web site: web.uvic.ca/psyc/masson
seminar schedule:
   http://www.uvic.ca/socialsciences/psychology/graduate/brain-sciences/cabssem/index.php

Course Objectives
The purpose of this seminar is to provide a forum for the presentation of research in the general
domains of cognitive psychology and cognitive neuroscience. Each meeting will consist of a
presentation by a student or faculty member from the University of Victoria community or from
a visitor from another institution. Registered students are required to make at least one seminar
presentation during the academic year and are expected to actively participate in questions and
discussion associated with the presentations. Students should go to the web site for the seminar
schedule to subscribe to the seminar mailing list.

Evaluation
For registered students, attendance and participation in seminar discussion will be tracked and
the professor will provide feedback to students who appear to be falling short of expectations.
Students are to contact the professor to indicate the date on which their presentation(s) will be
made and are to provide the professor with a title for the presentation at least one week before its
scheduled date. The professor will provide feedback to students after their presentations.
This course is graded as COMPELTE/INCOMPLETE.
