

Rithet's Bog

When you see a colour-banded Song Sparrow, find its band combination in the list for that section (e.g. *Fir Tree Glen* section, *Vole Meadow* section) and write in the details on the data sheet. Then use the number (1, 2, 3 ...) on the data sheet under which you entered its band combination to indicate on this map where it was you saw the bird (please use red ink if possible).

Sections are outlined by solid black lines. Paths are shown by dashed lines.
