (MPA)
On Campus and Online
The Master of Public Administration (MPA) programs are designed for full-time students (MPA On Campus) and for part-time students (MPA Online). Also, in partnership with the Faculty of Law, the School offers a full-time double degree JD+MPA program.

Master of Arts in Dispute Resolution
The School offers an on campus Master of Arts in Dispute Resolution (MADR) for full-time students. The program provides students with the knowledge and skills to contribute to the development of diverse, peaceful societies through their work with public sector and civil society organizations. The MADR program recommends participation in Co-operative Education. For details, see "Dispute Resolution", page 1.

Master of Arts in Community Development
Focused on the Community Economic Development, Co-operative, and Non-profit sectors, the Master of Arts in Community Development program (MACD) is designed to provide students with the opportunity to develop their capacities in transformational change, governance, leadership, analysis, and management in order to better meet the challenges and opportunities that are facing communities at various levels. The program is offered through a combination of on-campus and online learning, allowing students from across Canada and internationally to participate. For details, see "Community Development" on page 1.

Graduate Professional Certificates and Graduate Diploma
The School offers specialized credential programs via distance methods intended to strengthen the skills of working professionals. The program requirements draw upon the Master of Public Administration curriculum.
Graduate Professional Certificate in Library Sector Leadership

This program is a 5-course, part-time program which includes an on-campus orientation course (ADMN 517A); students must also complete four specified 500-level ADMN online courses. Registering in one course per term, it is possible to complete the program in 16 months.

Graduate Professional Certificate in Cultural Sector Leadership

This program is intended to strengthen the capacity of cultural sector professionals to serve in management and leadership roles in museums, art galleries, the performing arts, heritage sites and heritage conservation. This program includes an on-campus orientation course (ADMN 517B); students must also complete AHVS 488T and four specified 500-level ADMN online courses. Students may complete the program over two years.

Graduate Certificate in Evaluation and Graduate Diploma in Evaluation

The Graduate Certificate and Graduate Diploma in Evaluation are designed for early- or mid-career professionals working in the evaluation field as government or non-profit employees or consultants. The Graduate Certificate in Evaluation consists of four specified 500-level ADMN courses. Upon completion of the four courses required for the Certificate, students may apply to receive their Certificate, or they may apply for admission to the Diploma program, which requires completion of a capstone project (4.5 units). Both programs are delivered entirely online and are completed on a part-time basis.

PhD in Public Administration

The School offers a PhD program that prepares students for scholarly and leadership roles in universities, government, non-profit organizations, research institutes and other settings where knowledge and research skills in public administration and policy are needed.

Facilities

The administrative office of the School of Public Administration is located in Room A302, Human and Social Development Building. Students of the School of Public Administration share a number of designated study spaces and meeting rooms.

Financial Support

A number of awards, scholarships and bursaries are available to full-time graduate students from the School of Public Administration and UVic. The Faculty of Graduate Studies provides a list of available awards and necessary applications online at <www.uvic.ca/graduatestudies/finances> or through their office in the University Centre. Information on bursaries and scholarships is available at the UVic Student Awards & Financial Aid Office, located in the University Centre, or through their website at <www.uvic.ca/safa>. In addition, the provincial and federal governments each offer student loans to full-time candidates who meet the requirements. Students are advised to apply for student loans only during their academic terms (i.e., not during Co-op work terms).

The School of Public Administration also actively supports students seeking Social Sciences and Humanities Research Council of Canada fellowships (SSHRC) and Canada Graduate Scholarships.

MPA

In addition to being eligible to compete for UVic Graduate Awards and School of Public Administration awards for their first year, on-campus full-time students can use the income from up to three Co-operative Education work terms to help fund their studies. Employers of many of our online students are willing to financially support their employee’s professional development by providing reimbursement for tuition and, in some cases, reimbursement for texts and instructional materials.

PhD

In addition to being eligible to compete for University of Victoria Fellowships for their first year as PhD students, the School provides opportunities for more senior PhD students to teach or assist faculty members or the School with teaching or research-related projects. These opportunities will vary from year to year and will be available on a competitive basis. School of Public Administration Awards may also be available to supplement the income from these jobs. Contact the Graduate Adviser for more information about funding opportunities.

Guidelines for Professional Conduct

The School of Public Administration expects graduate students to exhibit professional conduct according to the following guidelines:

- submission of oneself to the professional codes of conduct associated with one’s employment and/or professional membership(s);
- exercise of personal discipline, accountability, and judgement;
- acceptance of personal responsibility for continued competency and learning, including the capacity to be a reflective practitioner;
- willingness to serve the public;
- demonstrated ability to recognize the dignity and worth of all persons;
- willingness to assist others in their learning;
- ability to recognize and work with one’s own limitations;
- maintenance of the confidentiality of information, including all electronic communication, appropriate to the purposes and trust given when that information was acquired;
- acceptance that one’s professional abilities, personal integrity, and the attitudes one demonstrates in relationships with other persons are measures of professional conduct.
Unprofessional Conduct

Graduate student conduct in the School of Public Administration is subject to the professional standards of entities including, but not limited to, UVic Co-op and Co-op employers. A student exhibiting behaviour that does not meet the standards required by these relevant entities may be required to withdraw from the School.

Admission Requirements

General

Applications for admission are first received by the Graduate Admissions and Records Office which evaluates each applicant's transcripts to determine admissibility to the program. After this determination, the application is forwarded to the School of Public Administration for consideration by the school's Admissions Committee. The Admissions Committee is comprised of faculty members.

Admission to Master of Public Administration Programs

To be eligible for admission, applicants must:

• Have an undergraduate degree with a minimum B+ (6.0) average (75-79%) in the last two years (30 units) leading to the undergraduate degree.
• Applicants to the online program must have a minimum of three years of full-time public sector or non-profit work experience. Those applicants to the online program whose degree was awarded four or more years prior and whose grade point average is below B+ may be considered.
• Follow the instructions provided through the page <www.uvic.ca/grad/apply>.
• Provide Assessment Reports:
  MPA On Campus Applicants: Provide two Assessment Reports from academic referees. If it has been more than five years since you last attended a post-secondary institution, we recommend that you include three Assessment Reports from current or former supervisors in place of academic referees. To strengthen your application, we recommend that your referees attach a Letter of Reference in addition to the Assessment Report.
  MPA Online Applicants: Provide two Assessment Reports from academic referees, and at least one work-related Assessment Report from a supervisor. If it has been more than five years since you last attended a post-secondary institution, we recommend that you include three Assessment Reports from current or former supervisors in place of academic referees. To strengthen your application, we recommend that your referees attach a Letter of Reference in addition to the Assessment Report.
• Submit official copies of relevant transcripts.
• Submit a professional resumé.

• Submit a Letter of Intent describing why you are seeking an MPA and how the degree relates to your career plans, personal values and goals.

Applicants must assemble all of the required application elements, as well as other relevant evidence of suitability for admission (e.g., academic records from non-degree courses), and submit them to the Graduate Admissions Office as a complete package. Clearly indicate whether application is being made for the On Campus or the Online program.

The School's Admissions Committee assesses an applicant's ability to successfully complete the MPA program. Admission decisions are based on an evaluation of the Letter of Intent, the Academic Assessment forms or non-academic letters of reference, the applicant's academic record, applicable test scores and experience (paid or voluntary). The admission process is competitive; therefore, ensure that all your documentation is complete.

Deadlines

• December 15 for international applicants.
• January 15 for domestic applicants. Applicants to the MPA On Campus Program who have a first class (A minus) average over the last two years of their undergraduate and/or graduate course work are automatically considered for graduate entrance awards. It is to the applicants' benefit to do their best to ensure that their file is complete as soon as possible for the Admissions Committee's consideration.

Admission to PhD Program

To be eligible for admission, applicants require:

• a master's degree in a related discipline, with a minimum grade point average of A- (7.0) in the last two years of academic work; and
• demonstrated research potential.

Candidates are also strongly encouraged to apply for external funding and should indicate on their application where they have applied for such funding.

To apply for the program, applicants must:

• Follow the instructions provided through the page <www.uvic.ca/grad/apply>.
• Provide two Assessment Reports from academic referees. If it has been more than five years since you last attended a post-secondary institution, we recommend that you include three Assessment Reports from current or former employers in place of academic referees. To strengthen your application, we recommend that you referees attach a Letter of Reference in addition to the Assessment Report.
• Submit official copies of relevant transcripts.

Applicants must assemble all of the required application elements, as well as other relevant evidence of suitability for admission (e.g., academic records from non-degree courses), and
submit them to the Graduate Admissions Office as a complete package.

In addition to the documentation required by the Faculty of Graduate Studies, the School of Public Administration requires that applicants submit a professional resumé, as well as a letter of intent which provides an overview (up to a total of five single-spaced pages) of:

- the two fields in which the student plans to specialize;
- a proposed area for dissertation research illustrating the problem to be studied, possible literature and the general approach;
- the names of faculty identified as possible research supervisors; and
- a list of applications submitted for external funding.

The Admissions Committee assesses an applicant’s ability to successfully complete the PhD program. Admission decisions are based on an evaluation of the applicant’s academic record, the Academic Assessment forms (included within the application package), applicable test scores, the overview, and the availability of appropriate faculty expertise to match the applicant’s chosen research area.

All short-listed candidates will be interviewed (by teleconference or in person) by a faculty admissions committee.

**Deadlines**

- December 15 for International Students.
- February 15 for applicants who wish to be considered for University Graduate Awards. All applicants with a first class (A minus) average over the last two years of their undergraduate and graduate course work, as applicable, and whose applications are COMPLETE BY FEBRUARY 15 are automatically considered for these awards.
- March 15 for Domestic applicants.

Admissions to the PhD program will be undertaken on a biennial basis. For the next term of entry, please consult the School’s website at <publicadmin.uvic.ca/phd>.

**Admission to Graduate Professional Certificates**

To be eligible for admission, applicants must have:

1. a baccalaureate degree (or equivalent from another country) from an accredited and recognized institution. (Note that for the Graduate Professional Certificate in Library Sector Leadership, a Master’s is preferred.)
2. a grade point average of 5.0 (B) in the last two years (30 units) leading to the baccalaureate degree.

In addition, applicants must submit official transcripts, a professional resumé and a letter of intent that explains how this program relates to their career plans, and their personal and professional values and goals. Finally, applicants must have two assessment forms or letters of reference sent directly to the Graduate Admissions and Records Office.

**Application Deadline for Cultural or Library Sector Leadership programs**

Please view the information at <publicadmin.uvic.ca/gradcerts> for current information on application deadlines.

**Admission to Graduate Certificate in Evaluation — Additional Requirements**

To be eligible for admission to the Graduate Certificate in Evaluation, applicants must have:

- An undergraduate degree (or equivalent from another country) from an accredited and recognized institution.
- A grade point average of B (5.0) in the last two years (30 units) leading to the undergraduate degree.
- The equivalents of Research Design: Critical Appraisal of Information (ADMN 502A); Data Analysis & Interpretation (ADMN 502B); and Public Sector Economics (ADMN 310 or ADMN 509).

**Application Deadline for the Evaluation program**

March 1

**International Applications**

The Graduate Admissions and Records office provides a step-by-step application guide, including application forms for international students, available at: <uvic.ca/garo>.

Applicants who do not possess a Canadian undergraduate degree will be required to write and submit official results for the GMAT. International applicants whose first language is not English are required to provide test results for one of the following:

- The Test of English as a Foreign Language (TOEFL) with a minimum score of 610 on the paper-based test and 102 on the Internet-based test, or
- The International English Language Testing System (IELTS) with an overall score of at least Band 7.0 with no score of less than 6.5 on each academic component.

**PROGRAM REQUIREMENTS**

**Master’s Programs**

Students are admitted into either the MPA On Campus or the MPA Online program.

**Master of Public Administration On Campus**

- Core Courses
  - ADMN 502B, 504, 509 or other specified course*, 512; PADR 501, 502, 503, 504, 505, 589
- Elective Courses: two from
  - ADMN 523, 530, 531, 537, 544, 547, 548, 553, 577, 578, 579, 580, 581, 582
GRADUATE PROGRAMS

-Courses from other School of Public Administration offerings:
  • MADR (DR) or MACD (CD) courses: with permission of the instructor and Graduate Adviser
  • 400-level undergraduate courses (ADMN) offered by the School of Public Administration or other academic programs: with permission of the instructor and Graduate Adviser.

• Final Requirement
  - ADMN 598 or 599

* based on a review of students' prior academic history, the student may be streamed into an alternate course

Students may not transfer between the On Campus and Online MPA programs, or take core courses from the other program that are not specifically open to students from both programs, without the permission of the Graduate Adviser.

Students have the opportunity to focus their studies on specific areas of public policy and administration through their selection of electives, their Co-op work term placements and the topic of their final report or thesis.

At the end of their program, all MPA students choose between completing a Master's Project (ADMN 598) or a Thesis (ADMN 599).

Because ADMN 599 is 6.0 units while ADMN 598 is 4.5 units, thesis students' programs will total 22.5 units, while project students' programs will total 21.0 units. More detailed information on the thesis option requirements is included on the School of Public Administration website.

Program Length

The full-time MPA On Campus program can be completed in two years, including two co-operative work terms.

MPA On Campus Program Schedule

The MPA On Campus program consists of a minimum of five compulsory terms: two full-time, residential academic terms, two co-operative work terms, and two further academic terms spent completing the Master's Project or Thesis (which may be taken concurrently with the second work term). The terms spent completing the Project or Thesis may be completed on campus, online or through a combination of the two. Students must complete all program requirements, including a third Co-op term (if taken), by the same semester in which they defend their Project or Thesis.

PADR 589 (0.0) Co-op Seminar: Introduction to Professional Practice

Note: Some term 1 courses may include pre-course assignments.

Co-op Work Term 2 (Fall Term, Sep–Dec)

Students are strongly encouraged to register in one online course elective during their co-operative work term (1.5 units)

Term 3 (Spring Term, Jan–Apr)

Students register in either:
- ADMN 598 (4.5) Master's Project
- ADMN 599 (6.0) Master's Thesis

Students selecting either option will be expected to attend the preparation seminar and/or review online resources during this term. If required to complete their program, students also have the option to register in an online course elective (1.5 units)

Term 4 (Summer Term, May–Aug)

Students register in either:
- ADMN 598 (4.5) Master's Project
- ADMN 599 (6.0) Master's Thesis

Optional Co-op Work Term 3

To be completed by the same term in which the Project or Thesis is defended. Please see “Co-operative Education”, page 267.

MPA Online Program Schedule

Courses in the MPA Online program are offered year-round. Students must follow the program as listed here. Students taking only one course per term should consult the School staff and/or the website for the recommended sequencing. MPA Online students may only take more than two courses per term with the permission of the Graduate Adviser.

Program Term 1 (Sep–Dec)

ADMN 504 (1.5) Government and Governance
Capstone Project or Thesis

Students will complete a Master’s Project (ADMN 598) or a Master’s Thesis (ADMN 599) to complete their MPA requirements.

MPA – Master’s Project

ADMN 598: Master’s Project (4.5 units)

The Master’s Project is expected to be a substantial analysis of a management, policy or program problem for a client in the non-profit or public sector. Students have the choice of working individually or with a partner. Team-based Master’s projects must be designed and written so that each team member’s contributions are clearly indicated. The Master’s Project is prepared in consultation with the client and an academic supervisor in the School of Public Administration and must be both practical and academically rigorous. The academic supervisor is a member of the School faculty and is also a member of the Faculty of Graduate Studies. More detailed information about the Master’s Project option is included in the school’s website.

Final Examination

The Master’s Project is defended in an oral examination, and the minimum Committee consists of the academic supervisor, the client, a second reader from the School of Public Administration and a Chair representing the Faculty of Graduate Studies.

MPA – Master’s Thesis

ADMN 599: Master’s Thesis (6.0 units)

The Master’s Thesis is expected to be a substantial contribution to the knowledge in the field of Public Administration. An MPA thesis will demonstrate a student’s mastery of a substantive body of scholarly or practice literature, as well as using appropriate and academically defensible methodologies to analyze research questions, test hypotheses or contribute new theoretical knowledge. Individual students will work with an academic supervisor in the School of Public Administration.

Final Examination

The Master’s Thesis is defended in an oral examination, and the minimum Committee consists of the supervisor, a second member from within the School and an external member from the University of Victoria, together with a Chair and an external examiner appointed by the Faculty of Graduate Studies from outside the school. All members of the committee must be members of the Faculty of Graduate Studies.

For “Guidelines for Oral Examinations” please go to the following website: <www.uvic.ca/graduatestudies/resourcesfor/students/thesis.html>.

JD+MPA Double Degree Program

In partnership with the Faculty of Law, the School of Public Administration offers the JD+MPA program, for students wishing to pursue double degrees. Students who apply and are accepted into both the Faculty of Law JD and the School of Public Administration MPA programs may earn both degrees concurrently with modified requirements for each. Undertaken separately, the two degrees normally require five years of study, whereas the double degree may be completed in four years. The first year of the double degree program is devoted entirely to the first year law curriculum. The second year of the program requires the completion of the required core public administration courses offered in the fall and summer terms. In consultation with the Graduate Adviser, these courses can be completed in combination with law courses, if the student wishes. The remaining two years entail the completion of all other law and public administration course requirements. Students may reduce the time in the program by enrolling in some MPA courses during the third Summer Term. Alternatively, students may participate in the Co-operative Education program. For information about the Faculty of Graduate Studies’ rules governing the JD+MPA double degree program, see “Registration in Double Degree Programs”, page 43. Further information on the program may also be obtained from either the School of Public Administration or the Faculty of Law.
Students enrolled in the JD+MPA double degree program must submit two formal applications for graduation when registering in their final Summer or Winter session. Graduation application forms are available from Undergraduate Records and Graduation Services for the JD degree and from Graduate Records for the MPA degree. Application deadlines are July 1 for the November convocation and December 1 for the June convocation. Both degrees must be conferred at the same Senate meeting, and be awarded at the same convocation.

Students enrolled in the JD + MPA double degree program prior to starting first year law school will not be eligible to enrol in the Law Co-op Program. Students that are admitted to the Law Co-op Program during first year law and subsequently enrol in the JD + MPA double degree program shall withdraw from the Law Co-op Program. Students enrolled in the JD + MPA double degree program will be required to complete any mandatory work terms as specified by the School of Public Administration.

**PhD Program**

The PhD program offers learning and research opportunities in the fields of:

1. comparative policy and governance;
2. organizational studies; and
3. applied policy and program analysis.

The first year of the program is a full-time course of studies consisting of a minimum of 10.5 units of coursework, a non-credit doctoral seminar and language training (if required for the student’s dissertation research). Students must be in residence to complete this part of their program:

- four core courses in two of the three fields
- two methodology courses
- a further graduate-level quantitative or qualitative methods course with the approval of the Graduate Adviser (1.5)
- at least one elective course (1.5)

Students may take graduate-level courses offered by the School of Public Administration, the Department of Political Science, other UVic departments, or other universities with the approval of the Graduate Adviser. Elective courses must be related to their two core fields of study.

Students will be required to register in this non-credit seminar course for the duration of their PhD program.

Students who choose comparative policy and governance as one of their fields will do coursework in both the School of Public Administration and the Department of Political Science.

The total number of courses each student is required to take will depend on the background of the student and will be decided by the student and the Graduate Adviser and approved by the Admissions and Program Standards Committee. The minimum units required for the PhD Degree is 10.5 units of coursework.

PhD students are expected to have mastery of a second or third language if it is germane to their chosen fields of study. They will be expected to acquire needed language skills in addition to their PhD coursework. No PhD credit will be given for language training.

**Candidacy**

ADMN693 (3.0) Candidacy Examination

During the second year of the program of study, students will complete candidacy Examinations in the two fields of study they have chosen. The examinations will be set by School field committees. A student who passes the comprehensive examinations is admitted to candidacy for the PhD degree.

**Dissertation**

ADMN 699 (30.0) Dissertation

Upon completing the candidacy examinations, students will develop a dissertation proposal and defend the proposal in an oral presentation to their supervisory committee. Once the committee is satisfied that the dissertation proposal meets the standards of the program, students will begin their dissertation research.

**Oral Examination**

Students will defend the completed dissertation in an oral examination in accordance with the regulations of the Faculty of Graduate Studies.

**Program Length**

The entry date for the PhD program is September. The program operates year-round. Courses, faculty members and facilities are available during Fall, Spring and Summer sessions. PhD candidates are expected to complete the program in five years.

**Graduate Professional Certificates**

The courses are normally taken in the following sequence. Should a student miss a course due to personal circumstances, that student can enrol in the missed course in the next academic year (or the next offering). Note that for the Cultural and Library Sector Leadership programs, the orientation courses ADMN 517A and 517B and AHVS 488T (Cultural Sector students only) include required attendance at on-campus intensive sessions.
Graduate Professional Certificate in Library Sector Leadership

ADMN 507A (1.5) Public Sector Leadership: Teams, Self and Organization
ADMN 517A (0.5) Graduate Professional Certificate Orientation
ADMN 530A (1.5) Increasing Organizational Effectiveness
ADMN 531A (1.5) Strategic Human Resource Management
ADMN 577A (1.5) Strategic Planning and Implementation

Graduate Professional Certificate in Cultural Sector Leadership

ADMN 507B (1.5) Public Sector Leadership: Teams, Self and Organization
ADMN 517B (0.5) Graduate Professional Certificate Orientation
ADMN 530B (1.5) Increasing Organizational Effectiveness
ADMN 531B (1.5) Strategic Human Resource Management
ADMN 577B (1.5) Strategic Planning and Implementation
AHVS 488T (1.5) Leadership in Cultural Organizations

Graduate Certificate in Evaluation and Graduate Diploma in Evaluation

The part-time online Graduate Certificate in Evaluation consists of four specified ADMN 500-level courses. Upon successful completion of the four courses, students can opt to apply for and receive their Graduate Certificate, or they may apply for admission to the Graduate Diploma in Evaluation.

The Diploma requires completion of a final project, ADMN 596 (4.5 units). Students who undertake the project, which will be supervised by a faculty member, will have an evaluation client, an agreed-upon project design, and a timeline to complete the project. A written project report will be prepared and submitted to an examination committee. Completed reports will be assessed by a committee consisting of academic instructors and practitioners, including the client for the project.

Required Courses

Fall
ADMN 537 (1.5) Program Evaluation and Performance Measurement

Spring
ADMN 580 (1.5) Qualitative Evaluation Methods and Applications

Summer
ADMN 581 (1.5) Quantitative Methods for Public Policy Analysis and Program Evaluation or
ADMN 582 (1.5) Topics in Program Evaluation, Performance Measurement, Performance Management and Knowledge Management

Fall
ADMN 544 (1.5) Economic Evaluation Methods and Applications

For students who opt to enrol in the Diploma in Evaluation, they will then complete:

Spring
ADMN 596 (4.5) Evaluation Project (course may take 2 terms to complete, but normally should not exceed 3 terms.)

Co-operative Education

Participation in the Co-operative Education program - which enables students to acquire knowledge, practical skills for employment, workplace experience, and an opportunity to build a network of potential employers - is mandatory for MPA On Campus students. MPA On Campus students complete a minimum of two work terms (a work term normally consists of four months of full-time, paid employment) and students undertake study and work terms in alternating sessions. Completion of additional work terms is permitted, with the approval of the Co-op Coordinator and based on availability. Students in their first or second co-op terms may receive priority. Additional work terms must be completed in or before the same semester in which the project/thesis is defended.

MPA On Campus students are required to register in PADR 589 Co-op Seminar: Introduction to Professional Practice, in their first term in the program. Students are also referred to “General Regulations: Graduate Co-op”, page 56.

Participation in the Co-operative Education program is optional for full-time PhD students. PhD students complete three terms; a fourth work term is an option. Students require permission from their academic adviser, graduate adviser and Co-op coordinator to participate in the Co-op program. Interested students should contact the Co-op Office (located in HSD A302) early in the term in which they are applying.

Public Health and Social Policy

General Information

The School of Public Health and Social Policy is designed to encompass interdisciplinary and inter-professional fields of study. Within this context, health is understood as a resource for everyday living emphasizing social and personal resources as well as physical capacities. The School of Public Health and Social Policy at the University of Victoria recognizes and values:
- Collaborative action across all sectors (government organizations, non-government organizations, non-profit organizations, community coalitions, and interest groups)
- Inter-professional and multi-disciplinary approaches to practice and research
- Critical analysis drawing on principles of social justice and equity
- Political awareness and political engagement as a basis for social change
- Community-based approaches to research and knowledge development
- Partnerships with people and populations served
- Diversity and cultural safety
- Indigenous knowledge and the right to self-determination

Faculty Members and Areas of Research

Lyn Davis PhD (Florida)
Scholarship of teaching and learning; social justice; social policy; housing; community organizing and development; lesbian health; feminism; research methodologies; program evaluation.

Trevor Hancock MB BS (London)
Public health systems and services research; health promotion; healthy cities and communities; health and nature; healthy public policy; community development and health

Michael Hayes PhD (McMaster)
Health inequities; disability; public policy; obesity; health literacy; population health promotion

Nathan Lachowsky PhD (Guelph)
Sexual health; global health; lesbian, gay, bisexual, transgender, queer, and two-spirit (LGBTQ2S) people; HIV prevention and care; health equity; interdisciplinary approaches; indigenous health; mixed methods; community-based research; public health surveillance; infectious diseases; population health

Charlotte Loppie PhD (Dalhousie)
Sexual and reproductive health across the lifespan; sexual diversity; sex trade work; HIV/AIDS; the construction of female sexuality and the cultural determinants of health

Nigel Livingston PhD (British Columbia)
Disability, assistive technology, policy and practices with respect to individuals with disabilities and their families; disability supports and services

Laurene Shields, PhD (Oreg)
Community; health promotion; empowerment; community nursing practice; life threatening illness and events; connectedness; people's experiences of health, illness and healing; narrative inquiry; feminist research; story as a metaphor of healing; spirituality

Karen Urbanoski, PhD (Toronto)
Development; substance use problems and addiction; role played by the treatment system in recovery

Ziba Vaghri, PhD (British Columbia)
Child development and child health, child rights, social determinants of health, indicators as accountability tools, international development, nutrition

Catherine Worthington PhD (Toronto)
Health services research; program evaluation; access to health care; recipient views of services; social-structural drivers of health; HIV/AIDS; homelessness; adolescent health; community-based participatory research; survey methods; qualitative methods; research ethics

Emeritus

Jeff Reading PhD (Toronto)
Aboriginal health; health promotion; health policy; cardiovascular physiology; research administration; population and public health; health services; chronic disease; surveys; global Indigenous health
Adjunct and Grant Tenure Appointments

Carol Aramatunga, BA, MSc, PhD (Toronto), Adjunct Professor (2012-2015)
Lillian Bayne, BA, MA, MSc (Toronto), Adjunct Professor (2012-2015)
Brenda Canitz, BScN, BA, MSc (Toronto), Adjunct Professor (2012-2015)
Perry Kendall, MBBS, FRCP, MSc (UBC), Adjunct Professor (2012-2015)
Patrick McGowan, BA, MSW, PhD (UBC), Professor, Grant Tenure (Limited Term 2012-2015)
Debra Nanan, BSc, MPH (Johns Hopkins), Adjunct Assistant Professor (2013-2016)
Victor Neufeld, BA, MA, MD (Saskatchewan), Adjunct Professor (2013-2016)
Melanie Rusch, BSc, MSc, PhD (UBC), Adjunct Associate Professor (2013-2016)
Irving Rootman, MPhil, PhD (Yale), Adjunct Professor (2012-2015)
Richard Stanwick, BSc, MD, MSc (McGill), Adjunct Associate Professor (2014-2017)
Martin Wale, BMedSci, BM BS, MBA (Nottingham), Adjunct Associate Professor (2014-2017)
Franklin White, MD, CM, MSc, FRCP, FFPH (London), Adjunct Professor (2012-2015)

Public Health Advisory Board

Irving Rootman, PhD (Chair)
Perry Kendall, OBC, MBBS, MHSc, FRCPC
Marjorie MacDonald, PhD
Cheryl Martin, BScN, MSc
Darlene Martin, RN, BSN
Catherine Mateer, PhD
Jeff Reading, PhD
Mary Ellen Strada, RN, MN
Shannon Turner, BA, BSc, MSc
Franklin White, MD, CM, MSc, FRCP, FFPH
Eric Young, MD, BSc, MHSc, CCFP, FRCP

Degrees and Specializations Offered

The School offers a Master’s of Public Health (MPH) degree for both full-time and part-time students and a Graduate Diploma in Public Health (GD) for part-time students. Both programs are offered via online/distance learning methods.

Students in either program have the opportunity to focus their studies by selecting one of four areas of focus during their program: Indigenous Peoples’ Health, Public Health Informatics, Public Health Nursing, Social Policy.

Facilities

The administrative office of the School of Public Health and Social Policy is located in Room B202, Human and Social Development Building. Master’s in Public Health and Graduate Diploma students have a designated computer lab in Room B241, HSD Building.

Financial Support

All new applicants are evaluated for the University Fellowship. The minimum standard required for consideration is a first-class standing (A-). Grade calculations and equivalencies are determined by the Graduate Admissions and Records Office. The process is competitive and meeting the minimum standard does not guarantee that students will be successful in the competition.

A number of awards, scholarships and bursaries are available to full-time students. The Faculty of Graduate Studies provides a list of available awards and necessary applications online at <web.uvic.ca/gradstudies/fund/funding.html> or through their office in the University Centre. Information on bursaries and scholarships can be found at the UVic Student Awards & Financial Aid Office, located in the University Centre, or through its website at <uvic.ca/safa>.

Limitation of Enrolment

Admission to UVic is not a guarantee of admission to particular Schools or programs within the Faculty. Applicants should be aware that admission to Schools and programs is competitive and subject to limited enrolment. Meeting minimum requirements is not a guarantee of admission. The Faculty of Human and Social Development recognizes that many factors contribute to a person’s chances of success in professional programs and therefore in addition to academic requirements (GPA), professional suitability for the selected program will be considered.

Professional Conduct

All students in the School of Public Health and Social Policy must follow the Faculty of Human and Social Development’s (HSD) Guidelines for Professional Conduct. The faculty supports models for professional conduct based on the following guidelines:

- submission of oneself to a professional code of ethics
- exercise of personal discipline, accountability and judgement
- acceptance of personal responsibility for continued competency and learning
- willingness to serve the public, client or patient and place them before oneself
- ability to recognize the dignity and worth of all persons in any level of society
- willingness to assist others in learning
- ability to recognize one’s own limitations
• maintenance of confidentiality of information (including all electronic communication) appropriate to the purposes and trust given when that information was acquired
• acceptance that one's professional abilities, personal integrity and the attitudes one demonstrates in relationships with other persons are the measure of professional conduct

Unprofessional Conduct
Students in the Faculty of Human and Social Development are subject to the provisions of the code of ethics of their respective professions, and may be required to withdraw from their School for violating these provisions. Students may also be required to withdraw from their School, when ethical, medical or other reasons interfere with satisfactory practice in their respective disciplines.

UVic Email Address
All program information will be provided by email. All PHSP students are required to use their UVic email address as their primary email contact in the student records system while enrolled in programs. This is to ensure continuity and consistency of information received. PHSP is not responsible for providing missed information if students do not use the UVic email address.

General Practicum Guidelines

Criminal Record Reviews
A requirement for admission, PHSP students placed in practica must undergo a criminal record review. Students are responsible for providing authorization for the review prior to registration in their first course in the program and cooperating with the conduct of the review as needed. Usually, students must pay for the review, although some agencies will absorb the costs. Registered Nurses in BC have a Criminal Record Review completed with their CRNBC registration.

Practica Placements
The Faculty reserves the right to approve any agency or institution that provides placements for student practica, and to change any placement assigned to a student. The student, however, has the right to be informed in writing of the reasons for any change in placement.

While the Faculty accepts a responsibility to provide a sufficient number of practicum opportunities to serve the needs of all registered students, a student may be required to withdraw from a practicum course if none of the available practicum agencies will accept the student.

It is the responsibility of the course instructor to inform students of the criteria by which unprofessional conduct will be judged in the practicum setting.

Practica Dates
The dates of practica will be established by each School or program, and will be announced to the students involved at the beginning of each term.

Attendance
Attendance at practicum activities is required. Students are expected to notify the placement agency whenever practicum appointments cannot be kept, and also to inform the course instructor. Failure to do so may result in a student being withdrawn from the practicum setting.

Denial and Withdrawal

Denial
Students will be denied the practicum experience if their preparatory work is considered unsatisfactory by the Director of the School in the Faculty of Human and Social Development.

Temporary Withdrawal of Students Pending Report
The Director may require a student to withdraw temporarily from a practicum if, during the course of a term, there are reasonable grounds to believe that the conduct or lack of competence of a student enrolled in the practicum has adversely affected or may adversely affect:
• clients or pupils, or
• personnel, including students associated with the practicum

The student will be required to withdraw temporarily pending the receipt of a report on the conduct and lack of competence of the student. This written report from the course instructor will normally be provided to the student within 10 business days of the withdrawal.

Withdrawal
After giving the student an opportunity to be heard, the Director may require a student to withdraw from the practicum if the Director is satisfied that the student's conduct or lack of competence may adversely affect members of any of the groups identified in the paragraph above.

Voluntary Withdrawal
Students seeking voluntary withdrawal from a practicum, whether permanent or temporary, must receive permission to do so from their faculty supervisor in Human and Social Development.

Termination of Practicum by Placement Agency
In situations where a practicum is terminated by the agency, the student will be informed in writing of the reasons for termination, by the School within 15 business days of the termination. After giving the student an opportunity to be heard, the Director or designate will determine appropriate action: 1) withdrawal from the School; 2) additional preparatory work; 3) placement in a different practicum setting.

Practicum Evaluation Documentation
If a student withdraws from practicum or is required to withdraw from practicum by their instructor of record, all practicum evaluation materials to date of withdrawal will remain on their student file and may be taken into account in determining
whether their preparatory work is satisfactory to enter a
subsequent practicum.

**Notification of the Faculty of Graduate Studies**

Students who withdraw temporarily from a practicum must notify the Faculty of Graduate Studies in writing. Students who are required to withdraw from a practicum will be withdrawn from any course involved by written notification from the Director to the Faculty of Graduate Studies.

**Readmission**

Students who have withdrawn from a practicum for whatever reason who later wish to reenter the practicum must apply for readmission to the course and should not assume that readmission is guaranteed.

**Appeals**

The normal avenues of final appeal are available to students who have been required to withdraw from a practicum. Students in the Faculty of Human and Social Development may follow regular appeal procedures within the faculty.

**Additional Practice Requirements for Registered Nurses Registered in the Public Health Nursing Area of Focus**

**Active Practicing Registration and Malpractice Insurance**

Registered Nurses enrolled in the Public Health Nursing area of focus must have active practicing registration as a Registered Nurse or the equivalent registration for the jurisdiction in which they are undertaking their practice experience. Periodically, information provided by students will be checked. Please note that students studying outside of BC are required to submit verification of active practicing registration to the School of Public Health and Social Policy annually. Students studying in the US must also provide proof of current malpractice insurance, annually, for the duration of the program.

**Current Basic Life Support Certificate**

All Registered Nurses enrolled in the Public Health Nursing area of focus must provide evidence of successful completion of a basic life support level-C course no more than 12 months prior to admission. Current CPR level-C certification must be on file in the School of Public Health and Social Policy to remain registered in the program.

**ADMISSION REQUIREMENTS**

**General**

Initial enquiries regarding graduate programs should be addressed to the Program Manager, School of Public Health and Social Policy. Application materials may be obtained from the Graduate Admissions and Records Office website <www.uvic.ca/garo> or the School of Public Health and Social Policy website: <www.uvic.ca/publichealth>.

Applications for admission are first received by the Graduate Admissions and Records Office. This office evaluates each applicant’s transcripts to determine admissibility to the program. After this determination, the application is forwarded to the School of Public Health and Social Policy for consideration by the department’s Admissions Committee.

Applicants are required to indicate whether they are intending to study as a full-time or part-time student and their anticipated area of focus. Students selecting the Public Health Nursing area of focus will be required to show evidence of active practicing registration as a Registered Nurse or the equivalent registration for the jurisdiction in which they are undertaking their program. The School will endeavor to select the strongest candidates in each of the four areas of focus. Once admitted to the program students may change their area of focus subject to individual academic advising.

Students enrolled in the Diploma program who want to transfer to the Masters program will be required to meet with the academic adviser and put their request in writing to the Director of the School. Students wanting to move from the Diploma to the Masters program must be in good standing and hold a minimum of a B+ (6.0 GPA) in the Diploma program.

Admission to the Diploma program does not guarantee admission to the MPH program. Students who have successfully completed the Diploma program are eligible to apply for admission to the MPH program. Applications will be competitively assessed within the MPH applicant pool.

Applicants will be required to have completed an undergraduate statistics course with a minimum grade of B. Students may be provisionally accepted into either the Diploma or Master’s in Public Health program with the condition that they complete an undergraduate statistics course (with a minimum grade of B) prior to beginning the program.

**Admission to the Graduate Diploma Program**

To be eligible for admission, students must:

- Have an undergraduate degree with a minimum B+ (6.0) average (75-79%) in the last two years (30 units) leading to the undergraduate degree.
- Fill out an application form online <www.pas.bc.ca> or download the Faculty of Graduate Studies application form <www.uvic.ca/garo> and submit a hard copy by mail. To ensure that all documents are added to the application file, applicants should ensure that all online and hard copy documents submitted to the Graduate Admissions and Records Office are under the same name.
- Provide two Letters of Reference that should come from individuals who can provide a reliable assessment of the applicant’s abilities; academic or professional references are acceptable.
- Submit relevant transcripts.
- Submit a resumé/curriculum vitae.
• Submit a Letter of Intent describing why they are seeking a Graduate Diploma in Public Health and how the diploma relates to their experience, goals and career plans.
• Undergo a criminal record check. See "Criminal Record Reviews" on page 270.

Applicants are encouraged to submit whatever other evidence of suitability for admission they feel is relevant (e.g., academic records from non-degree courses).

The Admission Committee assesses an applicant’s ability to successfully complete the Diploma in Public Health program. Application to the Diploma program will be competitively assessed based on four criteria: 1) Grade Point Average; 2) Letter of Intent; 3) Professional Experience and Community Service; and 4) References.

Application Deadline
February 1

Graduate Course Prior to Admission
Students not admitted to the Diploma may be permitted to take up to 1.5 units of graduate level Public Health and Social Policy courses. The prerequisites are admission to Graduate Studies and approval of the Graduate Adviser.

Admission to the Master of Public Health Program
To be eligible for admission, students must:
• Have an undergraduate degree with a minimum B+ (6.0) average (75-79%) in the last two years (30 units) leading to the undergraduate degree.
• Fill out an application form online <www.pas.bc.ca> or download the Faculty of Graduate Studies application form <www.uvic.ca/garo> and submit a hard copy by mail. To ensure that all documents are added to the application file, applicants should ensure that all online and hard copy documents submitted to the Graduate Admissions and Records Office are under the same name.
• Provide two Letters of Reference that should come from individuals who can provide a reliable assessment of the applicant’s abilities; academic or professional references are acceptable.
• Submit relevant transcripts.
• Submit a resumé/curriculum vitae.
• Submit a Letter of Intent describing why they are seeking a Master's in Public Health and how the degree relates to their experience, goals and career plans.
• Undergo a criminal record check. See "Criminal Record Reviews" on page 270.

Applicants are encouraged to submit whatever other evidence of suitability for admission they feel is relevant (e.g., academic records from non-degree courses).

The Admissions Committee assesses an applicant’s ability to successfully complete the MPH program. Application to the MPH degree program will be competitively assessed based on four criteria: 1) Grade Point Average; 2) Letter of Intent; 3) Professional Experience and Community Service; and 4) References.

Application Deadline
February 1

Graduate Courses Prior to Admission
Students not admitted to the MPH degree may be permitted to take up to 3.0 unit of graduate level Public Health and Social Policy courses. The prerequisites are admission to Graduate Studies and approval of the Graduate Adviser.

Program Requirements

Residency Requirements
All students admitted to both the MPH and GD programs are expected to attend three onsite intensives: (1) orientation (end of August) to their program prior to program commencement in September; (2) during the final area of focus course (beginning of May); (3) a culminating student conference at the end of their program (end of April) where students will demonstrate and share their project outcomes and learning.

Program Fee
Students admitted to either program may be assessed an additional program fee.

Diploma in Public Health (12.0 units)
The Graduate Diploma requires a minimum of 12.0 units. The 12.0 units are made up of 4.5 units of core courses, 3.0 units of courses from the chosen area of focus, practicum (1.5 units), culminating report (1.5 units) and 1.5 units of elective.

Graduate diploma students who complete the diploma and then wish to complete the Master of Public Health (MPH) will be required to apply to the MPH program, be accepted, and then complete remaining core and area of focus courses as well as PHSP 508B and 589 in the MPH program. See “Admission Requirements”, “General” (page 271), for more information.

Faculty Members and Areas of Research

Over 100 full time faculty members across the 28 departments, schools, programs, institutes and research centres in the Faculties of Social Sciences, Humanities, Education and Human and Social Development are engaged in health research. All are eligible to supervise SDH Graduate Students.

Thematic Areas of Research Expertise:

- Social Determinants of Health
- Health Policy, Law and Bioethics
- Health of Populations
- History of Medicine
- Aboriginal/Indigenous People's health
- Addictions Research
- Environmental Health
- Health Over the Life Span

Degrees and Specializations Offered

MA, MSc, PhD

The Social Dimension of Health program offers programs of study leading to the degrees of Master of Arts, Master of Science and Doctor of Philosophy.

The programs provide an opportunity for advanced research in Social Dimensions of Health. Focused specifically on interdisciplinary health research, the programs link research opportunities based in research centres on campus with the academic mandates of the Faculties of Social Sciences, Humanities, Education and Human and Social Development to provide an innovative approach that cross-cuts disciplinary affiliations, provides an academic home for graduate students with interests in health research and allows faculty researchers affiliated with research centres to support and supervise graduate students.

Planned as an interdisciplinary, research-intensive, graduate program, the Social Dimension of Health program incorporates community-based approaches, evidence-based modeling and training in research skills, knowledge and methodologies. The program allows for maximum flexibility and supports a broad range of student research interests with an emphasis on relatively few required courses, participation in a colloquium series and a focus on independent graduate research. The primary outcome is a thesis at the master's level or dissertation at the doctoral level.

Both master's and doctoral programs centre around:

- two 1.5 unit core courses in Fundamentals of Health Research (Master's: SDH 500A, 500B; PhD: SDH 600A, 600B),
- two 1.5 unit required methodology courses,
- two 1.5 unit elective courses and
- mandatory participation in a 3.0 unit colloquium (Master's: SDH 501A, 501B; PhD: SDH 601A, 601B).

Financial Support

Potential funding sources for graduate students include (but are not limited to) SSHRC, NSERC and CIHR. Vanier Canada Graduate Scholarships recognize and support exceptional Canadian and international students who are pursuing doctoral degrees at Canadian Universities. Similarly, Bombardier Scholarships Bell Scholarships and Banting and Best Scholarships recognize high-calibre scholars who are engaged in doctoral programs.

Admission Requirements

Admission to the Master's Program

Students applying for master's level degrees will be required to hold a bachelor's degree in an appropriate discipline from a recognized university. Applicants must meet the general requirements set out by the Faculty of Graduate Studies in the Graduate Studies calendar. Ordinarily a B+ average (6.0 GPA) in the last two years of university work is a minimum requirement for admission to the program, however, students may request consideration on the basis of life or work experience equivalency.

Admission to the Doctoral Program

Students applying for doctoral degrees usually are required to hold a master's degree in an appropriate discipline from a recognized university. Applicants must meet the general requirements set out by the Faculty of Graduate Studies in the Graduate Studies calendar. Ordinarily a B+ average (6.0 GPA) in the last two years of university work is a minimum requirement for admission to the program, however, students may request consideration on the basis of life or work experience equivalency.

Applications will be reviewed by the Faculty of Graduate Studies, the SDH Director and SDH Program Committee. In cases where students have insufficient background in health research, additional coursework may be required as part of the student's program. This will be determined by the SDH Director in consultation with the SDH Program Committee and the co-supervisors, and communicated to the student in writing at the time of acceptance into the program.

Application Deadlines

Students will be admitted to the SDH program in September of each year.

- February 15 for September entry

Program Requirements

The curriculum for the SDH program is predicated on the thematic areas of research strength outlined above. Intended as research intensive degrees, the master's and doctoral programs outlined below centre around two 1.5 unit core courses in Fundamentals of Health, two 1.5 unit required methodology courses, mandatory participation in the program colloquium and two 1.5 unit elective courses.
MA, MSc and PhD students will attend the same colloquium and Fundamentals of Health core courses, although the pedagogic expectations will be different at the master’s and doctoral levels.

The core courses and colloquium are intended to engender cohesiveness among the students and faculty within the program and to provide students with a basic complement of knowledge and core competencies from which to pursue their independent research. Choices of methodological approach and elective courses are intended to provide flexibility so faculty and students can tailor research programs to suit student interests and research requirements.

The importance placed on the independent research component of the program, especially in the case of the PhD program, is indicated by the number of unit credits allotted to the thesis/dissertation. The primary outcome is a thesis at the master’s level or dissertation at the doctoral level. In the case of doctoral students, candidacy requires that students also pass a comprehensive examination. Three questions related to their particular research area will be crafted by the student in consultation with their supervisory committee. The questions will be answered in a written format, drawing upon pertinent literature and will be evaluated on a pass/fail basis.

**Supervisory Committee**

The structure of the supervisory committee must meet the requirements set out by the Faculty of Graduate Studies for interdisciplinary students. For master’s students, two co-supervisors, who are members of the Faculty of Graduate Studies at least one of whom has successfully supervised candidates for graduate degrees in the past, must confirm their willingness to supervise before a student can be admitted. For doctoral students, at least one additional faculty member must be added to the supervisory committee following admission. At the time of the thesis/dissertation defense at least one additional member must be added to the examination committee.

**MA and MSc Programs (18.0 units)**

- SDH 500A (1.5) Fundamentals of Health Research I
- SDH 500B (1.5) Fundamentals of Health Research II
- SDH 501A (1.5) Social Dimensions of Health Colloquium I
- SDH 501B (1.5) Social Dimensions of Health Colloquium II
- Methodology (3.0) Selected from the list of approved methodology courses
- Electives (3.0) Selected from the list of approved elective courses
- SDH 599 (6.0) Thesis

**Program Length**

The master’s program is designed for completion within 2 years.

**PhD Program (30.0 units)**

- SDH 600A (1.5) Fundamentals of Health Research I
- SDH 600B (1.5) Fundamentals of Health Research II
- SDH 601A (1.5) Social Dimensions of Health Colloquium I
- SDH 601B (1.5) Social Dimensions of Health Colloquium II
- Methodology (3.0) Selected from the list of approved methodology courses
- Electives (3.0) Selected from the list of approved elective courses
- SDH 693 (3.0) Candidacy Examination
- SDH 699 (15.0) Dissertation

**Approved Electives Courses**

Final decisions regarding the student’s selection of elective courses will be made in consultation with the academic unit where the course is offered, the course instructor and the student’s supervisory committee, and will require the approval of the SDH Director and/or Advisory Committee.

- ECON 517 The Economics of Canadian Health Care
- ED-D 505 Basic Concepts in Human Development
- ED-D 506 Selected Topics in Human Development
- ED-D 519 Advanced Seminars in Counseling Psychology
- ED-D 520 Educational Research Apprenticeship
- ED-D 568 Seminar in Special Education: Program, Practices and Policies
- ED-D 569 Seminar in Special Education: Current Issues, Research and Applications
- HINF 503 HI Research Methods
- HINF 510 Information Management and Technology
- HINF 570 Epidemiology in Health Services Management
- HINF 571 Health Systems Data Analysis
- HINF 573 Applied Biostatistics
- HINF 591 Topics in HI
- EPHE 351 Community and Population Health
- EPHE 455 Nutrition for Exercise and Health
- EPHE 580 Physiological Issues in Physical Activity and Health
- EPHE 582 Neuroscience in Physical Activity and Health
- EPHE 583 Issues in Health Promotion and Wellness
- EPHE 584 Pedagogical Issues in Physical Activity and Health
- EPHE 585 Qualitative Research Genres in Physical Activity and Health
- PSYC 531 Environmental Psychology
- PSYC 569 Special Topics in Lifespan Development
- SOCI 545 Sociology of Health
- SOCI 585 Seminar on Aging
- SOCW 503 The Social Construction of Health, Illness, and Aging
Approved Methodology Courses

Final decisions regarding the student’s selection of methodology courses will be made in consultation with the academic unit where the course is offered, the course instructor and the student’s supervisory committee, and will require the approval of the SDH Director and/or Advisory Committee.

Quantitative Methods
- ADMN 602 Research Methods in Public Administration
- ECON 500 Microeconomic Analysis
- ECON 501 Macroeconomic Analysis
- ECON 545 Econometrics Analysis
- ECON 549 Computational Methods in Economics and Econometrics
- ED-D 560 Statistical Methods in Education
- ED-D 562 Advanced Statistical Methods in Education
- GEOG 524 Advanced Quantitative Methods
- GEOG 538 Advanced Seminar in Geomatics
- HINF 571 Health Systems Data Analysis
- PSYC 518 Psychometric Methods
- PSYC 532 Applied Multiple Regression
- PSYC 533 Applied Multivariate Analysis
- PSYC 541 Research Design and Methods in Neuropsychology
- PSYC 564 Statistical Methods in Lifespan Development
- SOCI 510 Categorical Data Analysis

Qualitative Methods
- ED-D 519 Advanced Seminars in Counselling Psychology
- ED-D 561A Methods in Educational Research
- ED-D 567 Case Study and Mixed Method Research
- ES 501 Methods, Research Design and Communication
- GEOG 523 Qualitative Methods in Human Geography

- PSYC 561 Theories and Methods in Lifespan Development
- SOCI 511 Research Design
- SOCI 515 Qualitative Research Methods
- SOCW 516 Research Methodologies

Social Work

Mission Statement

The emerging vision of the School of Social Work in both its undergraduate and graduate programs commits us to social justice and anti-oppressive social work practices, and to promoting critical enquiry that respects the diversity of knowing and being.

Our educational mission within the Master of Social Work Program is to prepare social workers skilled in critical self-reflection and with an advanced analytic understanding of the social, cultural, political and practical implications of their work. In particular, we emphasize structural, feminist, Indigenous and anti-oppressive analysis within a context of interdisciplinary work in an effort to link policy to practice.

Faculty Members and Areas of Research

Billie Allan, PhD (Toronto)
Indigenous health and well-being (particularly Indigenous women’s and Two-Spirit health); Indigenous re-search methods; health and healing in the context of child welfare involvement; Indigenous midwifery and birthing

Leslie Brown, PhD (Victoria)
Research Methods, Indigenous Governance, Social Work Education, Community Development, Child Welfare
Jeannine Carriere, PhD (Alberta)
Indigenous child and family practice and policy, Indigenous ways of knowing, mental health and decolonization for Indigenous people

Jacquie Green, MPA, PhD (Victoria)
Indigenous and cultural knowledges that centre, inform and transform child welfare policy and practice.

V.C. Hackett, PhD Candidate (Toronto)
African Caribbean immigration, family building and healing; decolonizing approaches to research and pedagogy; social work history/ies

Yvonne Haist, MEd (UVic)
Trauma work: affect regulation, right brain processing and social responses; embodied practice; spirituality

Donna Jeffery, PhD (OISE-Toronto)
Research interests are interdisciplinary in orientation: feminist, critical race and post-structural scholarship in the contexts of pedagogy, policy, knowledge production, professional identity and social work education

Patricia MacKenzie, PhD (Edinburgh)
Health promotion, interdisciplinary practice, disability; rural issues; aging; gay, lesbian, bisexual, transgendered issues; social work practice in health care settings; qualitative research methods

Cheryl Moir-van Iersel, MSW (British Columbia)
Feminist and group work practice; integrating play and creativity in the classroom

Mehmoona Moosa-Mitha, PhD (Southampton)
Citizenship rights of children and marginalized communities, child welfare policy and practice, anti-racist, feminist theory

Gayle Ployer, MSW (Carleton)
Social work education, social justice and the law, field education and participatory research.

Susan Strega, PhD (Southampton)
Critical, feminist and post-structural analysis of sex work, violence against women and child welfare practice and policy

Robina Thomas, PhD (Victoria)
Residential schools, Indigenous ways of knowing and being, Indigenous women and children, social work education and story telling

Bruce Wallace, PhD (UBC)
Poverty, health and equity. Specific experiences in homelessness, social assistance and so-cial policy, mental health, substance use and harm reduction, access to dental care and oral health equity, consumer-based services in mental health and drug user groups, health equity, community-oriented primary care (such as community health centres) and inner-city medicine. My research is primarily qualitative and mixed-methods with interests in case study and theory informed (realist) evaluations.

**Degrees and Specializations Offered**

The School of Social Work offers a graduate program leading to the degree of Master of Social Work that is fully accredited by the Canadian Association of Schools of Social Work. BSW and non-BSW graduate students may focus on child welfare, health or international work (resources permitting).

**MSW Degree**

The program is designed to provide BSW graduate students and non-BSW graduate students, who have successfully completed their foundation coursework, with the opportunity to reflect on their practice experience in the context of the School’s mission statement and to develop critical skills and their application to practice and/or research. Note: The terms Foundation Year and Advanced Year refer to a menu of courses, both required and elective, and do not specify a particular timeframe of completion. The School offers three options to complete a MSW:

**BSW entry to MSW Degree:**

Qualified BSW degree holders enter the MSW Advanced program.

**Non-BSW entry to the MSW degree:**

Qualified non-BSW degree holders undertake foundational coursework that prepares them for the Advanced coursework at which time they join the BSW degree holders who have entered the MSW Advanced program. Those who are qualified may also apply to complete their Advanced Year of study with the MSW Indigenous Specialization.

**MSW with an Indigenous specialization:**

The School of Social Work has a specialized program of studies leading to the Master of Social Work degree for social workers working in Indigenous social settings. This program is designed to provide social workers working in Indigenous communities with the opportunity to develop their knowledge and skills within this context.

**Objectives of the MSW degree include:**

- Develop critical self-reflection and analysis of their role as social workers;
- Build on their experience and understanding of practice conditions and effective practice models;
- Analyze and critique social work theories and approaches to practice, using difference-centered theories;
- Develop skills for developing and applying critical social work theories and approaches to practice;
- Conceptualize, critique and develop their own practice framework;
GRADUATE PROGRAMS

- Develop and apply skills in research and critical inquiry within community contexts;
- Address the current impact of funding and program policies, organizational policies and structures and community dynamics on practice in their communities;
- Explore the challenges, opportunities and strategies for critical social work practice in inter-professional contexts;
- Cultivate practice approaches for working across differences of gender, age, race, ethnicity, class, ability and sexual orientation;
- Identify the leadership roles and distinctive contributions that social work can make to policy and practice in the human services and locate themselves as leaders in relevant practice and policy contexts within their communities.

Additional objectives of the MSW program within the Indigenous specialization:

- “centering” Indigenous culture, knowledge and understanding;
- building on students’ own knowledge as experienced practitioners in Indigenous service settings;
- developing critical awareness and capacity for analysis and applying these skills to practice and policy development in Indigenous service settings;
- developing the capacity to conduct research and contribute to Indigenous knowledge building and transmission;
- identifying racism, colonization and oppression and contributing to liberating policies and practices;
- contributing to the development of culturally appropriate child welfare policies and practices;
- contributing to the development of healthy Indigenous communities;
- identifying international connections between Indigenous peoples and their knowledge and experience;
- developing leadership skills in policy development and administration in the context of Indigenous governance.

The MSW Advanced program will be offered through a combination of summer institute and web-based delivery of instruction and all of the courses will be offered through the School.

The MSW Indigenous specialization program will be offered every other year through a combination of summer institute and web-based delivery of instruction. Students within the specialization will begin the program in the summer session by taking SOCW 521 which has an on-campus component.

The Non-BSW MSW program will be offered on campus.

Students have the option of completing a thesis or social work Advanced Practice practicum with additional coursework under the supervision of a faculty member of the School of Social Work, unless an alternate supervisor is approved by the Director.

Financial Support

All new applicants are evaluated for the University Fellowship. The minimum standard required for consideration is a first-class standing (A-). Grade calculations and equivalencies are determined by the Graduate Admissions and Records Office. The process is competitive and meeting the minimum standard for consideration does not guarantee that you will be successful in the competition.

A number of awards, scholarships and bursaries are available to full-time students. The Faculty of Graduate Studies provides a list of available awards and necessary applications online at <web.uvic.ca/gradstudies/fund/funding.html> or through their office in the University Centre. Information on bursaries and scholarships can be found at the UVic Student Awards & Financial Aid Office, located in the University Centre, or through their website at <uvic.ca/safa>. In addition, the provincial, territorial and federal governments each offer student loans to full-time candidates who meet the requirements.

Students are encouraged to apply to postings that are advertised on the School’s listserv, where additional opportunities may be provided.

ADMISSION REQUIREMENTS

General

Initial inquiries regarding graduate studies in social work should be made to the Graduate Secretary. Application forms and supporting documents can be obtained from the School of Social Work website, at <www.uvic.ca/hsd/socialwork/prospective>. Applicants are required to provide a personal statement, a current CV, and two references, one of which may be from an employer, as part of the application. Completed applications and supporting documents must be available for consideration by the School and faculty on, or prior to, the deadline date.

All students entering a graduate program in Social Work must have access to the Internet, email and Microsoft Office (i.e., Word and PowerPoint) as well as Adobe Reader or Adobe Acrobat for the duration of the program. Students require a UVic Netlink ID with a UVic email address.

Synchronous learning sessions (booked online classes in real time) may be required for all MSW program options. Students enrolled in the MSW program may be required to be available for weekly online synchronous learning opportunities.

Admission to the Master’s Program

Entry into the MSW Advanced Program or MSW Indigenous Specialization requires a BSW degree with a minimum GPA of 6.0 (B+) or higher. Admission is highly competitive. Not all students
who meet the minimum requirements will be admitted. These programs are offered as resources permit.

Specific to the MSW Advanced Program: all applicants must have at least two years of post-BSW professional experience. (Equivalencies to this practice requirement may be considered.)

Specific to the MSW—Indigenous Specialization: Two years of post-BSW professional experience in an Indigenous social service setting. This requirement reflects the distinctive features of this program.

Admission to the Master’s Program without a BSW

All applicants will be required to satisfy normal admissions requirements for the Faculty of Graduate Studies. Entry requires an undergraduate degree from a Canadian recognized degree-granting institution, and a graduating cumulative GPA of 6.0 or higher. References demonstrating two or more years of successful practice in one or more human service organizations.

Deadline

The application deadline is December 1 of each year for all MSW options, for both domestic and international applicants. Completed applications and supporting documents must be available for consideration by the School of Social Work on, or prior to, these dates.

Program Regulations

All students in the School of Social Work must follow the Guidelines for Professional Conduct (see below), the Regulations Concerning Practica (see below) and are subject to the provisions of the Canadian Association of Social Work (CASW) Code of Ethics <www.casw-acts.ca/en/what-social-work/casw-code-ethics>.

Guidelines for Professional Conduct

The School of Social Work expects students to develop and adhere to a professional code of conduct. The School supports models for professional conduct based on the following guidelines:

• adherence to a professional code of ethics;
• exercise of personal discipline, accountability and judgement;
• acceptance of personal responsibility for continued competency and learning;
• willingness to serve the public, client or patient and place them before oneself;
• ability to recognize the dignity and worth of all persons;
• willingness to assist others in learning;
• ability to recognize one’s own limitations;
• maintenance of confidentiality of information (including all electronic communication) appropriate to the purposes and trust given when that information was acquired;
• acceptance that one’s professional abilities, personal integrity and the attitudes one demonstrates in relationships with other persons are the measure of professional conduct.

A student who has breached any of the above guidelines or fails to follow the CASW Code of Ethics in any Social Work course may be:

a) required to engage in a course of action to address concerns; and/or
b) suspended from continued participation in the course prior to the course end date; and/or
c) assigned a failing grade (grade of F or N) for the course; and/or
d) asked to withdraw from the Social Work Program.

Regulations Concerning Practica

General Practicum Policies

The School reserves the right to approve any agency or institution that provides placements for student practica, and to change any placement assigned to a student. The student has the right to be informed in writing of the reasons for any change in placement. While the faculty strives to provide a sufficient number of practicum opportunities to serve the needs of all registered students, a student may be required to withdraw from a practicum course if none of the available practicum agencies will accept the student.

Immunizations, Agency Fees and Other Costs

Students may be required to complete their practica in an agency requiring proof of immunization and a criminal record check as part of its screening process. In addition, agencies may charge an administration fee and a fee to process identification badges. Cost related to these requirements and other agency costs associated with the practicum are the responsibility of the student.

All students completing a practicum in BC will be required to complete a criminal record check through the Ministry of Justice.

Application for Practicum

Students must submit an application for practicum approximately two terms in advance of the semester when they are planning to take the course. Applications are available on the School’s web site. The due dates for applications are posted on the school’s website.

Attendance

Attendance at practicum activities is required. Students are expected to notify the placement agency whenever practicum appointments or regular hours of attendance cannot be kept for any reason, and also to inform the course instructor. Failure to do so may result in a student being withdrawn from the practicum setting.
Denial and Withdrawal

Denial
Students will be denied the practicum experience if their preparatory work is considered unsatisfactory by the Director of the School of Social Work.

Temporary Withdrawal of Students Pending Report
The Director may require a student to withdraw temporarily from a practicum if, during the course of a term, there are reasonable grounds to believe that the conduct or lack of competence of a student enrolled in the practicum has adversely affected or may adversely affect:

- clients, or
- personnel, including students associated with the practicum

The student will be required to withdraw temporarily pending the receipt of a report on the conduct and lack of competence of the student. This written report from the course instructor will normally be provided to the student within 10 business days of the withdrawal.

Withdrawal
After giving the student an opportunity to be heard, the Director may require a student to withdraw from the practicum if the Director is satisfied that the student’s conduct or lack of competence may adversely affect members of any of the groups identified in the paragraph above.

Voluntary Withdrawal
Students seeking voluntary withdrawal from a practicum, whether permanent or temporary, must receive permission to do so from the Graduate Advisor.

Appeals
The normal avenue of final appeal is available for students who feel they have been unjustly treated.

Information Sharing
The University of Victoria School of Social Work is committed to supporting students to become capable, professional Social Workers. Evaluative feedback about student progress may be shared amongst instructors and staff in the School in order to promote student success or address concerns about professional conduct.

Program Requirements

Non-BSW Entry MSW Program
Non-BSW entry MSW students must take 31.5 units in total to complete the program. The Foundation courses are comprised of seven 1.5-unit courses for a total of 10.5 units, 1.5 units of an elective plus a 4.5 unit practicum. The Advanced Year courses are the same as for the BSW degree holders.

Core Course Requirements (10.5 units)

- SOCW 541 (1.5) Introduction to Critical Social Work Practice
- SOCW 544 (1.5) Social Work, the State and Citizenship
- SOCW 546 (1.5) Collaborative Conversations
- SOCW 547 (1.5) Historicizing Social Work: Friendly Visits to Social Justice
- SOCW 549 (1.5) Research Foundations
- SOCW 550 (1.5) Social Justice, Social Work and the Law
- SOCW 551 (1.5) Indigenous Communities: Practice and Policy
- Electives (1.5) Students must take at least 1.5 units of elective courses.

Students may take one 400 level course as an elective with the permission of the course instructor and the Graduate Adviser. Undergraduate courses taken prior to admission to the MSW cannot be used for graduate elective credit.

Practicum Requirements

- SOCW 540 (4.5) Foundation Practicum

Additional Program Requirements
To be eligible to progress to the advanced year coursework, students must maintain a 6.0 (B+) average and have completed all the foundation year core-course and practicum requirements.

Program Length
The maximum time limit for the MSW Program is 5 years. It is expected that full-time students will complete their programs in less than 3 years.

MSW Advanced program

Thesis option
The MSW Advanced program (thesis option) requires a minimum of 15 units. The 15 units are made up of 7.5 units of core courses, 1.5 units of electives, and a 6.0 units thesis.

The Advanced program courses will be offered through a combination of summer institute and web-based instruction.

- SOCW 510 (1.5) Policy Context of Practice
- SOCW 511 (1.5) Contemporary Debates and Ethical Dilemmas in Social Work
- SOCW 512 (1.5) Knowledge and Inquiry: Re-Theorizing Social Work
- SOCW 515 (1.5) Transnational Social Work
- SOCW 516 (1.5) Research Methodologies
- SOCW 599 (6.0) Thesis

Electives (1.5 units):
Students must take at least 1.5 units of elective courses. MSW students may take one 400 level course as an elective with the permission of the course instructor and the Graduate Adviser.
Undergraduate courses taken prior to admission to the MSW cannot be used for graduate elective credit.

**Program Length**

The maximum time limit for the MSW Program is 5 years. It is expected that full-time students will complete their programs in less than 3 years.

**MSW Advanced program**

**Course-based option**

The MSW Advanced program (course-based option) requires a minimum of 15 units. The 15 units are made up of 9.0 units of core courses, 1.5 units of electives, and a 4.5 unit advanced practicum.

The Advanced program courses will be offered through a combination of summer institute and web-based instruction.

- SOCW 510 (1.5) Policy Context of Practice
- SOCW 511 (1.5) Contemporary Debates and Ethical Dilemmas in Social Work
- SOCW 512 (1.5) Knowledge and Inquiry: Re-Theorizing Social Work
- SOCW 515 (1.5) Transnational Social Work
- SOCW 516 (1.5) Research Methodologies
- SOCW 571 (1.5) MSW Capstone
- SOCW 506 (4.5) Advanced Practicum

**Electives (1.5 units):**

Students must take at least 1.5 units of elective courses. MSW students may take one 400 level course as an elective with the permission of the course instructor and the Graduate Adviser. Undergraduate courses taken prior to admission to the MSW cannot be used for graduate elective credit.

**Program Length**

The maximum time limit for the MSW Program is 5 years. It is expected that full-time students will complete their programs in less than 3 years.

**Master’s with Indigenous Specialization**

**Thesis option**

The MSW-Indigenous Specialization degree (thesis option) requires a minimum of 15 units. The 15 units are made up of 6.0 units of core courses, 3.0 units of electives, and a 6.0 unit thesis.

- SOCW 510 (1.5) Policy Context of Practice
- SOCW 516 (1.5) Research Methodologies
- SOCW 521 (1.5) Indigenous Perspectives on Knowledge and Research
- SOCW 523 (1.5) Self-conscious Traditionalism in Indigenous Social Work Practice Seminar
- SOCW 599 (6.0) Thesis

- SOCW 510 (1.5) Policy Context of Practice
- SOCW 516 (1.5) Research Methodologies
- SOCW 521 (1.5) Indigenous Perspectives on Knowledge and Research
- SOCW 523 (1.5) Self-conscious Traditionalism in Indigenous Social Work Practice Seminar
- SOCW 571 (1.5) MSW Capstone
- SOCW 506A (4.5) MSWI Practicum

**Elective (3.0)**

Student must take at least 3.0 units of elective courses. MSWI students may take one 400 level course as an elective with the permission of the course instructor and the Graduate Adviser. Undergraduate courses taken prior to admission to the MSWI program cannot be used for graduate elective credit.

**Program Length**

Normally, full-time students in the Indigenous Specialization require a minimum of two years to complete the MSW degree.

**Sociology**

**General Information**

At the level of graduate studies, the Department of Sociology includes among its research and teaching strengths the six core areas of concentration designated in its doctoral program: aging, gender, health, political sociology/social movements, social inequality, and cultural, social and political thought. Graduate studies in Sociology are designed to emphasize the connections between core areas and to encourage students to develop competencies in more than one area, particularly at the doctoral level. Further information is available at the department’s website (see below).

Faculty Members and Areas of Research
Douglas E. Baer, PhD (Waterloo)
  Social inequality; political sociology; quantitative methods; voluntary associations; immigration
Cecilia M. Benoit, PhD (Toronto)
  Marginalized populations; work and occupations; sex industry; stigma and discrimination; health; drug use; equity; social policy
William K. Carroll, PhD (York)
  Political economy; social movements; Marxism and post-Marxism; critical social theory and methods; fossil capital and climate crisis
Neena L. Chappell, PhD (McMaster)
  Aging; health; health care and social policy; Chinese families; dementia care
Aaron H. Devor, PhD (Washington)
  Transgender, LGBTQ+ gender and sexuality
Steve Garlick, PhD (CUNY)
  Masculinity; gender relations; critical social theory; sexuality; bodies; technology and science studies
Garry Gray, PhD (Toronto)
  Crime and deviance; institutional corruption; socio-legal studies; behavioral ethics; culture; health; organizational theory; sociology of science; qualitative methods
Helga K. Hallgrimsdattir, PhD (Western Ontario)
  Social movements; historical sociology; gender; culture and social action; citizenship studies
Sean P. Hier, PhD (McMaster)
  Social problems; moral panic; media; social theory; criminalization; human/nonhuman relations; urban lifestyles; modern postural yoga
Karen M. Kobayashi, PhD (Simon Fraser)
  Aging; family; health and health care; ethnicity and immigration; research methods
Catherine Krull, PhD (Alberta)
  Migration; diasporas; inequality; transnationalism; circuits of knowledge; gender politics and the state; body/reproductive politics; Cuba/Latin America; postcolonialism/indigenous issues
Martha McMahon, PhD (McMaster)
  Environment; local food and farming agrifood governance; ecological feminism; human dimensions of climate change
Margaret J. Penning, PhD (Alberta)
  Aging; health and health care; social networks and social support; research methods
André P. Smith, PhD (McGill)
  Health; aging; deviance; social control; mental health; blood donation; qualitative research methodologies
Peyman Vahabzadeh, PhD (Simon Fraser)
  Classical and contemporary social theory; social movements; phenomenology; Iranian studies; exile
Zheng Wu, PhD (Western Ontario)
  Demography; family; aging; health; immigration; quantitative methods
Min Zhou, PhD (Harvard)
  Global and transnational sociology; economic sociology; political sociology; social network analysis; quantitative methods; East Asian societies
Emiritus Faculty

C. David Gartrell, PhD (Harvard)
- Networks; social psychology; theory; methods and statistics; religion

Robert B. Hagedorn, PhD (Texas-Austin)
- Formal organization; social psychology; social change; theory

R. Alan Hedley, PhD (Oregon)
- Social change and development; sociology of work and technology; comparative cultures; research methodology

Richard L. Ogmundson, PhD (Michigan)
- Inequality; political sociology; elites

T. Rennie Warburton, PhD (London School of Economics)
- Religion; class relations and ideology; racism and ethnicity

Adjunct Faculty

B. Singh Bolaria, PhD (Washington State)
- Social inequality; labour migrations; immigration policy; health and illness

Thomas K. Burch, PhD (Princeton)
- Demography; family; theory and methodology; computer modelling

Barry Edmonston, PhD (Michigan)
- Demography; human ecology; quantitative methodology

James C. Hackler, PhD (Washington)
- Deviance; social control; criminology and delinquency

Feng Hou, PhD (Western Ontario)
- Demography; immigration; race and ethnicity; labour economics; social policy

Mikael Jansson, PhD (Western Ontario)
- Health; substance use; street youth; ethics; research methods

Sharon M. Lee, PhD (Princeton)
- Social demography; immigration; race and ethnicity; social inequality

Dorothy E. Smith, PhD (UC, Berkeley)
- Social organization of knowledge; institutional ethnography

Degrees and Specializations Offered

The Department of Sociology offers courses of study leading to the degrees of Master of Arts and Doctor of Philosophy.

Facilities

Facilities available exclusively for Sociology graduate students include the Roy Watson Computer Laboratory, where software is available for the analysis of both qualitative and quantitative data.

Through its affiliation with the B.C. Regional Data Centre, the University provides extensive access to Statistics Canada survey data at the university library. Graduate students have access to the B.C. Provincial Archives and to national and international data sets through the Inter-University Consortium for Political and Social Research (ICPSR).

The department participates in research centres that include the Centre on Aging (arguably the best unit of its kind in Canada), the Centre for Addiction Research of BC, and the Centre for Youth and Society, and in the highly innovative Interdisciplinary Program in Cultural, Social, and Political Thought (CSPT, see below).

Financial Support

Graduate students are supported by fellowships and scholarships, teaching and research assistantships, and (for master’s students) work placements in UVic’s Co-operative Education Program, the third largest in Canada. The Co-op option allows master’s students to gain valuable paid work experience while completing degree requirements.

Not all MA students can expect to be funded. As well, the department normally funds MA students only in the first two years of their program. To qualify for second-year funding, a student needs to make adequate progress in the first year. Generally, this means completing six courses with a GPA of 6 or better.

All doctoral students are funded at a minimum level of $12,000 for each of three years. The department strives to support its doctoral students with funds approaching $18,000 for each of these years. Sources for funds can include teaching and research assistantships, grants and fellowships from the Faculty of Graduate Studies, external grants and fellowships, and sessional teaching work for doctoral students after completion of all coursework and candidacy exams.

All eligible students are encouraged to apply for funding from provincial, federal and external sources.

Admission Requirements

The department welcomes applications from Canadian and international students with strong backgrounds in sociology or closely related fields. All applications should include a full set of official transcripts, at least two letters of reference, a writing sample, and a statement of intent.

With rare exceptions, master’s and doctoral students enter their programs in September. This is mainly because funding is normally available only for students beginning their programs at that time. Graduate seminar courses are offered only in the fall and spring terms; however, graduate students may arrange with individual faculty to take Directed Studies courses (SOCI 590 and 690) in the summer term (May-August).

Admission to Master’s Programs

Admission to the master’s program requires a bachelor’s degree, with a minimum overall average of 8+ (6.0) in the final two full years of credit units or undergraduate work. All incoming master’s
The programs leading to the Master of Arts degree in Sociology, while containing a core of theory and method, are designed to provide flexibility for students as well as to reflect the diversity which characterizes the discipline. Individual programs beyond the core are designed to fit students’ interests and to supplement areas in which they may require additional work, insofar as faculty resources and specializations permit.

Normally, work as a research assistant or teaching assistant is an integral part of the master’s program in Sociology.

Students are urged to consult the most recent edition of A Guide to Graduate Studies in Sociology, which may be obtained at the departmental Office and on our website. The Guide provides further details of the program and specifies additional requirements for program completion.

**Thesis-based Master’s**

This program involves 9 units of coursework and a 6-unit thesis, with at least 12 of the 15 units drawn from Sociology listings in the calendar. At least 13.5 units must be at the graduate level; 1.5 units may be selected from undergraduate Sociology courses numbered 300 and higher (subject to approval by the Graduate Adviser). In this program, students write a thesis (SOCl 599) for which they receive 6 units of credit. Students are required to demonstrate competence in both sociological theory (SOCl 503 or 504) and method (SOCl 507 and 515).

In addition, normally students must complete at least one of the following: SOCl 508, 511, 525, 535, 545, 556, 566, 585. CSPT 500 or CSPT 501 may be substituted for these courses if the CPST section is taught by a member of the Sociology department. These courses are designed to facilitate the range of interests displayed by traditional and contemporary sociological inquiry. The range of such interests is illustrated by the current areas of interest declared by the Sociology faculty.

**Course Requirements:**

- **Thesis (SOCl 599)** ................................................................. 6.0
- **Statistical Analysis (SOCl 507)** ............................................. 1.5
- **Qualitative Research Methods (SOCl 515)** ............................. 1.5

One of the following:

- **Classical Sociological Theory (SOCl 503)** .............................. 1.5
- **Contemporary Social Theory (SOCl 504)** .............................. 1.5

At least one of the following:

- **Linear Models (SOCl 508)** ..................................................... 1.5
- **Research Design (SOCl 511)** ................................................ 1.5
- **Gender, Power and Social Justice (SOCl 525)** ......................... 1.5
- **Political Sociology (SOCl 535)** .............................................. 1.5
- **Sociology of Health (SOCl 545)** ............................................. 1.5
- **Social Inequality (SOCl 556)** ................................................ 1.5
- **Social Movements (SOCl 566)** .............................................. 1.5
- **Seminar on Aging (SOCl 585)** ............................................. 1.5
- **Topics in Cultural, Social and Political Thought (CSPT 500)*** ........................................................................................................ 1.5

**Deadlines**

- Domestic with financial support: January 15th (for Sept. entry)
- Domestic without financial support: 31 May (for Sept. entry)
- International: 15 December (for Sept. entry)

**Program Requirements**

**Master’s**

The department offers two programs leading to the MA degree. Normally, students will declare their intentions of pursuing one or the other option by the end of April of their first year in the graduate program.

**MA Oral Examination**

All students will undergo an oral examination upon completion of their thesis.

**MA Supervisory Committee**

Students in the thesis option will be supervised by a committee consisting of their academic supervisor and at least one other member from the home academic unit. Additional committee members may or may not be from the home academic unit.

**Program Length**

The department expects full-time students to spend two years completing the master's degree. Students who take the Co-operative Education option can expect to take close to three years to complete the master's degree. Students who complete the master's degree on a part-time basis can expect to take three to four years, depending on how many terms involve full-time enrolment and how many involve part-time enrolment.

**Thesis-based Master's with CSPT**

CSPT Master's students must complete 9 units of course work and a 6-unit thesis (SOCI 599) whose topic must be within the field of CSPT. Within or in addition to the 9 units of course work, they must complete two CSPT graduate seminars (3.0 units). At least 12 of the 15 units must be drawn from Sociology listings in the calendar. At least 13.5 units must be at the graduate level; 1.5 units may be selected from undergraduate Sociology courses numbered 300 and higher (subject to approval by the Graduate Adviser). CSPT Master's students are required to demonstrate competence in both sociological theory (SOCI 503 or 504) and method (SOCI 507 and 508). At least one of the following: Sociology of Health (SOCI 545) 1.5 Social Inequality (SOCI 556) 1.5 Social Movements (SOCI 566) 1.5 Seminar on Aging (SOCI 585) 1.5 Topics in Cultural, Social and Political Thought (CSPT 500) 1.5

Contemporary Cultural, Social and Political Thought I (CSPT 501) 1.5

Qualitative Research Methods (SOCI 515) 1.5

Statistical Analysis (SOCI 507) 1.5

Research Design (SOCI 511) 1.5

Gender, Power and Social Justice (SOCI 525) 1.5

Political Sociology (SOCI 535) 1.5

Sociology of Health (SOCI 545) 1.5

Social Inequality (SOCI 556) 1.5

Social Movements (SOCI 566) 1.5

* May be taken more than once if course content differs.

At least one of the following:

Linear Models (SOCI 508) 1.5

Research Design (SOCI 511) 1.5

Gender, Power and Social Justice (SOCI 525) 1.5

Political Sociology (SOCI 535) 1.5

Sociology of Health (SOCI 545) 1.5

Social Inequality (SOCI 556) 1.5

Social Movements (SOCI 566) 1.5

* May be taken more than once if course content differs.

**Project-based Master’s**

This program involves 12 units of course work and a 3-unit Major Research Paper, with at least 9 of the 15 units drawn from Sociology listings in the Calendar. At least 13.5 units must be at the graduate level; 1.5 units may be selected from undergraduate Sociology courses numbered 300 and higher (subject to approval by the Graduate Adviser). In this program, students write an Extended Essay (SOCI 598) for which they receive 3 units of credit. Students are required to demonstrate competence in both sociological theory (SOCI 503 or 504) and method (SOCI 507 and 508). In addition, students must complete at least two of the following: Sociology of Health (SOCI 545) 1.5 Social Inequality (SOCI 556) 1.5 Social Movements (SOCI 566) 1.5 Seminar on Aging (SOCI 585) 1.5. CSPT 500 or CSPT 501 may be substituted for these courses if the CPST section is taught by a member of the Sociology department.

Additional courses may be taken from other departments, up to a maximum of 4.5 units, selected in consultation with the Graduate Adviser and the student’s supervisor, and with permission of the other departments.

**Course Requirements**

Course Requirements:

**Major Research Paper (SOCI 598) 3.0**

**Statistical Analysis (SOCI 507) 1.5**

**Qualitative Research Methods (SOCI 515) 1.5**

One of the following:

**Classical Social Theory (SOCI 503) 1.5**

**Contemporary Social Theory (SOCI 504) 1.5**

**Research Design (SOCI 511) 1.5**

**Gender, Power and Social Justice (SOCI 525) 1.5**

**Political Sociology (SOCI 535) 1.5**

**Sociology of Health (SOCI 545) 1.5**

**Social Inequality (SOCI 556) 1.5**

**Social Movements (SOCI 566) 1.5**

At least one of the following:

**Linear Models (SOCI 508) 1.5**

**Research Design (SOCI 511) 1.5**

**Gender, Power and Social Justice (SOCI 525) 1.5**

**Political Sociology (SOCI 535) 1.5**

**Sociology of Health (SOCI 545) 1.5**

**Social Inequality (SOCI 556) 1.5**

**Social Movements (SOCI 566) 1.5**

* May be taken more than once if course content differs.

**Additional courses may be taken from other departments, up to a maximum of 4.5 units, selected in consultation with the Graduate Adviser and the student’s supervisor, and with permission of the other departments.**
Seminar on Aging (SOCI 585) .................................................. 1.5
Topics in Cultural, Social and Political Thought (CSPT 500) .................................................. 1.5
Contemporary Cultural, Social and Political Thought I (CSPT 501) .................................................. 1.5

**Final Project**

In this program, students write an Major Research Paper (SOCI 598) for which they receive 3 units of credit. This is a piece of independent research work that involves substantial analytical engagement with a defined area of sociology guided by one or more research questions. Typically, the Major Research Paper is between 40 and 60 pages long.

**Oral Examination**

Students in the project-based program will be supervised by a committee consisting of their academic supervisor and one other department member and will undergo an oral examination upon completion of their Major Research Paper.

**PhD Program**

The PhD program is open to students with research interests in one or more of the following core areas and their intersections:

- aging
- gender
- health
- political sociology/social movements
- social inequality
- cultural, social and political thought (CSPT)

The PhD degree requires 33 units in accordance with the following program.

**Course Requirements**

All students are required to complete six 1.5 unit graduate courses beyond the MA degree. Unless taken as part of a previous graduate program in Sociology, students will, by the end of their doctoral program, be required to complete two graduate-level social theory courses (SOCI 503 and 504) as well as graduate-level courses in qualitative (SOCI 515) and quantitative (SOCI 508) method. These four courses have prerequisites at the upper-undergraduate level. To ensure mastery of theory and method, students with grades below B+ in any of the four designated courses must pass a written supplementary examination before the theory/method requirements will be deemed to have been met. Students deficient in basic social theory and methods will be asked to complete the prerequisite courses (additional to the 9.0 required graduate-level units) before taking SOCI 503, 504, 508 and 515. CSPT courses taught by a Sociology faculty member are considered Sociology courses. Sociology doctoral students are encouraged though not required to take graduate courses from other disciplines to enhance their studies. They may take 3.0 units from other departments, selected from a list of approved courses.

**Unit Values**

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>PhD Candidacy Examinations</td>
<td>3.0</td>
</tr>
<tr>
<td>Dissertation</td>
<td>21.0</td>
</tr>
<tr>
<td>Total</td>
<td>33.0</td>
</tr>
</tbody>
</table>

**Candidacy examinations**

All students must pass a three-part candidacy examination. Students first write a broad-based exam paper that addresses a central topic in sociology, followed by a more narrowly-focused written exam paper that addresses the student’s proposed area of dissertation research (including theoretical and methodological approaches relevant to that area of study). Finally, all students complete an oral examination on both written components. Reading lists are compiled through a collaborative process between the student and the examining committee, and all three parts of the candidacy exam must be passed.

The only exception to this process is for students taking the CSPT option in the PhD program. CSPT students have one candidacy exam administered by the CSPT program, which substitutes for the first, broad-based exam in the candidacy examination process.

**Dissertation**

Students are required to complete and defend a dissertation proposal before their supervisory committee, normally within six months of passing the candidacy exams. The proposal and oral defense must be considered satisfactory before the student may proceed to the dissertation. All students are required to submit and defend a dissertation worth 21 units of credit.

**PhD Supervisory Committee**

A PhD student’s supervisory committee must have at least three members: the academic supervisor from the home academic unit, plus one other member also from the home academic unit. The third member must be from outside the home academic unit.

**PhD Program - CSPT Option**

CSPT doctoral students must meet the core requirements of their own department as well as the specific requirements of the CSPT program. A CSPT PhD student must complete 9.0 units of coursework, subject to the same requirements that apply to other Sociology doctoral students (see ‘Course Requirements’ above). CSPT doctoral students are required to take one section of CSPT 500 plus one section of CSPT 600/601. In addition, such students write, as one of their comprehensive exams, a CSPT exam, set by the CSPT program. Students taking the CSPT doctoral option will have as their supervisor a CSPT faculty member who is also a member of the Sociology department. A Sociology (CSPT) student’s dissertation must meet the requirements of both the CSPT Program and the Department of Sociology. The topic must be within the broad field of cultural, social and political thought.

**Unit Values**
Co-operative Education

Participation in the Co-operative Education program – which enables students to acquire knowledge, practical skills for employment, and workplace experience – is optional for Master's and PhD students. Master’s students complete two work terms and PhD students complete three (a work term consists of four months of full-time, paid employment). Students require permission from their academic adviser and graduate adviser, as well as the Co-op coordinator, to participate in the Co-op program. Interested students should contact the Sociology Co-op office early in their first term. Students are also referred to “General Regulations: Graduate Co-op”, page 56.

Theatre

General Information

The Philosophy of the Theatre department is that the theatre should be studied in all its aspects and that it is best approached through a curriculum that leads to performance. Through all courses and productions, students are encouraged to focus on fundamental creative, interpretive, performative and technical skills as they study the historical, contemporary and educational theories and practices of the theatre arts.

Since theatre is a public art, the majority of our work is presented to the public. Our production format includes a Mainstage season of shows, plus a spring festival of new and innovative work co-produced with the Department of Writing.

For more information please consult our website: <finearts.uvic.ca/theatre>.

Faculty Members and Areas of Research

Allana Lindgren, PhD (Toronto), Chair
  Dance history, theatre history, modernism, Canadian cultural history

Conrad Alexandrowicz, MFA (Alberta)
  Acting, movement for actors, devised theatre

Warwick Dobson, PhD (Sussex)
  Applied theatre, drama/theatre in education, reminiscence theatre

Fran Gebhard, MFA (Vancouver)
  Acting, directing

Linda Hardy, MA (Toronto)
  Acting, voice and speech for the stage, 19th-century British theatre, directing

Mary Kerr, BFA (Manitoba), Doctor of Canon Law (honoris causa) (Manitoba)
  Stage design (costume and set), Canadian theatre, dance, ballet, opera, musical theatre, film, television and special events design

Peter McGuire, MFA (Victoria)
  Production, direction

Brian Richmond, MA (Toronto)
  Directing, dramaturgy, acting

Kirsten Sadeghi-Yekta, PhD (Manchester)
  Applied theatre, aesthetics of theatre, political theatre, community projects, devising for performance

Anthony Vickery, PhD (Victoria)
  Theatre history, especially melodrama and British and North American theatre of the 19th and early 20th centuries
Jennifer Wise, PhD (Toronto)
  Theatre history, especially Ancient Greece and the 18th
century, theories of acting, opera

Jan Wood, BFA (Alberta)
  Acting, voice

Adjunct, Emeritus and Visiting Faculty

Sarah Blackstone, PhD (Northwestern)
  American theatre history, especially popular theatre forms

Michael Booth, PhD (London)
  19th-century theatre history, especially melodrama

Giles Hogya, PhD (Northwestern)
  Lighting Design

Alan Hughes, PhD (Birmingham)
  Theatre history, especially ancient Greek comedy

John Krich, MFA (Yale)
  Acting and Directing

Juliana Saxton, BA (Toronto)
  Applied theatre

Allan Stichbury, BFA (Alberta)
  Stage design (scenic, costumes and lighting), Canadian
theatre

Michael Whitfield, MA (Villanova)
  Lighting design for theatre, opera, and ballet. History of stage
lighting, theatre architecture

Degrees and Specializations Offered
The department offers the following graduate programs:
• MA in Theatre (Theatre History)
• MA in Theatre (Applied Theatre)
• MFA in Directing
• MFA in Design/Production

Facilities
The Phoenix Building is recognized as one of the most innovative
and complete production/teaching facilities in Canada. In
keeping with the academic philosophy of the teaching program,
the Phoenix Building is designed and built around three distinct
theatre architectural models, a thrust, a proscenium and a black
box studio. Each space is provided with equipment designed to
give students, actors, technicians and designers the opportunity
to take part in many types of theatre: historic, modern, and
experimental. Surrounding these performance spaces are fully
equipped support areas: a design studio, scene, costume and
properties workshops. In addition, there are rehearsal areas,
makeup and dressing rooms, a movement studio, storage areas
for props, scenery and costumes and of course classrooms.

In addition, the Department of Theatre has a good working
relationship with the professional community, and educational
theatres on Vancouver Island, providing opportunities for
graduate students to do various types of practical work off-
campus when time permits.

Financial Support
A few graduate students receive University of Victoria Fellowships
(currently valued at approximately $13,500 over 12 months),
which are awarded annually by the Faculty of Graduate Studies.
The primary requirement for a fellowship is a minimum GPA
average of 7.0 (UVic scale = approximately an A- average of 80%)
each of the last two undergraduate years and every graduate
year.

A limited number of assistantships (TA) are also available from the
department for qualified students. The usual level of
assistantships is $2,000 per term, which normally can be matched
by the Faculty of Graduate Studies for a total of $4,000 per term or
$8,000 per year. Numerous other awards are administered
through The Faculty of Graduate Studies. Details can be found on
the Faculty of Graduate Studies website: <www.uvic.ca/grad>.

All eligible graduate students are encouraged to apply for funding
from provincial, federal and external sources. The Theatre
department cannot guarantee funding, although it is our
intention that all graduate students receive some financial
support in the initial years of their respective programs (for MA
and MFA students, the first two years, and for PhD students, the
first three years).

Admission Requirements
General
In addition to the documentation required by the Graduate
Admissions and Records Office (see “Faculty Admissions”,
page 29), the Department of Theatre also requires applicants for
admission to any of the graduate programs to send a letter to
Graduate Admissions with a statement of purpose and a detailed
resumé of their educational background, theatre experience, and
teaching experience, if applicable.

Applicants must have completed appropriate undergraduate
theatre courses.

References should come from theatre professors and/or
recognized theatre professionals.

In addition to satisfying the general requirements for admission to
the Faculty of Graduate Studies (please see the UVic Graduate
Calendar), applicants must be approved by the Department of
Theatre; a minimum GPA of B+ (6.0) is required for admission.

All applicants are judged on a competitive basis and admission is
limited. Not all students who meet the minimum requirements
will be admitted.

Normally we accept applications only for September enrolment.
Admission to the MA in Theatre (Theatre History)
Applicants must possess either a general knowledge of Western theatre history, from the Greeks to the present, or a strong background in dramatic literature. Applicants must also be familiar with the practicalities of theatre production: design, direction, and performance. Normally all admissions are conditional upon a diagnostic examination in theatre history.

Admission to the MA in Theatre (Applied Theatre)
Applicants must have already undertaken extensive study in the field of Applied Theatre, or an allied discipline. Applicants must also possess the intellectual, creative and practical skills necessary to succeed in a postgraduate degree level program. All candidates will be required to provide a full curriculum vitae describing former studies and relevant work experience. Additionally, all candidates should provide a clear statement of intent in which they describe their interests and aspirations in the field, including any special areas of interest, as these relate to the specifics of the program.

Admission to the MFA in Directing
One student is admitted to the MFA program in Directing every two years. The competition is rigorous and a student should not apply unless he/she has an undergraduate degree with a major in theatre and a minimum GPA of B+. The applicant should also have a strong background in dramatic literature and dramatic theory as well as substantial practical experience in acting and directing. MFA in Directing applicants must have a knowledge at the BFA level of Directing, Acting, Theatre History, Lighting, Costume and Scene Design. A candidate’s knowledge may be assessed by a diagnostic examination.

Admission to the MFA in Design/Production
In addition to the above general requirements, MFA in Design/Production applicants will be required to submit a portfolio. Applicants must have a basic knowledge and some experience in design of scenery, costume and lighting. They should also possess at least a survey knowledge of Western Theatre History and an acquaintance with the art of Directing. A candidate’s knowledge may be assessed by a diagnostic examination.

Deadlines
All applications must be submitted on forms available from the Graduate Admission and Records Office website <uvic.ca/garo> by February 1. Applicants are automatically considered for a Graduate Fellowship or Award upon application.

PROGRAM REQUIREMENTS

Master of Arts
MA candidates will normally follow the project-based option as described below. For the project-based option, all candidates must complete 13.5 units of graduate course work (as described in the separate entries below) and an MA Essay of 4.5 units. In exceptional cases, a candidate may be granted permission by the graduate adviser to follow the thesis option, which requires completion of 12 units of graduate course work and an MA thesis of 6 units.

Each student will be assigned a faculty supervisor who will assist the student in the development of the final project.

MA in Theatre - Theatre History (Thesis Option)

Course Requirements
Theatre History (including THEA 500) ........................................... 6.0
Courses to be chosen from a related discipline, to be approved by the Graduate Adviser (3 units may be taken at the 300 or 400 level) ......................................................... 6.0
MA Thesis (THEA 599) ................................................................. 6.0

Thesis
The candidate will submit the thesis and orally defend it as part of the requirements of the Faculty of Graduate Studies.

Program Length
The residency requirement is one year. The expected completion time is two years.

MA in Theatre - Theatre History (Project-based Option)

Course Requirements
Theatre History (including THEA 500) ........................................... 7.5
Courses chosen from a related discipline, to be approved by the Graduate Adviser (3 units may be at the 300 or 400 level) ......................................................... 6.0
MA Essay (THEA 598) ................................................................. 4.5

Final Project (MA Essay)
Under the direction of the faculty supervisor, the candidate will prepare, orally defend during examination and submit a paper suitable for presentation at a recognized scholarly conference or a refereed academic journal. Under special circumstances, the faculty supervisor may approve a student’s request to pursue an MA thesis program. Information is available from the Graduate Adviser.

Program Length
The residency requirement is one year. The expected completion time is two years.

MA in Theatre - Applied Theatre (Thesis Option)
The faculty supervisor may approve a student’s request to pursue an MA thesis program. Information is available from the Graduate Adviser.

Course Requirements
Methods and Materials of Theatre Research (THEA 500) ........................................... 3.0
Research Methods in Applied Theatre (THEA 535) ......................................................... 1.5
Other courses, totalling 4.5 units, to be chosen either from Theatre Department courses, or from a related discipline, to be approved by the Graduate Adviser (Units may be taken at the 300 or 400 level, up to a maximum of 3.0 units).
MA Thesis (THEA 599) ........................................................................................................ 6.0
Total ................................................................................................................................... 15.0

**Thesis**
The candidate will submit the thesis and orally defend it as part of the requirements of the Faculty of Graduate Studies.

**Program Length**
The residency requirement is one year. The expected completion time is two years.

### MA in Theatre - Applied Theatre (Project-based option)

**Course requirements**
Methods and Materials of Theatre Research (THEA 500) ........................................... 3.0
Research Methods in Applied Theatre (THEA 535) ......................................................... 1.5
Other courses, totalling 4.5 units, to be chosen either from Theatre Department courses, or from a related discipline, to be approved by the Graduate Adviser (Units may be taken at the 300 or 400 level, up to a maximum of 3.0 units).
Practical Project Associated with MA essay (THEA 590) .............................................. 1.5
MA Essay (THEA 598) ........................................................................................................ 4.5
Total ................................................................................................................................... 15.0

**Final Project (MA Essay)**
Under the direction of the faculty supervisor, the candidate will design and conduct a research project of workshops and/or performance activity that targets a specific client group. The candidate will prepare, orally defend during examination and submit a reflective paper.

**Program Length**
The residency requirement is one year. The expected completion time is two years.

### Master of Fine Arts

Applicants must have practical theatre experience and may be required to take a diagnostic examination. Any deficiencies will represent additional requirements for the student and must be eliminated before the student may enrol in the graduate level courses in that area. All courses must be taken at the graduate level unless otherwise specified. Candidates may be required to write comprehensive examinations before proceeding to the practicum.

Each student will be assigned a faculty supervisor who will assist the student in the development of the thesis or practicum.

### MFA in Directing – Project-based Option

MFA Directing students will direct a number of short projects and at least one full-length play before graduation.

A practicum production is required along with a practicum report. Members of the performance faculty supervise all projects and productions.

**Course Requirements**
Methods and Materials of Theatre Research (THEA 500) ........................................... 3.0
Directing and Advanced Directing (THEA 512, 515, 523) ............................................. 6.0
Design and Production (THEA 508, 509, 510, 520, 521, 522) ........................................ 3.0
MFA Practicum (THEA 524) ......................................................................................... 6.0

**Final Project** THEA 524, MFA Practicum
A production to be decided upon in consultation with the student’s supervisor and the department’s graduate faculty.

**Oral Examination**
An oral defence of the practicum production is part of the requirements of the Faculty of Graduate Studies. Normally this defence must occur within two months of the close of the production.

**Other requirements**
If a written comprehensive examination is required, it must be passed prior to commencing work on the practicum production. The comprehensive examination will emphasize the practical areas of the theatre but may include Theatre History.

**Program Length**
Normally two calendar years of residency.

### MFA in Design/Production – Project-based Option

Candidates develop their knowledge and skills in three major fields of design for the theatre: scenery, costume and lighting. Practical application of theoretical knowledge and learned skills is particularly emphasized. Normally candidates provide designs for a number of departmental productions, specializing in one area of design, with a minor specialization in a second area.

**Course Requirements**
Methods and Materials of Theatre Research (THEA 500) ........................................... 3.0
Design and Production (THEA 508, 509, 510, 511, 520, 521, 522) .................................. 12.0
MFA Practicum (THEA 524) ......................................................................................... 6.0
Final Project THEA 524, MFA Practicum
A production to be decided upon in consultation with the student’s supervisor and the department’s graduate faculty.

Oral Examination
An oral defence of the practicum production is part of the requirements of the Faculty of Graduate Studies. Normally this defence must occur within two months of the close of the production.

Other requirements
A written comprehensive examination may be required. If required, it must be written no later than the spring term of the second year and prior to commencing work on the practicum production.

Program Length
Normally two calendar years of residency.

Co-operative Education
Participation in the Co-operative Education program - which enables students to acquire knowledge, practical skills for employment, and workplace experience - is optional for Master’s students. Master’s students complete two work terms (a work term consists of four months of full-time, paid employment), and students undertake study and work terms in alternating sessions. Interested students should contact the Humanities, Fine Arts, and Professional Writing Co-op office early in the term in which they are applying. Students are also referred to “General Regulations: Graduate Co-op”, page 56.

Emeritus
Vikky Alexander, BFA (NSCAD)
  Photography
Mowry M. Baden, MFA (Stanford University)
  Sculpture, Public Art
Lynda Gammon, MFA (York)
  Drawing, Sculpture

Degrees and Specializations Offered
MFA

Financial Support
Normally, work as a research assistant or teaching assistant is available to students in the graduate program.
ADMISSION REQUIREMENTS

General

The MFA program is centered around the major areas: Drawing, Painting, Sculpture, Photography and Digital Multimedia. In the tradition of contemporary practice, members of the department also recognize and encourage work that does not fit singularly into the above categories.

Admission To Master’s Program

Applicants to the MFA program must submit a portfolio of work (consult the Visual Arts website <finearts.uvic.ca/visualarts/prospective_students/masters> for details regarding portfolio submission.) Additionally, a Statement of Intent describing the applicant’s conceptual approach to art-making is required. Applicants should also state why they are applying to the University of Victoria MFA program.

As MFA positions are limited, applications will be reviewed in a competitive context. Students who have not previously completed the equivalent of 12 units of Art History, 6 of which must be at the 300 or 400 level, will be required to take the necessary additional courses at the University of Victoria before the granting of the MFA.

Students with a BFA from the University of Victoria will be encouraged to seek their master’s degree elsewhere.

Deadlines

Portfolio submissions and completed applications to the MFA program must be submitted to the Graduate Admissions and Records Office by January 15. See <finearts.uvic.ca/visualarts/prospective_students/masters> for more information.

PROGRAM REQUIREMENTS

Project-based Master’s

Course Requirements

Notwithstanding the Art History requirement, a student must complete the following courses:

one two-year sequence: ART 500 and 501, or ART 511 and 512, or ART 521 and 522, or ART 541 and 542, or ART 551 and 552; in addition to ART 570, 580, 581 and 598.

Final Project

ART 501, 512, 522, 542 and 552 will culminate in a solo exhibition, normally at the end of the second year of study. This final exhibition (ART 598) will be the major source of evaluation for the student’s attainment of the MFA, and will therefore form the basis of the final oral examination.

Other Requirements

At the end of the first year students will present an exhibition of their own work which will be evaluated by faculty members in the department in order to determine the advisability of a student continuing to the second year. Students will be expected to meet on a regular basis with their faculty supervisor(s) for constructive critiques and seminars dealing with their work.

Program Length

The normal length of time for the completion of the MFA is two years of full-time study, with degree requirements being completed in the spring of the second year. A student may be advised, or permitted upon departmental recommendation, to delay the final exhibition for a period of not more than twelve months.

CO-OPERATIVE EDUCATION

Participation in the Co-operative Education program - which enables students to acquire knowledge, practical skills for employment, and workplace experience - is optional for Master’s students. Master’s students complete two work terms (a work term consists of four months of full-time, paid employment), and students undertake study and work terms in alternating sessions. Interested students should contact the Humanities, Fine Arts, and Professional Writing Co-op office early in the term in which they are applying. Students are also referred to “General Regulations: Graduate Co-op”, page 56.

Writing

GENERAL INFORMATION

The Department of Writing offers a Master of Fine Arts in Writing with a focus in the following genres: poetry, fiction, creative nonfiction, playwriting and screenwriting. A key component in the MFA is courses and practice in the teaching of writing. Workshops are the key to the department’s teaching methods – small groups of students discuss and analyze their craft in intensive workshop and seminar sessions. In addition to its award-winning faculty, the Department hires guest instructors and visiting lecturers who are outstanding practitioners.

Canada
Financial Support
A Graduate Award will be awarded to each Master’s student in the first year of the program. There are a number of graduate scholarships available specifically for Writing students, along with others in the university. Students without a previous Master’s degree are eligible to apply for SSHRC funding.

Students are eligible to apply for a teaching assistantship in the second year of the program.

ADMISSION REQUIREMENTS

General
The MFA program focuses on five genres: fiction, creative nonfiction, poetry, playwriting and screenwriting.

Admission to Master’s Program
An undergraduate degree in any discipline and from any accredited college or university in BC as well as from accredited post-secondary institutions from outside the province. Applicants must have an undergraduate degree and a cumulative GPA of B.

There will be only one admission point: September of each year. We will accept only those prepared to make a commitment to full-time studies in the fall and spring semesters of their first year. Applicants will submit a portfolio consisting of samples of writing in the genre in which they wish to study. One of the following will be required: 10-15 pages of poetry; 20-30 pages of playwriting, screenwriting, fiction or creative nonfiction. Professional experience, screenings and publications will also be taken into account. These should be summarized in one to three pages.

Applicants must also submit a 400-word statement of purpose, which will include a description of the manuscript to be worked on and the specific area of expertise to be explored.

In addition to the letters of assessment required for admittance to Graduate Studies, the Department of Writing will require two letters of reference which will include the following: an assessment of the student’s academic standing, talent as a writer, critical ability, capacity for doing self-directed work, and teaching potential.

Deadlines
Applications with supporting material must be received by December 1.

PROGRAM REQUIREMENTS
Students will be required to complete 9 units of classes and a 9-unit major writing project in a two-year period. The Writing Portfolio will be a significant body of publishable material, the basis of a manuscript of poetry or short stories, a novel, a collection of essays or a memoir, biography, travel book. It may also be a stage play or a screenplay ready for production. The program of studies includes:

Required courses:
WRIT 500 (1.5) Writing Workshop (taken twice)
Electives may also be taken from several other sources. Students can request admission into undergraduate courses within the Department of Writing or outside the department with approval from the student’s supervisor. As well, there is a range of courses offered in other graduate programs across campus. There is, however, no guarantee that space will be available in courses in other departments.

**Co-operative Education**

Participation in the Co-operative Education program - which enables students to acquire knowledge, practical skills for employment, and workplace experience - is optional for Master’s students. Master’s students complete two work terms (a work term consists of four months of full-time, paid employment), and students undertake study and work terms in alternating sessions. Interested students should contact the Humanities, Fine Arts, and Professional Writing Co-op office early in the term in which they are applying. Students are also referred to “General Regulations: Graduate Co-op”, page 56.

**Required courses:**
- WRIT 509 (1.5) Instructional Skills Preparation
- WRIT 501 (1.5) Advanced Studies in Writing (taken twice)
- WRIT 598 (9.0) Major Writing Portfolio

**Program Electives:**
- WRIT 590 (1.5) Directed Studies in Instructional Skills Preparation
- WRIT 591 (1.5) Directed Studies in Writing

Electives may also be taken from several other sources. Students can request admission into undergraduate courses within the Department of Writing or outside the department with approval from the student’s supervisor. As well, there is a range of courses offered in other graduate programs across campus. There is, however, no guarantee that space will be available in courses in other departments.
