Faculty of Science

The Sciences encompass the various disciplines concerned with the study of the terrestrial and cosmic worlds and their phenomena. The study of science introduces students to methods of enquiry and approaches to learning that emphasize systematic observation, experimentation and critical thinking. Through the disciplines of Astronomy, Biochemistry, Biology, Chemistry, Earth and Ocean Sciences, Mathematics, Microbiology, Physics and Statistics, students have opportunities to engage in scientific discovery, to enhance their knowledge and comprehension of the universe, and to prepare themselves for a diverse range of stimulating careers.

Robert Lipson, BSc, MSc, PhD (Tor), Dean of Science
Robin G. Hicks, BSc (Dalhousie), PhD (Guelph), Associate Dean
Cindy Holder, BA (McGill), MA (Dal), PhD (Arizona), Associate Dean
Advising
General Information

DEGREES AND PROGRAMS OFFERED

The Faculty of Science comprises the Departments of Biochemistry and Microbiology, Biology, Chemistry, Mathematics and Statistics, and Physics and Astronomy, and the School of Earth and Ocean Sciences.

Each department in the faculty offers programs of varying levels of specialization in one or more disciplines leading to the degree of Bachelor of Science (BSc):

- an Honours Program which involves a high level of specialization in a discipline and requires 18 to 36 units in that discipline at the 300 or 400 level
- a Major Program which requires less specialization, usually 15 units in a discipline at the 300 or 400 level
- a General Program which requires 9 units at the 300 or 400 level in each of two disciplines

The disciplines in the faculty and the programs leading to the BSc are shown in the table below. Several of the disciplines may be taken in combination with each other. Details of the combinations offered are presented under the entries for the individual departments.

Students can also combine a program in the Faculty of Science with a program offered in another faculty (see “Interfaculty Program”, page 246).

The Faculty of Science does not offer a Bachelor of Arts degree. However, students may combine a Science program with a non-Science program in an Interfaculty BA. This interfaculty BA degree is awarded by the non-Science faculty.

In most cases, it is possible for students to choose their courses for the first two years so that they can postpone to the end of second year their choice of the program they wish to follow.

ACADEMIC ADVICE AND PROGRAM PLANNING

Associate Dean, Academic Advising
Cindy Holder BA (McGill), MA (Dal), PhD (Arizona)

Director
Susan Corner, BFA, MA (UVic)

Academic Advisers
Amanda Alfaro, BA, BEd (UVic)
Devin Arnold, BSc (UVic)
Kelly Colby, BA (Whitman), MSc (Ithaca)
Larissa Fielding, BA (TWU)
Shu-Min Huang BA, MA (UVic)
Jessica MacLean, BA (UVic)
Melana Mar, BA, BEd (UVic)
Janine Mayers, BA (UVic)
Jennifer Oakes, BA (Athabasca), MA (UVic)
Lori S. Olson, BSc, MPA (UVic)
Patricia Perkins, BSc (UVic)
Sherri Williams, BA, Dipl. Applied Linguistics (UVic), MEd (Memorial)

Administrative Officer
Daisy Williams

Assistant to the Associate Dean
Cat Price
Lara Hannaford

Advising Assistants
Bosa Dosenovic
Ashleigh Lakas

Academic Advising Centre
Students who have been admitted to or plan to enter the Faculty of Science can seek academic advice or information about the programs in the faculty from the Academic Advising Centre, A203, University Centre.

Departmental Advising
Each academic department has advisers generally available throughout the year who can give advice about the courses and programs offered by their department.

Students who are not in attendance at the University when they want advice from a department should contact the Chair of the department for an appointment before coming to the campus.

Transfer Advising
Students planning to transfer to another faculty or university from the UVic Faculty of Science should consult with advisers in the other faculty
or university before they make their choice of courses in the Faculty of Science.

Students planning to enter the Faculty of Education from the Faculty of Science should seek advice from the Education Advising Centre.

Students planning to transfer to the Faculty of Engineering to complete a degree in Computer Science should seek advice from the Department of Computer Science.

**Record of Degree Program**

All students continuing in the Faculty of Science must file a Record of Degree Program with the Academic Advising Centre. Please see *Interfaculty Program* (page 246) for details.

**Availability of Courses to Students in Other Faculties**

Generally, courses offered in the Faculty of Science are open to students in other faculties who have satisfied any prerequisite courses. However, some courses or sections are open only to students in the Faculty of Science or to students in specific programs. Restrictions on enrolment are included under individual course descriptions.

Students in other faculties who propose to take courses offered in the Faculty of Science are responsible for determining if the courses can be used for credit in their degree program.

**Definition of a Science Course**

A science course is any one of the following:

- a course offered in the Faculty of Science;
- any course offered by the Department of Computer Science (CSC), all Software Engineering courses (SENG) and Medical Science (MEDS) courses;
- a course that a student has taken at another institution for which the student has received transfer credit applicable to the categories defined above or for which the student has received transfer credit for a specified number of science units that are not equated to specific science courses.

**Limitation on Enrolment**

Admission to UVic and the Faculty of Science is not a guarantee of placement in particular programs or courses. Departments may limit enrolment for a variety of reasons, and admission requirements may be raised.

**Student Responsibility**

Students are referred to the section "Course Selection Responsibility" (page 40).

**Faculty Admissions**

The requirements for admission to the Faculty of Science are presented in Undergraduate Admission (see "Admission Requirements", page 33). Applicants should note the following recommended courses for entry to faculty programs:

- Secondary school students who wish to study Biochemistry, Biology or Microbiology are strongly advised to include Biology 12 in their secondary school programs.
- All secondary school students planning to enter the Faculty of Science are advised to include Chemistry 12 in their secondary school programs and to achieve a score of at least 67% in one of Principles of Mathematics 12, Pre-calculus 12, or equivalent.
- Secondary school students who wish to study Astronomy, Chemistry, Earth and Ocean Sciences, or Physics are strongly advised to include Physics 12 in their secondary school programs.

- An approved Language 11 course (see "Year 1 Admission Requirements: BC/Yukon Secondary School Graduate", page 34) is strongly recommended.
- Other prerequisites may be required for entry into courses and programs in particular disciplines. Students should take note of individual program requirements listed under each departmental entry as well as course prerequisites, listed at the end of individual course descriptions. Some Science departments offer courses to help students meet requirements they may not have fulfilled prior to admission to the Faculty of Science.

**Transfers from Other Faculties**

- Students in other faculties who wish to transfer into the Faculty of Science during their first session at UVic must have been eligible for admission to the Faculty of Science when they applied for admission to UVic.
- A student who wishes to transfer into the Faculty of Science after completing one or more sessions at UVic should have satisfactory standing as defined in the University regulations (see "Standing", page 53), and must either:
  - have been eligible for admission to the Faculty of Science from secondary school; or
  - have credit for at least 9 units of Science courses including credit for at least 3 units of Mathematics selected from MATH 100, 109, 101, 102, 151.

**Transfers from Colleges and Universities**

To be eligible for admission to the Faculty of Science from a college or another university, a student must have transfer credit for at least 12 units of courses with an average, as determined by UVic, of at least 60% calculated on courses taken most recently (to a maximum of 15 units). This requirement includes repeated and failed courses.

The student should also:

- have been eligible for admission to the Faculty of Science from secondary school; or
- be eligible for transfer credit for at least 9 units of Science courses including credit for at least 3 units of Mathematics selected from MATH 100, 109, 101, 102, 151.

**Other Applicants**

Applicants from institutions other than colleges and universities must satisfy the faculty admission requirements (see "Admission Requirements", page 33) and present work they have completed that is equivalent to that specified for transfers from other faculties, colleges and universities, above.

**Faculty Academic Regulations**

**Course Credit**

**Credit for Courses at Other Institutions**

Normally, to be recommended for a degree by the faculty, a student must complete a minimum of 30 units of courses at UVic, including at least 18 of the minimum 21 units at the 300 or 400 level required for all degree programs and including:

- at least 12 of the 15 units at the 300 or 400 level required for the Major Program; or
- at least 6 of the 9 units at the 300 or 400 level required in each discipline of the General program; or
- if the student is in an Honours Program, not more than 6 units at the 300 or 400 level in the discipline of the Honours Program taken at
another institution with the prior approval of the Chair of the relevant department.

Except as permitted by the regulations above, a student who has been admitted to the faculty may not take courses at another institution without the prior written approval, in the form of a Letter of Permission, of the Associate Dean of Academic Advising. To be eligible for a Letter of Permission, a student must have completed or be registered in no fewer than 6.0 units at the University of Victoria.

Students are solely responsible for checking the University of Victoria credit for courses to be taken elsewhere, prior to registration, to make sure that there will be no duplication of course credit already received (see also “Duplicate and Mutually Exclusive Courses”, page 43.)

Upon successful completion of such work, the student must request the other institution to send an official transcript to Undergraduate Records at UVic.

Students who are considering completing their degree requirements at another institution should note that generally other institutions cannot send transcripts of their academic records to Undergraduate Records at UVic in time for Undergraduate Records to be able to determine a student’s eligibility to graduate at the earliest convocation. Such students who complete their degree requirements in the Spring will generally graduate in the Fall and those who complete their degree requirements in the Fall will generally graduate in the Spring.

Students authorized to attend another institution who accept a degree in the Fall will generally graduate in the Spring.

Students seeking to complete a Certificate or Diploma program at the University “Policy on Academic Integrity” (page 45).

**Credit for Courses in Other Faculties**

All courses in other faculties are acceptable for use as elective credit in the Faculty of Science, if the regulations of the department offering the courses permit and prerequisites are met.

**Substitution of Elective Credit for Required Courses:**

With the consent of the department offering the student’s degree, and with the permission of the Associate Dean of Academic Advising, a student may substitute up to 3 units of 300 or 400 level credit for required courses at the 300 and 400 level in a Faculty of Science degree program; such permission is invalidated if a student withdraws from the degree program of the department that provided the consent.

Students should review individual department entries for information on the use or substitution of elective credit.

**Substitution of courses for MATH 100**

MATH 109 may be used to replace MATH 100 in any program offered by the Faculty of Science. MATH 109 may be used to replace MATH 100 as a prerequisite in any course offered by the Faculty of Science.

**Course Challenges**

Course challenge is not offered by all departments. Where not specifically referenced in the departmental calendar entry, a student should consult the department directly to determine if course challenge is permitted.

**Graduation Standing**

The graduation standing of a student in the Faculty of Science is determined in accordance with the University regulations (see “Standing”, page 53) and, for a student enrolled in an Honours Program, in conjunction with any Honours requirements specified by the departments concerned.

In cases of plagiarism and cheating, the Faculty of Science reserves the right to recommend to Senate the withdrawal of the “With Distinction” (see page 56) designation in addition to the penalties outlined in the University “Policy on Academic Integrity” (page 45).

Once a degree, diploma or certificate has been awarded by the University Senate, no change can be made to the programs that constitute that credential (see “Application for Graduation”, page 55).

**declaring a program**

All students registered and continuing in the Faculty of Science must submit a Request to Declare Program (RDP) to the Academic Advising Centre after completion of 12.0 units (normally at the end of first year) and before registering for subsequent courses.

Students who have completed 12.0 units but who are still exploring program options may declare their program as Exploratory before registering for subsequent courses, in which case they will be required to identify two possible program areas. Students who declare their program as Exploratory must declare a specific program no later than after completion of 27.0 units (normally at the end of second year) and before registering for subsequent courses. Other program options are available (see below).

The Academic Advising Centre will review the RDP and update the student’s record. Once this process has been completed the student will have access to an on-line degree audit (Curriculum, Advising and Program Planning (CAPP) report). CAPP degree audit reports are not available for students who have selected an Exploratory or Preparatory program (Preparatory program is defined below).

Students who satisfactorily complete the program of courses outlined in their CAPP report and who meet all university graduation requirements will be eligible to be granted their degree, upon submission of an Application to Graduate.

Students should be aware that some combinations of requested programs may not be possible or permitted.

Students may change their program at any time by submitting a Program Change Request to the Academic Advising Centre.

**Students who are visiting** from another institution are not required to declare a program. This includes incoming exchange students.

**Students who have completed 12.0 units** and who have been conditionally accepted to another Faculty (excluding Humanities and Social Sciences) are not required to declare a program. Such students may indicate that their program is Preparatory before registering for subsequent courses Students who indicate that their program is Preparatory and do not transfer to another Faculty or institution must declare a specific program no later than after completing 27.0 units.

**Transfer students** who enter the University with 12.0 or more units of transfer credit must declare a program before the end of their first term at UVic. Transfer students who enter the University with fewer than 12.0 units of transfer credit must declare a program after completion of 12.0 units of combined UVic and transfer credits.

**Students who intend to declare an Honours program** must do so by following the requirements outlined in the Calendar entry for that program. Until an application to an Honours program has been approved by the unit offering the program and submitted to the Academic Advising Centre, the student must declare a Major program.

**Students seeking to complete a Certificate or Diploma** must declare their program in accordance with program instructions.

**Time Limit for Degree Completion**

Although the Faculty of Science imposes no time limit for the completion of a General or Major program, a department in the faculty may, with the approval of the faculty, impose stated time limits for a General or Major program that it offers. Normally, students who have not completed their degree programs within five calendar years of first registration will be required to satisfy any revisions that may have been made to the program requirements since they first registered.
A student in an Honours Program is expected to complete the program in four years or, for a student in the Co-operative Education Program, in five years. A student who wishes to take longer to complete an Honours Program should seek prior approval from the Chair of the department concerned. Approval is not automatic.

Faculty Program Requirements

Requirements Common to All Bachelor’s Degrees

A student may proceed to a BSc degree, normally in one of three programs: Honours, Major or General. Combined Honours and Major programs are also offered (see below).

Each candidate for a Bachelor’s degree must:

1. complete at least 3.0 units from each of three areas of study on the following listing:
   - Astronomy
   - Biochemistry
   - Biology
   - Chemistry
   - Earth and Ocean Sciences
   - Marine Science
   - Mathematics
   - Microbiology
   - Physics
   - Statistics
2. have satisfied the “Academic Writing Requirement” (page 42).
3. have received credit for at least 21 units of courses at the 300 or 400 level, of which at least 18 units must have been taken at UVic.
4. have received credit for at least 60 units of university-level courses numbered 100 and above, of which normally at least 30 units have been taken at UVic.
5. have received credit for at least 33 units of science courses (“Definition of a Science Course”, page 243).
6. have satisfied the requirements specified in this Calendar by the department whose program the student has taken.
7. have a graduating grade point average of at least 2.0 (see “Graduating Average” under “Standing at Graduation”, page 56, for details).

Students may not combine the following program areas (Honours, Major, General, Minor), with the exception of designated Combined Programs (see page 245 and 246):

- Biochemistry and Microbiology
- Biochemistry and Chemistry for the Medical Sciences
- Chemistry and Chemistry for the Medical Sciences
- Microbiology and Chemistry for the Medical Sciences

Honours Program

The Honours Program requires specialization in one or more disciplines in the last two or three years of a degree program and is intended for students of higher academic achievement. Students who plan to undertake graduate studies are strongly advised to follow an Honours Program.

Admission to an Honours Program

Admission to an Honours Program is restricted to students who have satisfied the prerequisites and met the minimum GPA specified by the department(s) concerned, and who are judged by the department(s) to have the ability to complete the Honours Program. A student who wishes to be considered for admission to an Honours Program should apply to the Chair or Honours Adviser of the department (approval from both departments is required for admission to Combined Honours programs).

Requirements of the Honours Program

A student in an Honours Program must satisfy the requirements common to all bachelor’s degrees in the Faculty of Science, listed above.

Each department has its own requirements for its Honours Programs, which are specified in individual department entries elsewhere in the Calendar. Of the 300- and 400-level course units specified by the department concerned, not more than 6 may be taken at another acceptable post-secondary institution, and then only with the prior approval of the department’s Honours Adviser.

Continuation in an Honours Program requires satisfactory performance as dictated by the department. If, in the opinion of the department, a student’s work at any time is not of Honours standard, the student may be required to transfer to a Major or General program.

Normally, a student should complete the requirements for an Honours Program in four academic years (five years for those students enrolled in the Co-operative Education Program). Students who are undertaking a degree on a part-time basis, and who wish to be considered as candidates for Honours, should discuss the options with the department(s) concerned.

Honours Programs

- Astronomy
- Biochemistry
- Biology
- Chemistry
- Earth Sciences
- Mathematics
- Microbiology
- Physics
- Statistics

Combined Honours Programs

- Biology and Earth and Ocean Sciences
- Biology and Psychology
- Chemistry and Earth and Ocean Sciences
- Chemistry and Mathematics
- Computer Science and Mathematics
- Computer Science and Statistics
- Mathematics and Statistics
- Physical–Geography and Earth and Ocean Sciences
- Physics and Astronomy
- Physics and Biochemistry
- Physics and Computer Science
- Physics and Earth Sciences (Geophysics)
- Physics and Mathematics
- Physics and Ocean Sciences (Ocean-Atmosphere Dynamics)
Double Honours Program

With the joint approval of the departments concerned, a student may be permitted to meet the requirements for an Honours Program in each of two departments in the Faculty of Science, both leading to the BSc degree.

Interfaculty Double Honours Program

If a student elects to complete an Honours Program in the Faculty of Science and a second Honours Program in another faculty, with one program leading to a BA and the other leading to a BSc, the program leading to the degree selected (BA or BSc) must be listed first on the student’s Record of Degree form. If the second department listed offers both a BA Honours Program and a BSc Honours Program, the requirements of the program leading to the degree selected (BA or BSc) must be met in the department offering the option.

Students completing an Interfaculty program will be subject to the regulations of the faculty in which they are registered.

Joint Honours and Major Program

A student may elect to complete an Honours Program in one area of study together with a Major Program in another area of study, both within the Faculty of Science and both leading to the BSc degree. The Honours Program will be listed first on the student’s Curriculum Advising and Program Planning (CAPP) form.

Interfaculty Joint Honours and Major Program

A student may elect to complete an Honours Program in one faculty together with a Major Program in another faculty. The Honours Program will be listed first on the student’s Curriculum Advising and Program Planning (CAPP) form, and students will be subject to the regulations of the faculty in which they are registered.

If one of the two departments concerned offers a BA Program while the other offers a BSc Program, the student will receive either a BA or a BSc, depending on which is specified by the Honours Program. If the department offering the Major Program offers both a BA and a BSc program, the requirements of the program leading to the degree selected (BA or BSc) must be met in the department offering the option.

Requirements of the Major Program

A student in a Major Program must satisfy the requirements common to all bachelor’s degrees in the Faculty of Science, listed above.

Each department has its own requirements for its Major Programs, which usually include the specification of 15 units of 300- and 400-level course work. At least 12 of these 15 units must be completed at UVic. A department may also specify and require up to 9 units of courses offered by other departments at the 300 or 400 level.

Major Programs

- Astronomy
- Biochemistry
- Biology
- Chemistry
- Chemistry for the Medical Sciences
- Earth Sciences
- Mathematics
- Microbiology
- Physics
- Statistics

Combined Major Programs

- Biochemistry and Chemistry
- Biology and Earth and Ocean Sciences
- Biology and Mathematics and Statistics
- Biology and Psychology
- Chemistry and Earth and Ocean Sciences
- Chemistry and Mathematics
- Chemistry and Biochemistry or Microbiology
- Computer Science and Mathematics
- Computer Science and Statistics
- Financial Mathematics and -Economics
- Mathematics and Statistics
- Physical -Geography and Earth and Ocean Sciences
- Physics and Astronomy
- Physics and Biochemistry
- Physics and Computer Science
- Physics and Earth Sciences (Geophysics)
- Physics and Ocean Sciences (Ocean-Atmosphere Dynamics)

Double Major Program

A student may complete the requirements for a Major Program in each of two disciplines in the Faculty of Science, both leading to the BSc degree, except for the following combinations: Biochemistry with Microbiology; Biochemistry with Chemistry for the Medical Sciences; Chemistry with Chemistry for the Medical Sciences; Astronomy with Physics; and Mathematics with Statistics.

Combined Major with a Major Program

A student can complete one of the Combined Major Programs listed above with another Major Program (in this faculty or in another faculty), but the discipline of the Major Program must not be either of the disciplines of the Combined Major Program.

Interfaculty Program

A student may elect to complete an Interfaculty Double Major or a Joint Honours and Major Program. In a Double Major Program, if one of the two departments concerned offers both a BA Major Program and a BSc Major Program, the requirements of the program leading to the degree selected (BA or BSc) must be met in the department offering the option.

In a Joint Honours and Major Program, the Honours Program is listed first on the student’s Curriculum Advising and Program Planning (CAPP) form, and students will be subject to the regulations of the faculty they are registered in. If one of the two departments concerned offers a BA Program while the other offers a BSc Program, the student will receive either a BA or a BSc depending on which is specified by the Honours Program. If the department offering the Major Program offers both a BA and a BSc program, the requirements of the program leading to the degree selected (BA or BSc) must be met in the department offering the option.

BA Major in Environmental Studies

A Major Program in Environmental Studies can only be taken as one component of a Double Major or Joint Honours and Major Program.
BA in Mathematics or Statistics

Students who wish to obtain a BA in Mathematics or Statistics should register in either the Faculty of Humanities or the Faculty of Social Sciences, and complete the requirements common to all bachelor's degrees in that faculty.

General Program

The General Program provides students with the opportunity to study broadly in two disciplines in the last two years of a degree program. It is not intended to prepare students for graduate study, although some graduate schools may accept graduates of a General Program if they have achieved sufficiently high standing.

Requirements of the General Program

A student in a General Program must satisfy the requirements common to all bachelor's degrees in the designated faculty determined by the first subject area listed on the Curriculum Advising and Program Planning (CAPP) form.

The General Program requires:
- completion of 9 units of course work at the 300 and 400 level in each of the two disciplines, as specified in the General Program requirements of the departments concerned
- at least 6 of the 9 units in each discipline must be completed at UVic

A student may complete a General Program in any two of the following or by completing one of the following and one of the Generals offered in another faculty. The degree will be a BA awarded by either the Faculty of Humanities or the Faculty of Social Sciences unless two Generals in the Faculty of Science are chosen, or one of the BSc Generals in Humanities or the Faculty of Social Sciences unless two Generals in the Faculty of Science are chosen, or one of the BSc Generals in Anthropology, Computer Science, Geography or Psychology is combined with a second BSc General in the Faculty of Science.

- Biochemistry or Microbiology
- Biology
- Chemistry
- Earth Sciences
- Mathematics or Statistics
- Physics

A student may also complete a General Program that combines one of the above disciplines/areas of study with one of the following. The degree will be a BA awarded by either the Faculty of Humanities or the Faculty of Social Sciences.

- "Arts of Canada Program" (see page 331)
- "European Studies" (see page 333)
- "Film Studies Program" (see page 332)
- "Health and Society" (see page 333)
- "Social Justice Studies" (see page 335)
- "Technology and Society" (see page 336)

Minor Program

A Minor is an optional program that allows students to study in an area outside their Honours, Major or General Program areas. Requirements vary and are specified in the Minor requirements of the department concerned. Where not specified, the requirements for a Minor follow the requirements for the department General Program in one area only.

- No more than 3 units of the 300- and 400-level course work required for the Minor can be taken elsewhere, and at least 6 of the units required for the Minor must be completed at UVic.
- If the Minor requires 9 units of 300- and 400-level course work, these 9 units cannot form part of the 300- and 400-level department requirements for a student's Honours or Major Program. Corequisite courses in other programs may be counted toward the Minor.

- If the Minor requires less than 9 units of 300- and 400-level course work, no courses at the 300- or 400-level can form part of the requirements for a student's Honours, Major or General Program or Option. Required or corequisite courses at the 200 level or higher in other programs or options may not be counted toward the Minor.

Only one Minor can be declared on a student's program.

In addition to department Minors, the following Minors are offered:

Interdisciplinary Minors

- "Applied Ethics" (see page 335)
- "Arts of Canada Program" (see page 331)
- "European Studies" (see page 333)
- "Film Studies Program" (see page 332)
- "Health and Society" (see page 333)
- "Human Dimensions of Climate Change" (see page 335)
- "Social Justice Studies" (see page 335)
- "Technology and Society" (see page 336)

Student-Designed Interdisciplinary Minor

Students may undertake an interdisciplinary Minor that is not listed in the Calendar. In addition to the requirements of the Minors listed above, this student-designed Minor must:

- be approved by the Associate Dean of Academic Advising of Humanities, Science and Social Sciences
- have structure, coherence and theme; it cannot consist of unrelated courses
- be approved before more than 6.0 units of coursework counting towards the minor has been completed
- consist of 13.5 units, with a minimum of 7.5 units of courses numbered 300 and above
- a minimum of 6.0 units of upper-level coursework must be taken at UVic
- include courses from at least two departments, with a minimum of 3 units from each department
- be declared prior to the student achieving fourth-year standing (42.0 units)
- be approved by the Director of the Office of Interdisciplinary Academic Programs
- be approved by the Associate Dean of Academic Advising of Humanities, Science and Social Sciences

Students must discuss their proposed Student-Designed Interdisciplinary Minor with the Director of the Office of Interdisciplinary Academic Programs before submitting their request to the Associate Dean of Academic Advising. The Student-Designed Interdisciplinary Minor form is available from the Academic Advising Centre, A203, University Centre.

Co-operative Education Programs

Refer to the general regulations pertaining to "Undergraduate Co-operative Education" Programs of the University of Victoria governing all co-operative education students (page 63).

Admission to, continuation in and completion of Co-operative Education Programs are governed by individual departmental regulations. In general, students participating in the Co-operative Education Program must maintain a GPA of at least 3.5 overall. As a required part of the program, students are employed for specific Work Terms. Normally, the expected number of weeks per work term is 15 and the expected
number of hours per week is 35. The minimum number of weeks per work term is 12 and the minimum number of hours per week is 35. This employment is related as closely as possible to the student’s course of studies and individual interest.

Students who are taking double or combined Major degrees, (where each area offers a Co-op program) may, if eligible, enrol in and undertake work terms in both Co-op programs or may, if eligible, enrol in and undertake work terms in only one Co-op program. Students who complete at least two work terms in each area will have the combined nature of their program noted as part of the Co-op designation on their official records. Students enrolled in combined Major degrees where a minimum of three work terms are required must complete at most two work terms in one department.

In addition to the graduation requirements outlined in "Requirements Common to All Bachelor’s Degrees" (page 245), a student must have a graduating GPA of at least 3.5 in order to graduate with Co-operative Education notation.

Students may withdraw from the Co-operative Education Program at any time during an academic term and remain enrolled in a Major or an Honours Program.

The Faculty of Science offers Co-operative Education Programs in Biochemistry and Microbiology, Biology, Chemistry, Earth and Ocean Sciences, Mathematics and Statistics, and Physics and Astronomy. The details of the programs are provided under individual department entries.

Science Work Experience Program

The Science Work Experience Program is intended for full-time students in the Faculty of Science. Students participating in the Science Work Experience Program will complete one or two terms of full-time, discipline-related work under the supervision of the applicable Science Co-op program. These work experience terms are subject to individual departmental Co-op regulations as well as the general regulations for Undergraduate Co-op programs in the University Calendar, with the exception that work term credit by challenge is not permitted. Work Experience students may transfer to a regular Co-op program, subject to approval from the Co-op Coordinator. Participation in this program is limited. Students should contact the applicable Science Co-op office to discuss entry into this program. Students interested in the Math Work Experience Program should refer to "Mathematics Work Experience Program" (page 278).

Department of Biochemistry and Microbiology

Perry Howard, BSc (Waterloo), PhD (Toronto) Associate Professor and Chair of the Department
Juan Ausio, BSc, PhD (Barcelona), Professor
Alisdair Boraston, BSc, PhD (Brit. Col.), Professor
Christoph Borchers, BSc, MSc, PhD (Konstanz), Professor
Martin J. Boulanger, BSc, PhD (Brit. Col.), Professor
Caroline E. Cameron, BSc, PhD (Victoria), Professor
Stephen Evans, BSc, PhD (Brit. Col.), Professor
Caren C. Helbing, BSc (Hons) (Windsor), PhD (Western), Professor
Francis E. Nano, AB (Oberlin), MS, PhD (Ill), Professor
Paul J. Romanjuk, BSc (Hons), PhD (McMaster), Professor
Christopher Upton, BSc, PhD (Lond), Professor
Brad H. Nelson, BSc (Hons) (Brit. Col.), PhD (Calif. Berkley), Professor (limited term)
Christopher Nelson, BSc, PhD (Brit. Col.), Associate Professor
John E. Burke, BSc, PhD (Calif. San Diego), Assistant Professor

Lisa A. Reynolds, BSc (Manchester), MSc, PhD (Edinburgh), Assistant Professor
Julian J. Lum, BSc, MSc, PhD (Ottawa), Associate Professor (limited term)
Douglas Briant, BSc (Hons), MSC (Waterloo), PhD (Brit. Col.), Associate Teaching Professor
Scott Scholz, Biotechnical Support Centre Manager
Kimberley Politano, BSc (Victoria), Administrative Officer
Rozanne Poulson, BSc, PhD (Wales), Co-operative Education Coordinator

Visiting, Adjunct and Cross-listed Appointments

N. Leigh Anderson, BA, PhD (Cambridge), Adjunct Professor
Monica Palic, PhD (Alberta), Adjunct Professor
Andrew Ross, BSc, PhD (Brit. Col.), Adjunct Assistant Professor
Peter H. Watson, BA, MA, MB BCHir (Cambridge), FRCP (Manitoba), Adjunct Professor
John R. Webb, BSc, MSc, PhD (Western Ontario), Adjunct Associate Professor

Biochemistry and Microbiology

The department offers Honours, Major, General, and Minor Programs in Biochemistry or Microbiology, a Combined Major in Biochemistry or Microbiology and Chemistry, and a Combined Honours and Major in Biochemistry and Physics.

See "Biochemistry and Microbiology Co-operative Education/Internship Program" (page 252).

Program Requirements

Notes on Course Requirements

- Courses may be taken in different sequences and in different years from those indicated provided the corequisite and prerequisite requirements are satisfied. However, students must be extremely careful in planning programs that differ from the normal sequence and pay close attention to scheduling conflicts.
- Failure to take courses in the years indicated may delay graduation.
- Directed studies courses are normally only available to students with a minimum cumulative GPA of 5.0 and fourth-year standing in the Biochemistry or Microbiology programs.
- Students should consult the department concerning courses offered in a particular year.
- The department does not offer the E grade and supplemental examinations.

Honours Programs

Admission to the Honours program is by permission of the department. Students who wish to be admitted to one of the Honours programs should apply to the department on completion of their third year. The general requirement for admission is a GPA of at least 6.0 in BCMB 301A/B, BIOC 300A/B, MIRC 302, MIRC 303 with a grade of at least B in each.

The Biochemistry and Microbiology Honours program offers students an intensive, advanced experience in academic studies and research. Students normally begin their Honours program in the fall term and are expected to complete the final year requirements of the Honours program in two consecutive academic terms. However, students in the Honours Biochemistry and Microbiology Co-operative Education Program may begin in the spring term, undertake a work term during the
summer months, and complete in the fall term to fulfill the final year requirements in three consecutive terms.

An Honours degree will be awarded to students obtaining a minimum GPA of 5.5 in 300- and 400-level department courses. Students must achieve a minimum grade of B+ in BCMB 499A and 499B.

If a student fails to meet the standards for the Honours degree, but does meet the Major degree requirements, the department may recommend the appropriate class of Major degree.

1. The Academic Writing Requirement must be fulfilled. At least one of ENGL 135, 146, 147 is recommended for all students.

2. BIOC 102, BIOL 230, MICR 200B, BCMB 301B, BIOL 360 and 361 are suggested electives for students intending to complete BCMB 499A and 499B.

3. PHYS 229, 248, 314, 317, 325, and MATH 301, 346 are suggested electives for students intending to complete PHYS 429A and 499.

4. Electives chosen from Physics and Astronomy courses numbered 300 or higher.

**Biochemistry and Microbiology Co-operative Education/Internship Program**

See “Co-operative Education Programs” for the Faculty of Science (page 247). See also the general regulations pertaining to “Undergraduate Co-operative Education” Programs of the University of Victoria governing all co-operative education students (page 63).

**Co-op Education/Internship Program Requirements**

Entry into the Biochemistry and Microbiology Co-operative Program is restricted to students who are enrolled in an Honours or Major Program offered by the department. To qualify for entry and continuation in the Co-operative Education Program, students must be enrolled on a full-time basis and must normally maintain a B average (4.5) in Biochemistry and Microbiology courses, and overall. Students are also required to satisfactorily complete four work terms. The first work term is undertaken in the Summer following the second academic year. After the first work term, academic and work terms alternate. Each work term will be recorded on the student’s academic record and transcript (as COM, N/X, or F/X).

Students who are taking double or combined Major degrees programs, who wish to participate in a combined Co-op program, should refer to the Faculty of Science “Co-operative Education Programs” regulations (page 247).

A student may at any time during an academic term transfer from the Biochemistry and Microbiology Co-operative Education Program to a regular Biochemistry and Microbiology program.

The department also offers two optional Internship Programs. In the Co-op Internship Program, students are required to satisfactorily complete 12 or 16 months of consecutive work term placements, beginning in the Spring or Summer of the third academic year. In the Post-Study Internship Program, students are required to satisfactorily complete a minimum of four months of work beginning after completion of their academic coursework and before graduation; students should apply four to six months before completion of their academic coursework.

Applications and further information about the Co-operative Education Program and Internship options in Biochemistry and Microbiology are available from the department or at <www.uvic.ca/biocoop>.

Verena J. Tunnichiffe, BSc (McMaster), MPhil, PhD (Yale), FRSC, Professor, CRC Tier I in Deep Ocean Research
Diana E. Varela, BSc (UNS, Arg), MA (Boston), PhD (UBC), Professor
Patrick von Aderkas, BSc (Guelph), PhD (Manchester), Professor
Gautam B. Awatramani, BS (Rochester), PhD (SUNY Buffalo), Associate Professor
Julia K. Baum, BSc (McGill), MSc, PhD (Dalhousie), Associate Professor
Robert L. Chow, BSc (Toronto), PhD (NYU), Associate Professor
Juergen Ehlting, BSc, MSc (Cologne), PhD (Max-Planck, Cologne), Associate Professor
Rana El-Sabawbi, BSc (Western Ontario), MSc (UBC), PhD (UVic), Associate Professor
Terri Lacourse, BA, MA (Ottawa), PhD (SFU), Associate Professor
Raad Nashmi, BSc, MSc, PhD (Toronto), Associate Professor
Louise R. Page, BSc, MSc (Alberta), PhD (UVic), Associate Professor
John S. Taylor, BSc, MSc (York), PhD (SFU), Associate Professor
Réal Roy, BSc (Quebec), PhD (McGill), Assistant Professor
Gregory C. Beaulieu, BA, BSc (Calgary), MSc (Guelph), PhD (Wash), Associate Teaching Professor
Douglas Briant, BSc, MSc (Waterloo), PhD (UBC), Associate Teaching Professor
David C. Creasey, BSc, PhD (Manitoba), Assistant Teaching Professor
Barbara Ehling, MSc (Wurzburg), PhD (Cologne), Assistant Teaching Professor
Thomas E. Reimchen, BSc (Alberta), PhD (Liverpool), Assistant Teaching Professor
Brian Christie, BSc, MSc (Calgary), PhD (Otago), Professor, Limited Term
Craig Brown, BSc (Manitoba), MSc, PhD (Calgary), Associate Professor, Limited Term
Patrick Nahmey, BSc (Wash), MSc, PhD (UBC), Associate Professor Limited Term
Leigh Anne Swayne, BSc (Guelph), PhD (Calgary), Assistant Professor Limited Term
Kimberley Curry, BSc (UVic), MSc (Alberta), Senior Laboratory Instructor
Heather Down, BSc (UVic), Scientific Assistant
Janice D. Gough, BSc (Dalhousie), Administrative Officer
Brent E. Gowen, BSc (Manitoba), Senior Scientific Assistant
Katy Hind, BSc (UVic), PhD (New Brunswick), Senior Laboratory Instructor
My Lipton, BSc (UVic), Scientific Assistant
Diane Luszniak, BSc Hon (UVic), PhD (Nottingham), Co-operative Education Coordinator
Roswitha Marx, Statsexamen (Kaiserslautern), MSc (Saskatchewan), PhD (Victoria), Senior Laboratory Instructor
Alicia Rippington, BSc, MSc (UVic), Senior Laboratory Instructor
Liujuan Sun, BSc (Jianusi, China), MSc (Fourth Military, China), MSc (Ottawa), Scientific Assistant
Neville Winchester, BSc, MSc, PhD (UVic), Senior Laboratory Instructor

Adjunct Appointments
Joseph A. Antos, BS (N Ill), MA (Mon), PhD (Oregon St), Adjunct Professor
Bryan E. Glickman, BSc, MSc (McGill), PhD (Leiden), Adjunct Professor and Emeritus Professor
Delano James, BSc (Brandon), PhD (West Indies), Adjunct Professor
Brad H. Nelson, BSc (UBC), PhD (Calif-Berkeley), Adjunct Professor
Thomas E. Reimchen, BSc (Alberta), PhD (Liverpool), Adjunct Professor
Henry Reissig, BA, MA (Calif-Berkeley), MSc, PhD (Yale), Adjunct Professor
Rachael Scarth, BSc, MSc, PhD (Can), Adjunct Professor
David H. Turpin, BSc, PhD (UBC) FRSC, Adjunct Professor
Alan Burger, BSc, PhD (Cape Town), Adjunct Associate Professor
Lisheng Kong, BSc, MSc (Southwest-China), PhD (Calgary), Adjunct Associate Professor
J. Anthony Trofymow, BSc (Lethbridge), MSc (Colorado), Adjunct Associate Professor
Patrick B. Walter, BSc (SFU), MSc (UBC), PhD (Swiss Fed. Inst of Technology), Adjunct Associate Professor
Alvin Yanchuk, BSc, MSc, PhD (Alberta), Adjunct Associate Professor
Fabio De Leo, BSc, MSc (Sao Paula), PhD (Hawaii at Manoa), Adjunct Assistant Professor
Sarah Dudus, BSc (Guelph), PhD (UVic), Adjunct Assistant Professor
Andrew Edwards, BA (Oxford), PhD (Leeds), Adjunct Assistant Professor
Steven J. Insley, BA (SFU), MSc (UVic), PhD (Calif-Davis), Adjunct Assistant Professor
Simon R.M. Jones, BSc, MSc, PhD (Guelph), Adjunct Assistant Professor
R. John Nelson, BS (Calif-Davis), PhD (Wisconsin), Adjunct Assistant Professor
Inigo Novales-Flamarrigue, BSc (McGill), MSc, PhD (UVic), Adjunct Assistant Professor
Aakash Sastry, BSc, MSc (Guelph), PhD (UVic), Adjunct Assistant Professor
Michael Stoehr, BSc, MSc (Lakehead), PhD (Toronto), Adjunct Assistant Professor
Marc M. Trudel, BSc, MSc (Montreal), PhD (McGill), Adjunct Assistant Professor

Biology Programs
The department offers the following BSc degree programs:
- General, Major or Honours in Biology
- Major or Honours in Biology and Earth and Ocean Sciences
- Major or Honours in Biology and Psychology
- Major in Biology and Mathematics and Statistics

BSc Honours and Major Programs are intended for those planning to undertake biology as a profession. The Honours Program requires undergraduates to undertake a research project including the writing and defense of an Honours thesis. Students intending to pursue research or continue their studies for MSc or PhD degrees should consider the Honours Program. The distinctive character of BSc or BA General Programs is the variety of course options possible. Students in these
programs may wish to combine a General Program in Biology with one in another science area (BSc) or an arts area (BA). Such interdisciplinary programs may be advantageous to students considering a postgraduate degree in the Health Sciences or Education.

Biology Courses for Non-Majors

The Biology department offers several courses for students not undertaking an undergraduate program in Biology. These courses cover areas of Biology of general interest and relevance. Courses in this category include BIOL 150A, 150B, 334, 351, 359, and 400. Certain other courses may be taken with the permission of the instructor.

Biology Courses Offered Through the Bamfield Marine Sciences Centre

Marine Science courses (MRNE courses in the course listings) are offered at the Bamfield Marine Sciences Centre, the majority during the summer months. Registration information for the Summer Program is available from the Biology department and our website: <www.bms.bc.ca>.

Bamfield Marine Sciences Centre also offers a 7.5 unit Fall Program. Students accepted into this program will have at least third-year standing in Biology. Contact the Biology department for further information.

Bamfield courses taken by students at the University of Victoria will be treated as if they had been offered by the Biology department at the University of Victoria in determining the student’s grade point averages, and in satisfying University, faculty, and departmental program requirements.

See “Biology Co-operative Education Program” (page 258).

PROGRAM REQUIREMENTS

Notes on Course Requirements

- The prerequisite for BIOL 184 is one of Biology 11, Biology 12, BIOL 150A, 150B, 186, or passing a placement exam. The prerequisite for BIOL 186 is one of Biology 11, Biology 12, BIOL 150A, 150B, 184, or passing a placement exam. The placement exam will be given in the first week of classes in each term.

- Major and Honours students are expected to participate fully in all aspects of laboratory work including handling live and preserved organisms. Laboratory work using animals is reviewed annually by the UVic Animal Care Committee and complies with guidelines established by the Canadian Council on Animal Care. Students who are unwilling to use animals and plants for educational purposes will not normally be able to complete a Major or Honours Program. The General Program provides an alternative for students in such a position. Students who have ethical or health concerns that interfere with normal program requirements should write to the Chair of the Biology department. This should be done at least six weeks before the beginning of the term in which the course of concern is being offered.

- Students from outside the Department of Biology wanting to take BIOL courses are encouraged to take BIOL 150A and 150B or BIOL 186 and 184, and as many as possible of BIOL 215, 225 and 230. Students who wish to take upper-level courses should contact the undergraduate adviser or instructor to determine which core courses are most suitable as prerequisites.

- Students considering going on to professional schools (e.g., Medicine, Dentistry, Veterinary Science) should include the Science, Math and English courses that are prerequisite to entry into these professional programs. Three units of PHYS are required for most first-year preprofessional programs. Students contemplating entry into Medicine after the third year should consult with the department.

- Students considering a teaching career are advised to consider the following programs:
  - for Senior Secondary level: a BSc Major or Honours
  - for Junior Secondary School and Elementary level: a BSc or BA General Program
  - for teacher certification: consult the Faculty of Education.

- Because of the importance of biometrics in most biological work, students in Biology programs should consider taking additional STAT courses.

- Students may be required to meet part of the expenses involved in required field trips.

- The department does not offer supplemental examinations.

Notes on Biology Upper Level Electives

Biology upper level electives should be chosen with the student’s full program in mind. Students cannot expect to be admitted to courses without the prerequisites.

Course Challenge

The Department of Biology does not permit students to gain credit by course challenge.

Honours Program

Honours students complete the program of required courses shown below and the Biology electives as described for the Major, and in addition take BIOL 460 (1.0) and BIOL 499A and 499B (3.0) in their fourth year. Of the remaining 9 units to complete the 61 unit degree requirement, at least 3 units must be from an additional course(s) in Biology chosen in consultation with the department.

Any prospective Honours students should first discuss proposed thesis research with a faculty member and obtain the member’s consent to serve as thesis supervisor. The student should then apply to the departmental Honours Adviser for admission to the Honours Program before May 1 in the third year of studies. However, applications will be accepted up to the end of fall registration in the fourth year of studies. The completed thesis will be examined by a small committee including the supervisor. Applicants should have and maintain a GPA of at least 6.0 in all department courses.

A student who obtains a minimum GPA of 5.5 and a minimum grade of A- in BIOL 499A and 499B, will receive an Honours in Biology. A student with a GPA of less than 5.5 will receive a Major in Biology, regardless of the grade obtained in BIOL 499A and 499B. The submission date for the thesis is the last day of lectures.

Concentration in Forest Biology

The Department of Biology offers a concentration in Forest Biology. Students must complete the courses noted below within the Major and Honours programs in Biology. The declared concentration will appear on students’ transcripts.

The concentration will require a minimum of 7 courses, including a capstone research or field experience, as follows:

- BIOL 324 and 366;
- one of BIOL 325, 326, 438;
- three¹ of BIOL 312, 325, 326, 329, 330, 415, 418, 438, 449, 457, 458;
- one of BIOL 418, 499B, 490J.

Note: BIOL499B credit may be counted toward the Forest Biology Concentration only if the thesis topic is approved by the department.
Concentration in Marine Biology

The Department of Biology offers a concentration in Marine Biology. Students must complete the courses noted below within the Major and Honours programs in Biology. The declared concentration will appear on students’ transcripts.

The concentration will require a minimum of 7 courses as follows:

- one of BIOL 311, EOS 311, MRNE 435;
- one of BIOL 319, MRNE 430;
- one of BIOL 322, 335, MRNE 410, 412;
- four of BIOL 321, 322, 323, 335, 336, 370, 438, 446, 461, 466, 490D, MRNE 410, 412, 415, 420, 425, 437, 440, 445; MRNE 400, 401, 402 with permission of the department.

Note: Students may count only one of MRNE 400, 401, 402 in the Marine Biology Concentration.

Concentration in Neurobiology

The Department of Biology offers a concentration in Neurobiology. Students must complete the courses noted below within the Major and Honours programs in Biology. The declared concentration will appear on students’ transcripts.

The concentration will require a minimum of 8 courses as follows:

- BIOL 365, 367
- two of BIOL 404, 447, 448, 467
- four of BIOL 345, 345A, 345B, 345C, 347, 447, 448, 467, 499B or 499H, MEDS 410, EPHE 380

Note: BIOL 499B credit may be counted toward the Neurobiology Concentration only if the thesis topic is approved by the department.

Recommended: BIOL 360, PSYC 345A, PSYC 451D.

Notes on Course Requirements

1. 1. BIOL 300A or 300B may be used to fulfill the Biochemistry requirement in Biology programs; however, BIOL 299 is a prerequisite for some 300-level BIOL courses.
2. Science electives are courses at any level offered by the Departments of Biochemistry and Microbiology, Chemistry, Computer Science, Mathematics and Statistics, Physics and Astronomy, or the School of Earth and Ocean Sciences. Only one of EOS 350, 360, 370 may be taken for credit as a science elective.
3. At least two BIOL upper-level electives must be BIOL courses with a laboratory: BIOL 307, 309, 311, 312, 319, 321, 322, 324, 325, 326, 329, 330, 335, 336, 345, 362, 365, 366, 409B, 410, 418, 448, 449. Students are encouraged to seek advice regarding program requirements and prerequisites from an Undergraduate Adviser. MRNE courses are considered upper-level biology courses.
4. The 19.5 units of electives in third and fourth years must include 9 units of 300-level or above in second area of concentration for the General Program.

Combined Honours in Biology and Earth and Ocean Sciences

Admission to the Combined Honours Biology and Earth Sciences Program requires the permission of both the Department of Biology and the School of Earth and Ocean Sciences. To receive an Honours degree, a student must obtain: (1) a minimum graduating GPA of 5.5 overall; (2) a minimum GPA of 6.0 in SEOS or Biology courses at the 300 and 400 level; and a minimum grade of A- in BIOL 499A and 499B or EOS 499A and 499B.

Notes on Course Requirements

1. CHEM 150 may be taken instead of CHEM 101.
2. EOS 202 and 300 are recommended for students interested in geologic field studies (202 is prerequisite for 300); EOS 260 and 460 are recommended for students interested in biosphere evolution (260 is prerequisite for 460).
3. MATH 200 and 204 may be taken instead of MATH 202.
4. Students registering for BIOL 499A/B must also take BIOL 460 (Honours Seminar).
5. Recommended courses include EOS 311 or BIOL 311, BIOL 319, 321, 322, 335, 418, 427, 435, 438, 446.
6. Recommended courses include EOS 403, 425, 480.
7. EOS 403, 408, 416, 420, 422, 425, 427, and 433 are normally offered in alternate years. Students are advised to consult with the department to determine when these courses are offered.
Combined Major Program in Biology and Earth and Ocean Sciences

First Year
BIOL 184 or 190B, and 186 or 190A .......................... 3.0
CHEM 101, 102 ........................................................... 3.0
EOS 110, 120 .............................................................. 3.0
MATH 100 or 109, 101 .................................................. 3.0
PHYS 102; or 102A and 102B; or 110 and 111; or 120 and 130 ........................................ 3.0
Total .................................................................... 15.0

Second Year
BIOL 215, 225 ................................................................ 3.0
BIOL 230 ........................................................................ 1.5
CHEM 231, 245 .............................................................. 3.0
EOS 201, 205, 240 .......................................................... 4.5
EOS 202 or 260 ............................................................... 1.5
MATH 202 ................................................................. 1.5
Total .................................................................... 15.0

Third and Fourth Years
BIOL 330 ........................................................................ 1.5
One of BIOL 355, 370, 457 ................................................ 1.5
EOS 300 or 460 ............................................................... 1.5
EOS 225, 330, 335 .......................................................... 4.5
STAT 255 or 260 ............................................................ 1.5
BIOL upper-level electives ............................................. 7.5
EOS upper-level electives ............................................. 6.0
Science upper-level electives ....................................... 1.5
Electives ..................................................................... 4.5
Total ..................................................................... 30.0

1. CHEM 150 may be taken instead of CHEM 101.
2. EOS 202 and 300 are recommended for students interested in geologic field studies (202 is prerequisite for 300); EOS 260 and 460 are recommended for students interested in biosphere evolution (260 is prerequisite for 460).
3. MATH 200 and 204 may be taken instead of MATH 202.
4. Recommended courses include EOS 311 or BIOL 311, BIOL 319, 321, 322, 335, 418, 427, 435, 438, 446. MRNE courses are considered upper-level biology courses.
5. Recommended courses include EOS 403, 425, 480.
6. EOS 403, 408, 416, 420, 422, 425, 427, and 433 are normally offered in alternate years. Students are advised to consult with the department to determine when these courses are offered.

Combined Major in Biology and Mathematics and Statistics

First and Second Years
BIOL 184, 186, 215, 225, 230 ................................................. 7.5
CHEM 101, 102, 231 ......................................................... 4.5
CSC 110, 115 ................................................................. 3.0
MATH 100 or 109, 101, 110 or 211, 122, 200, 204 .................. 9.0
STAT 260 (or 255), 261 (or 256) ........................................ 3.0
Electives2 ................................................................. 3.0

Third and Fourth Years
BIOL 365 or 435 ................................................................. 1.5
BIOL upper-level electives4 ............................................... 1.5
MATH 342, 377 ............................................................... 3.0
Two of STAT 350, 353, 354, 359 or two of MATH 346, 348, 379 .................................. 3.0
MATH or STAT 400-level ................................................ 3.0
MATH or STAT upper level electives5 .................................. 1.5
Electives4,5 ................................................................. 4.5
Total ..................................................................... 60.0

1. It is strongly recommended that students interested in this program take STAT 260 and STAT 261.
2. Recommended electives: MATH 236, 248, CHEM 232, PHYS 102A, 102B.
3. BIOL 300A or 300B may be used to fulfill the Biochemistry requirement and may be prerequisites for recommended courses.

Combined Biology and Psychology Program Requirements

Both Major and Honours BSc degrees are offered in the Combined Biology and Psychology Program. These are not joint degrees in Biology and Psychology, but single degree programs composed of a selected combination of courses from each of the departments. These programs are intended for students with interests and career goals in any area of neuroscience, including neuroethology, human biology, medicine, dentistry, or nursing. Students should consult with undergraduate advisers in both departments when planning their course schedules.

Combined Honours in Biology and Psychology

Core Course Requirements
BIOL 184 or 190B, and 186 or 190A1 ........................................ 3.0
PSYC 100A, 100B ........................................................... 3.0
BIOL 2251 ................................................................. 1.5
PSYC 201 ................................................................. 1.5
PSYC 210 ................................................................. 1.5
PSYC 251 ................................................................. 1.5

1. BIOL and PSYC courses are offered at 100 level and above.
2. BIOL and PSYC courses are offered at 100 level and above.
3. BIOL and PSYC courses are offered at 100 level and above.
4. BIOL and PSYC courses are offered at 100 level and above.
5. BIOL and PSYC courses are offered at 100 level and above.
6. BIOL and PSYC courses are offered at 100 level and above.

Combined Biology and Mathematics and Statistics Program Requirements

A Major BSc degree is offered in the Combined Biology and Mathematics and Statistics Program. This is a single degree interdisciplinary program composed of a selected combination of courses from each of the departments. The program is intended for students with an interest in both Biology and Mathematical Sciences, to prepare them for quantitative approaches in biology or for the fields of mathematical biology or biostatistics. Students should consult with undergraduate advisers in both departments when planning their course schedules and pay close attention to course prerequisites.

## Other Courses of Potential Interest (Electives)

- BIOL 215, 230, 307, 321, 322, 335, 360, 361, 400
- BIOL 300A (required for BIOL 360, 361, medical school), 300B (required for BIOL 361, medical school)
- MATH 101, 377, or other MATH courses
- PHIL 100, 201, 203, 220, 460
- EPHE 141, 241B, 341

1. BIOL 184 (or 190B), 186 (or 190A) and 225 require a minimum grade of C+ in each.
2. Admission and Graduation Standing requirements for the Honours program are governed by the regulations for the department in which the Honours thesis is taken.
3. Students registering for BIOL 499A, 499B must also take BIOL 460 (Honours Seminar).
4. Students planning to do an Honours thesis or a graduate degree in Psychology are advised to take PSYC 300A and 300B. Students interested in a graduate degree in Psychology are advised to take PSYC 400A and/or 400B as electives.
5. At least 21 units of upper-level courses are required to satisfy university requirements.
6. Students planning to undertake graduate studies in biopsychology are advised to acquire experience in a research laboratory through paid, volunteer, or Directed Studies positions. Students registering for BIOL 499A/B must also take BIOL 460 (Honours Seminar).

## Biology Co-operative Education Program

See “Co-operative Education Programs” for the Faculty of Science (page 247). See also the general regulations pertaining to “Undergraduate Co-operative Education” Programs of the University of Victoria governing all co-operative education students (page 63).

### Biology Co-op Program Requirements

Entry into the Biology Co-operative Education Program is open to students who are enrolled in an Honours or Major Program offered by the Biology department. To qualify for entry and continuation in the Co-operative Education Program, students must be enrolled on a full-time basis and must maintain a B average (5.0) in Biology courses and overall. A minimum of four work terms is required to graduate with Co-op designation. The first work term is undertaken in the Winter or Summer of the second academic year. After the first work term, academic terms and work terms normally alternate. Each work term will be recorded on the student’s academic record and transcript (as COM, N/X or F/X).

Students who are taking double or combined Major degrees programs, who wish to participate in a combined Co-op program, should refer to the regulations for the Faculty of Science “Co-operative Education Programs” found on page 247.

A student may transfer from the Biology Co-operative Education Program to a regular Biology program at any time during an academic term.

Applications and further information may be obtained from the UVic website (Biology Co-operative Education Program: <www.uvic.ca/biocoop>) or by contacting the office directly at: 250-721-8637.
Department of Chemistry

Neil Burford, BSc (Wales), PhD (Calgary), FCIC, Professor and Chair of the Department
Cornelio Bohne, BSc, PhD (Sao Paulo), FCIC, PChem, Professor
Alexandre G. Brolo, BSc, MSc (Sao Paulo), PhD (Waterloo), PChem, Professor and Director of CAMTEC
David A. Harrington, BSc (Canterbury), PhD (Auckland), PChem, Professor
Robin G. Hicks, BSc (Dalhousie), PhD (Guelph), Professor and Associate Dean of Science
Fraser Hof, BSc (Alberta), PhD (Scripps), PChem, Professor, CRC Tier II in Supramolecular and Medicinal Chemistry
Dennis K. Hore, BSc (McMaster), PhD (Queens), Professor
Robert Lipton, BSc, MSc, PhD (Toronto), FCIC, Professor and Dean of Science
Ian Manners, BSc, PhD (Bristol), FCIC, FRSC, FRS, Professor, Canada 150 Research Chair in Materials Science
J. Scott McIndoe, BSc, MSc, PhD (Waikato), Professor
Matthew Moffitt, BSc, PhD (McGill), Professor
Lisa Rosenberg, BSc (Memorial), PhD (British Columbia), Professor
Frank C.J.M. van Veghel, MEng, PhD (Twente), FRSC, Professor
Peter C. Wan, BSc, PhD (Toronto), FCIC, Professor
Jeremy Wulff, BSc (Victoria), PhD (Calgary), PChem, Professor, CRC Tier II in Bioactive Small Molecule Synthesis
David J. Berg, BSc (Victoria), PhD (UC-Berkeley), PChem, Associate Professor
Natia Frank, BA (Bard), MSc (UW-Madison), PhD (UC-San Diego), Associate Professor
Inna Poci, BSc (A.U.Cuza) BEd, PhD (Queens), Associate Professor
Katherine Elvira, MSc, PhD (Imperial), Assistant Professor, CRC Tier II in New Materials and Techniques in Health Applications
Violeta losub, BSc, MSc (Bucharest), PhD (Calgary), Assistant Teaching Professor
Lori Aasebo, Secretary
Sean Adams, Scientific Glassblower
Christopher Barr, BSc (Waterloo), MSc (Guelph), Senior Scientific Assistant
Sandra Baskett, BA (Vancouver Island), Graduate Secretary
David E. Berry, BSc (Liverpool), PhD (Bristol), Laboratory Supervisor
Sandra Carlson, BA (Victoria), Department Secretary
Arkady Futerman, BSc, MSc (Ben-Gurion, Israel), BMus (Alaska), Coordinator, Co-operative Education Program
Corrina Ewan, BSc (Victoria), Course Coordinator
Kelli L. Fawkes, BSc (Victoria), Scientific Assistant and Senior Laboratory Instructor
Ori Granot, BSc, PhD (Tel Aviv), Senior Scientific Assistant
Shubha Hosalli, BEng (Mysore), Electronics Technician
Stanislav Konorov, MSc, PhD (Moscow), Senior Scientific Assistant
Andrew Macdonald, Electronics Technician
Peter MArrs, BSc, PhD (British Columbia), PChem, Senior Laboratory Instructor
Rosemary Pulez, BSc (Victoria), Administrative Officer
Monica Reimer, BSc (Calgary), Senior Laboratory Instructor

Adjoint Appointments

Christopher Gill, BSc (Acadia), PhD (British Columbia), Adjunct Associate Professor
Coreen Hamilton, BSc (McGill), PhD (Alberta), Adjunct Associate Professor
Jessie A. Key, BSc (Thompson Rivers), PhD (Alberta), Adjunct Assistant Professor

Emeritus Professors

Walter J. Balfour, BSc (Aberdeen), PhD (McMaster), DSc (Aberdeen), FCIC, Professor Emeritus
Alexander G. Briggs, BSc (Mount Allison), MSc (St. Andrews), PhD (Victoria), PChem, Assistant Teaching Professor Emeritus
Penelope W. Cadding, BSc, PhD (Michigan State), Professor Emerita
Thomas W. Dingle, BSc, PhD (Alberta), Associate Professor Emeritus
Thomas M. Fyles, BSc (Victoria), PhD (York), FCIC, PChem, Professor Emeritus
Terence E. Gough, BSc, PhD (Leicester), FCIC, Professor Emeritus
Alexander D. Kirk, BSc, PhD (Edinburgh), FCIC, Adjunct and Professor Emeritus
Alexander McAuley, BSc, PhD, DSc (Glasgow), CChem, MRS Chem, FCIC, Adjunct and Professor Emeritus
Reginald H. Mitchell, BA, MA, PhD (Cambridge), FCIC, Professor Emeritus
Gerald A. Poulton, BA, PhD (Saskatchewan), Associate Professor Emeritus
Stephen R. Stobart, BSc, PhD (Nottingham), Professor Emeritus
Paul R. West, BSc, PhD (McMaster), FCIC, PChem, Associate Professor Emeritus

CHEMISTRY PROGRAMS

The Department of Chemistry offers a variety of programs leading to the BSc degree. These are intended to provide students with the opportunity of undertaking either specialized studies in Chemistry, or a broader program with Chemistry as a focal point supplemented by other disciplines. These programs provide preparation for a wide range of careers requiring a background in Chemistry.

The Honours and Major Programs are designed for those students wishing to embark on careers as professional chemists. In the Honours degree, a student undertakes an in-depth study of Chemistry with other supporting physical sciences. Each student will participate in a short research project in the final year of study. The Honours Program requires 30 units of Chemistry courses within a total of 60 units for the degree. 4.5 units of Mathematics, 3 units of Physics, 1.5 units of Biochemistry, and 1.5 units of another science are corequisites. On graduation as a chemist, the candidate may either enter employment in a variety of industries or proceed to graduate school and the higher qualifications of MSc and PhD.

The Major Program does not require a research project. The program therefore requires 27 units of Chemistry courses. 4.5 units of Mathematics, 3 units of Physics, 1.5 units of Biochemistry, and 1.5 units of another science are corequisites. The degree is sufficiently specialized to present an attractive background in Chemistry to a prospective employer and to provide the opportunity for students maintaining high averages to continue to graduate school. Both the Honours and Major programs are suitable for students intending to enter a career in teaching at the secondary level.

The Chemistry for the Medical Sciences Program is a BSc Majors Program for students who have a strong interest in Chemistry, but who ultimately plan on entering professional programs in the medical sciences – pharmacy, medical school, dentistry, veterinary medicine, etc. While still providing a rigorous training in Chemistry, the ChemMedSci BSc allows students to customize their degree program more than would be possible in the traditional Chemistry Majors stream. This allows students to better fit into their schedules the non-chemistry offerings that may be required to prepare them for the future professional program of their choice.
A student may complete a Minor in Chemistry by completing the first- and second-year requirements and the third-year Chemistry courses required for the General Program in Chemistry in conjunction with the requirements for an Honours or Major Program offered by another department (which need not be in the Faculty of Science).

The department also offers considerable scope for students wishing to include Chemistry as part of a BSc or BA General Program. Students with this training will frequently find career opportunities in industry, at both the technical and managerial levels, as well as in business, teaching and many other occupations. The influence of Chemistry in modern society is considered in CHEM 300A, a course intended for non-scientists who have successfully completed at least 15 units of university credit.

See “Chemistry Co-operative Education Program”, (page 263).

**Program Requirements**

**Notes on Course Requirements**

- Courses may be taken in different sequences and in different years than those indicated provided the corequisite and prerequisite requirements are satisfied. However, students must be extremely careful in planning programs that differ from the normal sequence. Students who do not take CHEM 213 in the second year might find it difficult to complete their program in the normal time period.

- Safety glasses or goggles must be worn by all students in laboratories. Chemistry department laboratory notebooks may be purchased in the University Bookstore.

**Course Challenge**

The Department of Chemistry does not permit students to receive credit by course challenge.

**Credit for Previously Offered Courses**

Students with credit in the following courses which are no longer offered may make the specified substitutions in any undergraduate program:

- CHEM 235 for CHEM 232
- CHEM 352 for CHEM 452
- CHEM 353 for CHEM 453

**Fourth-year Course Selection**

For up-to-date information on fourth-year course offerings, please see the Chemistry department’s website at <www.uvic.ca/science/chemistry> or contact the department at <chem@uvic.ca>.

**Honours Programs**

Students require the permission of the department to enter an Honours Program and should contact the department in their second year of studies (or later).

To graduate with an Honours degree in Chemistry, students must achieve a graduating GPA of at least 5.5.

UVIC UNDERGRADUATE CALENDAR SEPTEMBER 2018

**Program Requirements**

**First Year**

PHYS 102; or 102A and 102B; or 110 and 111 or 120 and 130 .... 3.0
One of ENGL 135, 146, 147 ... 1.5
Electives ............................................................ 1.5

**Second Year**

CHEM 123 ............................................................ 1.5
One of CHEM 2124, 222, 2455 .................................. 1.5
CHEM 231, 232 ................................................... 3.0
BIOL 225 ............................................................ 1.5
STAT 255 or 260 .................................................. 1.5
Two of ANTH 250, BIOL 230, ENGL 303, EPHE 141, 155, 241, 242,
MICR 200A, 200B, PHIL 331, PSYC 2515, 6, 7 .................. 3.0
Electives ............................................................ 3.0

**Third and Fourth Years**

BIOC 300A and 300B7 ........................................... 3.0
One of CHEM 2124, 222, 2455 .................................. 1.5
One of CHEM 361, 362, 363, 364 ................................... 1.5
CHEM 337 and 437 ............................................... 3.0
Three 300- or 400-Level CHEM lecture courses .......... 4.5
Two of ANTH 250, BIOL 230, ENGL 303, EPHE 141, 155, 241, 242,
MICR 200A, 200B, PHIL 331, PSYC 2515, 6, 7 .............. 3.0
Two of ANTH 352, BCMB 301A, 301B, BIOL 432, 436, 439, 447,
MEDS 301, 325, 410, MICR 303, 402, STAT 3555, 6, 8 ........ 3.0
Electives9, 10 ....................................................... 10.5

**Total 3rd & 4th** ................................................. 30.0

1. For students with Chemistry 11 and Principles of Mathematics 12 or Pre-Calculus
2. For students with Chemistry 12 and Principles of Mathematics 12 or Pre-Calculus
3. Most medical schools require two first year English courses, as a result, students are encouraged to take a second English course at some point of their degree.
4. Students interested in pursuing the co-op option are encouraged to take CHEM 212, and to do so prior to their first work term. This course may also be useful for identifying job opportunities after graduation.
5. Units for any of these courses will be granted only once per course.
6. Some of these courses will require prerequisites other than those listed as required courses in the ChemMedSci program. Students are advised to check prerequisite requirements well in advance of the year in which they plan to take these courses.
7. BIOL 299 plus one of either BIOL 360 or 361 in lieu of BIOL 300A and 300B may be acceptable. Students planning on this option need to consult with the Program Adviser.
8. In any given year, some of these courses may not be offered, or may be restricted to students in a specialized program of study. In this event, additional 300- or 400-level courses may be substituted, with the permission of the Chemistry Department.
9. A total of 21 units of 300- and 400-level courses are required for graduation.
10. Students planning on a career in chemistry involving additional graduate study or accreditation as a Professional Chemist are advised to take at least one additional 1.5 units of Chemistry courses numbered 300 or higher as part of their program electives in the third and fourth year.

**General and Minor Programs**

**First Year**

CHEM 091 and 1011, or 1012 ................................... 1.5
CHEM 102 ........................................................... 1.5

**Second Year**

CHEM 212, 213, 222, 231, 232, 245 ......................... 9.0
Electives ............................................................ 6.0

**Third and Fourth Years**

6 units of additional Chemistry lecture courses numbered above 300, plus two of 361, 362, 363, 364 ............ 9.0
Electives5 ........................................................... 21.0

1. For students with Chemistry 11 and Principles of Mathematics 12 or Pre-Calculus 12 or equivalents.
2. For students with Chemistry 12 and Principles of Mathematics 12 or Pre-Calculus 12 or equivalents.
3. Physics requirement may also be satisfied by PHYS 120 and 130.
4. CHEM 231 may also be taken in the second term of first year, and 1.5 units of these electives postponed.
5. Must include 9.0 units of 300 level or above in a second area of concentration for the General program.

**Combined Chemistry and Biochemistry or Microbiology Program Requirements**

Students may obtain a Combined Major in Chemistry and Biochemistry or Chemistry and Microbiology.

**Combined Major in Chemistry and Biochemistry**

**First Year**

BIOL 186 ........................................................... 1.5
CHEM 091 and 1011, or 1012 ................................ 1.5
CHEM 102 ........................................................... 1.5
MATH 100 or 109, 101 ........................................ 1.5
MATH 100 or 109, 101 ........................................ 3.0
PHYS 110 and 1113 ............................................. 3.0
Electives4 ........................................................... 4.5

**Second Year**

BCMB 301A, 301B ................................................. 3.0
BIOL 406A, 406B ............................................... 3.0
MICR 300A, 300B ............................................... 3.0
Two of BIOL 401, 403, 404, 408, 409 ................. 3.0
CHEM 335, 363, 452, 453 .................................... 6.0
Two of CHEM 318, 324, 337, 347, 361, 362, 364 ....... 3.0
MICR 302, 303 ..................................................... 3.0
Electives ........................................................... 6.0

1. For students with Chemistry 11 and Principles of Mathematics 12 or Pre-Calculus 12 or equivalents.
2. For students with Chemistry 12 and Principles of Mathematics 12 or Pre-Calculus 12 or equivalents.
3. Physics requirement may also be satisfied by PHYS 120 and 130.
4. CHEM 231 may also be taken in the second term of first year, and 1.5 units of these electives postponed.
5. Must include 9.0 units of 300 level or above in a second area of concentration for the General program.

1. For students with Chemistry 11 and Principles of Mathematics 12 or Pre-Calculus 12 or equivalents.
2. For students with Chemistry 12 and Principles of Mathematics 12 or Pre-Calculus 12 or equivalents.
3. Physics requirement may also be satisfied by PHYS 120 and 130.
4. CHEM 231 may also be taken in the second term of first year, and 1.5 units of these electives postponed.
5. Must include 9.0 units of 300 level or above in a second area of concentration for the General program.

1. For students with Chemistry 11 and Principles of Mathematics 12 or Pre-Calculus 12 or equivalents.
2. For students with Chemistry 12 and Principles of Mathematics 12 or Pre-Calculus 12 or equivalents.
3. Must include 9.0 units of 300 level or above in a second area of concentration for the General program.

1. For students with Chemistry 11 and Principles of Mathematics 12 or Pre-Calculus 12 or equivalents.
2. For students with Chemistry 12 and Principles of Mathematics 12 or Pre-Calculus 12 or equivalents.
3. Must include 9.0 units of 300 level or above in a second area of concentration for the General program.

1. For students with Chemistry 11 and Principles of Mathematics 12 or Pre-Calculus 12 or equivalents.
2. For students with Chemistry 12 and Principles of Mathematics 12 or Pre-Calculus 12 or equivalents.
3. Must include 9.0 units of 300 level or above in a second area of concentration for the General program.

1. For students with Chemistry 11 and Principles of Mathematics 12 or Pre-Calculus 12 or equivalents.
2. For students with Chemistry 12 and Principles of Mathematics 12 or Pre-Calculus 12 or equivalents.
3. Must include 9.0 units of 300 level or above in a second area of concentration for the General program.

4. May be replaced by BIOC 300A.

### Combined Chemistry and Mathematics Program Requirements

For a BSc degree in the Combined Chemistry and Mathematics Program students may take a Major or Honours Program. These programs are not joint degrees in Chemistry and Mathematics, but a single degree program composed of a selected combination of courses from each of the departments. Students opting for either of these combined programs must contact the Departments of Chemistry and Mathematics and Statistics. Each student will be assigned an adviser from each of these departments. Students considering proceeding to graduate work in either Chemistry or Mathematics must consult with their adviser prior to making their final choice of courses.

1. For students with Chemistry 11 and Principles of Mathematics 12 or Pre-Calculus 12 or equivalents.
2. For students with Chemistry 12 and Principles of Mathematics 12 or Pre-Calculus 12 or equivalents.
3. Physics requirement may also be satisfied by PHYS 120 and 130.
4. May be replaced by BIOL 300A.
## Combined Chemistry and Earth and Ocean Sciences Program Requirements

Both Majors and Honours BSc degrees are offered in the Combined Chemistry and Earth and Ocean Sciences Program. This program exposes students to the fields of geochemistry and chemical oceanography while providing a firm basis in the principles of chemistry. Students considering this program must contact the Chemistry department and the School of Earth and Ocean Sciences where an adviser from each discipline will be assigned. Students considering graduate studies in either Chemistry or Earth and Ocean Sciences must consult with their adviser from the appropriate discipline before making their final choices of courses.

#### Total 3rd & 4th

| Credit Total                                                        | 30.0    |

---

1. CHEM 150 may be taken instead of CHEM 101.
2. For students with Chemistry 11 and Principles of Mathematics 12 or Pre-Calculus 12 or equivalents.
3. For students with Chemistry 12 and Principles of Mathematics 12 or Pre-Calculus 12 or equivalents.
4. Physics requirement may also be satisfied by PHYS 120 and 130.
5. EOS 202 and 300 are recommended for students interested in geologic field studies (202 is prerequisite for 300); EOS 260 and 460 are recommended for students interested in biosphere evolution (260 is prerequisite for 460).
6. MATH 200 and 204 may be taken instead of MATH 202.
7. May be replaced by BIOC 300A.
8. EOS 403, 408, 416, 420, 422, 425, 427, and 433 are normally offered in alternate years. Students are advised to consult with the department to determine when these courses are offered.

### Chemistry Co-operative Education Program

See “Co-operative Education Programs” for the Faculty of Science (page 247). See also the general regulations pertaining to “Undergraduate Co-operative Education” Programs of the University of Victoria governing all co-operative education students (page 63).

#### Chemistry Co-op Program Requirements

To enter and remain in the Chemistry Co-operative Education Program, students must normally maintain a GPA of 4.5 in Chemistry courses and overall. Students are also required to complete satisfactorily a minimum of four work terms. A student may at any time during an academic term transfer from the Chemistry Co-operative Education Program to a regular Chemistry program.

Students in the Co-op program may commence work terms after one full year of course work, and normally will alternate terms of academic study and work experience, with the following conditions:

1. Students' work terms should include work with at least three different employers.
2. Two consecutive work terms (totalling 8 months) may be included with permission.
3. Two of the work terms must be subsequent to the student passing all required 100- and 200-level chemistry courses and 3.0 units of third-year chemistry courses.

Students who do not take CHEM 213 in the second year might find it difficult to complete their program in the normal time period.

Each work term is recorded on the student’s academic record and transcript (as COM, N/X or F/X). Some employers keep work term reports confidential, but at least two work term reports must be evaluated as satisfactory by the department in order to complete the program.

Students who are taking double or combined Major degrees programs, who wish to participate in a combined Co-op program, should refer to the regulations for the Faculty of Science “Co-operative Education Programs” found on page 247.

Applications and further information about the Co-operative Education Program in Chemistry are available from the department or at <www.uvic.ca/chemcoop>.

Students may take a Minor Program in Earth and Ocean Sciences along
interests in both disciplines.
Combined Honours and Major programs offered in collaboration with
span the fields of physical geography and earth sciences.
the Department of Chemistry expose students to the fields of
Combined Honours and Major programs offered in collaboration with
apply basic principles of physics and mathematics to fundamental global
either Geophysics or Ocean-Atmosphere Dynamics and allow students to
corequisite courses in the other sciences, and a selection of electives
The Earth Sciences programs require a core of earth sciences courses,
course options possible. Students in this program combine a
concentration in earth sciences with one in another science area (BSc) or
an arts area (BA).
The Minor in Ocean Sciences is intended to provide students with a
broad overview of oceanography, focusing on its essentially
interdisciplinary nature.

**Professional Registration**

Completion of the Earth Science Honours or Major program, with an
appropriate selection of courses (including a geomorphology elective), is
intended to fulfill the academic requirements for designation as a
Professional Geoscientist (PGeo) under the discipline of Geology from the
Association of Professional Engineers and Geoscientists of BC (APEGBC). The Combined Physical Geography and Earth and Ocean
Science program, with an appropriate selection of courses, is intended to
fulfill the APEGBC academic requirements for PGeo designation under the
discipline of Environmental Geoscientist. APEGBC has requirements of students beyond course work, and reserves the right to set standards
and change requirements at any time. Therefore, the School of Earth and
Ocean Sciences, Department of Geography, and University of Victoria
assume no responsibility for students’ acceptance into APEGBC during or
after completion of their program. For more information, see the SEOS
website <www.uvic.ca/science/seos/undergrad/programs/apreg> and
the APEGBC website <www.apeg.bc.ca>.

See “School of Earth and Ocean Sciences Co-operative Education
Program” (page 271).

**Program Requirements**

**Course Availability and Information**

Students should consult the School concerning courses offered in any
particular year. Some fourth-year courses are offered in alternate years.
The names of course instructors, together with the required and
recommended texts for each course, are available from the School.

**Field Courses**

Earth Sciences 300 and 400 are scheduled outside of the normal term
time at off-campus locations on dates specified by the School. Students
are required to meet part of the expenses involved and will be advised of
such expenses during the Fall term. Students should contact the School
for further information.

**Honours Programs**

Students will normally apply for admission to the SEOS Honours Program
at the end of the third year of their undergraduate Earth Sciences
Program or combined program, although they may apply as early as the
end of their second year and as late as the beginning of their last year.
The general requirement for admission to the Honours Program is a
cumulative GPA of 5.5 in 200-, 300-, and 400-level courses at the time of
application.

**Honours Graduation Standing**

An Honours degree requires:
- a graduating GPA of at least 5.5
- minimum grade of B+ in EOS 499A and 499B

If a student fails to meet the standards for the Honours degree, while
meeting the Major degree requirements, the student may graduate with
the appropriate Major degree.

**Earth and Ocean Sciences Programs**

The School offers the following BSc degree programs:
- General, Minor, Major and Honours in Earth Sciences
- Combined Major and Honours in Physics and Earth Sciences (Geophysics)
- Combined Major and Honours in Physics and Ocean Sciences (Ocean-
  Atmosphere Dynamics)
- Combined Major and Honours in Chemistry and Earth and Ocean
  Sciences
- Combined Major and Honours in Physical Geography and Earth and
  Ocean Sciences
- Combined Major and Honours in Earth Science and Biology and Earth
  Sciences
- Minor in Ocean Sciences

The Earth Sciences programs require a core of earth sciences courses,
course options possible. Students in this program combine a
concentration in earth sciences with one in another science area (BSc) or
an arts area (BA).
The Minor in Ocean Sciences is intended to provide students with a
broad overview of oceanography, focusing on its essentially
interdisciplinary nature.

**Professional Registration**

Completion of the Earth Science Honours or Major program, with an
appropriate selection of courses (including a geomorphology elective), is
intended to fulfill the academic requirements for designation as a
Professional Geoscientist (PGeo) under the discipline of Geology from the

- Two of EOS 311\(^5\), 312, 314, 403\(^6\), 408\(^6\), 425\(^6\), 431, 433\(^6\) ........................................ 3.0
- Electives ........................................................................ 3.0

**Total** ........................................................................ 15.0

**Fourth Year**

- EOS 400, 460 .............................................................. 3.0
- EOS 499A, 499B ......................................................... 3.0
- EOS upper-level electives\(^6\) .......................................... 4.5
- EOS 400-level elective\(^5\) .............................................. 1.5
- Electives ........................................................................ 3.0

**Total** ........................................................................ 15.0

1. Students who have completed Biology 11 and 12 should take BIOL 184.
2. CHEM 150 may be taken instead of CHEM 101.
3. Physics requirement may also be satisfied by PHYS 102 and 110; or PHYS 102A and 102B and 110; or PHYS 120 and 130.
4. MATH 200 and 204 may be taken instead of MATH 202.
5. Students should consider taking BIOL 215 as one of their electives.
6. EOS 403, 408, 416, 420, 422, 425, 427, and 433 are normally offered in alternate years. Students are advised to consult with the department to determine when these courses are offered.
7. Students completing the Minor in Ocean Sciences may substitute two upper-level EOS electives for this requirement.

**Major in Earth Sciences**

**First Year**

- BIOL 150A or 184 or 190A\(^1\) ........................................... 1.5
- CHEM 101\(^2\), 102 ....................................................... 3.0
- EOS 110, 120 .............................................................. 3.0
- MATH 100 or 109, 101 .................................................. 3.0
- PHYS 110 and 111\(^3\) ................................................... 3.0
- Electives ........................................................................ 1.5

**Total** ........................................................................ 15.0

**Second Year**

- CHEM 245 ................................................................. 1.5
- EOS 201, 202, 205, 210, 240, 260 ..................................... 9.0
- MATH 202\(^4\) .............................................................. 1.5
- STAT 255 or 260 ......................................................... 1.5
- Electives ........................................................................ 1.5

**Total** ........................................................................ 15.0

**Third Year**

- EOS 225, 300, 316, 330, 335, 340 ..................................... 9.0
- Two of EOS 311\(^5\), 312, 314, 403\(^6\), 408\(^6\), 425\(^6\), 431, 433\(^6\) ........................................ 3.0
- Electives ........................................................................ 3.0

**Total** ........................................................................ 15.0

**Fourth Year**

- EOS 400, 460 .............................................................. 3.0
- EOS 400-level elective .................................................. 1.5
- Electives ........................................................................ 10.5

**Total** ........................................................................ 15.0

1. Students who have completed Biology 11 and 12 should take BIOL 184.
2. CHEM 150 may be taken instead of CHEM 101.
3. Physics requirement may also be satisfied by PHYS 102 and 110; or PHYS 102A and 102B and 110; or PHYS 120 and 130.
4. MATH 200 and 204 may be taken instead of MATH 202.
5. Students should consider taking BIOL 215 as one of their electives.
6. EOS 403, 408, 416, 420, 422, 425, 427, and 433 are normally offered in alternate years. Students are advised to consult with the department to determine when these courses are offered.
7. Students completing the Minor in Ocean Sciences may substitute two upper-level EOS electives for this requirement.

**General and Minor in Earth Sciences**

The School of Earth and Ocean Sciences General and Minor Program is designed to offer a flexible program with maximum choice for students with a general interest in Earth Sciences. Students interested in a
professional career or graduate studies in the field are strongly advised to take the Honours or Major Program.

</table>

1. CHEM 150 may be taken instead of CHEM 101.
2. For students with Chemistry 11 and Principles of Mathematics 12 or Pre-Calculus 12 or equivalents.
3. For students with Chemistry 12 and Principles of Mathematics 12 or Pre-Calculus 12 or equivalents.
4. Physics requirement may also be satisfied by PHYS 120 and 130.
5. EOS 202 and 300 are recommended for students interested in geologic field studies (202 is prerequisite for 300); EOS 260 and 460 are recommended for students interested in biosphere evolution (260 is prerequisite for 460).
6. MATH 200 and 204 may be taken instead of MATH 202.
7. May be replaced by BIOC 300A.
8. EOS 403, 408, 416, 420, 422, 425, 427, and 433 are normally offered in alternate years. Students are advised to consult with the department to determine when these courses are offered.

Combined Geographic and Earth and Ocean Sciences Program Requirements

Students intending to pursue this combined program must consult with the Undergraduate Adviser in either the School of Earth and Ocean Sciences or the Department of Geography after completing first-year requirements.

Combined Honours in Physical Geography and Earth and Ocean Sciences
Admission to the Combined Honours Geography and Earth and Ocean Sciences Program requires the permission of both the Department of Geography and the School of Earth and Ocean Sciences.

### Combined Biology and Earth and Ocean Sciences Program Requirements

1. CHEM 150 may be taken instead of CHEM 101.
2. Physics requirement may also be satisfied by PHYS 102 and 110, or PHYS 102A and 102B; or PHYS 120 and 110, or PHYS 120 and 130.
3. MATH 200 and 204 may be taken instead of MATH 202.
4. GEOG 226, STAT 255 and 260: Students who already have credit for an introductory statistics course numbered 200 or above from another academic unit must consult with a Geography or SEOS Undergraduate Adviser before registering in either GEOG 226, STAT 255, STAT 260. See "Credit Limit—Beginning Level Statistics Courses" (page 44).
5. EOS 403, 408, 416, 420, 422, 425, 427, and 433 are normally offered in alternate years. Students are advised to consult with the department to determine when these courses are offered.

### Combined Honours in Biology and Earth and Ocean Sciences

Admission to the Combined Honours Biology and Earth and Ocean Sciences Program requires the permission of both the Department of Biology and the School of Earth and Ocean Sciences. To receive an Honours degree, a student must obtain: (1) a minimum graduating GPA of 5.5 overall; (2) a minimum GPA of 6.0 in SEOS or Biology courses at the 300 and 400 level; and a minimum grade of A- in BIOL 499A and 499B or EOS 499A and 499B.

</table>

1. CHEM 150 may be taken instead of CHEM 101.
2. EOS 202 and 300 are recommended for students interested in geologic field studies (202 is prerequisite for 300); EOS 260 and 460 are recommended for students interested in biopshere evolution (260 is prerequisite for 460).
3. MATH 200 and 204 may be taken instead of MATH 202.
4. Students registering for BIOL 499A/B must also take BIOL 460 (Honours Seminar).
5. Recommended courses include EOS 311 or BIOL 311, BIOL 319, 321, 322, 325, 418, 427, 435, 438, 446.
6. Recommended courses include EOS 403, 425, 480.
7. EOS 403, 408, 416, 420, 422, 425, 427, and 433 are normally offered in alternate years. Students are advised to consult with the department to determine when these courses are offered.

**School of Earth and Ocean Sciences Co-operative Education Program**

Students intending to register in Earth Sciences Major or Honours Programs may wish to combine their academic programs with relevant and productive work experience in industry, business and government. See "Co-operative Education Programs" for the Faculty of Science (page 247). See also the regulations pertaining to "Undergraduate Co-operative Education" Programs of the University of Victoria governing all co-operative education students (page 63).

**Co-op Program Requirements**

Entry into the SEOS Co-op Program is restricted to students enrolled in a Major or Honours Program in SEOS and attending UVic on a full-time basis. To qualify for entry and continuation in the Co-op Program a student must normally maintain a GPA of 5.0 in SEOS courses and a GPA of 4.5 overall. In addition to academic grades, acceptance will be based on individual interest, abilities and aptitudes, and a formal interview. A student is required to satisfactorily complete at least four Work Terms, each of which will be recorded on the student’s academic record and transcript (as COM, N/X or F/X).

Students who are taking double or combined Major degrees programs, who wish to participate in a combined Co-op program, should refer to the regulations for the Faculty of Science “Co-operative Education Programs” found on page 247.

A student may at any time during an academic term transfer from the SEOS Co-operative Program to a regular SEOS program. “Work Term Credit By Challenge” (page 64) is permitted in the SEOS Co-op Program.

Students transferring from other post-secondary institutions may apply to enter the Co-op Program when applying for admission to UVic. Co-op students interrupting their academic or work term program may apply for reinstatement in the Co-op Program upon return to UVic, but readmission is not guaranteed.
Applications and further information concerning the Co-op Program in SEOS may be obtained from the School or at <www.uvic.ca/eoscoop>.

Zheng Wu, BA (Beijing International Studies), MA (UVic), PhD (Western), Adjunct Professor
Francis W. Zwiers, BMath (Waterloo), MSc (Acadia), PhD (Dal), Adjunct Professor, Honorary Professor

Mathematics and Statistics Programs

The department offers the following BSc degree programs:

- General, Major or Honours in Mathematics
- General, Major or Honours in Statistics
- Major or Honours in Mathematics and Statistics
- Major in Biology and Mathematics and Statistics
- Major or Honours in Chemistry and Mathematics
- Major or Honours in Computer Science and Mathematics
- Major or Honours in Computer Science and Statistics
- Honours in Physics and Mathematics
- Major in Financial Mathematics and Economics

Honours Programs allow specialization in one or more disciplines in the last two or three years and are intended for students of above-average ability. Students who plan to undertake graduate studies are strongly advised to follow an Honours Program.

The Major in Mathematics is a program broadly based in the mathematical sciences requiring courses in each of pure mathematics, applied mathematics, discrete mathematics, and statistics, and having enough elective choice to permit emphasis in any of these four areas.

The General Program emphasizes breadth of education and requires concentration in two different fields. For more details on a BSc degree in a General Program combining Mathematics or Statistics with another field in Science (or with Geography or Psychology), see “General Program.”
Honours caliber may be required to withdraw from the program. A student whose third-year work is not of Honours caliber should apply in writing to the Chair of the department on the Faculty of Humanities and the Faculty of Social Sciences, complete the requirements common to all bachelor's degrees in that faculty, and satisfy the requirements for the General, Major or Honours Program in Mathematics or the General, Major or Honours Program in Statistics described below.

Students may also complete a Minor in Mathematics or Statistics. See "Mathematics and Statistics Co-operative Education Program" (page 278).

**PROGRAM REQUIREMENTS**

**Notes on Course Requirements**

1. Any student who has been awarded a UBC-SFU-UVIC-UNBC Calculus Examination Certificate can receive credit for MATH 100 with the letter grade corresponding to the examination score.

2. Credit by course challenge is not offered. Any students who demonstrate to the department that they have mastered the material of a course may be granted advanced placement. For this purpose a score of 4 or 5 on the AP Calculus test will constitute mastery of MATH 100.

3. The prerequisite for MATH 100 is a minimum grade of 73% in either Principles of Mathematics 12 or Pre-calculus 12; or a minimum grade of C+ in MATH 120; or a PASS on the MATH 100 pretest. The pretest will be given in the first week of classes each term.

4. All courses within the Department of Mathematics and Statistics which require a calculator will permit only the use of a specific department-selected calculator. Detailed information about calculator restrictions will be given at the beginning of these courses.

5. All students taking a Major or Honours in Mathematics are strongly advised to take at least one University course in Physics.

**Honours Programs**

Students who wish to be admitted to an Honours Program in the department should apply in writing to the Chair of the department on completion of their second year. Normally a student will be admitted to the third year of an Honours Program in the department only if the student has achieved a GPA of at least 6.5 in the second-year courses taken in the department. A student whose third-year work is not of Honours caliber may be required to withdraw from the program.

**Mathematics Program Requirements**

**Honours in Mathematics**

**First and Second Years**

- MATH 100 or 109, 101, 122 ................................................................. 4.5
- CSC 110 ............................................................................................ 1.5
- MATH 200, 204, 211, 212, 236, 248 ................................................. 9.0
- STAT 260 ........................................................................................ 1.5

**Third and Fourth Years**

- MATH 222, 301, 311, 312, 335 ....................................................... 7.5
- STAT 350 ....................................................................................... 1.5

**Statistics Program Requirements**

**Honours in Statistics**

- MATH 100 or 109, 101, 122 ................................................................. 4.5
- CSC 110 ............................................................................................ 1.5
- MATH 200, 204, 211, 212, 236, 248 ................................................. 9.0
- STAT 260, 261 ............................................................................... 3.0

**Notes on Course Requirements**

- Any student who has been awarded a UBC-SFU-UVIC-UNBC Calculus Examination Certificate can receive credit for MATH 100 with the letter grade corresponding to the examination score.

- Credit by course challenge is not offered. Any students who demonstrate to the department that they have mastered the material of a course may be granted advanced placement. For this purpose a score of 4 or 5 on the AP Calculus test will constitute mastery of MATH 100.

- The prerequisite for MATH 100 is a minimum grade of 73% in either Principles of Mathematics 12 or Pre-calculus 12; or a minimum grade of C+ in MATH 120; or a PASS on the MATH 100 pretest. The pretest will be given in the first week of classes each term.

- All courses within the Department of Mathematics and Statistics which require a calculator will permit only the use of a specific department-selected calculator. Detailed information about calculator restrictions will be given at the beginning of these courses.

- All students taking a Major or Honours in Mathematics are strongly advised to take at least one University course in Physics.

**Honours Programs**

Students who wish to be admitted to an Honours Program in the department should apply in writing to the Chair of the department on completion of their second year. Normally a student will be admitted to the third year of an Honours Program in the department only if the student has achieved a GPA of at least 6.5 in the second-year courses taken in the department. A student whose third-year work is not of Honours caliber may be required to withdraw from the program.

MATH 377 ......................................................................................... 1.5
STAT 350, 353, 354, 453 .......................................................... 6.0
7.5 additional units made up of MATH or STAT courses
numbered 300 or higher. Recommended courses include
MATH 452, STAT 450, 454, 455, 456, 457, 458, 459 (454 can be
taken more than once in different topics) ........................................... 7.5

General in Statistics

MATH 100 or 109, 101 ................................................................. 3.0
MATH 200 (or 205), 211 .............................................................. 3.0
STAT 260 (or 255), 261 (or 256) ..................................................... 3.0
STAT 353, 354, 453 ........................................................................ 4.5
4.5 additional units of MATH and/or STAT courses numbered
300 or higher. Recommended courses include
MATH 352, 377, 452, STAT 350, 355, 359, 450, 454, 455, 456, 457,
458, 459 (454 can be taken more than once in different topics) .......... 4.5

Minor in Statistics

A student may declare a Minor in Statistics by completing the
requirements for an Honours Program or a Major Program in another
discipline together with the following set of courses:

MATH 100 (or 102 or 109), 101 (or 151) ................................. 3.0
MATH 211 ......................................................................................... 1.5
STAT 260 (or 252, 254, 255), 261 (or 256) ................................. 3.0
STAT 353, 354 ................................................................................. 3.0
One of STAT 350, 355, 359, 450, 453, 454, 455, 456, 457, 458, 459
(454 can be taken more than once in different topics) ...................... 1.5

The selected courses must include at least 9.0 units numbered 200 or
higher that do not form part of the requirements of the Honours or Major
or General or Option Program. Any course disqualified from the Minor
Program by overlap with the requirements of the Honours or Major or
General or Option Program may be replaced by another MATH or STAT
course at the same level or higher. Only one Minor may be declared on
any degree program.

Combined Mathematics and Statistics Program
Requirements

Honours: Mathematics and Statistics

MATH 100 or 109, 101, 122 ......................................................... 4.5
CSC 110 ......................................................................................... 1.5
MATH 200, 204, 211, 212, 236, 248 ............................................. 9.0

STAT 260, 261 ................................................................................. 3.0
Two of MATH 322, 342, 377 ......................................................... 3.0
MATH 301, 311, 312, 335 ............................................................ 6.0
STAT 350, 353, 450 ................................................................. 4.5
Three of MATH 451, 452, STAT 354, 453, 454, 455, 456, 457, 458,
459 (454 can be taken more than once in different topics) ............... 4.5
3.0 additional units of MATH or STAT courses numbered 300 or
higher ......................................................................................... 3.0

Major: Mathematics and Statistics

MATH 100 or 109, 101, 122 ......................................................... 4.5
CSC 110 ......................................................................................... 1.5
MATH 200, 204, 211, 212, 236, 248 .................................................. 9.0

MATH 322 or 342 ........................................................................... 1.5
MATH 311, 377 ................................................................................. 3.0
STAT 350, 353, 354, 453 .......................................................... 6.0
One of STAT 450, 454, 455, 456, 457, 458, 459 ................................ 1.5
3.0 additional units of MATH or STAT courses numbered 300 or
higher ......................................................................................... 3.0

Combined Biology and Mathematics and Statistics
Program Requirements

A Major BSc degree is offered in the Combined Biology and Mathematics
and Statistics Program. This is a single degree interdisciplinary program
composed of a selected combination of courses from each of the
departments. The program is intended for students with an interest in
both Biology and Mathematical Sciences, to prepare them for
quantitative approaches in biology or for the fields of mathematical
biology or biostatistics. Students should consult with undergraduate
advisors in both departments when planning their course schedules and
pay close attention to course prerequisites.

Combined Major in Biology and Mathematics and Statistics

First and Second Years

BIOL 184, 186, 215, 225, 230 ............................................................ 7.5
CHEM 101, 102, 231 ........................................................................ 4.5
CSC 110, 115 .................................................................................... 3.0
MATH 100 or 109, 101, 110 or 211, 122, 200, 204 .......................... 9.0
STAT 260 (or 255), 2611 (or 256) ............................................... 3.0
Electives2 ........................................................................................ 3.0

Third and Fourth Years

BIOL 2995 .......................................................................................... 1.5
BIOL 30 .......................................................................................... 1.5
BIOL 355 or 435 ............................................................................... 1.5
BIOL upper-level electives4 ................................................................ 10.5
MATH 342, 377 ................................................................................ 3.0
Two of STAT 350, 353, 354, 459 or two of MATH 346, 348, 379 ... 3.0
MATH or STAT 400-level .................................................. 3.0
MATH or STAT upper level electives5 ........................................... 1.5
Electives4,5 ....................................................................................... 4.5
Total .................................................................................................... 60.0

1. Students must make course selections such that their program contains at least
6.0 units of MATH and/or STAT courses numbered 400 or higher.

2. Electives must be selected from MATH or STAT courses numbered 300 or
higher.

3. Students must make course selections such that their program contains at least
6.0 units of MATH and/or STAT courses numbered 400 or higher.

4. The set of level B courses must include the following courses:

- Four of CHEM 101, 102, 231
- Three of MATH 200, 204, 211, 212, 236, 248
- CSC 110
- STAT 260

5. Students must complete a minimum of 30.0 units in any of the Sciences.

6. The remaining units must be at the 300 level or higher, selected from MATH or
STAT courses numbered 300 or higher.
1. It is strongly recommended that students interested in this program take STAT 260 and STAT 265.
2. Recommended electives: MATH 236, 248, CHEM 232, PHYS 102A, 102B
3. BIOC 300A or 300B may be used to fulfill the Biochemistry requirement and may be prerequisites for recommended courses.
4. Students interested in cell and molecular biology should take BIOC 360, at least three of BIOC 309, 361, 362, 401A, 433, 436, 439; and BIOC 326, 432, 458, 459, 465, 467, 490F are also relevant. Students interested in physiology and medicine should take BIOC 365, at least three of BIOC 309, 300, 367, 432, 435, 444, 477, and BIOC 362, 366, 404, 401A, 409B, 439, 448, 467, 490E, 490E, 490F, 490F are also relevant. Students interested in ecology and evolution should select courses from BIOC 329, 339, 345, 346, 410, 435, 446, 457, 461, 462, 468, 490B, 490D, 490G, 490J.

**Combined Chemistry and Mathematics Program Requirements**

For a BSc degree in Combined Chemistry and Mathematics, students may take a Major or Honours program. These programs are not joint degrees in Chemistry and Mathematics, but a single degree program composed of a selected combination of courses from each of the departments. Students opting for either of these combined programs must contact the Chemistry and Mathematics and Statistics departments. Each student will be assigned an adviser from each of these departments. Students considering proceeding to graduate work in either Chemistry or Mathematics must consult with their advisers prior to making their final choice of courses.

**Combined Computer Science and Mathematics, and Computer Science and Statistics Program Requirements**

For a BSc degree in Combined Computer Science and Mathematics or Computer Science and Statistics, students may take a Major or Honours program. These programs are not joint degrees in Computer Science and Mathematics or Computer Science and Statistics, but a single degree program composed of selected courses from each of the departments. These combined programs are offered through the Faculty of Science. Students should contact an adviser in Computer Science for advice regarding CSC or SENG courses, and an adviser in Mathematics and Statistics for advice regarding MATH or STAT courses, and for advice regarding the programs. Students considering future graduate work in Computer Science, Mathematics, or Statistics should consult with advisers prior to making their choice of elective courses.

**Admission to the Combined Honours Programs in Computer Science and Mathematics or Computer Science and Statistics**

Admissions to the Honours program is done through Mathematics and Statistics, in consultation with Computer Science. Students who wish to be admitted to one of the Combined Honours programs should apply in writing to the Honours Advisers of both departments on completion of their second year. Normally a student will be admitted to the Combined Honours program only if the student meets the following conditions:

1. completion of CSC 106 (formerly 112, 212), 110, 115, 225, 230, and SENG 265
2. completion of at least 10.5 units of the Mathematics and Statistics courses required for the degree
3. a grade of at least B+ in all 200-level CSC and SENG courses
4. a GPA of at least 6.5 in all 200-level Mathematics and Statistics courses

Students may also enter one of the Combined Honours programs upon completion of their third year provided they have at least 4.5 units of 300- or 400-level credit from each department with a minimum GPA of 6.0. This minimum GPA of 6.0 is in all courses completed at the 300- or 400-level in the two departments.

Honours students are expected to maintain a GPA of at least 5.0 in their third year to remain in the program.
Honours: Computer Science and Mathematics

First Year
CSC 106, 110, 115 ................................................................. 4.5

</table>

1. Students who have not satisfied the Academic Writing Requirement must choose 1.5 units from ENGL 135, 146, 147.
2. Math 211 can be replaced by Math 110.
4. Electives should include at least 3.0 units comprising 300/400 level courses from either CSC or MATH or SENG or STAT.
Combined Major: Financial Mathematics and Economics
This is a single degree program leading to a BSc in Financial Mathematics and Economics. Only a Major program is offered. Students are required to take a selected combination of courses from the Department of Mathematics and Statistics and the Department of Economics. Students may complete this program in either the Faculty of Science or the Faculty of Social Sciences. Those choosing a Science degree should consult the Faculty of Science “Requirements Common to All Bachelor’s Degrees”, page 245; those choosing a Social Science degree should consult the Faculty of Social Sciences degree requirements, (see “Requirements Common to All Bachelor’s Degrees,” page 292).

First Year
CSC 110, 115 ...................................................................................................................... 3.0
ECON 103 or 103C or 180, 104 ................................................................................ 3.0
MATH 100 or 109, 101, 122 .................................................................................... 4.5
MATH 211 ..................................................................................................................... 1.5
AWR1 and Electives3 ...................................................................................................... 3.0

Second Year
COM 240 and COM 202 or 270 .................................................................................... 3.0
ECON 2032, 204, 2251 .............................................................................................. 4.5
MATH 200, 204 .......................................................................................................... 3.0
STAT 260, 261 ............................................................................................................. 3.0
MATH 248 or elective3,4 ............................................................................................. 1.5

Third Year
ECON 305, 3131,2, 3651, 366, 4352 .............................................................................. 7.5
MATH 348, 377 .......................................................................................................... 3.0
STAT 350 ..................................................................................................................... 1.5
Electives3 ..................................................................................................................... 3.0

Fourth Year
ECON 4542 .................................................................................................................... 1.5
ECON 468 or STAT 457 ............................................................................................ 1.5
MATH 452, 477 .......................................................................................................... 3.0
STAT 450 ..................................................................................................................... 1.5
ECON 457 or elective3,4 ............................................................................................. 1.5
Electives3 ..................................................................................................................... 6.0

1. Satisfaction of the AWR (“Academic Writing Requirement” page 42) is a prerequisite for ECON 225. ECON 225 is a prerequisite for ECON 313 and a corequisite for ECON 365. Students satisfy the ECON 225 course requirement if they have passed ENGR 240.

2. A minimum grade of C in ECON 203 is the prerequisite for ECON 313. A minimum grade of B- in ECON 313 is the prerequisite for ECON 435 and 454.

3. At least 1.5 units of electives must be from ECON or MATH courses numbered 300 or above.

4. Students must complete MATH 248 or ECON 457. MATH 248 should be taken in Second Year, while ECON 457 should be taken in Fourth year.

Diploma in Secondary Teacher Education
Students enrolled in a Bachelor of Science degree in Mathematics may apply to the Faculty of Education to take the Diploma in Secondary Teacher Education concurrently. Consult an academic adviser in Mathematics or Education for information about the admission requirements and application procedures.
Visiting, Adjunct and Cross-listed Appointments

- William Ansbacher, BSc, PhD (Otago), Adjunct Professor
- Richard Baartman, MSc, PhD (SFU), Adjunct Professor
- Parminder Basran, BSc, MSc (Alberta), PhD (Calgary), Adjunct Professor
- Wayne A. Beckham, BSc, MSc (Otago), PhD (Adelaide), Adjunct Professor
- Harvey A. Buckmaster, BSc (Alberta), MA, PhD (UBC), Adjunct Professor

- John P. Blakeslee, BA (Chicago), PhD (MIT), Adjunct Associate Professor
- James Di Francesco, BSc (Toronto), PhD (Texas, Austin), Adjunct Associate Professor
- Cornelia Hoehr, BSc, MSc (Albert-Ludwigs-Universität), PhD (Ruprecht-Karls-Universität), Adjunct Associate Professor
- Andrew I. Jirasek, BSc (Calgary), MSc (Guelph), PhD (UBC), Adjunct Associate Professor
- Doug Johnstone, BA (Toronto), MSc, PhD (UC Berkeley), Adjunct Associate Professor
- J.J. Kavelaars, BSc (Guelph), MSc, PhD (Queen’s), Adjunct Associate Professor
- Shane M. Koscielniaik, BA (Cambridge), PhD (Oxford), Adjunct Associate Professor
- Christian Marois, BSc, MS, PhD (Montreal) Adjunct Associate Professor
- Brenda C. Matthews, BASc (McMaster), MSc (Calgary), PhD (McMaster), Adjunct Associate Professor
- Alan W. McConnachie, BASc, MSc (St. Andrews), PhD (Cambridge), Adjunct Associate Professor
- Ante Mestrovic, BSc (Simon Fraser), MSc, PhD (UBC), Adjunct Associate Professor
- David Morrissey, BSc (McGill), PhD (Chicago), Adjunct Associate Professor
- Christopher Ruiz, BSc, PhD (Edinburgh), Adjunct Associate Professor
- Luc Simard, BSc (Queen’s), MSc, PhD (UBC), Adjunct Associate Professor
- Erika Chin, BSc, MSc, PhD (McGill), Adjunct Assistant Professor
- Iris Dillmann, Diploma (Johannes-Gutenberg-Universität), PhD (Basel), Adjunct Assistant Professor
- Alexander Gottberg, BSc, MSc, PhD (Freie Universität), Adjunct Assistant Professor
- David Johnstone, BA (Toronto), MSc, PhD (UC Berkeley), Adjunct Associate Professor
- Michelle Hilts BA, Bsc (McMaster), Msc, PhD (UBC), Adjunct Assistant Professor
- Simon Kwiatkowski, BA (UC Berkeley), MS, PhD (Michigan State), Adjunct Assistant Professor
- Antoniu I. Popescu, Diploma (Bucharest), PhD (Kentucky), Adjunct Assistant Professor
- Katherine P. Prestridge, BS (Princeton), PhD (UC, San Diego), Adjunct Assistant Professor
- Manuel Rodriguez Vega, BSc (Honduras National University), MSc (Louisiana State), PhD (Wisconsin-Madison), Adjunct Assistant Professor
- Isabel Trigg, BSc (McGill), MSc, PhD (Montreal), Adjunct Assistant Professor
Notes on Course Requirements

1. The course sequences below are designed for a four-year program. Students who anticipate taking longer than four years should consult the undergraduate adviser. In the Co-op program, the course sequences will take longer than four years and should consult the Co-op coordinator.

2. Physics 12 and Mathematics 12 are required for entry into the Physics and Astronomy undergraduate programs. For all sequences, PHYS 120 is intended for students planning a career in Physics or Astronomy and who have attained at least a B standing in each of Physics 12 and Mathematics 12.

3. Those with less than a B standing and planning a career in Physics or Astronomy, or those planning a career in some other Physical Science (such as Chemistry or Earth and Ocean Sciences), should take PHYS 110 and 111.

4. Students planning to take Honours programs should normally also have completed Chemistry 11 and 12. Advanced placement is available for students with high standing in both Mathematics 12 and Physics 12.

5. Students should consult the timetable or the department to confirm which courses are offered in any particular term.

6. Where consent of the department is specified as a course prerequisite, this consent must be obtained from the department Chair or the Chair’s nominee.

7. “MATH breadth electives” may be chosen from MATH 301, 311, 348, 352, 369, 377, 379, 436, 442, 447, 449, 492, STAT 254, 260, 350. MATH 301 is strongly recommended for students considering graduate school.

Honours Programs: General Regulations

1. Admission to the third and fourth years of the Honours programs requires the permission of the department.

2. Admission to the Combined Honours Physics and Mathematics program requires the permission of both the Department of Physics and Astronomy and the Department of Mathematics and Statistics.

3. Admission to the Combined Honours Physics and Earth Sciences (Geophysics) Program, and the Combined Honours Physics and Ocean Sciences (Physical Oceanography) Program requires the permission of both the Department of Physics and Astronomy and the School of Earth and Ocean Sciences (SEOS).

4. Admission to the Combined Honours Physics and Computer Science Program requires the permission of both the Department of Physics and Astronomy and the Department of Computer Science.

5. Admission to the Combined Honours Physics and Biochemistry Program requires the permission of both the Department of Physics and Astronomy and the Department of Biology and Microbiology.

6. Students in the Honours programs will be required to maintain a GPA of at least 3.5.

Major Programs: General Regulations

For any Major program in the department, the course grades used in calculating the GPA on which the type of degree is based must include those for all courses (including departmental electives) numbered 300 and above that are specified by the department.

PHYS electives 3 ......................................................................................................... 6.0
Total ............................................................................................................................ 15.0

1. ASTR 150, 250, PHYS 210, CSC 349A, MATH 122 are recommended.
2. Chosen from courses listed in Note 7 in the Notes on Course Requirements in Physics and Astronomy’s Program Requirements.
3. Electives chosen from Physics and Astronomy courses (or other approved courses) numbered 300 or higher.

Major Program in Physics

Year 1
CSC 110 or 111 ........................................................................................................... 1.5
MATH 100 or 109, 101 .................................................................................................. 3.0
PHYS 120 and 130; or 110 and 111 ............................................................................... 3.0
Electives 1 ................................................................................................................... 7.5
Total ............................................................................................................................ 15.0

Year 2
MATH 200, 204, 211 .................................................................................................... 4.5
PHYS 215, 216, 229, 248 ............................................................................................ 6.0
Electives 1 ................................................................................................................... 4.5
Total ............................................................................................................................ 15.0

Year 3
MATH 342, 346 ........................................................................................................... 3.0
PHYS 317, 321A, 323, 325, 326 ............................................................................... 7.5
Electives ....................................................................................................................... 4.5
Total ............................................................................................................................ 15.0

Year 4
MATH breadth electives 2 ............................................................................................ 3.0
PHYS electives 3 ......................................................................................................... 7.5
Electives ....................................................................................................................... 4.5
Total ............................................................................................................................ 15.0

1. Three units of Chemistry are strongly recommended in this program. ASTR 150, 250, PHYS 210, CSC 349A, MATH 122 are also recommended.
2. Chosen from Physics and Astronomy courses numbered 300 or higher.

Minor Program in Physics

A student may complete a Minor in Physics by fulfilling the requirements of an Honours, Major, or General degree in another discipline together with either the requirements of the General Program in Physics or the following:

PHYS 120 and 130; or 110 and 111 ............................................................................... 3.0
PHYS 200-level or higher .......................................................................................... 4.5
PHYS 300-level or higher .......................................................................................... 4.5

The 9.0 units numbered 200 or higher cannot also be used to fulfill the requirements of a student’s Honours, Major or General program, or Option. Any course disqualified from the Minor program by such overlap may be replaced by another PHYS course at the same level or higher. Students should note that most PHYS courses have MATH pre- and corequisites. Students who believe they are appropriately prepared for a PHYS course without having completed the listed prerequisites, such as 3rd or 4th year BEng students who have completed MATH 204, may apply to the department for permission to take it. The combination PHYS 215, 317, 321A, 323, 325, 328 is recommended for students in Electrical Engineering. The combination PHYS 215, 321A, 323, 325, 326, 328 is recommended for students in Mechanical Engineering.

Astronomy Programs: Course Requirements

Honours Program in Astronomy

Year 1
ASTR 150 ................................................................................................................... 1.5
CHEM 101, 102 ........................................................................................................... 3.0
CSC 110 or 111 .......................................................................................................... 1.5
MATH 100 or 109, 101 ............................................................................................... 3.0
PHYS 120 and 130; or 110 and 111 ............................................................................... 3.0
Electives 1 ................................................................................................................... 3.0
Total ............................................................................................................................ 15.0
### Year 2

1. Electives chosen from Chemistry courses.
2. Some students may take MATH 211 and 212 in first year, and MATH 311 and 312 in second year.
3. PHYS 210, CSC 349A are recommended.
4. Electives chosen from Math courses numbered 300 or higher. These electives must be chosen in consultation with the Department of Mathematics and Statistics.
5. The courses chosen for this degree must include at least 4.5 units of MATH numbered 400 or higher.
6. Electives chosen from MATH or PHYS courses numbered 300 or higher.

### Combined Physics and Earth Sciences (Geophysics) Program Requirements

<table>
<thead>
<tr>
<th>Combined Honours in Physics and Earth Sciences (Geophysics)</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Year 1</strong></td>
</tr>
<tr>
<td>CHEM 101, 102</td>
</tr>
</tbody>
</table>
### Combined Major in Physics and Earth Sciences (Geophysics)

#### Year 1
- CSC 110 or 111 ................................................................. 1.5
- EOS 110, 120 ........................................................................ 3.0
- MATH 100 or 109, 101 ....................................................... 3.0
- PHYS 120 and 130; or 110 and 111 ..................................... 3.0
- Electives ............................................................................. 1.5
- **Total** ............................................................................... **15.0**

#### Year 2
- EOS 201, 202, 205 ............................................................ 4.5
- EOS 210 or PHYS 210 ......................................................... 1.5
- MATH 200, 204, 211 ............................................................ 4.5
- PHYS 216, 229, 248 ............................................................ 4.5
- **Total** ............................................................................... **15.0**

#### Year 3
- EOS 300 ............................................................................. 1.5
- EOS 427 or PHYS 427 or electives2,3 .................................. 1.5
- MATH 342, 346 .................................................................. 3.0
- MATH breadth electives4 ................................................... 1.5
- Electives2 ............................................................................ 1.5
- **Total** ............................................................................... **16.5**

#### Year 4
- EOS 410, 480 ................................................................. 3.0
- EOS 427 or PHYS 427 or electives2,3 .................................. 1.5
- EOS 499A, 499B; or PHYS 429A, 499 ................................ 3.0
- PHYS 323, 325, 411 ............................................................ 4.5
- PHYS 460A, 460B ............................................................... 0.0
- PHYS or EOS electives2,3,5 .................................................. 6.0
- **Total** ............................................................................... **18.0**

**Notes:**
1. CHEM 150 may be taken instead of CHEM 101.
2. In choosing these electives, it is recommended that students consider the prerequisite requirements for PHYS or EOS electives in Year 4.
3. EOS 403, 408, 416, 420, 422, 425, 427, and 433 are normally offered in alternate years. Students are advised to consult with the department to determine when these courses are offered. One of EOS 427 or PHYS 427 is required in the program, and may be taken in either third or fourth year.
4. Chosen from courses listed in Note 7 in the Notes on Course Requirements in Physics and Astronomy’s Program Requirements.
5. Chosen from EOS and PHYS courses numbered 300 and above. PHYS 460A and 460B are recommended for third- and fourth-year students.

### Combined Honours in Physics and Ocean Sciences (Ocean-Atmosphere Dynamics)

#### Year 1
- CHEM 101, 102 ............................................................... 3.0
- CSC 110 or 111 ............................................................... 1.5
- EOS 110, 120 ............................................................... 3.0
- MATH 100 or 109, 101 ....................................................... 3.0
- PHYS 120 and 130; or 110 and 111 ..................................... 3.0
- Electives ............................................................................. 1.5
- **Total** ............................................................................... **15.0**

#### Year 2
- EOS 340 ................................................................. 1.5
- MATH 200, 204, 211 ............................................................ 4.5
- PHYS 215, 216, 229, 248 ................................................... 6.0

**Notes:**
1. In choosing these electives, it is recommended that students consider the prerequisite requirements for PHYS or EOS electives in Year 4.
2. EOS 403, 408, 416, 420, 422, 425, 427, and 433 are normally offered in alternate years. Students are advised to consult with the department to determine when these courses are offered. One of EOS 427 or PHYS 427 is required in the program, and may be taken in either third or fourth year.
3. Chosen from courses listed in Note 7 in the Notes on Course Requirements in Physics and Astronomy’s Program Requirements.
4. Chosen from EOS and PHYS courses numbered 300 and above. PHYS 460A and 460B are recommended for third- and fourth-year students.
### Year 2
- Electives $^2$ .......................... 1.5
- **Total** .......................... 15.0

### Year 3
- MATH 342, 346 ........................................ 3.0
- MATH breadth electives $^2$ ........................................ 3.0
- PHYS 317, 321A, 321B, 323, 325, 326 .................. 7.5
- EOS electives $^4$ ........................................ 1.5
- PHYS electives $^5$ ........................................ 1.5
- **Total** ........................................ 16.5

### Year 4
- EOS 431, 433 $^4$ ........................................ 3.0
- PHYS 323, 411, 426 ........................................ 4.5
- PHYS or EOS electives $^4, ^5$ ........................................ 3.0
- Electives ........................................ 4.5
- **Total** ........................................ 15.0

1. CHEM 150 may be taken instead of CHEM 101.
2. EOS 210 or PHYS 210, and CSC 115, 225 and 230 are recommended.
3. Chosen from courses listed in Note 7 in the Notes on Course Requirements in Physics and Astronomy’s Program Requirements.
4. EOS 403, 408, 416, 420, 422, 425, 427, and 433 are normally offered in alternate years. Students are advised to consult with the department to determine when these courses are offered.
5. Chosen from PHYS or EOS courses numbered 300 and above. PHYS 460A and 460B are recommended for third- and fourth-year students.

### Combined Physics and Ocean Sciences (Ocean-Atmosphere Dynamics)

#### Year 1
- CHEM 101$^1$, 102 ........................................ 3.0
- CSC 110 or 111 ........................................ 1.5
- EOS 110, 120 ........................................ 3.0
- MATH 100 or 109, 101 ........................................ 3.0
- PHYS 120 and 130; or 110 and 111 .................. 7.5
- Elective ........................................ 1.5
- **Total** ........................................ 15.0

#### Year 2
- EOS 340 ........................................ 1.5
- MATH 200, 204, 211 ........................................ 4.5
- PHYS 215, 216, 229, 248 ........................................ 6.0
- Electives $^2$ ........................................ 3.0
- **Total** ........................................ 15.0

#### Year 3
- MATH 342, 346 ........................................ 3.0
- MATH breadth electives $^3$ ........................................ 3.0
- PHYS 317, 321A, 325, 326 ........................................ 6.0

#### Year 3
- Electives ........................................ 3.0
- **Total** ........................................ 15.0

#### Year 3
- EOS 431, 433 $^4$ ........................................ 3.0
- PHYS 323, 411, 426 ........................................ 4.5
- PHYS or EOS electives $^4, ^5$ ........................................ 3.0
- Electives ........................................ 4.5
- **Total** ........................................ 15.0

1. CHEM 150 may be taken instead of CHEM 101.
2. EOS 210 or PHYS 210, and CSC 115, 225 and 230 are recommended.
3. Chosen from courses listed in Note 7 in the Notes on Course Requirements in Physics and Astronomy’s Program Requirements.
4. EOS 403, 408, 416, 420, 422, 425, 427, and 433 are normally offered in alternate years. Students are advised to consult with the department to determine when these courses are offered.
5. Chosen from PHYS or EOS courses numbered 300 and above. PHYS 460A and 460B are recommended for third- and fourth-year students.
Combined Major in Physics and Computer Science

Year 1
- CSC 106; 110 or 111; 115 ................................................................. 4.5
- ENGL 135, 146, or 147 ............................................................... 1.5
- MATH 100 or 109, 101, 122 .......................................................... 4.5
- PHYS 120 and 130; or 110 and 111 ................................................ 3.0
- Electives .................................................................................. 1.5
- Total ....................................................................................... 15.0

Year 2
- CSC 225, 226, 230 ..................................................................... 4.5
- MATH 200; 201 or 204; 211 ......................................................... 4.5
- PHYS 215, 216, 229, 248 ............................................................. 6.0
- Total ....................................................................................... 15.0

Year 3
- CSC 349A, 360 ........................................................................... 3.0
- MATH 342, 346 .......................................................................... 3.0
- PHYS 317, 321A, 325, 326 .......................................................... 6.0
- SENG 265 .................................................................................. 1.5
- Elective .................................................................................... 1.5
- Total ....................................................................................... 15.0

Year 4
- CSC 320, 497 .............................................................................. 3.0
- CSC 445 or 446 ......................................................................... 1.5
- PHYS 323 .................................................................................. 1.5
- CSC electives2 .......................................................................... 3.0
- PHYS electives3 ........................................................................ 3.0
- Total ........................................................................................ 15.0

1. It is recommended that students consider the upper-level PHYS courses they wish to take when choosing the order in which to take PHYS 317, 321A, 323, 325, 326.
2. These Computer Science electives must be at the 400 level. 1.5 units may be 400 level SENG courses.
3. These Physics electives must be at the 300 or higher level. PHYS 460A and 460B are recommended for third- and fourth-year students.

Combined Major in Physics and Biochemistry

Year 1
- BIOL 186 .................................................................................... 1.5
- CHEM 101, 102 .......................................................................... 3.0
- CSC 110 or 111 .......................................................................... 1.5
- Total ....................................................................................... 15.0

1. It is recommended that students consider the upper-level PHYS courses they wish to take when choosing the order in which to take PHYS 317, 321A, 323, 325, 326.
2. These Computer Science electives must be at the 400 level. 1.5 units may be 400 level SENG courses.
3. These Physics electives must be at the 300 or higher level. PHYS 460A and 460B are recommended for third- and fourth-year students.

Combined Physics and Biochemistry Program Requirements

Combined Honours in Physics and Biochemistry

Year 1
- BIOL 186 .................................................................................... 1.5
- CHEM 101, 102 .......................................................................... 3.0
- CSC 110 or 111 .......................................................................... 1.5
- Total ....................................................................................... 15.0
PHYSICS AND ASTRONOMY CO-OPERATIVE EDUCATION PROGRAM

The Physics and Astronomy Co-operative Education Program is a year-round program which includes, in addition to the normal Major or Honours academic program for the BSc, employment in jobs related to Physics or Astronomy in industry or government for at least four scheduled Work Terms interspersed between academic terms. This employment is related as closely as possible to the student’s course of studies and individual interest. See “Co-operative Education Programs” for the Faculty of Science (page 247). See also the general regulations pertaining to “Undergraduate Co-operative Education Programs” found on page 247.

A student may, at any time during an academic term, transfer from the Physics and Astronomy Co-operative Education Program to a regular Physics and Astronomy program.

Applications and further information concerning the Co-operative Education Program in Physics and Astronomy may be obtained from the department or at <www.uvic.ca/physcoop>.

**Co-op Program Requirements**

To qualify for entry to the Physics and Astronomy Co-op Program, a student must have satisfied the Academic Writing Requirement, be enrolled full time, be proceeding to an Honours or Major degree in the department of Physics and Astronomy, have at least a 4.5 GPA and have at least a B- in each Physics or Astronomy course taken. To remain in the program, a student must be enrolled full time and maintain an average of at least 3.5. A minimum of four Work Terms is required to graduate with Co-op designation. Successfully completed Work Terms will be recorded on the student’s record and transcript. "Work Term Credit By Challenge" (page 64), is permitted in the Physics and Astronomy Co-op Program.

Honours students in the Co-operative Education Program are normally required to obtain credit for at least 7.5 units in each academic term, or 15 units in two successive academic terms which may be separated by a Work Term. The ninth academic term is not subject to this requirement.

Students who are taking double or combined Major degrees programs, who wish to participate in a combined Co-op program, should refer to the regulations for the Faculty of Science “Co-operative Education Programs” found on page 247.

1. The Academic Writing Requirement must be fulfilled. At least one of ENGL 135, 146, 147 is recommended for all students.
2. BIOC 102, BIOC 230, MICR 200B, BCMB 301B, BIOL 360 and 361 are suggested electives for students intending to focus in Biochemistry.
3. PHYS 229, 248, 314, 317, 325, and MATH 346 are suggested electives for students intending to focus in Physics.
4. Electives chosen from Physics and Astronomy courses (or other approved courses) numbered 300 or higher. PHYS 432 is strongly recommended.
