

RECENT PUBLICATIONS OF J. PHILLIPS: 1990-2016

- [1] J. Phillips, K-Theory Relative to a Semifinite Factor, *Indiana Univ. Math. J.*, 39 (1990), 339-354.
- [2] J. Phillips and I. Raeburn, Voiculescu's Double Commutant Theorem and the Cohomology of C^* -algebras, *Proc. Amer. Math. Soc.*, 112 (1991), 139-142.
- [3] A. Carey and J. Phillips, Algebras Almost Commuting with Clifford Algebras in a Semifinite Factor, *K-Theory* 4 (1991), 445-478.
- [4] W. Pfaffenberger and J. Phillips, Commutative Gelfand Theory for Real Banach Algebras: Representations as Sections of Bundles, *Canad. J. Math.* 35 (1992), 1-15.
- [5] J. Phillips and I. Raeburn, Semigroups of Isometries, Toeplitz Algebras and Twisted Crossed Products, *J. Integral Eqns. and Operator Theory*, 17 (1993), 579-602.
- [6] J. Phillips and I. Raeburn, An Index Theorem for Toeplitz Operators with Noncommutative Symbol Space, *J. Functional Analysis*, 120 (1994), 239-263.
- [7] J. Phillips, Self-Adjoint Fredholm Operators and Spectral Flow, *Canad. Math. Bull.* 39 (1996), 460-467.
- [8] J. Phillips, Spectral Flow in Type I and II Factors-A New Approach, *Fields Institute Communications*, 17 (1997), 137-153 (invited paper).
- [9] A. Carey, T. Coulhon, J. Phillips, V. Mathai, Von Neumann Spectra Near the Spectral Gap, *Bull. Math. Sci., France* 122(3) (1998), 1-40.
- [10] A. Carey and J. Phillips, Unbounded Fredholm Modules and Spectral Flow, *Canad. J. Math.* Vol 50(4) (1998), 673-718 (invited paper).
- [11] A. Carey, J. Phillips, F. Sukochev, On Unbounded p -Summable Fredholm Modules, *Advances in Math.*, 151 (2000), 140-163.
- [12] A. Carey, J. Phillips, F. Sukochev, Spectral Flow and Dixmier Traces, *Advances in Math.*, 173 (2003), 68-113.
- [13] A. Carey and J. Phillips, Spectral Flow in θ -summable Fredholm Modules, Eta Invariants and the JLO Cocycle, *K Theory*, 31 (2004), 135-194.
- [14] A. Carey, J. Phillips, A. Rennie, F. Sukochev, The Hochschild Class of the Chern Character for Semifinite Spectral Triples, *J. Functional Analysis*, 213(1), (2004), 111-153.
- [15] B. Booss-Bavnbek, M. Lesch, J. Phillips, Unbounded Fredholm Operators and Spectral Flow, *Canad. J. Math.* Vol 57(2), (2005), 225-250.
- [16] A. Carey, J. Phillips, A. Rennie, F. Sukochev, The Local Index Formula in Semifinite von Neumann Algebras I: Spectral Flow, *Advances in Math.*, 202 (2006), 451-516.
- [17] A. Carey, J. Phillips, A. Rennie, F. Sukochev, The Local Index Formula in Semifinite von Neumann Algebras II: The Even Case, *Advances in Math.*, 202 (2006), 517-554.
- [18] M.-T. Benaneur, A. Carey, J. Phillips, A. Rennie, F. Sukochev, K. P. Wojciechowski, An Analytic Approach to Spectral Flow in von Neumann Algebras, *Proceedings of a Conference in Honour of K. P. Wojciechowski, 50 years-Analysis and Geometry of Boundary Value Problems*, in Analysis, Geometry and Topology of Elliptic Operators, World Scientific (2006), 297-352.
- [19] A. Carey, J. Phillips, A. Rennie, F. Sukochev, The Chern Character of Semifinite Spectral Triples, *J. Noncomm. Geometry*, 2 (2008), 141-193.

- [20] A. Carey, J. Phillips, A. Rennie, “A Noncommutative Atiyah-Patodi-Singer Index Theorem in KK-Theory”, *J. reine angew. Math.*, 643(2010), 59-109 (Crelle’s Journal).
- [21] A. Carey, J. Phillips, A. Rennie, “Twisted Cyclic Theory and an Index Theorem for the Gauge Invariant KMS state on Cuntz Algebras”, *K Theory* 6, (2010), 339-380.
- [22] A. Carey, J. Phillips, I.F. Putnam, A. Rennie, “Families of Type III KMS States on a Class of C^* – algebras Containing O_n and $\mathcal{Q}_{\mathbf{N}}$ ”, *J. Functional Analysis* 260, (2011), 1637-1681.
- [23] A. Carey, J. Phillips, I.F. Putnam, A. Rennie, “Type III KMS States on a Class of C^* – algebras Containing O_n and $\mathcal{Q}_{\mathbf{N}}$ and their modular index”, *Perspectives on Noncommutative Geometry*, M. Khalkhali and G. Yu, editors, *Fields Institute Communications* 61, (2011), 29-40.
- [24] A Carey, V. Gayral, J. Phillips, A. Rennie, F. Sukochev, “Spectral Flow for Nonunital Spectral Triples” *Canad. J. Math.* Vol 67(4), 2015, 759-794.
- [25] J. Phillips and I. Raeburn, “Centre-valued Index for Toeplitz Operators with Noncommuting Symbols” *Canad. J. Math.* 54 pages, to appear 2015, Online First.
