

Growth, Externalities, and Justice: The Economic Response to 21st Century Challenges

Featuring **Dr. Bill Rees** (pioneer of the ecological footprint concept), **Marc Lee** (climate justice specialist at the CCPA), and **Dr. Merwan Engineer** (UVic economics faculty)

WHAT: free panel discussion that will engage environmental and social justice issues from a variety of perspectives. Is all economic growth desirable? How will climate change affect the developing world? Does the environment impose any constraints on economic expansion and progress?

WHO: everybody. The economic analysis presented will be very accessible.

WHEN: March 4th, 3-5PM

WHERE: SSM A120
