

ECON 546: Themes in Econometrics

Spring, 2010

Arrangements for Midterm Test

Test Date: Friday, 26 February, 2:00 – 3:30 p.m.

Location: Harry Hickman Building, 116

Weight: 20% of the final grade for the course.

Coverage: All of the material covered in class, in lab. sessions, and in the assignments, up to the end of the section on the Likelihood Ratio Test.

You will be asked to interpret and discuss some EViews output, but you will ***not*** be asked to interpret or write any EViews program code.

Other Info.:

- You should bring a calculator to the test.
- Statistical tables will be supplied – they will be copies of those in the back of Greene’s text (6th. ed.).
- This will be a “closed books/closed notes” test.
- No formula sheet will be provided, but the wording of the test questions will provide you information of this type that you will need.
- Copies of previous tests, and solutions, are on the class web page. These will give you a good indication of the general style of the questions that you will encounter. ***There will be no multiple choice or True/False questions.***
