

ECON 530: RESOURCE ECONOMICS
Homework #3
Due: Monday evening, October 1, 2018

In light of the fact that we do not have class on September 26, you will need to read two short papers. One is found on pp. 180-195 in your text but available [here](#). The other is a paper produced by the United Nations that calls for an overhaul of global economies to address the threat of climate change; it is 8 pages long and available [here](#).

Prepare a one-page paper (no more than 500 words, approx. 3000 characters) with your thoughts about the United Nations proposal. The paper is to be typed using Times New Roman, 12pt font, using a word processor and submitted electronically to repa@uvic.ca.
