

Appendix 1: Elective Graduate Courses

The following list is representative (but not exhaustive) of the types of elective courses from which students may choose. This list will be updated regularly by the SDH Director and Program Committee in consultation with the departments/schools and instructors offering the courses.

Space may be limited in some courses and to take them may require that student have particular and appropriate background preparation. The departments/schools offering these courses have indicated that they will consider requests from SDH students on an individual, student-by-student basis provided the students have permission of the instructor and/or the chair or director of the unit offering the course, that there is sufficient space in the course to accommodate the students and that the student has appropriate background training and skills to succeed in the course, which may require specific technical as well as health professional background as prerequisite. Students without an appropriate background may be asked to take additional courses preparatory to taking the courses listed here.

Other courses, such as Directed Reading and Special Topic courses that address health related topics and are offered by the Faculties of Social Sciences, Humanities, Education, Human and Social Development and Graduate Studies (for example, GS500) may be used to fulfill methodology course requirements if approved by the SDH Program Director. Similarly, upper level undergraduate courses focused specifically on health issues may be taken for graduate credit with the approval of the SDH Director.

Final decisions regarding all methodology courses will be made in consultation with the unit where the course is offered, the course instructor and the student's supervisory committee, and require the approval of the SDHR Director and/or Advisory Committee.

ED-D 505 Basic Concepts in Human Development
ED-D 506 Selected Topics in Human Development
ED-D 519 Advanced Seminars in Counseling Psychology
ED-D 520 Educational Research Apprenticeship
ED-D 568 Inclusive Education in the 21st Century
ED-D 569 Developmental Psychopathology and Disorders
HINF 503 Research Methods in Health Informatics
HINF 510 Information Management and Technology
