LOW IMPEDANCE, GAIN = 70

Programmable Spectral Processor Model 296 - bottom right mislabelled
PROGRAMMED SPECTRUM TRANSFER
Newer versions of the 200-series show the correct panel labelling in the bottom-right corner of Model 296. The Uvic Buchla Manual (Section 5.5.4 on p. 25 of the D. Schaefer 1981 User Guide) addresses this issue and details how the controls actually work.
