

ALAN RODNEY DOBELL
PROFESSOR OF PUBLIC POLICY

UNIVERSITY OF VICTORIA
P.O. BOX 1700, STN CSC, VICTORIA, B.C., CANADA V8W 2Y2
TEL: (250) 721-6116 FAX (250) 721-8849 INTERNET rdobell@uvic.ca

Rod Dobell was born in Vancouver, B.C., and took B.A. and M.A. degrees at the University of British Columbia (in economics and mathematics) before going on to the Massachusetts Institute of Technology (MIT) for his PhD in economics. After a five-year appointment as Assistant Professor of Economics at Harvard University, he returned to Canada as Associate Professor of Mathematics and Political Economy, and subsequently Professor of Political Economy, at the University of Toronto. There he served as a member of the founding faculty of the Institute for Policy Analysis, directed a research project which analyzed and recommended a national contingent repayment student financial assistance scheme for financing of post-secondary education, and subsequently developed some of the first working models for longitudinal microsimulation methods in the analysis of social policy. Since then he has alternated between academic work and policy applications, with six years in the Government of Canada (including appointments as special adviser to the Deputy Minister of Finance for long-range economic planning, and Deputy Secretary (Planning) in the Treasury Board Secretariat) followed by two years (1976-78) at OECD as Director of the General Economics Branch, seven years as Director of the School of Public Administration at the University of Victoria, and subsequently a seven-year term as President of the Institute for Research on Public Policy, before returning to the University of Victoria in 1991 to take up the first appointment to the Francis G. Winspear Chair for Research in Public Policy, for a six-year term to 1997.

In the early eighties he also served as Director of Research for Parliamentary Task Forces on Federal-Provincial Fiscal Arrangements (the Breaux Task Force) and on Pension Reform (the Frith Task Force). He was the founding President for NAMI-Canada, the Canadian section of the North American Institute, exploring the emerging structures of a North American community. In 1992 he was awarded the Governor-General's Canada 125 medal for service to the country. He was a founding member of the Board of the tri-national Environmental Education and Training Institute of North America and presently serves also as a member of the Research Committee for the Institute of Public Administration of Canada. From 1995-99 he served on an inter-disciplinary Panel on Marine Resources for the Canadian Global Change Program of the Royal Society of Canada. He has been a member of the National Statistics Council, at the invitation of the Minister Responsible for Statistics Canada, since 1989.

In the course of this academic career interspersed with extensive field trips, Professor Dobell developed his specific research interests in the philosophy and processes of public administration and policy formation, and the way in which collective decisions are influenced both by changing views of scientific evidence and democracy, and changing structures for consultation and public participation. Social capital, social cohesion and social learning in the management of global environmental risks and in the stewardship of cultural and natural capital are subjects at the centre of his current work.

Selected executive positions and publications:

- Chair, Scientific Committee for the Human Dimensions of Global Change, Canadian Global Change Program, Royal Society of Canada, 1989-91
- Member, National Statistics Council, 1989 - present
- President, North American Institute (Canada), 1991-99
- Member, Research Committee, Institute of Public Administration of Canada, 1995 -
- Founding Board, Environmental Education and Training Institute of North America
- Member, Royal Society of Canada/Canadian Global Change Program, Expert Panel on Global Change and Canadian Marine Fisheries, 1995-99.
