Objective

To obtain a position in Software Development

Summary Of Qualifications

Second year Computer Science student passionate about giving life to innovative ideas by the means of full scale web development, application design and interaction with user community

Languages

- PHP, SQL, Java, Python, C
- BASH scripting
- JavaScript, CSS, XML, HTML

Tools And Technologies

- Development of AJAX web applications with Prototype, Mootools and other JavaScript frameworks
- Using public APIs from [Google](#) and [Audioscrobbler](#) to create interesting and exciting web tools
- Using Django Framework to create complex websites in a minimum amount of time
- Strong working knowledge of Apache and MySQL Servers
- Very good knowledge of inner workings of the WordPress publishing system
- Windows 2003 Server & other NT-based systems
- Debian-based Linux operating systems
- Zend Studio, Eclipse, Visual Studio and several other IDEs

Communication

- Ongoing interaction with team members and supervisors to ensure that project requirements are met and certain modules fit well into the big picture
- Interaction with clients, discussing required features, deadlines, costs involved and other project-specific issues
- Providing advice on Internet Security, Web Technologies, Open Source tools and products as well as proper web design and development practices

Work Experience

Web Developer

Sep 2007 – Present

Fred Bircham Design
Victoria, BC

Responsibilities:

- Designed, developed and implemented database driven, large scale web applications for our clients
- Enhanced security of existing web applications
- Provided consulting and advice on the current web technologies, Open Source tools and security issues
- Provided full documentation for my own code and reviewed and documented existing code written by others

Accomplishments: Received excellent user feedback on the design and implementation of content management systems for [Canadian Freestyle Ski Association](#) and [Royal Colwood Golf Club](#) (around 1500 users)

Technologies Used: PHP5, MySQL, CSS, XML, JavaScript, XHTML

Web Developer

Jun 2007 – Present

Self Employed

Victoria, BC

Responsibilities:

- Created innovative, community oriented websites and applications
- Interacted with clients, discussed and arranged numerous aspects of web development process (list of features and requirements, due dates, costs involved, etc)
- Constantly researched and learned about new and interesting tools, technologies, frameworks and languages in order to integrate this into my current work and enhance my knowledge portfolio
- Collaborated with independent development teams, reviewed their work and developed new modules for on-going projects

Accomplishments:

- Developed several popular tools for user communities at [Last.fm](#) and number of other web2.0 sites
- As a member of the Foxed Design team, created public and administrative search modules for the high traffic, large scale website of [Universal Cyber Gaming Association](#)
- Enjoyed user appreciation and recognition for providing useful and exciting tools

Technologies Used:

- PHP5, Python, MySQL, Django Web Framework, BASH scripting
- CSS, XML, JavaScript, XHTML
- Google APIs: Maps, Chart, Gadgets
- Audioscrobbler API

Education

B.Sc., Computer Science with Software Engineering Option

Jan 2008 – Present

University of Victoria

Victoria, BC

University Transfer

Sep 2006 – Dec 2007

Camosun College

Victoria, BC

Activities & Interests

- Internet security, cryptography, mobile technologies
- Semantic web, social networks and future of the Internet
- Photography, music, arts
- Climbing, skiing, mountain biking, soccer
- Reading classical and contemporary literature
